The decline in quarterly earnings as compared to the prior year's quarter resulted from a number of non-recurring factors affecting non-interest income. These factors include the reduction of income from real estate operations to $450,000 from $2.9 million in the prior year quarter. Income from real estate operations in the prior year quarter included a $2.5 million gain on the sale of a shopping center held for investment. Additionally, included in the current quarter's total non-interest income are $1.8 million of losses recognized on investment securities which were partially offset by a $946,000 gain on the sale of the bank's credit card portfolio.

Included in the loss on investment securities is the establishment of a $1 million loss reserve on the bank's $2 million investment in a senior debt security of Lomas Financial Corp. (NYSE: LFC), which is in Chapter 11 bankruptcy, and additional write-downs of investment and mortgage derivative securities. The bank felt a reserve on the Lomas security was warranted based on the continued deterioration in Lomas' financial condition. Mid America's asset quality continues to be very good, however as the ratio of non-performing assets to total assets was less than 1

percent as of March 31, 1990, which compares favorably with current industry levels.

Mid America Federal Savings Bank is a federally chartered stock savings bank. The bank operates a network of 13 retail banking offices primarily in the western suburbs of Chicago. The stock of MAF Bancorp, Inc., the holding company of Mid America Federal Savings Bank, is quoted on the NASDAQ National Market System under the symbol MAFB.

WASHINGTON (APRIL 20) PR NEWSWIRE - The Office of Thrift Supervision (OTS) today placed Heritage Savings & Loan Association, Lamar, Colo., in receivership and chartered a new federal mutual institution to take its place.

The new institution, Heritage Federal Savings Association, will assume certain assets and liabilities of the old thrift, and will operate in conservatorship under the oversight of the Resolution Trust Corp.

The receivership did not result in any interruption of Heritage's day-to-day operations. The institution and both of its branches will remain open for business as usual. Holders of insured accounts are not affected by the action, which was taken by OTS to protect insured depositors and the interests of the thrift insurance fund. Deposits remain insured to the $100,000 legal limit.

OTS initiated the action because Heritage was operating in an unsafe and unsound condition and has suffered losses that have depleted all or nearly all of its capital, with no prospect of replenishment without federal assistance.

Heritage's condition is due primarily to poor underwriting, a declining local economy, and investment in overvalued real estate outside the institution's market area.

As of Dec. 31, 1989, Heritage reported assets of $48.8 million, liabilities of $50.7 million and tangible capital of negative $1.9 million for a tangible capital-to-assets ratio of negative 4 percent.

CONTACT: Cindy Williams, 913-233-5313, or Tom Mason, 202-906-6677, both for the Office of Thrift Supervision.

#90110p5642 04/20/1990 ~PR Newswire
NEW YORK (APRIL 20) PR NEWSWIRE - West Point-Pepperell Inc. (NYSE: WPM) today reported sales and operating earnings for the nine months ended Dec. 31, 1989. Net sales were $962.1 million and earnings from continuing operations were $12.4 million ($.42 per share). The results for the nine months ended Dec. 31, 1989 have been adjusted to reflect the effects of the acquisition of the company by affiliates of Farley Inc.

The company has recently changed its year end from a fiscal period ended the last Saturday in September to a calendar year ended Dec. 31. As a result, no information for the comparable period of 1988 exists. Data for the six months ended Mar. 25, 1989 and the 12 months ended Sept. 24, 1988 is presented for informational purposes only.

In the nine months ended Dec. 31, 1989, the company recorded a charge of $450 million ($15.24 per share) after an income tax benefit of $69 million related to the writedown of net assets of businesses to be sold. This writedown was required because the decline in the market for high-yield securities, combined with disappointing operating results at certain businesses to be divested, have reduced the proceeds received from divestitures completed and the proceeds anticipated to be received from planned divestitures to levels substantially below those projected at the time of the acquisition.

West Point-Pepperell is the nation's leading domestic producer in the bed linen market and is one of the top two domestic producers in the bath towel market. Products are marketed under such leading designer names and trademarks as MARTEX (R), UTICA (R), TASTEMAKER (R), RALPH LAUREN (R), VELLUX(R) and LADY PEPPERELL (R).

PANAMA CITY, PANAMA (APRIL 20) UPI - Rescue crews found the wreckage of a twin-engine plane that crashed into the Pacific Ocean on its way to Panama City, presumably killing 20 of the 22 people on board, authorities said.

Civil Aviation President Jaime Fabrega said divers found the Twin Otter plane Thursday afternoon a mile from the tourist resort island of Contadora and began extracting bodies from the wreckage.

Two survivors from the Wednesday morning crash of Aeroperlas Flight 451 were recovering in a Panama City hospital. No other survivors have been found, and authorities said they believe the 20 other passengers and crew members on board the plane perished.

Four of those on the plane were U.S. citizens, three were French, one was Swiss and 14 were Panamanians, the airline said.

Aeroperlas issued a statement identifying the Americans as Anita Heck, Carl Heck, Lisa Langlow and Richard Poux. Poux, 33, is a resident of Tacoma, Wash., and Langlow, 34, is of Fox Island, Wash., friends and relatives said. The hometown of the Hecks was not immediately available.

Germinal Sarasqueta, chief of security for Panama's Civil Aviation Directorate, said the aircraft crashed at 11:05 a.m. a few minutes after leaving Contadora, a popular tourist resort 75 miles south of Panama City.

The plane, a DHC6 Twin Otter rented from a U.S. company for a month, ran into a flock of birds that hit the right engine, the Aeroperlas statement said. The name of the U.S. firm was not immediately known.

Darkness forced the U.S. Air Force to suspend its search until Thursday for the missing 20 people, all of whom were presumed dead.

Surviving passengers Frederick Pirot Jr., 12, of France, and Anne Juri, 40 of Switzerland, were taken to Paitilla Medical Center in Panama City, the

statement said.

Eduardo Sousa Lennox, a doctor at the hospital, said Juri told him she was two seats from the door when the plane nose dived into the water. Juri and Pirot escaped through the hatch when the door came off and were picked up by a Panamanian helicopter, Souza said.

Juri told Souza the accident occured about two minutes after takeoff. She said she saw the pilot and copilot trying to level the aircraft, and smoke coming out of one of the engines.

The plane then tipped toward the side of the burning engine and ditched into the sea, Souza said.

Authorities identified the pilot as Panamanian Roberto L. Deville and the copilot as Panamanian Alvaro Berroa.

Souza said Juri suffered strained muscles in her back and would be released from the hospital within three days. He declined to comment on the French boy's condition.

Raul Arias Espinosa, the director of Aeroperlas, said 10 of the passengers were employees of the Hotel Contadora on the island.

(APRIL 20) UPI - Moscow increased the pressure on Lithuania Thursday by cutting natural gas supplies to the Baltic republic. But Lithuanian leaders are NOT backing down and say they will endure any hardship to gain independence. Lithuanian leaders met to draw up plans for conservation and rationing of the small amount of fuel reserves the republic has left.

President Bush and French President Mitterrand met in Key Largo, Florida, Thursday and Lithuania dominated their talks. Both leaders expressed concern regarding the situation and called on President Gorbachev to end the crisis through peaceful dialogue.

The pro-Iranian Islamic Jihad has delayed the release of one American hostage because Washington is refusing to send Assistant Secretary of State John Kelly to Syria. The group said Wednesday it was ready to release a hostage within 48 hours if Kelly arrived in Damascus by the deadline. President Bush says he woN'T give in to terrorist demands.

Mexican President Carlos Salinas de Gortari opened a two-day drug meeting of attorney generals from 25 nations in Ixtapa, Mexico, Thursday. In what appeared to be a direct warning to Washington, Salinas said Mexico would NOT tolerate violations of the law, even in the fight against drugs.

#90110u0190 04/20/1990 ~United Press International
BONN, WEST GERMANY (APRIL 20) UPI - A $6.5 million rock extravaganza featuring top international stars will be held this summer at the Berlin Wall as a ''memorial for all war dead,'' former Pink Floyd band leader Roger Waters said.

''It will be a big show,'' the British-born rock star said Thursday.

Organizers say some of the world's best-known rock performers, a cast of 300 extras, choirs and a symphony orchestra would appear in the perfomance of ''The Wall,'' the brainchild of Waters, who first recorded the chart-buster with Pink Floyd in 1979.

''It will probably be the biggest rock extravaganza ever,'' said Jody Miller, one of the organizers. She said the names of the performers would only be announced once negotiations were completed.

''A 600-foot-long, 60-foot-high wall will be used in the show,'' Waters

said.

''We hope to get the Berlin Philharmonic or a Polish or East German orchestra. The Red Army Choir has confirmed that they will take part,'' he said.

He said the head of one of the puppets in the show ''will be as big as a London double-decker bus.''

In a telephone interview from Berlin, where he is rehearsing for the July 21 benefit show, the 46-year-old rock star said the proceeds of the performance will go to the Memorial Fund for Disaster Relief.

''I hope it will encourage governments to cooperate with each other in the face of natural and unnatural disasters,'' he said.

''The show will resemble the 1980 production,'' Waters said. ''The same animation will be used, although the size of the site means the show will be much bigger, since it's outdoors.''

The extravaganza will be set at Potsdamer Platz, on the former no man's land along the Berlin Wall long known as the ''death strip.''

Organizers say they expect at least 200,000 will attend the show. They said the performance would be televised worldwide.

Waters, who quit the Pink Floyd band in 1984, said last year he would consider staging ''The Wall'' if the Berlin Wall was torn down.

''I was approached by Leonard Cheshire and I believe, as he does, in the cause,'' he said.

Cheshire, the most decorated British Royal Air Force bomber pilot, heads the Memorial Fund for Disaster Relief.

''It is our hope that in years to come, national armies will do less hurting to each other. It would be good to harness power for positive use '' Waters said.

Asked if he expected the Berlin Wall to ever come down when he composed ''The Wall,'' Waters said, ''No, I didn't think it would get better. I thought it would get worse. I am amazed and pleased by the speed at which the whole thing has happened.''

#90110u0293 04/20/1990 ~United Press International

(APRIL 20) UPI - Rod Thorn clear Friday's schedule, you've got your hands full.

In a game the will surely be closely reviewed by Thorn, the NBA's Vice President of Operations, for the brawl that spilled into the stands, the Philadelphia 76ers defeated the Detroit Pistons Thursday night 107-97.

Almost overshadowed by the melee was the fact Philadelphia clinched its first Atlantic Division title since its NBA championship season of 1982-83.

Philadelphia forward Charles Barkley and Detroit center Bill Laimbeer exhanged punches and were ejected from the game with 14 seconds left in Thursday night's 107-97 76ers' victory over the Pistons.

Detroit guard Isiah Thomas was also ejected with 3:40 left for throwing a punch at former Piston Rick Mahorn.

''It started,'' referee Jake O'Donnell said, ''when Laimbeer put the ball in Mahorn's face. Laimbeer, Barkley and (Detroit reserve forward Scott) Hastings were all ejected for throwing punches.

''I clearly saw Hastings sucker-punch Barkley. Every player on both benches will be fined. Otherwise (meaning possible suspensions), they'll review the tapes.''

The incident began when Mahorn made a driving layup with 14 seconds to go and was fouled by Dennis Rodman. Laimbeer flipped the ball in Mahorn's face and Barkley made a run at Laimbeer.

''Laimbeer came at me. I was just protecting myself,'' Barkley said.

Afer calm prevailed, the fracas renewed on the way off the floor near the 76ers bench. Then a fan taunted Barkley, who, unable to reach him, leaped up and spat in the fan's face.

''I think they have a bunch of big mouths,'' said Laimbeer, fined $750 for his part in a late-game fracas last weekend that cost Orlando's Jerry Reynolds $3,500.

''It was very cheap what they tried to do,'' Barkley said. ''But there was no way we were going to get out of here without a win. He (Laimbeer) had a shot at the title - and he lost. I got in 3-4 good punches.''

Philadelphia held Detroit off for the third time in four meetings this season and prevented the Pistons from reaching 60 victories this season. Detroit has a 57-23 record with two games remaining.

Philadelphia got 16 points from Gminski and 16 from Johnny Dawkins plus from from Anderson.

Detroit was led by Edwards with 24 points, Mark Aguirre's 15, 14 by Vinnie Johnson and 13 by Thomas.

-- AROUND THE NBA --

In other games, Dallas dumped Charlotte 111-102, Milwaukee nipped New York 96-95, Chicago stopped Washington 120-117, Denver nipped Houston 130-127 in overtime, Seattle outran Sacramento 130-118, and the LA Lakers downed Minnesota 113-89.

Mavericks 111, Hornets 102

At Charlotte, Rolando Blackman scored 21 points, including 12 in the third quarter as Dallas Mavericks clinched the sixth spot in the Western Conference playoffs. The Mavericks, who will face the Portland Trail Blazers in the first round of the playoffs.

Bucks 96, Knicks 95

At Milwaukee, Jack Sikma sank two free throws with 32 seconds left and Jay Humphries tied a season-high with 29 points, leading the Bucks. Eddie Lee Wilkins sank a 10-foot baseline jumper but the referees disallowed the basket.

Bulls 120, Bullets 117

At Chicago, Michael Jordan's steal and layup with 2.4 seconds left iced the victory, clinching the homecourt advantage for the Bulls for at least the first two rounds of the playoffs. The win was the 55th of the season for the Bulls, their second-highest total in franchise history.

Nuggets 130, Rockets 127, OT

At Houston, Seven Nuggets scored in double figures to offset Akeem Olajuwon's career-high 52-point performance. Lafayette Lever's three-pointer tied the game with 4.9 seconds left, forcing the extra session. Floyd added 28 points for the Rockets and Olajuwon pulled down a game-high 18 rebounds. Lever led the Nuggets with 22 and Michael Adams had 21. The loss dropped the Rockets into a tie with Seattle for the last Western Conference playoff spot.

SuperSonics 130, Kings 118, OT

At Sacramento, Calif., Dale Ellis scored a game-high 43 points including seven three-pointers and Derek McKey and Sedale Threatt each scored seven points in overtime for Seattle. Xavier McDaniel added 26 points and Threatt 20 points and a game-high 12 assists for Seattle. Pervis Ellison scored a season-high 25 points and grabbed 11 rebounds for Sacramento,

which has lost five straight.

Lakers 113, Timberwolves 89

At Inglewood, Calif., Orlando Woolridge scored 23 points and the Lakers won their 62nd game of the season, the third most in franchise history. Michael Cooper scored 14 points and handed out a season-high 12 assists. Former Laker Tony Campbell led the Timberwolves with 25 points. Laker guard Byron Scott suffered a sprained ankle in the second half, and is doubtful for the final two regular season games.

#90110u0330 04/20/1990 ~United Press International

(APRIL 20) UPI - The pro-Iranian group holding three Americans hostage in Lebanon says the promised release of one hostage is being delayed by Washington's refusal to send Assistant Secretary of State John Kelly to Syria. The Islamic Jihad released a communique Thursday to a Beirut newspaper saying Washington had ''stumbled the process.'' Secretary of State Baker has said Kelly is traveling in Europe and ''the Middle East is NOT on his agenda.''

Health officials at the national Centers for Disease Control in Atlanta say Americans are drinking less alcohol but using more cocaine. The C-D-C says alcohol consumption is down by four percent over the past 10 years. But cocaine use has nearly doubled since 1985. A C-D-C report says cocaine use among adolescents is of particular concern because adult substance abuse is related to how old the person was when they first experienced drugs.

A RAND corporation study says Congress should spend more money on enforcing immigration laws if they are to work at all. The report says economic sanctions levied against employers who hire illegal aliens has NOT stemmed the flow of immigrants slipping into the United States. The purpose of the study was to examine the effects of the employer-sanction provisions of the Immigration Reform and Control Act of 1986.

#90110u0340 04/20/1990 ~United Press International

(APRIL 20) UPI - The only run the Cleveland Indians scored in nearly three games was just enough to do the trick.

Tom Brookens tripled and scored the only run of the game on a passed ball in the sixth inning Thursday night to lift the Indians to a 1-0 victory over the New York Yankees.

Brookens, who scampered home on a passed ball by catcher Rick Cerone, helped Cleveland snap a 21-inning scoreless streak. By failing to add another run, the Indians have tallied only once in their last 24 innings.

Greg Swindell, who entered the game with an 18.00 earned run average after giving up five runs in two innings in his first start of the year last week, allowed three hits, struck out five and walked one in 6 1-3 scoreless innings to even his record at 1-1.

''I had something to prove to myself,'' said Swindell, whose last win was July 20. ''It's been a long time since I won a game and it feels real good. Today really helped my confidence and brought me a long way.''

New York starter and loser Pascual Perez, 1-1, pitched six innings, striking out five and walking one while giving up four hits and the unearned run.

The crucial run scored when Cerone couldn't handle Perez' sinker.

''It got away from me and kind of ticked off my glove,'' the veteran catcher said. ''It kind of cut a little bit.''

Left-fielder Dave Winfield had a chance to catch Brookens' ball, but ran into the fence just when he got his glove on the ball.

''I was right with it, then bang-bang,'' Winfield said. ''It happens when it's not your park.''

The game, which was a makeup of the rained out April 10 game, attracted only 6,000 fans, the lowest home opening crowd in Cleveland history.

Elsewhere in the American League, Baltimore bounced Detroit 4-2, Milwaukee trashed Texas 11-0, and Oakland downed Seattle 5-2.

In the National League it was: New York 4, Chicago 1; Montreal 5, Philadelphia 0; Pittsburgh 5, St. Louis 1; and Los Angeles 7, Houston 3.

-- AROUND THE AL --

Orioles 4, Tigers 2

At Baltimore, Craig Worthington and Bill Ripken singled in runs in the third inning and four Detroit pitchers walked eight batters. Dave Johnson, 2-0, stranded eight runners through six innings and scattered seven hits for his second win over the Tigers. Gregg Olson pitched the ninth for his fourth save. Kevin Ritz, 0-3, took the loss for Detroit.

Brewers 11, Rangers 0

At Arlington, Chris Bosio allowed four hits in going the distance and benefited from a 13-hit Milwaukee attack featuring home runs by Greg Vaughn and B.J. Surhoff. Bosio, 1-0, who became the first AL pitcher to hurl complete a game this season, walked one and struck out five. Bobby Witt, 0-2, allowed seven hits and five runs over four innings for the loss.

Athletics 5, Mariners 2

At Oakland, Calif., Dave Stewart scattered five hits over seven innings to notch his 17th straight April decision and the A's won their seventh straight. Stewart, 3-0, allowed one earned run, walking two and striking out two. He has never lost to the Mariners as a member of the A's, winning 13 in a row. Gary Eave, 0-2, took the loss, lasting just 2 2-3 innings.

#90110u0359 04/20/1990 ~United Press International

(APRIL 20) UPI - The Berlin Wall will be the site of a huge rock concert this summer. Organizers say the event will feature top international stars a cast of 300 extras, choirs and a symphony orchestra in a performance of ''The Wall''- a chartbuster recorded by rock band Pink Floyd in 1979. Former Pink Floyd band leader Roger Waters says the concert will be a ''memorial for all war dead.''

A St. Louis Circuit Court jury has awarded 27-thousanddollars to a woman who was bitten on the buttocks by a law student in 1987 as part of a

barroom prank known as ''land-sharking.'' Maia Brodie, now an attorney, says she's happy with the trial outcome. She says she suffered humiliation and embarrassment as a result of the incident. Brodie adds the trial shows- in her words- ''that women can't be assaulted like that... and men caN'T get away with it.''

A spokesman at the Burnet Park Zoo in Syracuse, New York, says a pregnant Asian elephant is about to deliver and a birthing team is on hand, ready to help with the blessed event. Jim Aiello says Babe went into labor Wednesday night, but adds elephants can take five days to deliver. Asian elephants are endangered and at 36 years old, Babe would be the oldest ever to give birth in captivity. The pachyderm weighs in at 77-hundred pounds and is 22 months pregnant.

-30- 1487

#90110u0365 04/20/1990 ~United Press International

(APRIL 20) UPI - Von Hayes thinks he saw more than a routine fastball on his first trip to the plate Thursday night.

Hayes, facing Montreal's Dennis Martinez, noticed that the ball was discolored.

''I called for the ball in the first inning because you could see tobacco juice on the ball,'' said Hayes, who was later ejected from the game for arguing a third strike. ''It makes the ball darker. (Philadelphia Manager) Nick (Leyva) complained to the umpire too but he just put the ball in his pocket and didn't issue a warning or anything.''

Martinez, 2-0, didn't give the Phillies anything to hit either, hurling a two-hitter. He was perfect through six innings and had a no-hitter into the eighth as he mixed his pitches up effectively to keep the Phillies off balance.

''I stayed with my fastball and my curve but my fastball had good location and that made my breaking ball even better,'' said Martinez, who struck out seven and walked one. ''I was really hitting the spots I wanted and the ball was sinking.''

Von Hayes, however, saw something else.

''Martinez is tough enough without doctoring the ball,'' said Hayes. ''If you catch a guy doing something, something should be done and nothing was done about it.''

''That's OK when they're thinking that way,'' said Martinez, who notched the 17th shutout of his career. ''I really admire Von Hayes. He's a good player and a great hitter. But as a pitcher, you want them to think that

way.

''I just try to do what I've been doing my whole career and there's nothing wrong,'' said Martinez. ''I rub the ball and every time the umpire checks the ball, it's OK. But if they want to think that, that's OK.''

Martinez, didn't allow a hit, or even reach a three-ball count, in the first six innings. In the seventh, Len Dykstra fouled out six pitches before walking to break up the perfect game.

Then Darren Daulton doubled over the head of center fielder Marquis Grissom in the eighth, erasing the no-hitter. The Phillies added their second hit in the ninth when Tommy Herr singled sharply to right, but Martinez got Sil Campusano to pop out and struck out Carmelo Martinez to end the game in registering his first shutout and first complete game of the season.

''He pitched well,'' Montreal Manager Buck Rodgers said. ''He stayed ahead of the hitters. He had good stuff. When you pitch a two-hit shutout, you have to have something going for you and he had everything going for him tonight.''

In other NL games, New York defeated Chicago 4-1, Pittsburgh beat St. Louis 5-1, and Los Angeles upset Houston 7-3.

In AL games, Baltimore 4, Detroit 2; Cleveland 1, New York 0; Milwaukee 11 Texas 0; and Oakland 5, Seattle 2.

-- AROUND THE NL --

Mets 4, Cubs 1

At New York, Howard Johnson doubled home two runs in the fifth inning and Dwight Gooden extended his mastery over Chicago, helping New York salvage the finale of a three-game series against the Cubs. John Franco hurled two innings for his third save. Mike Harkey, 1-1, took the loss.

Pirates 5, Cardinals 1

At St. Louis, Doug Drabek allowed three hits over eight innings and Barry Bonds belted a two-run homer, lifting Pittsburgh to a victory over St. Louis. Drabek, 2-1, struck out five and walked two. Ted Power pitched the ninth for his first save. St. Louis starter Joe Magrane, 0-2, extended his personal losing streak to four games, dating back to last year. Magrane led all NL left-handers in victories last year with 18, but went winless with two losses in six September outings.

Dodgers 7, Astros 3

At Los Angeles, Hubie Brooks belted a three-run homer and Kal Daniels added three hits and three RBI as Los Angeles Dodgers ripped Mike Scott, 0-1, in a triumph over Houston. Orel Hershiser, 1-0, scattered nine hits, walked none and struck out six in seven innings for the victory. The right-hander is 9-1 lifetime against the Astros at Dodger Stadium with a 2.02 ERA.

#90110u0459 04/20/1990 ~United Press International

BEIJING (APRIL 20) UPI - China has more than 120 ''labor education'' camps nationwide where inmates are reformed through political indoctrination for periods of up to three years, the official Chinese press reported.

Under Chinese law, police have the authority to send people accused of disturbing the peace, ''fabricating rumors,'' hindering government officials from performing their duties and other minor offenses to ''labor education'' camps for up to three years.

The state-run Legal Daily newspaper said Thursday Justice Ministry officials disclosed at a recent meeting that China has developed more than 120 of the punitive camps since the system was introduced in the early 1980s.

Labor education camp inmates are sentenced by police without a court ruling, while ''reform through labor'' camps are reserved for offenders sentenced by criminal courts.

The article did not specify how many people are serving time in labor education camps, but said that 98 percent of the camps' inmates are undergoing political study.

According to an article in the official press last October, about 2 million Chinese have been sent to such camps over the past decade.

''Political, cultural and technological education have made many people in labor education camps cast off their ignorance, widen their field of vision, and change their spiritual aspect,'' the report said.

''Last year, more than 6,900 labor education camp inmates received various certificates for completing courses,'' it said.

The escape rate at labor education camps in 1989 was ''the lowest level in history,'' the report added.

HONG KONG (APRIL 20) UPI - While many nations were preparing for Earth Day observances this weekend, organizers of an environmental conference in Hong Kong said they might have to cancel their event next month because of a lack of interest.

Worldwide calls for a cleaner, greener Earth have gone largely unheeded in the British colony, where an emphasis on company profits has generally taken precedence over environmental concerns.

The Institute for International Research said a May 30 seminar on Hong Kong's chronic pollution problem, featuring a speech by renowned botanist David Bellamy, had attracted only 17 local delegates.

''It's rather pointless to bring (Bellamy) out from London to speak to such a small crowd,'' said conference organizer Clair Carvill. ''If we don't get more delegates by next week, we'll have to cancel the conference.

''We've done this kind of thing in other countries and had real good turnouts. There just is not a great deal of concern for the environment shown in Hong Kong.''

The words hong kong mean fragrant harbor in Chinese, yet the colony's trash-strewn waters into which factories spew raw sewage and toxic chemicals have little to merit the name.

Hong Kong pumps 64 percent of its municipal and industrial waste directly into the South China Sea with no prior treatment, according to the Environmental Protection Department.

Water pollution levels have forced the government during the colony's steamy summers to occasionally close beaches where feces and other pollutants were washing ashore.

''Very much people seem to concentrate on making large amounts of money and not worring too much about how they go about it,'' said David Melville a conservation officer with World Wide Fund For Nature.

''Some of Hong Kong's big companies have started to show a little interest in the environment, but many people feel that is just window dressing,'' he said. ''Environmental awareness here is getting to the stage that it was at in Britain about 16 years ago.''

The government in June released a draft bill on cleaning up the environment. But the effort gained little interest from the public and even less from Hong Kong businesses.

The Environmental Protection Department recently fought with the colony's major industrialists in order to tighten restrictions on sulfur dioxide fumes, which factories release when burning fuel with a high sulfur content.

Under the new regulations, which take effect July 1, Hong Kong factories must burn fuel containing no more than .5 percent sulfur - instead of the cheaper grade of 2.5 percent sulfur oil most of them now burn.

''Hong Kong has a very serious problem with sulfur dioxide emissions,'' said Robert Law, assistant director for the Environment Protection Department. ''We have huge industrial sites surrounded by low-rise housing where you can see metal railings being corroded away by the fumes.''

A government study showed some 2 million of Hong Kong's 5.8 million people are regularly exposed to ''unacceptable'' levels of sulfur dioxide and nitrogen dioxide.

#90110u0501 04/20/1990 ~United Press International

HANOI, VIETNAM (APRIL 20) UPI - Vietnam is unconcerned about rumors of possible anti-government demonstrations in Ho Chi Minh City during April 30 celebrations to mark the communist victory in the south, officials said.

Vietnamese officials in Bangkok, however, said that visas for journalists hoping to visit Vietnam for the anniversary were being sharply restricted.

Officials declined to explain the restrictions except to say that there already were ''too many foreign reporters'' in Vietnam.

Ho The Lan, spokeswoman for the ministry of foreign affairs, said Thursday that the government discounted unofficial reports of plans by unspecified opposition groups for anti-government disturbances to coincide with celebrations of the 15th anniversary of the fall of the U.S.-backed South Vietnamese government.

She denied press reports suggesting Vietnamese leaders were concerned by the rumors and had stepped up security in Ho Chi Minh City, formerly known as Saigon.

''There is nothing we should be worried about. If we had anything to be concerned about, we would not allow foreign correspondents to work here so freely,'' she said.

Lan said there will be mass rallies in Hanoi and Ho Chi Minh organized by the government and the party to commemorate the victory, she said.

Rumors of protests have been circulating in Hanoi for more than a week and were fueled by an editorial in Monday's Nhan Dan, the official Communist Party newspaper.

The paper said the government, and the army if necessary, would quell any attempt to disrupt public order and security.

It warned of measures to suppress those who are ''trying to undermine political security by calling for the unity of groups hostile to our party and state policies.''

The rumors come amid infighting at the top of the party over the pace of economic and political reform.

Late last month, politburo member Tran Xuan Bach was fired after he publicly called for political reform. He was accused of grave violations of party discipline.

Bach openly called for political liberalization to accompany economic changes meant to transform the centrally planned economy into a market-based economy.

Even Bach, however, did not advocate an end to the Communist Party's dominant role in Vietnam.

The party is the only legal political party in the country, but it has lost influence because of economic difficulties and the changes among its allied parties in Eastern Europe.

#90110u0504 04/20/1990 ~United Press International
SEOUL, SOUTH KOREA (APRIL 20) UPI - President Bush has nominated U.S. Army Gen. Robert W. RisCassi to head the American Forces in Korea and the United States-South Korea Combined Forces Command, the U.S. military announced Friday.

RisCassi, 54, currently vice chief of staff of the U.S. Army, will concurrently serve as commander of the United Nations Command and 8th U.S. Army in Korea, succeeding Gen. Louis C. Menetrey, said the U.S. Military Command announcement.

Specific dates for the change of command will be revealed later, but late June is the likely time frame, the announcement said.

Menetrey will retire from active duty at the close of his Korean tour, the announcement said.

#90110u0526 04/20/1990 ~United Press International
HONG KONG (APRIL 20) UPI - China Friday blasted Britain's plan to grant passports to 225,000 Hong Kong residents before Beijing's takeover of the colony in 1997, saying London lacked the authority to change the nationality of ethnic Chinese.

The harsh statement from Xinhua, China's official news agency, and Beijing's unofficial consulate in the British territory, came only hours after the Nationality Bill passed its first major hurdle in Parliament.

China has often expressed its opposition to plan to grant British nationality to selected residents of Hong Kong.

A spokesman for Xinhua said China reserved the right to take ''appropriate corresponding action'' against the British passport plan, which London says is designed to stem the flow of people from Hong Kong before the switch to Chinese rule.

''The Chinese government has time and again made clear its solemn stand against the unilateral decision of Britain to change the nationality of some of the Hong Kong Chinese citizens,'' a statement from Xinhua said.

The British measure, which passed its second reading in Parliament Thursday, would grant United Kingdom citizenship to 50,000 Hong Kong heads of households and their families, totaling about 225,000 people. It still must go through committee in the House of Commons and be approved by the House of Lords.

''We deeply regret Britain's wrong unilateral decision to pass its nationality act,'' Xinhua said. ''All Chinese in Hong Kong are subject to Chinese nationality and no matter what passports they hold, they are still Chinese nationals.''

Britain hopes the Nationality Bill will stem a growing confidence crisis among Hong Kong's 5.8 million people over the switch to Chinese rule in 1997. Each week, about 1,000 people emigrate, mainly to Canada and Australia. Most of those leaving are middle-class professionals.

Concerns among Hong Kong citizens over coming under Chinese rule grew further in June when China unleashed a military crackdown on pro-democracy demonstrators in Beijing.

#90110u0527 04/20/1990 ~United Press International

(APRIL 20) UPI - Around the world... around the clock... the latest news from U-P-I.

A Lebanese extremist group has postponed its plan to release an American hostage today. The Islamic Jihad says the delay is because President Bush failed to send Assistant Secretary of State John Kelly to Syria. Bush says the U-S has a perfectly capable accredited diplomat in Syria. And, Bush says, the United States ''does NOT knuckle under to demands'' from terrorists.

The World Health Organization is trying to prevent a confrontation over its membership for the second year in a row. WHO's director-general says the United States again vows to withhold its 78-Million-dollar annual contribution if the Palestine Liberation Organization is admitted as a member. He asked the P-L-O to withdraw its application for membership.

The federal government has fined Phillips Petroleum five-point-six-Million dollars. The Occupational Safety and Health Administration levied the fine for 575 safety violations that resulted in a series of explosions that killed 23 workers at a chemical plant near Houston last year. A maintenance company was fined 729-thousand dollars for 194 safety violations at the Phillips plant.

The Nuclear Regulatory Commission says arsonists set fire to the home of its chief inspector at the Sequoyah Nuclear Plant in Tennessee. The inspector received four threatening calls before the fire gutted his home yesterday. NO one was home when the fire broke out. A smashed window led investigators to suspect the home was fire-bombed.

About 15 anti-nuclear demonstrators staged a sit-in at New Hampshire Governor Judd Gregg's office yesterday. The demonstrators demanded that

Gregg take a stronger stand against the newly licensed Seabrook power plant. The protesters left after about three hours. NO arrests were made.

-30- 2015

#90110u0540 04/20/1990 ~United Press International

(APRIL 20) UPI - Representatives of 28 countries are in Los Angeles for a city-sponsored conference on the environment. Some just finished a similar meeting in Washington. Mayor Tom Bradley opened the L-A conference by criticizing the Bush administration for down-playing the dangers of global warming.

Dallas officials say a twin-engine plane with at least eight persons aboard crashed near Love Field this morning. Dallas Police say the aircraft went down at an intersection and was in flames. Police said they have NO word yet on casualties.

The fire chiefs of two Florida towns and a third person died when the single-engine plane they were aboard crashed in the water off Fort Myers yesterday. The coast guard says the plane's engine failed. Among the dead were the fire chiefs of San Carlos Park and North Captiva.

Members of a House committee say the Army's Apache attack helicopter is a costly ''disgrace'' that's- quote- ''riddled with design and maintenance problems.'' The General Accounting Office says that because of parts failures and maintenance problems, Apaches can fly missions only about 38 percent of the time.

A doctor who revolutionized blood banking with his discovery of a method of freezing blood is dead at 60. Dr. Charles Huggins died at his Boston-area home from of cancer of the pancreas. Huggins was the son of a Nobel Laureate cancer researcher.

-30- 1558

#90110u0723 04/20/1990 ~United Press International

(APRIL 20) UPI - Lithuania is taking steps to survive its escalating war of nerves with Moscow rather than knuckle under to Soviet economic pressure.

Lithuanian officials have initiated gasoline rationing in the face of a Soviet embargo on crude oil and natural gas. Among the emergency measures, citizens will receive less than eight gallons of gasoline per month.

A Lithuanian economic planning spokesman says the natural gas cutoff can bring Lithuania's industry to a halt in two days.

Moscow reportedly also is making it hard for Lithuania to use its hard

currency reserves, which it needs to buy oil from foreign producers.

Lithuanian leaders are expressing concern about the sanctions... but remain firm in their resolve to secede from Moscow. The Baltic republic depends on the Soviet Union for oil, gas, metal, chemical products, cotton and timber.

On the other side of the world in Key Largo, Florida, President Bush drummed up allied support yesterday for pressure on Moscow.

Bush says Soviet President Gorbachev knows ''there are limits'' to the West's tolerance of his crackdown against Lithuania.

Bush was in Key Largo for talks with French President Mitterrand .

The White House says all major U-S allies have been consulted about possible U-S action against the Soviet Union in the Lithuania affair.

-30- 1506

#90110u0730 04/20/1990 ~United Press International

(APRIL 20) UPI - The Oklahoma Senate bowed to the state's teachers last night... approving higher teacher salaries and education reforms it voted down last week.

The Senate passed the measure in a special session after a four-day walkout by tens of thousands of teachers. Yesterday alone, about 20-thousand teachers picketed and rallied at the Capitol in Oklahoma City.

Five Democrats changed their votes to pass the 230-Million-dollar package.

Teachers will get a 15-hundred-dollar a year pay raise over each of the next five years. Last year, the average Oklahoma teacher took home 22-thousand dollars... the third-lowest teacher pay rate in the nation.

Other reforms include smaller class size, improved programs for ''at-risk'' students... statewide parity in educational standards... and elimination of teacher tenure.

Governor Henry Bellmon says from now on, other states can look to Oklahoma for leadership in education.

The federal government levied five-point-six-Million dollars in fines against the Phillips Petroleum Company.

The fines are for 575 safety violations that resulted in a series of explosions last year that killed 23 workers and injured more than 130 at a Texas chemical plant.

In announcing the fines yesterday, Labor Secretary Elizabeth Dole said federal investigators had uncovered internal Phillips documents that called for corrective action... but which were largely ignored.

A spokesman for the Oil, Chemical and Atomic Workers International Union... said criminal charges, NOT multi-Million-dollar fines, are needed to force the petrochemical industry to improve safety practices.

The Occupational Safety and Health Administration also fined Fish Engineering and Construction more than 700-thousand dollars for 194 safety violations.

Fish was performing contract maintenance on the Phillips facility in Texas when the explosion occurred last October.

-30- 2099

#90110u0753 04/20/1990 ~United Press International

(APRIL 20) UPI - A blueprint for the nation's spending is on its way in Congress.

The House Budget Committee voted yesterday to approve a Democratic-sponsored one-TRILLION 200-BILLION-dollar fiscal 1991 budget. Liberal Democratic committee members forced deeper defense cuts than their Democratic leaders had proposed.

All 21 Democrats supported it and all 14 Republicans voted against it.

The budget resolution is a non-binding spending, savings, revenue and deficit reduction plan that guides other House committees.

The full House is expected to debate the budget next week. It could set up a major defense spending confrontation with President Bush, who proposed far more modest defense cuts than congressional Democrats want.

Asked if the budget plan will pass the full House, Committee Chairman Leon Panetta said he doesn't think anybody knows. The California Democrat says it's going to take a lot of work.

The Senate Budget Committee is expected to begin public hearings on its own budget plan next week.

The Nicaraguan government and the Contra rebels signed a cease-fire agreement yesterday that went into effect immediately. The accord also promised an end to eight years of civil war and the disarming of the rebels by June 10th.

A Contra leader... Nicaragua's defense minister... and a representative of President-elect Chamorro signed the detailed agreement after an all-night bargaining session.

Nicaraguan President Ortega met yesterday with Bernard Aronson, U-S assistant secretary of state for inter-American affairs. Ortega called his talks with Aronson about the cease-fire and disarmament ''constructive.''

Asked if the two men discussed a possible reduction of U-S military strength in Central America... Ortega said- ''That was implied.'' Aronson declined comment.

-30- 1996

#90110u0779 04/20/1990 ~United Press International

(APRIL 20) UPI - Stock prices on the Tokyo Stock Exchange closed mixed Friday in a session of see-saw buying and profit taking.

The blue chip Nikkei Average of 225 selected issues, which surged 696.35 points Thursday, fell 109.97 points to close out the week at 29,835.44.

The broader-based Tokyo Stock Exchange Index of all listed shares, however gained 0.67 points to 2,214.16.

An estimated 700 million shares changed hands, compared with 907 million shares Thursday.

Advancing issues outnumbered declining issues 532 to 417, while 158 issues remained unchanged.

Analysts said the market faced heavy selling after the Nikkei topped the 30,000 level in early trading.

They said the yen's strength against the dollar lifted the market, but investors soon moved to take quick profits.

On the Tokyo Foreign Exchange, the dollar weakened against the Japanese yen due to position adjustment selling. The dollar closed at 157.60 yen, down from Thursday's close of 157.75.

News in the afternoon about the bankruptcy of a large speculative investor led to selling, market watchers said.

On the trading floor, large-capital steels and shipbuildings such as Nippon Steel, NKK, Mitsui Engineering and Shipbuilding and Ishikawajima-Harima Heavy Industries ended lower.

Losers also included electricals like Sony and JVC, precision instruments,

constructions, drugs and some financial issues.

Electric railways and electric powers gained along with some individual issues.

Elsewhere in Asia, prices rebounded from sharp early losses on the Hong Kong Kong Stock Exchange to end the trading session with a only a slight loss.

The key Hang Seng Index, which gained 15.32 points Thursday, inched down 0.37 points to 3,067.30.

The loss ended a three-day streak of substantial gains and the Hang Seng Index still finished the week with a nearly 72-point gain.

Utilities lost 7.77 points, financials dropped 9.34, industrials gained 12.40 and properties eased 7.77 points.

Turnover was moderately heavy at 1.55 billion shares, compared with 1.83 billion shares Thursday.

Analysts said traders consolidated gains following the sharp rises earlier in the week.

Issues fell more than 10 points in the first 10 minutes of trading and continued to drop throughout the morning session.

Prices began the afternoon nearly 20 points lower and were pushed higher in a late rally, analysts said.

Prices on the Singapore Stock Exchange closed lower in light trading with investors maintaining their wait-and-see stance following the sharp drop on Wall Street.

The blue-chip Straits Times Industrial Index, which eased 3.25 points Thursday, slipped 8.46 points to 1,520.56. The narrower All Singapore Index eased 2.30 points to 417.67

Turnover amounted to 35.09 million shares, compared with 14.13 million shares Thursday.

Analysts said the market was dominated by small investors and speculators with institutional players reluctant to commmit themselves amid the bearish sentiment.

The mixed closing on Tokyo after two days of rallies dampened spirits further.

Analysts said an outflow of foreign funds to the Hong Kong market was also contributing to the sluggish mood.

On the trading floor, Hotel Negara paced the declining issues, followed by Singapore Airlines (foreign shares), Singapore Land, Development Bank of Singapore and Kings Hotel.

Overseas Chinese Banking Corp. (foreign shares) led the advancing issues, followed by Hai Sun Hup, Sungei Way, Golden Plus and Singapore Fodder.

In Australia, stocks closed lower in lackluster trading on the Sydney Sharemarket.

The key All Ordinaries Index, which fell 6.3 points Thursday, eased 3.0 points to 1,493.2. The closely watched Gold Index, which fell 7.6 points Thursday, lost another 4.2 points to 1,543.0.

Turnover amounted to around 86.2 million shares, compared with 75.2 million shares Thursday.

Trading was dominated by the big miners, pushed lower by a surge in the value of the Australian dollar which climbed to 77 cents against the U.S. dollar on foreign currency markets.

On the trading floor, BHP Mining paced the actives, easing 6 cents to $9.02.

Elsewhere, News Corp. lost 20 cents to $10.75, BTR slipped 8 cents to $5.76, Comalco lost 9 cents to $3.86 and Coles Myer lost 4 cents to $3.86.

#90110u0808 04/20/1990 ~United Press International

CHARLOTTE, NC (APRIL 20) UPI - The prolonged infighting between Baptist fundamentalists and moderates on the national level is taking its toll in local churches, a candidate for the presidency of the Southern Baptist Convention said.

The Rev. Daniel Vestal, of Atlanta, campaigned Thursday in North Carolina as the moderate wing's candidate to lead the nation's largest Protestant denomination - 14.8 million members.

"Forced terminations of pastors are at an all-time high. Tensions between pastoral staffs and congregations are rampant," Vestal said Thursday. "I think North Carolina has been ahead of the rest of the states in recognizing this for what it is - a power play and a power grab (by conservative Baptists)."

Vestal said fundamentalist Baptists are using the issue of the literal interpretation of the Bible as the infallible word of God as a smokescreen to gain political strength. "If the lay people realize that this is affecting their local churches, they're going to rise up and say, 'Stop this fight!"' Vestal said.

In North Carolina during the past three years, congregations of the flagship Baptist churches in Charlotte, Winston-Salem, Greensboro, and Rocky Mount have forced their ministers to leave, citing a lack of fundamental belief.

Fundamentalists took control of the Southern Baptist Convention in 1979 and continues to control the presidency. The convention meets in New Orleans on June 12 and Vestal faces the Rev. Morris Chapman of Wichita Falls, Texas, in the presidental election.

While conservative Baptists believe in a literal Bible, moderates contend the Bible is the word of God but open to interpretation. "This is not now, and never has been, a theological struggle," Vestal said. "When I say fundamentalist, I'm talking about a mind-set, an attitude of centralized control.

"I resist that attitude. It is a mind-set that maligns people's commitment to the Bible, and even to Christ, because they won't participate in a controlled political movement," Vestal said.

#90110u0845 04/20/1990 ~United Press International

NEW YORK (APRIL 20) UPI - The New York Stock Exchange reported Friday these odd lot transactions by principal dealers through NYSE facilities for April 19: Purchases of 346,511 shares and sales of 435,236 shares including 3,166 shares sold short.

-30- 393

#90110u0850 04/20/1990 ~United Press International

BY ARNOLD SAWISLAK

WASHINGTON (APRIL 20) UPI - Among the many problems Congress has been unable to solve, personal misbehavior by its own members is high on the list. This is not new, but that doesn't make it any less vexing or embarrassing.

Going all the way back to the mid-19th century when Rep. Daniel Sickles shot and killed U.S. District Attorney Philip Barton Key in Lafayette Square, Congress has found it all but impossible to discipline its members for personal peccadilloes.

Sickles beat the murder rap for killing the son of the Star Spangled Banner author by pleading the unwritten law - Key had a dalliance with Mrs. Sickles - but the House did not even try to discipline the New York congressman. He did lose both his social and political position when he publicly forgave his adulterous wife.

Personal misconduct also is a factor in three ethics cases in this Congress. Sex-related charges involving Reps. Barney Frank, D-Mass., and Donald Lukens, R-Ohio, still await action by the House ethics committee, but it already has disposed of allegations that Rep. Gus Savage, D-Ill., engaged in improper conduct toward a female Peace Corps worker while traveling in Africa.

The committee took no action against Savage, but expresed disapproval of his conduct and said had Savage not already written an apology to the woman, it would have ordered him to do so. Savage later told the House that the committee didn't lay a glove him, and no one disputed his analysis of the outcome.

There are several reasons why the House and the Senate have such trouble policing themselves.

First, although the Constitution clearly gives Congress the responsibility members never have enjoyed scrutinizing their colleagues' behavior, preferring to limit their judgment to questions of age, residence and the integrity of the election process. They definitely do not like to inquire into the personal lives of their peers, perhaps for fear of the Biblical injunction ''Judge not, lest ye be judged.''

A second problem is the long-standing feeling that it is the place of the voters in the affected state or congressional district to determine the fitness of a senator or representative to serve them.

This is associated with whatever remains of the concept of states' rights and to the extent that it has been weakened in recent years, so has the reluctance of Congress to poke into the personal lives of members.

Thus, in the 1940s and 1950s, when moral codes were stricter, members of Congress professed to be outraged by the after-dark shenanigans of a member like Adam Clayton Powell, but they waited to discipline him until they could make a case against his official conduct - the misuse of congressional travel funds.

Powell, like Sickles, beat the rap, but his defense was no unwritten law. The House tried to kick the Harlem globetrotter out of Congress with a majority vote and he went all the way to the Supreme Court to establish that the Constitution requires the same two-thirds vote needed for an

impeachment.

Then, as old-timers said the system should work, the voters finally retired Powell. But when the primary voters looked at Gus Savage's behavior this spring, they gave him a close call but once again the Democratic nomination.

(APRIL 20) UPI - A group of jail inmates made an unusually quiet move in Massachusetts yesterday. Hampden County jail officials transferred 44 minimum-security inmates from a Springfield National Guard armory used to house inmates since February when a sheriff commandeered it to relieve overcrowding in his jail. The inmates were moved to another armory... 20 miles away, in Holyoke... across a street from a kindergarten and child-care center.

Solidarity founder Lech Walesa lost a test vote at the trade union's congress today. Delegates are considering a move to try to limit Walesa's power as leader of the union. In what one delegate described as a ''small defeat for Walesa,'' delegates voted to invite former Solidarity members to the session in Gdansk. It's a reversal of a vote yesterday. Many of the break-away members oppose Walesa.

A twin-engine plane with engine trouble crashed in flames on a street near a e Dallas airport this morning. Officials say the pilot was killed in his Beechcraft Baron. He was the only one aboard the plane. The pilot already had aborted one take-off from Love Field because of engine trouble and was making a second attempt when he radioed he had further engine trouble.

Bob Hope has signed a deal to turn over 57-hundred acres of mountain property in Los Angeles and Ventura counties to California for parks. The price is a below-market 20-Million dollars. But in return, the entertainer wants California to give the federal government 200 acres in Malibu. Then he wants the National Park Service give him 59 acres near Agoura Hills. Hope wants the parcel for a residential development.

#90110u0918 04/20/1990 ~United Press International
WASHINGTON (APRIL 20) UPI - The House Budget Committee voted along party lines to approve a $1.2 trillion fiscal year 1991 budget blueprint after rebellious Democrats forced deeper defense cuts than their Democratic leaders had proposed.

The Democratic-sponsored budget plan, which the full House is expected to debate next week, could set up a major defense spending confrontation with President Bush, who proposed far more modest defense cuts than congressional Democrats want.

The budget resolution, a non-binding spending, savings, revenue and deficit reduction plan that guides other House committees, passed Thursday on a party line vote, with all 21 Democrats supporting it and all 14 Republicans voting no.

The final vote came after the committee rejected on a nearly party line vote of 22-12 the fiscal 1991 budget submitted in January by Bush. Rep. Bill Schuette, R-Mich., was the only Republican to oppose Bush's budget for the fiscal year starting Oct. 1.

Chairman Leon Panetta, D-Calif., of the House Budget Committee, author of the five-year budget plan, acknowledged he may have trouble winning House passage because of continuing Democratic divisions on defense spending.

Only hours after Panetta and House Democratic leaders unveiled their budget plan Wednesday, Panetta was confronted by angry committee liberals. They told him that $286 billion in defense budget authority in the plan for fiscal 1991 was unacceptable.

So Panetta agreed to cut the defense figure $3 billion, to $283 billion, before presenting his plan to the budget panel on Thursday.

''That's about as high as many of us could support,'' Rep. Charles Schumer D-N.Y., one of the rebellious Budget Committee liberals, said of the $283 billion figure.

The move won Panetta the liberal votes he needed to win committee passage, but it angered conservative Democrats whose votes Panetta will need on the House floor.

Asked if the budget plan would pass the full House, Panetta said, ''I don't think anybody knows right now. ... It's going to take some work - a lot of work.''

One conservative Democrat, Rep. Jerry Huckaby of Louisiana, said the lower defense figure demanded by liberals ''gives a lot of us conservatives real heartburn'' and said full House passage ''will be close.''

He said Panetta, meeting with conservative Democrats Thursday, stressed the lower defense number was merely a neogtiating position that probably would not survive an eventual House-Senate conference committee.

Rep. Bill Frenzel, R-Minn., the budget panel's ranking Republican, said Panetta's budget plan was merely ''a Democratic exercise'' to stake out a negotiating position for an expected budget summit between Bush and Congress later this year.

Panetta and the House Democratic leadership on Wednesday proposed Pentagon spending of $295.5 billion in fiscal 1991 and $285.9 billion in defense budget authority, which is the amount that can be obligated next year but spent in 1991 and in later years.

Panetta cut the budget authority number to $283 billion. The totals are

about $8 billion less than Bush's proposal for $303 billion in defense outlays and $24 billion less than the defense budget authority proposal.

#90110u0920 04/20/1990 ~United Press International

TOKYO (APRIL 20) UPI - A U.S.-Japanese consortium signed a contract with Japan's NTT domestic telecommunications giant Friday to design and supervise construction of the company's new head office in Tokyo. The move is seen by industry officials as a test case for opening up the Japanese construction market.

Nippon Telegraph and Telephone Corp. said the contract was officially signed with a joint venture between Cesar Pelli and Associates, Inc., of New Haven, Conn., and Yamashita Architects and Engineering Inc.

NTT declined to disclose the value of the contract, but company sources estimated it at $6.5 million. A spokesman for the company said the agreement calls for the contractor to submit the design within 15 months.

NTT plans to build a 30-story structure in Tokyo's expanding business and office district of Shinjuku for completion scheduled in 1994, the spokesman said.

Cesar Pelli, professor of architecture at Yale University and founder of the New Haven firm, said after the signing that the contract will enhance opportunities for foreign contractors to advance into Japan's lucrative construction market.

The joint venture was selected from among seven applicants, mostly joint ventures between Japanese and foreign firms, which passed pre-qualification screening by NTT.

NTT originally planned to select contractors from among Japanese firms but changed the plan under pressure from the United States to open the Japanese construction market to foreign firms.

Under an agreement signed with the United States in 1988, Japan pledged to allow foreign contractors to participate in 17 major public works project, including the NTT project and construction of the multi-million dollar Kansai International Airport on a man-made island off Osaka, Japan's second largest city 250 miles southwest of Tokyo.

NTT, the former domestic monopoly, was privatized in 1985 in line with the government's policy of opening the telecommunications market but remains under regulations set by the government.

A survey by the Japan Federation of Construction Contractors said 26

foreign firms, including 13 U.S. and nine South Korean contractors, have obtained construction licenses in Japan since the U.S.-Japanese accord was signed.

The federation said 23 other foreign contractors are trying to make an inroad into the Japanese market through tie-ups with Japanese partners. The federation said the survey showed that most of the licenses foreign firms still find it difficult to secure lucractive contracts because the market is dominated by Japanese companies.

Kyodo News Service said Schal Associates Inc., a medium-sized construction company based in Chicago, was among a few successful foreign contractors. The company has won a $116 million contract with eight Japanese partners for construction of a 32-story hotel and convention center in Yokohama, one of the 17 public works projects involved in the U.S.-Japanese agreement.

"Schal is doing its job seriously although this contract is not profitable " an official of Toda Construction Co., one of the Japanese partners with Schal, was quoted by Kyodo as saying.

Brown and Root Inc., an engineering firm based in Houston, Texas, was among the 13 U.S. license winners but withdrew from the Japanese market on grounds its profits from public works projects were slim, Kyodo said.

#90110u0958 04/20/1990 ~United Press International

WASHINGTON (APRIL 20) UPI - The Consumer Product Safety Commission said Friday nine companies that make infant bean bag cushions and pillows will voluntarily recall their products because of mounting concern they may smother and cause the death of children.

Jacqueline Jones-Smith, chairwoman of the commission, said the safety agency has learned of 19 deaths apparently related to the pillows, 13 of them in 1989 and 1990.

''Every one of these infants was reported to be 3 months of age or younger '' Jones-Smith said. ''Each of these children reportedly was found dead, lying stomach down on one of these cushions.''

Jones-Smith said that in March, when the safety commission confirmed the danger, it identified 10 companies making various versions of the bean bag pillow or cushion for infants and that by mid-March, all 10 had stopped making the products.

She said nine of the 10 companies had agreed not only to stop manufacturing the infant bean bags but also to initiate a voluntary recall

of those in the market and that six of the firms had already begun recalling the product. Another three firms were still working on the details of their recall.

One firm, which remained unidentified, according to the commission, is resisting a recall and could face legal action if the an agreement cannot be reached.

The manufacturers contend the products are safe if not misused, for example, by leaving infants unattended in them.

The commission has been investigating the pillows since January, when medical examiners in Dallas told it that three babies had died while sleeping face down on the bags. Eight of the 19 deaths have been reported in Texas.

Products being voluntarily recalled and their manufacturer are:

Mother's Helper (Hollander Home Fashions); Gold Bug Support Sack (Gold Inc.); Cozy Cushion (Pinky Baby Products); Cozy Baby (Pinky Baby Products); Baby Minder (The Fourth Little Pig); and Disney Babies Toddletime Support Sack, Sleepy Time Bears Toddletime Support Sack and Sesame Street Support Sack (J.C. Penny-Gold, Inc).

TOKYO (APRIL 20) UPI - Japan's steel exports in fiscal 1989 hit a 19-year low largely because of sluggish sales to its major customers, China and the Soviet Union, the Iron and Steel Federation said in a preliminary report Friday.

The federation said exports in the fiscal year, which ended March 31, were estimated at 18.99 million metric tons, down 18.3 percent from the preceding year and the lowest since fiscal 1970, when Japan's overseas sales totaled 19.75 million tons.

Federation officials said there is little possibility Japan's sluggish steel exports will pick up although domestic demand will remain strong.

#90110u0992 04/20/1990 ~United Press International

MANILA, PHILIPPINES (APRIL 20) UPI - The U.S. naval commander in the Philippines said Friday that Americans face ''a real threat'' from the communist insurgency in the period leading to negotiations for a new bases treaty.

In an interview with the U.S. military television, the Far East Network, Rear Adm. Roger Rich also urged service personnel to use caution when traveling off-base.

Exploratory talks are to begin May 14 in Manila to determine whether to hold formal negotiations on the renewal of the treaty covering the giant Clark Air Base and Subic Bay Naval station after the pact expires in 1991.

In a related development, Foreign Secretary Raul Manglapus said U.S. aid to Manila this year fell $222.58 million, more than the earlier projection of $96 million.

Under a 1988 agreement, the Reagan administration pledged its best efforts to secure congressional approval of $962 million assistance to the Philippines during the last two years of the bases accord.

The non-fulfillment of the pledge has prompted calls among many Filipinos for termination of U.S. basing rights and the issue is atop the agenda in the May 14 talks.

The communist New Peoples Army, which has been waging a 21-year rebellion against the Manila government, has threatened to kill Americans to force Washington out of its bases from the Philippines.

At least eight Americans, including Col. James Rowe, a Vietam War hero, have been killed in the past two years. The rebels said the killings were revenge for U.S. involvement in Manila's anti-insurgency campaign.

''I'm concerned because I believe that there is a real threat against U.S. personnel in the Philippines,'' said Rich, who also is the representative of the commander-in-chief of the U.S. Pacific Fleet to the Philippines.

''We're providing the best possible security we can,'' he said.

Rich said 600 Marines were deployed to secure the perimeter area around the sprawling Subic station, 60 miles northwest of Manila.

''I would say that we should be extremely concerned for the period that we have been warned to be concerned about by the NPA themselves,'' Rich said.

''And we are leading up to negotiations and that is going to be something that I think we need to worry about our people for that period just prior to the negotiations and maybe on into the negotiations.''

Rich said non-official travel restrictions to Manila remain in effect and he urged Americans to adopt the ''buddy system'' when going off base.

A report to military headquarters in Manila, meanwhile, said communist

rebels killed 22 soldiers in daring, well-planned ambushes in the southern Philippines, dealing the military its worst combat setback this year.

Thirteen other troops were reported missing and four were wounded in the gunbattles Wednesday and Thursday in Marihatag town, 550 miles south of Manila on strife-torn Mindanao island.

#90110u1018 04/20/1990 ~United Press International

TAIPEI, TAIWAN (APRIL 20) UPI - The Foreign Ministry Friday registered a formal protest against a U.S. Department of Defense report referring to the status of Taiwan and several island groups in the region as ''unresolved territorial issues.''

''It is common knowledge that Taiwan, the Pescadores, and the Spratley and Paracel Islands are the territory of the Republic of China,'' the Foreign Ministry said in a statement. ''We can neither understand nor accept any claim that Taiwan's status is uncertain.''

The Pentagon said in a report on East Asia's military situation that Taiwan and the Spratley and Paracel islands in the South China Sea have potential for generating regional conflict and instability. The Pescadores lie between Taiwan and the China mainland.

The report, which was commissioned by President Bush and presented to the U.S. Congress Thursday, suggested Taiwan's status was undefined.

In a section referring to the persistence of ''longstanding regional problems with destabilizing potential,'' the report said, ''Unresolved territorial issues include the Spratly and Paracel Islands and Taiwan.''

It appeared to be the first time the United States has deviated from its stance, stated by former President Nixon in a meeting with Chinese leader Chou En-lai in 1972, that there is only one China, that Taiwan is part of China, and that the issue of the governance of China is an internal matter to be resolved by the rival governments in Beijing and Taipei.

Both governments have claimed to be the sole legitimate ruler of all China since the Nationalists lost the Chinese civil war to the Communists on the mainland in 1949 and fled to Taiwan.

The Spratleys, a group of 33 islands and atolls in the South China Sea, are claimed by China, Taiwan, the Philippines, Vietnam and Malaysia.

The Foreign Ministry said it has cabled the Coordination Council for North American Affairs, Taiwan's representative office in Washington in the absence of diplomatic relations, for more information on the Defense

Department report.

The American Institute in Taiwan, the unofficial U.S. presence in Taiwan, declined comment on the report.

#90110u1022 04/20/1990 ~United Press International

NEW HAVEN, CT (APRIL 20) UPI - The Upjohn Co. has agreed to pay $1.8 million to settle a five-year-old suit alleging pollution of the Quinnpiac River by the company's North Haven plant.

Two environmental groups announced in New Haven Thursday that Upjohn has agreed to set up a trust fund to help restore the Quinnipiac River, which the company's North Haven plant has been accused of polluting over the years. The federal lawsuit accused Upjohn of more than 1,100 violations of the Clean Water Act in dumping toxic substances, including carcinogens, into the river.

The trust fund, to be administered by the New Haven Foundation, will use up to $1.2 million to improve the ecology of the river, New Haven Harbor, and their watersheds.

The rest of the settlement will be used to cover legal costs incurred by the two groups - The Connecticut Fund for the Environment and the Natural Resources Defense Council.

Katherine H. Robinson, senior staff attorney for the Connecticut Fund, said the agreement is believed to be the largest penalty ever paid for permit violations in Connecticut.

A spokesman at Upjohn's offices in Kalamazoo, Mich., said the company was pleased that the case has ended but pointed out that under the settlement, the company admits no wrongdoing.

"We're pleased that most of the proceeds of the settlement will be used for such a worthy cause as improving the Quinnipiac River," said Peter Maas. Upjohn has maintained the North Haven plant since 1962 and has announced plans to shut down the facility by 1992.

Upjohn is known primarily as a pharmaceutical company but the North Haven plant manufactures chemicals used in dyes, solvents, perfume additives, and other products.

#90110u1049 04/20/1990 ~United Press International

WASHINGTON (APRIL 20) UPI - Sen. Alfonse D'Amato, R-N.Y., introduced legislation Friday that would impose U.S. economic sanctions against Iraq unless the Middle Eastern nation permits the inspection of facilities suspected of making nuclear, chemical and biological weapons.

The bill, which was referred to the Senate Foreign Relations Committee, would terminate any economic aid, including grants, sales, loans, credits, insurance and guarantees.

Trade preferences would be suspended. Additional duties as high as 50 percent would be imposed on imports from Iraq, and all but emergency air travel between the United States and Iraq would be halted.

D'Amato said Iraq received $500 million in export credit guarantees from the United States last year and has asked for $1 billion this year.

Also affected would be oil imports from Iraq, which last year amounted to 447,000 barrels per day worth about $2 billion.

NEW YORK (APRIL 20) UPI - Latest metal market prices as quoted Friday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 70.00-71.00 c-lb.

Antimony, domestic, refined in alloy, $1.25-$1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 130.70 c-lb.

Lead, common, U.S. primary producers 50.00 c-lb.; U.S. non-primary (secondary) producers 54.00-60.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $280.00-$290.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.25-$4.36 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $128.00-130.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $479.00-$481.00; dealer-approx., $475.00-$480.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $103.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $105.50 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 310.50 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 83.00-83.75 c-lb.

#90110u1114 04/20/1990 ~United Press International

(APRIL 20) UPI - The nominees are in place and the lines are drawn for the Southern Baptist Convention's annual battle between moderates and fundamentalists for control of the body, if not the soul, of the nation's largest Protestant denomination.

Since 1979, the two factions have waged a bitter, often personal, battle to impose their view of the Baptist faith on the administrative machinery - including schools and seminaries - of the 14.7 million-member church.

And for the last decade, the fundamentalists, adhering to a rigid, literalist interpretation of the Bible, have been winning and slowly purging those who disagree from the denomination's leadership ranks.

The convention will meet June 12-14 and the political campaign for the critical role of president of the convention has been unfolding for months.

Representing the moderates will be Daniel Vestal, pastor of Dunwoody Baptist Church in suburban Atlanta. The fundamentalist choice, apparently handpicked by a group of former fundamentalist convention presidents while on a Bible conference cruise in the Caribbean, will be Morris Chapman, pastor of First Baptist Church, Wichita Falls, Texas.

Control of the presidency is important in the Southern Baptist Convention because the president names the Committee on Committees, which in turn, nominates the Committee on Nominations, which names trustees for the denomination's boards, agencies and seminaries.

Chapman is the odds on favorite to win election for a number of reasons.

First, his endorsement by the four of the five fundamentalists who have led the denomination since 1979, and second, the decision of John Bisagno, the influential pastor of First Baptist Church, Houston, Texas, to nominate Chapman.

Bisagno, who had remained unaligned during the first decade of the bitter

controversy in the church, recently threw his lot in with the fundamentalists, announcing a proposal to create a new coalition around ''the perfect, infallible Bible.''

The move of Bisagno from the unaligned to the fundamentalist camp is being widely interpreted in Baptist circles as an effort on the part of the small clique of early fundamentalist leaders to enlarge the tightly controlled circle of conservative leadership in the denomination.

Vestal compared the former presidents' choice of Chapman to the way Roman Catholics choose a pope.

''Southern Baptists don't need a college of cardinals to determine the direction'' of the church, he said. ''We particularly don't need a college of cardinals who go on Caribbean cruises and then come back and determine who will have a part in the decision-making process.''

''This is part of the problem,'' according to Vestal. ''The SBC does not need an episcopate, a presbytery, a college of cardinals. We do not need to be a centrally controlled denomination by a centrally controlling group determining who can and who cannot be a part of Southern Baptist life.''

But if the mid-March meeting of the Convention on Nominations is any indication, that is precisely what is happening.

At least one member of the committee has complained of steamroller tactics by the fundamentalists.

''I was told before this meeting that this committee would be inclusive; I discovered that it was not,'' said David Montoya, Gravette, Ark. ''I was told the hard-line people would be appointed this time and that we would be moving back to the center. But in this report (the list of nominees for agencies) you will find the hard-liners.''

#90110u1119 04/20/1990 ~United Press International

WASHINGTON (APRIL 20) UPI - The Senate Agriculture Committee voted to create two new forestry programs Friday, one to encourage long-term management of private forests and the other to buy easements to protect environmentally sensitive forest land.

At the same time, committee members delayed action on President Bush's ''America the Beautiful'' tree-planting initiative because of disagreements over who should run part of the campaign. The initiative calls for planting 1 billion trees a year.

The two new programs, called the Forest Stewardship Program and the Forest

Legacy Program, were given first-round approval for inclusion in the Agriculture Committee's version of the new five-year farm policy law.

''We have put together something that could be a major legacy for forestry '' Agriculture Chairman Patrick Leahy, D-Vt., said just before the committee adjourned.

A House Agriculture subcommittee, meeting earlier in the week, approved a Forest Reserve Program that, like the Senate proposal, would use conservation easements to shelter endangered species or prevent development of forest land. It also voted to establish a stewardship program with the same goals as the Senate plan.

The House panel's version of the forestry section of the farm bill includes creation of a nonprofit America the Beautiful Foundation to encourage tree-planting in cities and in rural areas.

A Senate staff worker said there have been suggestions to give the duties to an organization already involved in reforestation, rather than creating a new entity.

Bush has requested $110 million in fiscal 1991 to assist tree-planting and forest improvements in rural areas and $65 million to aid the planting of 30 million trees in about 40,000 communities.

Emphasis is being given to tree-planting because trees act as a natural air cleaner that removes carbon dioxide from the air and creates oxygen. Removal of carbon dioxide could prevent global warming.

There are about 730 million acres of public and privately owned forest land in the United States. More than half is privately owned.

The Forest Stewardship Program proposed by the Senate panel would broaden the range of forest improvement activities eligible for a federal cost-share. In exchange, owners would pledge to keep their land in the program for 20 years and to follow federal and state environmental laws.

The goal is to bring 25 million acres into the program. At present, federal cost-share is available primarily for tree planting. The Senate proposal would include activities to maintain tree health and advice on how to improve wildlife habitat, preserve water quality or develop recreational uses.

Under the Forest Legacy Program, federal and state governments would buy conservation easements from private landowners with priority given to forest land that is threatened by development, has unique scenic character or where water quality could be degraded by conversion to non-forest uses.

The Senate's forestry language also would create a Southern Forestry Center to encourage forestry in the South.

#90110u1144 04/20/1990 ~United Press International

NEW YORK (APRIL 20) UPI - Marla Maples, in her first interview since her relationship with Donald Trump fueled a media frenzy, acknowledged that she loves him and said the billionaire's wife, Ivana, was ''an absolutely beautiful woman'' - even before plastic surgery.

Speaking Thursday on the ABC News program ''Prime Time Live,'' the 26-year-old model and actress said that while she loves Trump, she was not the reason he split with Ivana, his wife of 13 years.

ABC said Friday the interview captured a 26 percent share of the television viewing audience, placing the show in first place.

Maples said she agreed to talk publicly about her relationship with Trump on the broadcast to ''take the heat'' off family members who have been besieged by the news media.

Dressed in a conservative white suit, Maples said of Mrs. Trump: ''I feel she's gone through a lot of pain. I can only imagine what it's like to have your whole world as you knew it sort of shaken and put out there for everyone to see.''

Maples said Mrs. Trump is ''an absolutely beautiful woman. I think she was before surgery - and - I mean, now she's - she's very, very gorgeous.''

Maples denied she confided details of her sex life to a friend, as summed up in the New York Post headline: ''Best Sex I've Ever Had.'' Pressed on the matter, Maples shook her head and said all the stories have hurt Trump.

Asked, ''But you still love him?'' Maples replied: ''I cannot lie about it. Oh, I do.'' Nevertheless, she never talked about marriage with him because ''he's a friend'' with ''a family that's No. 1 to him.''

Maples, whose acting career has been confined to bit parts in a few films, said she has been trying to move up in show business, but that the publicity about her relationship with Trump ''isn't the publicity I want.''

''My family had been so affected by this that I felt it was time I took control of the situation and take care of them,'' Maples said, explaining why she agreed to the interview.

She said Trump does not support her financially and she was never motivated by money in her relationship with him. ''I've always felt that,

you know, as your mom says, it's just as easy to marry a rich man as a poor man,'' she said. ''I think it all comes down to the heart.''

She said she declined million-dollar offers for interviews because she did not want to take money for a story that ''has to do with other people's problems. I have to keep a bit of dignity.''

Maples was interviewed Wednesday at the home of a friend of Trump near his newly opened Taj Mahal casino in Atlantic City, N.J. ABC said Maples was not paid and agreed to a no-holds-barred interview.

The actress-model said Trump has, ''helped me to keep my head up high, not to lose confidence even when they're saying horrible things that he and I absolutely know aren't true, that I'm sure Ivana would know is not true, because she's been there with him.''

Maples declined to say how she met Trump because of pending litigation between the Trumps, but she denied that her friendship with Manhattan's premier real estate mogul ruined his marriage.

''I'm not the reason for that marriage having problems,'' she said. ''I feel they've had a long marriage and, as Donald has said himself, 'People just grow apart.'''

#90110u1156 04/20/1990 ~United Press International

(APRIL 20) UPI - April showers dampened cities from West Virginia to Washington state early Friday, causing flooding in parts of the southern Plains, while clear, cold skies covered New England.

The National Weather Service said showers and thunderstorms drenched the Texas Panhandle and parts of New Mexico, Oklahoma, and Arkansas, capping a week of stormy spring weather. A fast-moving line of thunderstorms moving out of the Panhandle produced heavy rain and wind gusts near 50 mph.

In northern Texas, some roads near Wichita Falls were under water as authorities warned residents in low-lying areas to prepare for flooding. Nearly four inches of rain was reported in the area during a 48-hour period.

The weather service said southwestern Abilene received 1.82 inches of rain in 45 minutes and .90 inches fell at the airport, causing widespread street flooding before the front moved east into north-central Texas. Numerous streets and two underpasses were closed but there were no reports of injuries or damage.

Flash flood warnings were posted in central and southeast Oklahoma, where forecasters said rain falling at a rate of one to two inches an hour was swelling streams and rivers, officials said.

Iowa had thunderstorms overnight, while most of the rest of the Midwest had only light rain. Most of the Midwest recorded temperatures in the mid 40s and low 50s, but Springfield, Mo., rose to 58. Rain returned to Ohio after a brief absence and was expected to remain for the day with mild temperatures.

Mild temperatures, cloudy skies and scattered areas of light rain hung over western Washington state. A weak frontal system brought light rain, drizzle, low cloud ceilings and patchy local fog.

In Oregon, a weak frontal band spread rain along the Oregon coast and moved into the southwest interior. Most of the state reported light

amounts of rain. Widely scattered showers also developed across much of eastern Oregon.

In Southern California, temperatures mild under cloudy skies, with Los Angeles posting 72 degrees and 61 at the beach in Santa Monica. An upper-level low-pressure system was developing off the southern California coast.

A Pacific frontal system produced rain over northwest California and the northern mountains. Sprinkles fell as far south as the San Francisco and Sacramento.

On the East Coast, Worcester, Mass., was the coldest spot in New England, with the mercury dipping to 36 degrees. Elsewhere in the region, temperatures were mostly in the 40s under clear skies.

Light rain fell overnight across parts of Maryland, West Virginia, and western Pennsylvania, where temperatures moderated from their sub-freezing levels posted earlier in the week. Lows were in the 40s across most of the mid-Atlantic region, but West Virginia reported lows in the 50s. Eastern Pennsylvania and southern New Jersey had clear skies overnight.

In the Southeast, temperatures unseasonably mild under cloudy skies. Temperatures across the South overnight ranged from a low of 57 degrees in Atlanta and Macon, Ga., to a high of 75 in Miami.

#90110u1168 04/20/1990 ~United Press International

OKLAHOMA CITY (APRIL 20) UPI - Most Oklahoma teachers returned to classrooms Friday, ending a four-day walkout that led to passage of a $230 million tax bill for higher pay and education reforms.

Some schools remained closed, but Oklahoma Education Association spokeswoman Marilyn Rogers said most of them went back to work after Senate passage of the bill that included provisions for smaller classes and a state effort to equalize education standards.

''We encouraged everyone to go back,'' Rogers said. ''We know there are some districts that just couldn't move that quickly and go back today, but I believe a majority of the teachers are back in the classrooms and happy to be there.''

A few schools had announced originally they would be closed all week, while others suspended classes on a day-to-day basis.

Rogers said the association had no plans to visit the Capitol Friday, although Vice President Nancy Jewell earlier said teachers would return to say ''Thank you.''

''The legislators may not be there but they'll hear us,'' Jewell said.

The Legislature recessed for the weekend after passing the measure late Thursday.

The bill had not reached the desk of Republican Gov. Henry Bellmon, who backed the measure and is expected to sign it early next week. A spokewsoman in Bellmon's office said the governor was out of town Friday and would not sign the bill before Monday.

The Senate, under pressure from the teacher walkout, went back into

session late Thursday and approved the education measure it had voted down just last week.

The action capped a week of demonstrations by thousands of teachers at the Capitol and widening support from school officials and students around the state. On Thursday alone, an estimated 20,000 teachers rallied at the Capitol.

The bill will give teachers a $1,500 annual pay raise over each of the next five years. Last year, the average Oklahoma teacher's pay was $22,000 third-lowest in the nation.

Other reforms include smaller class size, improved programs for ''at-risk'' students, statewide parity in educational standards, elimination of teacher tenure, elimination of county school superintendents and a requirement that school board members have a high school diploma or its equivalent.

The emergency clause permits additional funds to be available for the new fiscal year beginning July 1. Without it, the measure could not take effect until 90 days after the Legislature's adjournment, which also would give opponents time to circulate an initiative petition calling for it a statewide vote.

(APRIL 20) UPI - After an initial rise, U.S. crude oil prices moved downward in early trading Friday as doubts gained sway whether the OPEC will be able to curb effectively cartel overproduction that has created a world glut.

On the New York Mercantile Exchange, the benchmark West Texas Intermediate which has risen $1.10 to $18.06 a barrel Thursday, was down 24 cents to $17.82 a barrel after rising as high as $18.45 a barrel. On the U.S. Gulf Coast cash market, prompt delivery WTI was down 25 cents to $17.80 a barrel.

"The market is a combination of traders worried about what OPEC can do and others who are skeptical that they will do anything," said Peter Beutel of Elders Futures Inc. As a consequence, Beutel said he looked for May delivery WTI prices on the Merc "to wiggle" between $17.70 and $18.45 a barrel.

The market situation was complicated by the fact that Friday was the last day of trading the May WTI contract. The June contract becomes the WTI spot contract Monday. The WTI June contract was down 21 cents to $18.66 a barrel in early Merc trading Friday.

The 13-nation Organization of Petroleum Exporting Countries pumps more than a third of the world's crude oil and has tried to support world prices by limiting cartel output to 22 million barrels daily for the first half of 1990.

Production of Kuwait and the United Arab Emirates way beyond their assigned quotas has, however, poured more crude onto the world market than current demand can absorb. Recent OPEC daily output has been near 24 million barrels.

Algerian oil minister and current OPEC president Sadek Boussena was reported Thursday as calling for an urgent meeting of OPEC's eight-member

monitoring and prices committee May 2 in Geneva "to stop the degradation" in prices. Boussena said the monitoring committee would be enlarged to include all 13 members of the cartel.

Boussena also said the scheduled May 25 Geneva full meeting of all OPEC oil ministers would be postponed until June 26, "in order to permit the measures envisaged to produce their full effect in the re-establishment of a better equilibrium between supply and demand."

On the European spot market, Britain's widely traded North Sea Brent was up 12 cents to $16.62 a barrel Friday after gaining 93 Thursday. The UAE's Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - was unchanged at $13.92 a barrel.

Many world crude prices rose nearly $1 a barrel Thursday after the announcement of the May 2 special OPEC meeting and reports indicating that Kuwait, the UAE and Saudi Arabia might lower their combined output by one million barrels a day. Saudi Arabia is he cartel's largest producer and in the past has raised or lowered its output to enforce OPEC quotas.

These reports combined Thursday to create uncertainty in the minds of traders who had taken "short positions" in anticipation of prices going lower, Beutel said. "There was a lot of uncertainty in people who were short." Prices rose when these traders bought out and took profits on their short positions, the analyst said.

NEW YORK (APRIL 20) UPI - Legendary actress Katharine Hepburn has decided to write her memoirs, publisher Alfred A. Knopf announced Friday.

Knopf and Ballantine Books have jointly acquired world publishing rights to the celebrated actress's memoirs.

Knopf will publish the hardcover edition in 1991 and Ballantine will publish the paperback edition at a later date, it was announced by Sonny Mehta, president of Knopf and Susan Petersen, president of Ballantine.

''This is certain to be a worldwide publishing phenomenon,'' Mehta said. ''For this is the book that so many, including ourselves, have fervently hoped Miss Hepburn would write but were uncertain that she would until now.

''We know from the considerable achievement of her first book, 'The Making of the African Queen,' that Miss Hepburn is a writer, that her humor and intelligence and the inimitable cadences of her voice translate with extraordinary vividness to the printed page.

''Now she has brought that talent to bear on a story that only she can tell, the story of her own life and her astonishing career.''

In 1987 Knopf published ''The Making of the African Queen,'' in which Hepburn described her experiences in making the 1957 movie and working in Africa with director John Huston and co-star Humphrey Bogart.

Mehta said the memoirs will take the form of reflections on the many aspects of Hepburn's life, including her childhood and family, her early days in New York, her long friendship with actor Spencer Tracy and her close associations with many of the leading actors, directors and producers of the past 50 years.

Describing her decision to write the book now, Hepburn said in a release, ''It's later than you think!''

REDLAKE, MN (APRIL 20) UPI - A wildfire that burned across more than 15,000 acres of grass and timberland in northwestern Minnesota remained out of control Friday, authorities said.

''They still have two helicopters working it,'' Minnesota Department of Natural Resources spokeswoman Mimi Barzen said.

The wildfire was the largest in Minnesota this spring, Barzen said. So far the state has had 879 fires that have burned 34,575 acres, she said. There were 265 active blazes Friday, she said.

Barzen said officials expected the weekend to be difficult, with warm, dry and windy conditions.

''With the weather conditions like they are going to be, we expect it

could be very severe,'' she said.

The grass and woodland fire started on the Red Lake Indian Reservation Thursday but quickly moved north off the reservation. A DNR official said crews did lit backfires Thursday afternoon, but that the flames jumped the line.

#90110u1288 04/20/1990 ~United Press International
MOSCOW (APRIL 20) UPI - The closest living relative of Vladimir Lenin, the founder of the Soviet state, Friday blamed Josef Stalin for the current unpopularity of her uncle and said ''sacred'' monuments to him in Eastern Europe should be preserved.

Olga Ulyanova, a daughter of Lenin's younger brother, Dmitri, told the newspaper Argumentia i Fakti that the fashionable criticism of Lenin is nothing less than ''ideological sabotage.''

''There is no end of attacks on Lenin in the mass media and television,'' she said. ''These attacks destroy our sacred national figure, destroy our Commmnist Party. Something sacred should remain.

''It is sad to read about the destruction of Lenin monuments by extremists and fascists in Eastern Europe,'' she said. ''Yet at the same time, capitalist countries like France, Finland, Sweden and Switzerland preserve Lenin Memorial museums and place plaques where he lived abroad.''

She regretted that the destruction of Lenin statues had even reached Georgia in the Soviet Union, saying ''Lenin was always for Georgian nationalism and defended it .... against Stalin's ideas on the question.''

There was also a recent proposal in the Moscow City Council to remove a bust of Lenin from the meeting hall because some members said it insulted them. The proposal was defeated by a communist group, which argued it would make the room look empty.

Lenin, real name Vladimir Ulyanov, adopted his nom de guerre while living as an exile from the Czarist secret police in several European countries.

Olga Ulyanov also said said Lenin's mother was Russian, refuting reports by anti-Semitic groups like Pamyat that Lenin's mother may have been part Jewish.

''We do not know anything certain about the ancestral line of Lenin's mother,'' Olga Ulyanova said. ''But she is Russian.''

Olga Ulyanova, who has a daughter and granddaughter, blamed despot Josef Stalin for making Lenin a saint. On Lenin's death in 1924, Stalin had him entombed in a mausoleum in Red Square, a communist shrine and place of pilgrimage since.

Lenin's memory remained sacrosanct until two years ago when theater director Mark Zakharov said on national television that Lenins' body should be removed from the mausoleum and he should be given a decent burial next to his mother and not remain in a place where tanks trundle by on army holidays.

Although the director of state television was fired for allowing Zakharov's suggestion to be broadcast live without censorship, Zakharov unleashed a floodgate. In February, historian Yuri Afanasiyev said Lenin started the Soviet police state. The works of Alexander Solzhenitsyn, now printed widely in Russia, blame Lenin for starting the Gulag labor camp system.

Olga Ulyanova took vigorous exception to the view that Lenin, not Stalin, inaugurated the Soviet police state with its crimes. ''This is lie,'' she said.

''We should know Lenin's real teachings, we should study his works, but not take his quotes and use them for different purposes,'' she said.

That suggestion in today's super-politicized Soviet society will probably be laughed at after decades of required courses on Leninism in school and millions of volumes of his works filling store shelves.

Lenin, who himself had no children, had two brothers - Alexander, who was older and was hanged for involvement in a failed plot to kill Czar Alexander III, and Dmitri, a doctor and also active in a minor way in the Communist Party.

Lenin had three sisters, Anna, Olga and Maria. Every child received a college education and all became revolutionaries against Czarist rule.

#90110u1295 04/20/1990 ~United Press International

VIENNA (APRIL 20) UPI - Albania's communist-run press carried appeals Friday for a ''deepening of democracy'' in the tiny Balkan country, hinting at support for political reform in Europe's last bastion of orthodox communism.

The appeals came a day after Albanian leader Ramiz Aliz, in a speech carried by the official news agency ATA, said his country was ready to improve relations with the United States and Soviet Union, ending decades of isolation.

Albania, Europe's poorest and most underdeveloped country, has had no diplomatic ties with Washington since 1939 and severed relations with Moscow in 1961 in a dispute over ideology. It broke with China in 1978 after that country restored ties with the United States, and has since followed a strict isolationist path.

ATA, in a review of national newspapers, focused on articles in the major dailies that appeared to call for Soviet-style reforms.

''Mounting steps to democratization,'' was the headline in the newspaper Zeri i Populit. ''Deepening of democracy, new solution on the socialist road,'' said the daily Bashkimi.

ATA said the articles dealt extensively with the speech by Alia, which was seen as signaling a major policy shift by the only remaining self-proclaimed Stalinist government.

In his speech at a communist party Central Committee meeting, Alia said restoration of relations with the two superpowers was possible if Moscow and Washington do not attempt to interfere with Albania's internal affairs.

''Taking into consideration the developments that have occurred, the problem of the re-establishment of diplomatic relations with the United States of America and the Soviet Union is on the agenda,'' ATA quoted Alia as saying.

But the Communist Party leader stressed that Albania was not prepared to follow its Eastern European neighbors in abandoning communism.

Bordered by Yugoslavia, Greece and the Adriatic Sea, the Maryland-sized country has has a rugged, mountainous terrain that has helped perpetuate a long tradition of isolation.

Albania emerged from World War II as a communist nation allied with Moscow. American attempts to establish formal ties with Tirana were rebuffed by the Marxist government, and relations were further damaged by a 1949 Anglo-American attempt to infiltrate groups of anti-Albanian exiles to encourage the overthrow of the regime.

#90110u1300 04/20/1990 ~United Press International
(APRIL 20) UPI - There may be a break in the impasse between Moscow and the wayward Soviet republic of Lithuania. Radio Moscow reports some Lithuanian legislators have asked the republic's March 11th declaration of independence be suspended until May 1st to initiate talks with the Kremlin. Soviet President Gorbachev has said there will be NO talks until the declaration is revoked.

In Norway, Lithuania's prime minister denied the Radio Moscow reports of a possible compromise. Kazimiera Prunskiene told Norwegian radio during a visit to Norway's parliament today- quoting here- ''This is clear disinformation. We will never withdraw our declaration of independence.'' Prunskiene says Lithuania is prepared for major hardship to win its goal of independence.

In Washington, there are calls for President Bush to get tough with Moscow over Lithuania. Republican Senator Robert Kasten of Wisconsin urged Bush to send a ''strong message'' to the Soviets, including economic sanctions. Said Kasten- quote- ''Let Gorbachev choose. Hands off Lithuania or get kicked out of the bank that can finance a Russian economic recovery.''

A four-day walkout by Oklahoma teachers achieved its goal- higher teacher salaries and education reforms. The Oklahoma Senate last night approved the education measures it had voted down just last week. The vote capped a week of protests by tens of thousands of teachers at the state Capitol in Oklahoma City and widening support from school officials and students around the state.

#90110u1322 04/20/1990 ~United Press International

LONDON (APRIL 20) UPI - More than two thirds of British lawmakers surveyed want to reduce the 28-week limit during which a woman may legally have an abortion, according to a survey released Friday by the British Broadcasting Corp.

As part of the Human Fertilization and Embryology Bill to be debated in the 650-seat lower house of Parliament next Monday and Tuesday, the legislators will also take up the issue of research of test-tube embryos.

Most lawmakers believe doctors should be allowed to check test-tube embryos for genetic defects before implanting them into a woman's womb, and the BBC survey found they will probably vote to enshrine the act into law.

Party leaders have not instructed members on how to vote on the two issues and some legislators say they have been flooded with far more mail from their constituents than over the controversial new poll tax.

Britain's laws since abortion was legalized 23 years ago have stipulated a 28-week limit, but the issue is up for debate given the medical advances that allow premature babies to be kept alive from an earlier age.

Prime Minister Margaret Thatcher has said she prefers a 24-week time limit for abortions, a view shared by opposition Labor Party leader Neil Kinnock.

According to the BBC survey of 383 legislators, 25 percent of the members wanted no change in the current 28-week limit in legal abortions, but 68 percent wanted the time reduced to periods ranging from 18 to 24 weeks. Some 35 percent opted for 24 weeks, it said. Seven percent were undecided.

''If exceptions are built in, to allow exceptions for handicaps and that sort of thing, then the limit should come down,'' said member of

Parliament Daffyd Wigley.

Pro-life activists, saying Britain has the most liberal abortion laws in Europe, claim more than 3 million fetuses have been aborted in Britain since abortion became legal.

In 1988, Liberal Party member David Alton tried to reduce the limit to 18 weeks because he said 92 percent of abortions done after this time were to healthy fetuses. That motion sparked protests by thousands of women in London, Glasgow and Liverpool, who argued that the scheme would lead to a return of backstreet abortionists.

On the issue of embryo research, legislators must decide whether to allow research during the first 14 days after the inception of an embryo in a test-tube, or ban it entirely. The BBC found 60 percent of members supported more research, 28 percent opposed, and 12 percent were undecided.

Scientists say they can now determine the sex of a test-tube embryo and whether it has any genetic disorders before it is implanted into a mother's womb. This can allow them to forecast whether an embryo had up to 200 genetic maladies, including muscular dystrophy.

#90110u1330 04/20/1990 ~United Press International
BEVERLY HILLS (APRIL 20) UPI - Pickfair, the legendary home of early film stars Mary Pickford and Douglas Fairbanks, is gone, soon to be replaced by an Italian-style villa for actress-singer Pia Zadora and her millionaire husband.

All that remained Friday of the symbol of Hollywood's golden age - an estate once said to be as well known as the White House - was a guest wing and remnants of the living room where Pickford entertained Albert Einstein Charlie Chaplin, and foreign royalty.

Zadora and her husband, Meshulam Riklis, bought the estate from Los Angeles Lakers owner Jerry Buss for $6.7 million in 1988. They plan to spend $5 million more to build a tile-roofed, Renaissance-style Venetian palazzo.

Contractors said that timbers of the estate, which grew from a $3,000 stable in 1911 to a melange of American Colonial styles, were eaten away by termites and couldn't be saved. "Once we got into it, it was like cancer," contractor Rob Myers told the Los Angeles Times.

"I regret (the demolition) very much," said Douglas Fairbanks Jr., the actor's son from a previous marriage, who remembers swimming in the house's famous kidney-shaped pool.

"I've got a funny feeling about it, because it's no longer Pickfair to me " said Phyllis Lerner, president of the Beverly Hills Society. "It really wasn't a pretty house, but my God, the guest list.!" The society raised no objections when the city granted permits for the new mini-palace at the site on Pickfair Way.

Pickford was known as "America's Sweetheart." She was loved and remembered for her roles in "Pollyanna," "Tess of the Storm Country," and "Little Annie Rooney." Fairbanks was the hero of "Zorro," "The Thief of Bagdad," and "Robin Hood."

Wallace Neff Jr., whose father helped Pickford and Fairbanks convert the old stable into their stately home, said, "I really am sorry to see it gone. I think it was maybe one of the most important homes of all the movie stars."

MOSCOW (APRIL 20) UPI - The Soviet Union found a new way to generate hard currency - exporting wild hares to improve the hunting stocks in other European countries.

The Soviet newspaper Nedelya (This Week) said 700 of the brown hares were sold to an Italian company for $70 each recently, adding that other companies are interested in buying more.

The hares, large mammals of the same family as the rabbit, were captured in the northern Caucasus and the Volga region where they are abdundant. The Italian firm planned to release them in hunting grounds of other European countries to ''improve the local hare populations'' by breeding, the weekly said.

Each female hare gives birth to an average of two bunnies three times a year. The Russian brown hares are large, weighing about 17.6 pounds each.

The animals were given medical checkups before they were exported, the newspaper said.

DETROIT (APRIL 20) UPI - Chrysler Corp. said Friday it was considering a $148-million project at its Trenton, Mich., plant to build its most powerful V6 engine ever and create about 550 new jobs.

The nation's No. 3 automaker said it applied to the downriver Detroit community last week for a 12-year tax abatement for the project at the plant, which now employs 2,700 workers and produces four- and six-cylinder engines.

Sources said the new powerplant will be the first 24-valve V6 engine ever built by Chrysler, and be used in its new mid-sized cars code-named LH. Those cars will be built at the Bramalea, Ontario, plant acquired by Chrysler in its 1987 takeover of American Motors Corp.

The new engines also are expected to power Chrysler's larger sedans like the New Yorker and Imperial models.

Chrysler's plans suggest it will further reduce its dependence on Japanese affiliate Mitsubishi Motors Corp. to supply it with V6 engines.

Mitsubishi has been supplying Chrysler with 3.0 liter V6s for its cars and minivans, which have already partly been replaced by the 3.3 liter version made at Trenton.

Chrysler also plans to add a 3.8 liter V6 engine derived from its 3.3 liter version for the 1991-model year, but it is only a stopgap measure until the more powerful multi-valve 3.5 liter engine is put in production, Nash said.

Its 2.2 liter and 2.5 liter fours will be replaced by a 16-valve 2.0 liter four by mid-1994, with a multi-valve 2.5 liter V6 to follow in 1995, he said, noting both engines will be suited for a wide range of Chrysler vehicles to help it meet any future governmental fuel economy pressures, Nash said.

DETROIT (APRIL 20) UPI - Ford Motor Co. said Friday it will idle its Lorain, Ohio, car assembly plant the week of Apr. 30 because of a shortage of dealer orders for its Thunderbird and Cougar cars made there.

This marks the sixth week this year Ford's Lorain car plant has been idled because of slow orders for the coupes, the No. 2 carmaker said. The plant, which employs about 2,700 workers on two shifts, builds about 5,600 cars a week.

Inventories of the Thunderbird and Cougar as of Apr. 10 stood at 62 and 59 days' respectively, which is normal for this time of year.

''But we just don't have any new orders for them,'' a company spokeswoman said.

Ford's Oakville, Ontario, plant which makes Ford Tempo and Mercury Topaz compact cars is idled this week because of a shortage of dealer orders, Ford said.

However, several other car and truck plants were either slated for daily or weekend overtime, including Ford's luxury car plant in Wixom, Mich., and its Wayne, Mich., assembly plant now building the all-new Escort subcompact car.

BANGKOK, THAILAND (APRIL 20) UPI - Three U.S. military teams departed Friday for Vietnam to investigate a U.S. warplane crash site and seek evidence of American servicemen missing in action since the Vietnam War.

''Three teams of U.S. technical experts are due to arrive in Vietnam today to work with Vietnamese experts to resolve the status of Americans missing in Vietnam,'' U.S. Embassy spokesman James Williams said.

Williams said the teams, including a recovery team and two investigative teams, will focus their efforts in Quang Binh and Quang Tri provinces in the area that once was the dividing line between north and south Vietnam. The 10th joint search since 1987 was expected to last up to 20 days.

The recovery team planned to help excavate the site where a U.S. warplane crashed in Quang Tri province, he said.

The teams included an explosives and ordnance disposal technician and an anthropologist as well as interpretors and search-and-recovery experts from the Pentagon's Joint Casualty Resolution Center and the Army Central Identification Laboratory in Hawaii.

The Americans were to be joined by personnel from Vietnam's missing persons office, Williams said.

The investigative teams planned to question residents in both provinces about incidents in which Americans were lost during the war.

There are 1,678 Americans unaccounted for in Vietnam.

#90110u1388 04/20/1990 ~United Press International

LONDON (APRIL 20) UPI - Harrod's department store is closing down its plush fur salon because of a decline in sales caused by warm winters, changing fashions and the impact of animal rights activists, officials said Friday. The fur salon, one of the world's largest, will close Saturday after keeping well-heeled clientele cozy and fashionable for more than 100 years.

Bargain hunters have snapped up about 1,500 garments worth about $5 million since a closing sale began Monday, offering 50 to 75 percent reductions. The store knocked $90,200 off a Russian lynx coat.

Harrod's spokeswoman Lindsey Watson said the salon was closing because fur sales have decreased by about 40 percent over the past four years. "We at Harrod's always respond to our customer's demands," Watson said. "Our customers have shown that they have not been wanting as many fur coats."

Watson cited a string of mild winters and recent economic pressures on the consumer as some of the reasons why people are shedding their furs. He downplayed the significance of anti-fur groups, who have become increasingly vehement in their campaigns.

"Animal rights lobbyists may have had some sort of knock-on effects, but we are keen to stress that we are not reacting to this," Watson said. "If in the future the trend turns and we find our customers want furs, obviously we may well open a fur salon again."

Animal rights activists have in recent years hurled fire bombs on House of Fraser stores, of which Harrod's is the flagship. Radicals have also harrassed people who wear fur, splattering wearers with paint and abusing them.

"We're very delighted that this has happened," said Mark Glover, director of Lynx, a Nottingham-based anti-fur group which has held demonstrations in Britain and launched extensive billboard and advertising campaigns. "It helps demonstrate the effectiveness of our campaign to dissuade them from buying and wearing fur," Glover said. "Its sort of a milestone."

#90110u1389 04/20/1990 ~United Press International

WASHINGTON (APRIL 20) UPI - Sen. Sam Nunn, D-Ga., proposed defense spending Friday above what House Democrats want but still far below what the Pentagon has proposed, saving money by cutting and slowing major programs and scaling down the Cold War pace of military activities.

The influential Senate Armed Services Committee chairman, in a speech setting the stage for the first debate on how to reap a federal budget ''peace dividend'' from reduced superpower tensions, also in effect set a political cap on the upper limit of what the Pentagon is likely to get for fiscal 1991, which starts Oct. 1.

He suggested stalling the rail-mounted MX missile, slowing a key submarine and submarine missile program and freezing spending for ''Star Wars'' nuclear defense research.

And while he deferred a formal suggestion on what should happen to the B-2 stealth bomber until Defense Secretary Dick Cheney makes his recommendation next week, Nunn signaled that the five planes now proposed are likely to be cut back to two or three.

Nunn said the plane must be adequately tested before Congress commits to production rates above the two or three a year it has approved in the past. Extensive testing is only just getting under way.

As a sign that intense pressure for deep cuts will drive the defense budget debate, Nunn conceded his figures - more conservative than those offered in the House - will come under intense pressure.

''I think the fight will be to try to keep defense even at the levels I'm talking about,'' Nunn told reporters after his speech, which was watched closely by the defense establishment because of his influence on defense issues.

Nunn proposed cutting up to $18 billion from the $306.9 billion in defense budget authority - permission for programs in fiscal 1991 and beyond - that Cheney has proposed. And in actual fiscal 1991 spending, called outlays, he proposed a cut of about $6 billion to $297 billion from the $303.3 billion Cheney is seeking.

Depending upon the method of calculating the defense budget, Nunn estimated his savings could reach as high as $255 billion in budget authority over five years, and $190 billion in foregone spending.

By way of comparison, the House Budget Committee suggests cuts of $21 billion in budget authority and almost $8 billion in outlays. The 1990 budget, if adjusted for the increase in inflation, equates to $315.8 billion in budget authority and $306.9 billion in outlays.

Senate Budget Committee Chairman James Sasser, D-Tenn., whose committee will set its defense recommendations next Tuesday, has suggested cuts deeper even than those offered by Nunn.

On major weapons, Nunn said the rail-based MX missile should be slowed because too much of the development and production work is going on simultaneously, raising the program's risk. Meanwhile, he said, Washington and Moscow should discuss a ban on multiple warhead mobile missiles as a step toward a ban on all land-basead multiple warhead missiles.

Nunn said work on the one-warhead truck-mounted Midgetman should continue, and initially the missile should be put into existing Minuteman silos.

Because of problems producing warheads for the new Trident submarine missile, he suggested slowing down both the submarine and the missile programs.

He said savings in the strategic weapons programs and ''Star Wars,'' formally known as the Strategic Defense Initative, could tally $3.5 billion in fiscal 1991, which starts Oct. 1, and up to $30 billion over five years.

Other potential savings Nunn suggested include:

-Troop cuts, particularly in Europe, that could save up to $15 billion.

-An emphasis on lighter, more mobile forces. The move might require a research investment initially, but those costs could be offset by reductions in heavy armor programs. He noted that, in terms of the weight of weapons systems such as the M-1 tank, ''The Army and the Marine Corps need to go on a diet.''

-Modest reductions in Navy deployments and operational patterns could save up to $15 billion in operating costs alone over five years.

-An increased emphasis on reserve units, with a parallel retirement of older weapons systems now in guard and reserve units. Those units, he said could get newer systems as active duty units are deactivated and modern gear is brought back from Europe.

-An increased reliance on simulators to cut the cost of military maneuvers.

#90110u1420 04/20/1990 ~United Press International

JERUSALEM (APRIL 20) UPI - Israel's High Court issued an interim order Friday halting the immediate eviction of Jewish settlers from a house owned by the Greek Orthodox Patriarchate but forbade more people from moving into the building in the Old City's Christian Quarter.

The three-judge panel of Israel's highest appellate court, however, also ruled that the Patriarchate could ask authorities to begin imposing a lower court eviction order against the Jewish families. The eviction process, once a notice is served, normally includes a 21-day grace period.

The 150 Jewish residents moved into the 72-room building in the Christian Quarter during Holy Week, prompting demonstrations and an outcry from Moslem, Christian and Jewish critics. The house is around the corner from the Church of the Holy Sepulchre, one of Christianity's holiest places and traditionally considered the site of Jesus' crucifixion.

Fueling the controversy were reports in the Israeli press that a grant of more than $3.5 million for the ''acquisition and preservation of property in Jerusalem'' was related to the Jewish occupation of the building. Justice Ministry officials denied the reports.

On Thursday, the underground leadership of the Palestinian uprising issued an order to execute Martyros Matossian, an Armenian who lived in the building, known as St. John's Hospice, for nearly 40 years and allegedly sold his lease to a Panamanian-based company. But the uprising leadership said implementation of the death sentence would be suspended indefinitely.

Matossian has disappeared since the Jewish settlers moved into the house April 11.

The legality of the lease transfer is before a lower court. Israel's High Court is deciding whether and when to evict the Jewish newcomers and the judges' decision Friday was considered a minor victory for the settlers, who had been ordered out of the house by a lower court.

The High Court announced it would hear arguments on the eviction issue Thursday and issued an interim order against ''evacuation until final judgment of the court.'' The court also prohibited new residents from living in the house. Friday's order was the second time a court had stopped the eviction. The first stay was overturned Tuesday on grounds its was improperly received.

On the political front, Labor leader Shimon Peres met with Rabbi Ovadia Yosef, spiritual leader of the ultra-Orthodox Shas Party, in another bid to win support from the Shas six-member faction in Israel's Parliament, the Knesset.

By failing to vote in a motion of no confidence March 15, five of the Shas Knesset members helped bring down the government of Prime Minister Yitzhak Shamir.

But after the vote, Shas indicated it would not support Peres in his

attempts to form a new coalition government.

''We do not look for seats ... but for a peace process that will bring hope and deliverance for the Jewish people,'' Peres said after his meeting with Yosef.

In the occupied West Bank and Gaza Strip Friday, merchants observed a commercial strike called by the outlawed Islamic Resistance Movement to protest the closure of Palestinian universities.

#90110u1427 04/20/1990 ~United Press International

COLUMBUS, OH (APRIL 20) UPI - World heavyweight boxing champion James ''Buster'' Douglas has filed for divorce, charging his wife of four years with ''gross neglect of duty'' and ''ill treatment'' of him.

In a divorce petition on file with the Franklin County Common Pleas Court, Douglas also said he and wife Bertha are ''incompatible.''

Douglas, who rose from small-town anonimity to win boxing's greatest prize just over two months ago, is seeking ''right, title and interest'' in their Columbus home and ''reasonable and equitable division'' of personal property.

The couple was married July 2, 1986. There were no children born during the marriage.

In the divorce petition, Douglas said he and his wife ''are indebted to various creditors, the extent of which will be fully disclosed when this cause comes on for final hearing.''

''I think James is a mature young man,'' Douglas's manager, John Johnson, said Friday. ''He's doing what he thinks is right. As long as James Douglas is happy, that's what's important, no matter what the circumstances.''

Neither Douglas nor his attorney could be reached for comment Friday, but Johnson said he does not think the divorce will affect the champion's career.

''I don't think he's going to let anything affect his dream to continue to be heavyweight champion of the world as long as he wants to be,'' said Johnson. ''What he does with his personal life is his business.''

Douglas filed for divorce Wednesday, and just a day later his wife denied they were having marital problems.

''No, that's a lie,'' she stated flatly when asked Thursday if it were true her husband was seeking a divorce.

Douglas had previously separated from his wife, but they later got back together.

Douglas, who grew up in a poor section of Columbus, won the heavyweight crown with a stunning 10th round knockout of former champion Mike Tyson Feb. 10 in Tokyo.

#90110u1434 04/20/1990 ~United Press International

BUENOS AIRES, ARGENTINA (APRIL 20) UPI - The acting chief of the Central Bank said Friday that Argentina needs at least three more months of a tight money policy to stabilize the austral, the nation's monetary unit.

Humberto Petrei, the acting director, said in an interview with United Press International the austral has been stable in the past seven weeks because the Central Bank is "not printing money."

Since Argentina does not now have access to large international credits, he said, a small deficit will immediately produce "a big impact on inflation." "There is currently a budget surplus," he said.

Petrei said there was need to continue the same tight money policy "for another three months until the economy is re-monetarized," meaning that businessmen and investors regain confidence in the austral.

The tight money policy, in both public spending and in printing money, is widely credited with ending hyperinflation in Argentina in the past two months.

The cost of living soared 95.5 percent in March, but was expected to drop drastically to 15 percent in April. The stability of the austral is widely credited with causing the inflation drop.

Nevertheless, the Central Bank is currently under pressure from exporters who say that the austral is overvalued. The the austral has gained ground against the U.S. dollar since Feb. 28, when it sold for a record high of 6,034 australes to $1. On Thursday the austral sold for 4,890 australes to $1, making the U.S. dollar about 20 percent cheaper than it was 51 days ago.

Petrei, who holds a doctor's degree in economics from the University of Chicago, said he didn't think the austral was overvalued. "The market sets the value," he said. "The dollar now costs about its average price that it had in the period 1983-1988."

Petrei said the Central Bank bought $23.5 million Thursday and $24.9 million Wednesday to increase the supply of liquid foreign exchange reserves, which he now estimated at $800 million.

He said "more reserves will be necessary" to have a cushion for the second half of this year, when export sales fall off, but he would not give an exact figure. "It will depend on how much external financing is available " he said.

Traditionally, Argentina, a grain exporter, earns most of its foreign exchange in the first half of the year, because of its harvest schedule. Petrei was appointed interim chief of the Central Bank following the resignation of Enrique Folcini March 12.

On July 1 Petrei, a professor of economics at the University of Cordoba, is to move to Washington as executive director of the Argentina-Chile area for the Inter-American Development Bank. His replacement at the Central Bank has not been formally announced.

#90110u1441 04/20/1990 ~United Press International
(APRIL 20) UPI - TODAY'S PEOPLE:

''THE WALL'' AT THE WALL: Former Pink Floyd leader Roger Waters is planning THE rock 'n' roll event of 1990 at the site of THE symbolic event of 1989. Waters will lead a $6.5 million production of his 1979 work ''The Wall'' on July 21 at Potsdamer Platz in Berlin, on the former no man's land along the Berlin Wall. No names yet - other than the Red Army chorus - but promoters say the extravaganza will feature some of the world's best-known rock performers, a cast of 300 extras, choirs and a symphony orchestra. Waters says he's staging the ''big show'' in memory of all nations' war dead. ''It is our hope that in years to come, national armies will do less hurting to each other,'' the British rocker said. ''It would be good to harness power for positive use.''

TELL ME, KATE: Seen the movies? In about a year, you'll be able to read the book. Acting legend Katharine Hepburn's memoirs are coming out in 1991 according to the Alfred A. Knopf publishing house. The four-time best acting Oscar winner and star of the ''Philadelphia Story'' and ''The African Queen'' - and so many other classics - will reflect on her childhood and family, her early days in New York, her long on- and off-screen association with Spencer Tracy and working with the leading actors, directors and producers of the past 50 years. Describing her decision to write the book now, the 80-year-old Hepburn said: ''It's later than you think!''

BUSTER SPLITS: James ''Buster'' Douglas, Mike Tyson's successor as world heavyweight boxing champ, now has something else in common with Tyson: a trip to divorce court. Douglas has filed for divorce, charging his wife of four years, Bertha, with ''gross neglect of duty'' and ''ill treatment.'' In a divorce petition filed in Ohio, Douglas also said he and his wife - who have no children - are ''incompatible.'' Douglas won the heavyweight crown Feb. 10 with a stunning 10-round knockout victory over Tyson, whose own divorce came after a brief, turbulent and highly publicized marriage to actress Robin Givens.

FROM PICKFAIR TO PIA'S PALACE: It's gone. Pickfair, the Beverly Hills home of early film greats Mary Pickford and Douglas Fairbanks - once thought to be America's most famous residence after the White House - has been demolished, save for a guest wing and remnants of the living room where the much-beloved Pickford entertained Albert Einstein, Charlie Chaplin and foreign royalty. The colonial-style residence, which contractors say was eaten away by termites and couldn't be saved, will be replaced by an Italian-style villa for actress-singer Pia Zadora and her milliproperty for $6.7 million and plan to spend $5 million more on their tile-roofed, Renaissance-style Venetian palazzo. ''It really wasn't a pretty house, but my God, the guest list!'' Phyllis Lerner, president of the Beverly Hills Society, said of the demolished Pickfair. ''I've got a funny feeling about it, because it's no longer Pickfair to me.'' But then again, Pia Zadora is no latter-day Mary Pickford.

BEANTOWN BANDS: The five Boston-bred hearthrobs of New Kids on the Block won act of the year honors in the Hub's version of the Grammies, the Boston Music Awards. The frenzy-stirring idols of the bubble-gum set also won in the pop single and video categories, for ''I'll Be Loving You Forever'' and ''Hangin' Tough,'' respectively. ''Music is all about expression and feelings, not about long hair and smoking marijuana,'' New Kid Donny Wahlberg told the teenybopper-dominated crowd that turned out to see the boys from Boston's Dorchester neighborhood. Among the other big winners: Aerosmith, Bonnie Raitt, and Pat Metheny.

GLIMPSES: Oscar winner Olympia Dukakis's Whole Theater in Montclair, N.J., is closing. Dan Gaby, board chairman of the theater - Dukakis was co-founder and artistic director - says the group would need up to $1 million to pay off accumulated debt, cover next season's expected deficit and create a cash reserve. Dukakis says she regretfully agrees with the decision. ... If you're keeping a list of those poking fun at the vice president of the United States, add the name Dan Quayle. Speaking Thursday at a fund raiser for California Republican attorney general candidate Dan Lungren, Quayle said the former Long Beach congressman is young, successful, and has a bright future. ''Those were all the same things they used to say about me, and look what happened to me,''. Kim Basinger, who already owns a town in her native Georgia, now reportedly is trying to buy a television station in the state. Basinger, who paid $20 million for the

small town of Braselton, is negotiating to purchase WFXL-TV, a Fox Network affiliate in Albany, Ga. The price is believed to be in the neighborhood of $3 million.

#90110u1459 04/20/1990 ~United Press International

ATHENS, GREECE (APRIL 20) UPI - Iranian President Akbar Hashemi Rafsanjani called for a holy war Friday against Israel after Iranians protesting the occupation of Jerusalem marched through the streets of Tehran, Iran's official media reported.

The late Iranian leader Ayatollah Ruhollah Khomeini in 1981 designated the last Friday of the Islamic month of Ramadan ''World Jerusalem Day,'' and Tehran radio over the past few days has been urging Moslems around the world to mark the occasion with marches and demonstrations.

''World Jerusalem Day'' is an ''ideal occasion for the Muslim nations to cry out the doom of Israel and to shout their hatred of the club of the arrogant powers for bolstering the usurping regime'' in Jerusalem, the official Islamic Republic News Agency said.

Addressing a Friday prayer congregation at Tehran University, Rafsanjani said: ''In defense of Islam, nothing is more important to the Iranian people than Jihad (holy war) against the regime occupying Palestine.''

Rafsanjani made the call after large crowds of Iranians chanting ''Death to Israel'' and ''Death to America'' marched through the streets of Tehran Tehran radio said.

The radio did not say how many people turned out for the march, except to say that the marchers converged from several directions on Tehran University for Friday prayers.

Rafsanjani was also quoted as saying ''global arrogance was busy arranging the immigration of millions of Jews to occupied Palestine from various parts (of the world), such as the Soviet Union and Argentina.''

He charged that ''certain Islamic societies have (also) helped Israel to materialize its sinister plot,'' the news agency said.

''At present we can see the hands of Egyptian rulers in the influx of Jews into the occupied lands, a treason for which there is no justification,'' the agency quoted the Iranian president as saying..

Since Khomeini's death, Iran's ruling clerics have organized marches and demonstrations in Tehran and other major Iranian cities every year to mark ''World Jerusalem Day.''

But apparently the idea has not caught on elsewhere among Moslem states.

The English language newspaper Tehran Times said Thursday: ''It is regrettable that in spite of the great enthusiasm shown by Moslem masses, many governments in Islamic states have not welcomed the Day.''

''They have actually chosen to suppress the related demonstrations in indirect and, at times, direct ways,'' the news agency quoted the newspaper as saying.

#90110u1475 04/20/1990 ~United Press International

GDANSK, POLAND (APRIL 20) UPI - Solidarity backed Lithuania's independence drive Friday and endorsed Lech Walesa's years of union leadership after he apologized for his strong-handed rule, saying he ''had no time for democracy."

The union then began considering restructuring leadership roles in a way likely to curb Walesa's power should he be re-elected union chairman.

Members of Solidarity, whose drive led to the downfall of Poland's communist government, unanimously passed a resolution backing Lithuania's declaration of independence during the second day of a union congress.

''The congress supports the decision of independence of March 11,'' it said. ''We call on all nations and governments to recognize this declaration of independence. We hope that soon Europe will be the home of free nations.''

The Solidarity delegates then gave a standing ovation to Lithuanian deputy Czeslaw Okinczyc, who was attending as an observer. Walesa congratulated Okinczyc, who stood and flashed a V for victory sign.

At a news conference, Okinczyc said Prime Minister Tadeusz Mazowiecki had promised unspecified economic aid to Lithuania, which is confronting a Soviet-imposed cutoff of oil supplies and cuts in natural gas.

Okinczyc said Lithuania will run out of Soviet oil in about 6 weeks and said Mazowiecki agreed to renovate a railroad line between Poland and Lithuania which was built before World War II.

Poland has not pledged aid to Lithuania, but the timing of Okinczyc's statement raised speculation that Warsaw would answer Vilnius's call for economic support.

Walesa, in his last speech as union chairman before seeking re-election

Saturday, apologized for his one-man rule but reminded critics that the union under his leadership achieved victory for Poland.

Observers believed Walesa would be re-elected, with one of his opponents possibly serving in a proposed deputy position. Solidarity sources said Wladyslaw Frasyniuk of the southwestern province of Wroclaw, Michal Boni and Zbigniew Bujak of Warsaw and Andrzej Slowik of Lodz may compete for union leadership.

Walesa, his voice shaking with emotion, recalled the moment whe he jumped the shipyard wall in 1980 to lead the strike triggering the rise of Solidarity, the East Bloc's first free trade union.

''You liked my jump over the wall and you elected me to drive the vehicle called Solidarity,'' said Walesa. ''If I obeyed some of you, then I would have crashed the vehicle. I had no time for democracy.''

He said the union had to operate under martial law imposed on Dec. 13, 1981, by Gen. Wojciech Jaruzelski, now president, with thousands of activists jailed. He said quick Solidarity decisions by one leader were needed.

''I apologize for offending some of you,'' he said. ''I forgive you and ask your forgiveness.''

The union congress voted 357-1 with 32 abstentions to endorse Walesa's nine-year leadership of the movement by approving a report summarizing the union's activities during that time.

Walesa received a standing ovation and flashed the victory sign after the endorsement vote.

But in a move apparently aimed at curbing Walesa's power should he be re-elected during a vote on the chairmanship on Saturday, Jan Waszkiewicz of Silesia in southwest Poland proposed a deputy chairman position.

Waszkiewicz said the deputy chairman could lead the union in case Walesa became Poland's president. ''The union has to be prepared for such a possibility,'' he said.

Walesa said this month he wants to succeed Jaruzelski as president because the communist leader has not done enough to reform the economically ailing country.

One Solidarity leader, Aleksander Malachowski, told Walesa he should not be bitter because his critics only wanted him to change his style.

''We struggle not against Walesa, but for (the) Walesa we want to have,''

he said. ''You are the most respected leader of the nation. You are a marshal who won the war.''

#90110u1478 04/20/1990 ~United Press International

WASHINGTON (APRIL 20) UPI - The Soviet economy plunged into a state of ''near crisis'' last year, registering its worst performance since Mikhail Gorbachev assumed power and making daily life miserable for most citizens, U.S. intelligence agencies said Friday.

The study by the CIA and the Defense Intelligence Agency said there was ''little prospect'' the Soviet economy would improve in the near term and the possibility existed that economic conditions could ''deteriorate sharply.''

''The economy is in an unstable state, and a single major event could lead to a substantial drop in output and bring about chaos in the distribution of both producer and consumer goods,'' the report said.

The agencies told the Joint Economic Committee that Gorbachev fulfilled his pledge to cut defense spending, reducing expenditures 4 percent to 5 percent in real terms in 1989, and that further cuts are likely the next two years.

But CIA officials testified that Gorbachev failed to make consumer goods more available by shifting investment away from defense and heavy industry - largely because his economic reforms have not gone far enough.

The result was that shortages worsened, rationing was introduced in many areas, prices rose at their fastest rate since 1950, industrial production was flat, energy production fell for the first time since the 1940s and railroad bottlenecks were ''massive.''

''The Soviet leadership's economic policies have plunged the economy into a near crisis,'' said John Helgerson, deputy CIA director. ''Soviet economic performance was abysmal in 1989 - the worst since Gorbachev took over.''

''Widespread breakdowns in transporation and distribution networks interfered with the delivery of all kinds of goods from producers to consumers, causing goods to pile up in freight cars and warehouses, instead of reaching store shelves,'' the report said.

''Inadequate supplies of consumer goods and inequalities in their distribution contributed to rising social tensions and played a role in the growing number of strikes and ethnic clashes. The combination of inflation and shortages made daily life miserable for all but the most

privileged segments of society.''

The report said an ''erosion in labor discipline and record losses of work time'' were major factors in the economic decline. At the same time, crime increased 32 percent - with thefts and violent robberies up 70 percent.

Good weather led to an increase in agricultural production. But the increase only reversed a two-year decline and brought grain supplies back to the levels of 1986-87. Meat production edged up 2 percent, but part of that growth resulted from increased slaughtering because of livestock feed shortages.

The report said per-capita consumption rose about 3 percent, but that most of the growth resulted from increased sales of alcohol and imported goods.

Well-publicized efforts to shift production at defense plants to civilian uses ''fell short of plans and far short of satisfying demand,'' said Dennis Nagy, the Defense Intelligence Agency's acting director for foreign intelligence.

At the same time, income increased 13 percent, meaning consumers had money to spend but could not find things to buy. The report said the gap between demand and supply, combined with government budget deficits, led to inflation.

Prices increased 6 percent at state-run stores that supposedly are subject to price controls, and price hikes were several times higher on the black market, it said. Meat and sausage were rationed in one-fifth of major cities; soap, detergent and sugar were rationed almost everywhere.

The government responded to the shortages by increasing imports, running up a $1.4 billion trade deficit. That forced the government to resort to continued heavy borrowing and brisk gold sales, the agencies said.

The report faulted Soviet leaders for removing centralized controls ''before the 'economic levers' needed to replace them were in place.'' State businesses, for example, were given greater control over what they produced, but did not know what consumers wanted because of the absence of a true market economy.

In addition, Helgerson said, the Soviets ''were just plain unlucky,'' trying to introduce economic changes amid rising ethnic tensions and natural disasters such as the Armenian earthquake.

(APRIL 20) UPI - Influential Senate Armed Services Committee Chairman Sam

Nunn of Georgia is proposing sharp cuts in the Pentagon budget for fiscal 1991, saying reductions now could save almost 200-BILLION dollars through 1995. Nunn outlined his defense spending proposals in a speech on the Senate floor this morning. But he said cuts proposed in the House- where liberal Democrats went beyond the recommendations of party leaders- are too deep.

President Bush says that for now he will remain silent on how and when the United States will respond to a Soviet crackdown on Lithuania. Administration officials say possible U-S retaliatory action against the Soviet Union likely would involve trade. Bush is on the second day of a four-day trip with stops at Republican fund-raisers in Birmingham, Alabama and Orlando, Florida.

Solidarity leader Lech Walesa- his voice choked with emotion- asked for forgiveness from union delegates at the first congress since martial law was declared in Poland. Walesa apologized for his strong-handed rule over the union in the last nine years but said he did NOT always- quoting now- ''have time for democracy.'' Walesa made his last speech as Solidarity leader. His successor will be elected tomorrow.

Officials say a pilot was killed when his twin-engine plane went down after two take-off attempts at Love Field in Dallas. City officials say D-A Johnson aborted one take-off because of engine troubles and was making a second attempt when the plane clipped a power line and crashed into the street in a fireball.

SRINAGAR, INDIA (APRIL 20) UPI - Moslem militants, taking advantage of the first curfew relaxation in 15 days, wounded two security officers Friday in the Moslem-dominated Kashmir region, police and residents said.

Police said Moslem militants during a five-hour curfew relaxation opened fire on a paramilitary patrol team in the outskirts of Sopore, injuring two security officials.

Authorities relaxed curfews across the northern Jammu and Kashmir state capital of Srinagar, 400 miles north of New Delhi, and other nearby towns of Sopore, Baramullah and Anantnag, police said.

They also halted house-to-house searches for suspected Moslem separatists, who are waging a bloody campaign for the secession of Kashmir from India.

However, security was tight in Srinagar during curfew relaxation with gun-toting security personnel closely watching residents, who rushed to grocery shops to replenish their dwindling food stocks.

Most of the shops remained closed, however, because they had nothing to sell, one resident said. The shops that were open were crowded with buyers.

The situation was tense as many residents came out of their homes for the first time in 15 days.

About 100 women held a protest demonstration, demanding the release of hundreds of militants who were arrested during house-to-house searches.

More than 50,000 Moslems used the curfew break to offer prayers in Srinagar's main mosque, located in the center of Srinagar, state-run radio said.

The curfew was slapped in the valley on April 6 to help security forces track down three hostages and their abductors.

The hostages were killed April 11 after the government rejected demands it trade their lives for the release of three militant members.

The hostage slayings ignited a storm of indignation across India and the government expanded the hunt for the kidnappers into a massive roundup of suspected militants.

Moslem separatists have been waging since 1988 a bloody campaign for the secession of Kashmir from India, but the situation in the state worsened with mass uprising that erupted in mid-January against Indian rule of Kashmir.

More than 250 people have died since the insurrection began with the killing of protesters demanding independence.

Militants pressing for an independent Kashmir say a separate nation is necessary because the interests of the area's 4 million Moslems have been consistently neglected by the Hindu-dominated New Delhi government.

#90110u1538 04/20/1990 ~United Press International

SODDY-DAISY, TN (APRIL 20) UPI - The FBI said Friday it has entered the investigation into the suspected firebombing of the home of the Nuclear Regulatory Commission's chief inspector at the troubled Sequoyah Nuclear Plant.

The fire gutted the home of NRC senior inspector Ken Jenison Thursday after he received four threatening phone calls, NRC spokesman Ken Clark said. Jenison discovered his car had been sabotaged as he left the plant to go to his burning home, Clark said. No one was hurt.

The NRC said it believes the fire was retaliation for Jenison's work at the nuclear power plant and labeled it the worst violence against an inspector in the federal regulatory agency's history.

''We have a rather intensive investigation going,'' said William Baugh, special agent in charge of the FBI in Knoxville. ''Every agent in the southern part of the state is working on this.''

Hamilton County sheriff's officials labeled the fire ''suspicious in origin'' until the investigation's completion. A smashed window led investigators to conclude the home might have been firebombed, officials said.

The FBI refused comment on whether any suspects had been identified. Another NRC inspector at Sequoyah said authorities suspect disgruntled ex-employees of the Tennessee Valley Authority, which owns the plant near Chattanooga.

''From the nature of the threatening phone calls, it sounded like the caller was upset that he had lost his job because of some of the things Ken had done,'' NRC inspector Paul Harmon said.

''But there's nothing he's done that we could point to. This is kind of out of the blue to us. You always hear some grumbling but we haven't had any indication that people are too upset with us,'' Harmon said.

TVA, which has been cutting costs to control electric rates, announced in March that it will lay off 230 employees at Sequoyah, a twin-reactor plant plagued by safety violations.

The plant was closed four years for safety problems until 1988. Last week, the NRC staff proposed fining TVA $75,000 for two safety violations at Sequoyah and $240,000 for agency retaliation against engineers who raised safety concerns at Watts Bar Nuclear Plant, which is under construction at Spring City, Tenn.

Jenison, who could not be reached for comment, is the senior of three NRC inspectors at Sequoyah.

He received two threatening phone calls at home Wednesday evening and two more at the plant Thursday before the fire at his house 5 miles away, officials said. His wife and two children were not home at the time.

Thursday's caller told Jenison his house would be burned, and he started for home when a neighbor phoned to report the fire, Clark said.

''He said that when he left the plant to get in his car to go see about his home, he noticed that on one wheel of the car, one lug nut was missing and three were loose,'' Clark said.

TVA said it is ''shocked and outraged'' by the fire and began an internal investigation to determine whether any employees are responsible. Clark said it is a violation of federal law to threaten a federal inspector.

#90110u1552 04/20/1990 ~United Press International

LONDON (APRIL 20) UPI - Police in Manchester demanded Friday that the central government reimburse the city for more than $1.6 million spent trying to quell the uprising in Strangeways Jail, where seven inmates remained in occupation.

As the siege dragged throught its 20th day, Ivor Serle of the Strangeways Prison Officers' Association claimed that hundreds of guards were ready to storm the facility when the uprising began on April 1, but the plan had been stopped by the Home Office.

''The governor was just about to say 'go' when he was told not to go by people much higher than him,'' said Serle.

Serle called for crack troops of the Special Air Service to break the stalemate by landing on the roof and flushing out the defiant remainders.

The Home Office replied that Serle misunderstood the siege and that it did not want to endanger any officers.

Serle said the inmates held the upper floors defended by barricades, catapults that could fire ball bearings 200 feet and explosives made of

boot polish and sugar. Cast iron fixtures would be dropped on anyone trying to reach the upper floors from below, he said.

The seven holdouts again showed little sign of heeding surrender calls.

Messages on a blackboard visible from outside included claims that they had months of food supplies, that using SAS troops would only embarrass prison authorities and that a game show hostess should be brought in as a negotiator.

The 45-member Police Authority of Manchester met and voted unanimously to charge the Home Office with all expenses for the uprising, calculated at more than $1.6 million.

''It has been a major logistical excerise,'' an official said. ''This does not take into account the investigations coming out of the riot.''

Most of the money has been spent in overtime pay, but supervising comandeered police cells, escorting surrendering inmates to other jails and dealing with casualties also have strained municipal resources, he said.

The official estimated the wrecked jail would take more than $164 million to rebuild, another cost to be met by the central government.

Authorities have been trying to wear the inmates down with water hoses, swooping helicopters and driving noises, but the tactics have failed to break the will of the seven holdouts.

#90110u1574 04/20/1990 ~United Press International

WASHINGTON (APRIL 20) UPI - With both sides aiming toward the May summit, the United States and the Soviet Union resumed high-level arms control talks Friday despite the shadow cast over relations by tensions over Lithuania.

Deputy Foreign Minister Viktor Karpov, the Soviets' ranking arms control negotiator, met for 1 hour and 45 minutes with Secretary of State James Baker and his top aides, including Undersecretary of State for Security Reginald Bartholomew.

A U.S. official later described the arms control portion of the meeting, the major focus of the session, as ''productive and forthright.''

But State Department spokeswoman Margaret Tutwiler noted, ''Secretary Baker took the occasion to raise Lithuania and U.S. policy on Lithuania.''

Tutwiler also said the Soviets have confirmed that petroleum supplies to Lithuania have been cut off and the flow of natural gas has been ''sharply reduced.''

U.S. officials, including President Bush, had emphasized in recent days that the United States, while considering possible responses to the Kremlin pressure, was uncertain how far Moscow had gone in its energy embargo against the rebellious Baltic republic.

Soviet Ambassador Yuri Dubinin, who attended the first hour of the Baker-Karpov meeting, told reporters at the State Department, ''We are very much interested in a peaceful solution of all these difficulties based on a fair and honest dialogue.''

Asked about the occupation by Soviet troops of a printing plant in Vilnius the Lithuania capital, Dubinin said, ''The laws of the Soviet Union were violated by Lithuania and (President Mikhail) Gorbachev was instructed by the Supreme Soviet to restore legality and to resolve the crisis by way of dialogue.''

''Put yourself in our position,'' Dubinin said. ''If the constitution and the laws of the United States were violated, what would you feel before such a situation?''

Karpov, leaving the building 45 minutes later, did not speak to reporters.

According to Tutwiler, Karpov was to return later Friday to resume the detailed negotiations with Bartholomew on issues left unsettled by the three days of meetings earlier this month between Baker and Soviet Foreign Minister Eduard Shevardnadze.

Those talks led to the announcement that Bush and Gorbachev would hold their second summit May 30-June 3, beginning in Washington.

Baker and Shevardnadze are trying to develop a basic text on reducing strategic nuclear missiles by 50 percent in time for initialing at the summit, but both have said it is unlikely a treaty can be finished in time.

Chief among the unsettled issues is how to deal with cruise missiles, the jet-powered missiles that can be launched from either planes or ships.

It had been agreed in February during talks in Moscow that sea-launched cruise missiles - SLCMs - would be treated in a separate side-letter to a strategic arms reduction treaty. The question of verification of any ban would be side-stepped by ''political declarations'' from both sides that they were not adding any new weapons.

The Soviets, however, have upset that agreement by insisting on stricter

terms for the voluntary limitation of SLCMs.

Baker and Shevardnadze are scheduled to meet again May 16-19 in the Soivet Union for a final try to clear up unresolved arms issues before the summit.

#90110u1583 04/20/1990 ~United Press International

BONN, WEST GERMANY (APRIL 20) UPI - West German authorities arrested a Foreign Ministry official on suspicion of espionage Friday - the fourth alleged spy uncovered in the ministry in the past two weeks, a ministry spokesman said.

The spokesman for the State Prosecutor's Office said authorities also arrested a member of the West German defense force, who is also believed to have spied for the former communist authorities in East Germany.

Police sources said West German spy-hunters have received a wealth of information on East Germany's intelligence network under the former hard-line communist regime, which led to the recent arrests.

The spokesman said the ministry official arrested Friday had served for 35 years in the foreign service and had carried out diplomatic assignements Austria, Britain, Ireland and Italy.

He said the official allegedly worked for the former East German intelligence services since 1975.

The spokesman said the defense force member who was arrested Friday had worked in the West German Armed Forces Information Center since 1972. As a programmer and later a systems technician, he had access to privileged data that he passed on to his East German superiors.

On April 4, a West German official working at the North Atlantic Treaty Organization headquarters in Brussels was arrested under the suspicion he was an East German agent.

A few days later a diplomat working for the West German Embassy in Sri Lanka and another, who worked for the Paris-based United Nations

Educational, Scientific and Cultural Organization were arrested as suspected spies.

#90110u1606 04/20/1990 ~United Press International

CHICAGO (APRIL 20) UPI - Soybean complex futures rallied to session highs about midday Friday on the Chicago Board of Trade, then gave up some of the gains to profit-taking during the final minutes.

The grains were mixed at the close following a day of choppy activity.

Several contract highs were established in corn, soybeans and soybean oil as professionals and commission houses dominated the buying.

The bullish attitude in the soy complex was based on the continued lack of farmer selling and the possibility that exports from Brazil will be lighter than had been expected.

Soybean oil had additional support from indications of tight supplies as the market prepares for the first notice day for May contracts on April 30.

Corn was lower, but had underlying support from rumors the Soviet Union may have bought 1 million tons. Commercials were on both sides of the corn market.

May wheat was higher in thin trading while new-crop wheat was pressured by favorable weather conditions in the Plains.

Country movement was light.

At the close, corn was up 1/4 to off 1 3/4, soybeans up 4 1/4 to 5 1/2, wheat up 1 3/4 to down 1 1/2 and oats off 1/2 to up 3/4 cents.

#90110u1612 04/20/1990 ~United Press International

SPACE CENTER, Houston (APRIL 20) UPI - The American crew of the U.S. space shuttle Columbia will attempt a ham radio chat with two Soviet cosmonauts aboard the Mir space station next month in an unprecedented bit of ''glasnost'' on the high frontier.

With the shuttle Discovery poised for blastoff Tuesday from the Kennedy Space Center, Columbia is scheduled to be hauled to its launch pad Sunday for takeoff May 16 on a Spacelab astronomy mission.

On board will be commander Vance Brand, co-pilot Guy Gardner, Jeffrey Hoffman, Robert Parker, John ''Mike'' Lounge, Ronald Parise and Samual Durrance. Astronomers Parise and Durrance are the first non-professional astronauts to be launched aboard a shuttle since the Challenger disaster.

The seven-member crew, the largest since the 1986 shuttle accident, will work around the clock in two shifts throughout the mission, using a battery of high-tech payload-bay telescopes to study ultraviolet light and X-rays emitted from energetic astronomical objects.

In addition to his other duties, Parise is responsible for overseeing the shuttle amateur radio experiment, or SAREX.

''We've had about 800 schools contact us with a desire to talk to the crew directly via amateur radio,'' he said Friday at a news conference. ''We're not going to be able to accommodate nearly that many.''

But the astronauts will talk with as many ''hams'' as possible - possibly as many as 40 school groups - along with Soviet cosmonauts Anatoly Solovyev and Alexander Balandin, who were launched to the Mir space station Feb. 11.

''It turns out the two crew members who are on Mir currently are both amateur radio operators and they have equipment on board to communicate with people on the ground,'' Parise said. ''We're going to try to do a ship-to-ship contact with them.''

If successful, the radio linkup will be the first in history between Soviet and American spacecraft that did not involve relays from the ground.

Appropriately enough, 1990 is the 15th anniversary of the only joint U.S.-Soviet space mission ever conducted, the Apollo-Soyuz Test Project in 1975. One of the three Americans on board for the historic orbital docking was Brand, making the first of his three space flights to date.

''This has never been done before,'' Parise said. ''There has not been any communications between a U.S. and Soviet spacecraft. In fact, I believe during Apollo-Soyuz it was via ground stations. This will be by amateur radio and it will be a first.''

Columbia's flight represents several other space ''firsts,'' among them the commander's age. Brand, who turns 59 May 9, will be the oldest human to ever fly in space, Soviet or American.

The shuttle's seven-member crew is the largest of the post-Challenger era and Parise and Durrance will become the first payload specialists to be launched since school teacher Christa McAuliffe and satellite engineer Gregory Jarvis were launched aboard Challenger.

Parise said Soviet space officials welcomed the upcoming ham radio experiment, although he said it was difficult to predict how many opportunities the astronauts might have to attempt the space chat.

''They were very enthusiastic about it,'' he said. ''They contacted the Radio Sport Federation in the Soviet Union, which is the amateur radio organization over there, and started planning with them how we would bring this off.

''The Soviets then contacted their own official organizations and asked if there was any problem with it and they got an enthusiastic response. So I think everybody's real excited about it and I hope it will come off. I think we've got a real good chance of being able to do it.''

#90110u1633 04/20/1990 ~United Press International

CHICAGO (APRIL 20) UPI - Bad commercial real estate loans sent First Chicago Corp. earnings into a tailspin in the first quarter but Chairman Barry Sullivan reassured stockholders Friday that the worst is over.

Still, the bank faces at least two lawsuits by stockholders who charge directors and senior officers failed to exercise due caution in making real estate loans and artificially inflated stock prices by concealing the shaky status of those loans.

Sullivan, meeting with reporters prior to the stockholders' meeting, denied the allegation. "We've had some real estate problems, and so has much of the banking industry," Sullivan said. Asked his reaction to the shareholder lawsuits, Sullivan snapped, "See you in court."

First Chicago Friday reported first-quarter earnings of $68.6 million, or 93 cents a share, 45 percent off the $124.7 million, or $1.85 a share, in last year's first quarter. The decline was due largely to an $85 million

increase in the provision for loan losses. Revenues for the quarter increased to $639.5 million, compared with $582 million in last year's first quarter.

The provision for credit losses was increased to $160 million in the first quarter, compared with $50 million a year ago and $75 million in the fourth quarter. Of the $160 million total, $104 million was allocated for commercial loans and $56 million for consumer credit.

The real estate loan problems pushed First Chicago's non-performing loan total to $1.27 billion, or 3.5 percent of the loan portfolio, compared with $792 million, or 2.8 percent, a year ago and $953 million, or 3.2 percent, at the end of the fourth quarter.

First Chicago announced March 30 that its first-quarter earnings would be off sharply because of increases in loan-loss provisions. But a class action suit filed Wednesday charged bank officers and directors knew of the problem in mid-March and failed to advise stockholders.

Sullivan strongly denied allegations bank officers told stock analysts of First Chicago's problems with its real estate portfolio - and specifically with $200 million in real estate loans to VMS Realty Partners - while keeping shareholders in the dark. VMS has been reported to have liquidity problems that prompted some lenders to foreclose on certain VMS properties.

Sullivan said if analysts knew of problems with First Chicago's loans to VMS, they did not get the information from anyone at First Chicago. He also denied the suit's allegations that First Chicago exercised too little care in making loans, saying the bank has been more cautious than many of its competitors, which have invested agressively in commercial real estate loans.

Another suit filed earlier this month charged the bank holding company knew it faced major problems with its real estate loans long ago but kept silent to maintain artificially high stock prices.

Sullivan said he and other bank officials have been "concerned about the real estate area" for some time and have made several public statements expressing their concerns. But he said they were unaware of the extent of the problem.

He said he and other officers had no reason to believe real estate loan problems would adversely affect the prospects of First Chicago stock. "During the window period in January I bought 15,000 shares of First Chicago stock at $35.125, if I remember right. I was then and now optimistic about the prospects of First Chicago," he said.

"Credit issues have caused First Chicago to get off to a slow start in

1990, but going forward, we believe that the loan loss provision will return to normal levels," Sullivan told shareholders at Friday's meeting. "We are optimistic about our prospects for the remainder of the year," he said.

He told reporters the bank will increase the frequency of reviews of its commercial real estate loans, and has adopted a "fairly grim view" of the market for assessing such loans and loan applications.

Sullivan said First Chicago expects no further problems with its commercial real estate loan portfolio that would require further increases in loan-loss provisions. And he emphasized that his view was based primarily on the "grimness of our outlook" on commercial real estate rather than any expectation of improvement in that market.

MEMPHIS, TN (APRIL 20) UPI - Rep. Harold Ford, the only black congressman in Tennessee history, predicted a quick acquittal in his influence-peddling trial Friday, grinning and telling crowds of courthouse supporters ''I feel good!''

Ford, a flamboyant eight-term Democrat, strode through the packed courtroom shaking hands as his lawyer completed an emotion-charged closing argument to the federal jury in his nine-week trial.

''I thought it was very touching,'' Ford said of William McDaniels' final plea to the jury. ''I think he showed that they don't have any evidence. I'm definitely not worried.

''I've said all along that this is a vendetta by (Assistant U.S. Attorney) Dan Clancy and the federal government and I think the jury can see that. They've been after me for a long time.

''I'm ready for this to go to the jury. I don't think this will take very long,'' said Ford, who faces 95 years in prison if convicted of all charges.

Ford, 44, whose family runs a powerful political machine in Memphis, is charged with 19 counts of bank fraud, mail fraud and conspiracy to defraud the government. The trial could go to the jury of eight blacks and four whites Monday.

The government contends Ford took $1.5 million in bribes disguised as loans from banks controlled by brothers Jake and C.H. Butcher Jr. in 18 payments between 1976 and 1983. In return Ford delivered the votes of Tennessee's most populous city to Jake Butcher in the banker's

unsuccessful race for governor in 1978, prosecutors charge.

Clancy told the jury Thursday the loans actually were bribes and said Ford did not repay them until 1983 under pressure from federal regulators who were closing the Butcher banks.

The prosecutor recounted evidence that Ford lived extravagantly, buying a Mercedes Benz, two homes and a $10,000 oriental rug while telling the government he was nearly bankrupt.

In his closing arguments, McDaniels defended Ford's lavish lifestyle, saying ''that is not a crime,'' and accused prosecutors of political motivation.

''If you are to remove a political leader, do it at the ballot box, not from the jury box,'' McDaniels said.

McDaniels ridiculed the government's key witness, Butcher associate Jesse Barr, as a ''scoundrel and outlaw'' and told the jury that prosecutors fell ''woefully short'' of proving their charges.

''Where's that proof? It doesn't exist,'' he said. ''Harold Ford is not in this courtroom because he has sacrificed any of you. You know that's not right. Return him to his family with this verdict and return him to the work he does best.''

The Butchers controlled a billion-dollar network of 20 banks in Tennessee and Kentucky until it collapsed under the weight of bad loans in 1983. The Butchers are serving 20-year federal prison sentences for funneling millions of dollars in fraudulent loans to themselves.

The government called neither Butcher to testify. Instead, they relied on the testimony of federal bank regulators and Barr, who is serving an 18-year sentence for bank fraud.

Barr testified the Butchers paid the congressman for a place on the ''Ford Ballot,'' a list of favored candidates distributed around Memphis before each election. Ford told reporters the payment was for the cost of poll workers.

Butcher associates Karl Schledwitz, David Crabtree and Douglas Beaty are standing trial with Ford. They are accused of helping the Butchers pay Ford by passing loans through bogus channels.

PRAGUE, CZECHOSLOVAKIA (APRIL 20) UPI - Thousands of Interior Ministry

police and soldiers were called out to provide security for Pope John Paul II this weekend in the first-ever papal visit to Czechoslovakia, Czech church officials said Friday.

More than 3 million people were expected to attend three masses by Pope John Paul II in his second visit to a Warsaw Pact nation. He had visited his native Poland three times.

Shop windows along Wenceslas Square were filled with commemorative plates, pictures and other papal memorabilia. Even bananas, which are only infrequently available in the capital, were in abundance as they were in the past for visits of top communist leaders such as Leonid Brezhnev.

''There are bananas in the stores again. Somebody must be coming,'' one Czech said facetiously.

Although there have been no reliable government figures published on religious affiliation since before World War II, nearly one-half of the population of 15.5 million is believed to be Roman Catholic.

A ''hidden church'' about which little is known operated for decades under communist rule, and the number of faithful actually may be higher.

A dozen cardinals from all over Europe will be on hand for the visit, led by Cardinal Frantisek Tomasek, 90, the leader of the Czechoslovak church.

For decades Tomasek has opposed what had been one of the most repressive regimes in the East Bloc, which threw dozens of priests in jail, forbade hundreds of others to practice their priestly rites, and closed down most of the country's religious houses.

His meeting on Saturday with the pontiff, who has a special concern for Eastern Europe, is expected to be a highly emotional one. They last met in 1987 at the Vatican.

It was Cardinal Tomasek who first invited John Paul in 1985 to visit Velehrad to commemorate the anniversary of St. Methodius, who with his brother Cyril brought Christianity to the area in the 9th century. But the communist leadership at the time refused permission.

The Velehrad mass is expected to be the centerpiece of this papal visit.

This time, the invitation was extended by President Vaclav Havel, who led the peaceful revolution that toppled the communists last November. The visit is jointly hosted by Tomasek.

Auxiliary Bishop Antonin Liska, in charge of the arrangements in Prague, said 700,000 worshippers are expected for the mass in Prague Saturday

afternoon.

Some 1 million Czechoslovaks are expected in Velehrad but hundreds of thousands of Poles were also apparently en route, despite pleadings from both the Polish and Czechoslovak governments to save their fervor for his fourth visit to his homeland in August 1991.

A press center spokesman in Velehrad said already there were reports of a 25-mile backup at the Polish-Czechoslovak border on Friday, nearly 48 hours before the papal mass.

Polish Prime Minister Tadeusz Mazowiecki will also fly in for the Velehrad mass, accompanying the pope on his procession to the altar, a spokesman in the premier's office in Warsaw said. At least 1 million faithful are expected in Bratislava, the capital of the Slovak Republic, ''and some are saying up to 2 million,'' Liska said in an interview.

Czechoslovakia comprises two republics: the Czech Republic, which includes Bohemia and Moravia; and the Slovak Republic, which is made up of Slovakia in the eastern half of the country. The pope, who is multilingual, will speak in both Czech and Slovak at all three masses.

The 33 1/2-hour visit, the pontiff's 46th foreign trip, was inserted into a busy papal schedule as a way for John Paul to express his support for the changes under way and to encourage the clergy and the faithful until a longer trip can be arranged.

Original plans were for a one-day trip with only one mass in Velehrad, ''but he respected our request to enlarge the scope of the visit,'' Liska said.

He said the pope was very encouraged by the new freedoms allowed the church in Czechoslovakia, which even exceed those before World War I when the monarchy still had control over the appointment of bishops.

Before the previous communist regime relented in May 1988, 10 of

DETROIT (APRIL 20) UPI - General Motors Corp. said Friday it has raised prices of selected extra-cost options across its six vehicle divisions, in the first such price hikes since the start of the 1990-model year last summer.

The increases, which range mostly between $10 and $20, affect all vehicles built after April 2, and are to partially recover higher material, labor, and health care costs, company spokesman John Mueller said.

Adjustments vary by the vehicle division and model, and involve mostly power accessories, like electric seats, windows and door locks. Examples include a $15 increase each for cruise control, power windows and power door locks, while power seats were raised between $20 and $55, GM said, meaning that ordering several extra-cost options could increase the price of a new GM vehicle by about $100.

GM's Cadillac division, which did not raise option prices last summer, increased prices on its optional anti-lock braking systems by $70, while other options were raised by as little as $5.

Gasoline engines on GM's Chevrolet and GMC light-duty trucks were raised by $20, while the four-speed automatic transmission was increased by $10, Mueller also said. Destination charges are unchanged, he said.

DUBLIN, IRELAND (APRIL 20) UPI - A special meeting of European Community foreign ministers called to discuss German unification appeared set Friday to instead focus on preparations for swifter political union of the 12 member nations.

France and West Germany this week urged Irish Prime Minister Charles Haughey, who now holds the rotating presidency of the European Community,

to plan for political and monetary integration by 1993, and said the 12 nations should adopt common policies on defense and foreign affairs.

The proposals were among the issues facing EC foreign ministers, plus Jacques Delors, president of the EC Commission, who were to meet at Dublin Castle Saturday to lay the groundwork for a summit of EC heads of government in Dublin on April 28.

''It's an informal meeting so we don't expect major published conclusions '' said a spokesman for Haughey.

''It will simply be used for the foreign ministers to bring themselves fully up to date on Eastern European issues, and to see what areas of agreement there are or areas of disagreement.''

The leaders' summit has a three-point agenda - German unification, political changes in Eastern Europe, and preparations for the 35-nation Conference on Security and Cooperation in Europe summit later this year.

Haughey has been on a two-week tour of European capitals to prepare for next week's summit, and was in London Friday for a 90-minute meeting with Prime Minister Margaret Thatcher.

An official of Thatcher's Downing Street office said the meeting mainly focused on the consequences of German unification.

Haughey said he and Thatcher briefly discussed the issue of extradition to Britain of suspects of the outlawed Irish Republican Army, but the two leaders in their first official one-to-one meeting in almost 10 years appeared to want to downplay the dispute in the interests of the larger questions confronting the European Community.

Haughey wants the leaders to agree on a mechanism for integrating East Germany into the Community after German unity so that the European Commission, the EC executive agency, can start drawing up the necessary documents and rules.

He also is seeking an agreement to hold a second inter-governmental conference on European political union and reforms in EC institutions later this year, his spokesman said.

''Or at the very minimum,'' Haughey wants the summit to appoint a high-level panel to look into the issue of political union, reporting back to the Rome summit on monetary union in December, the spokesman said.

Italy holds the EC presidency July through December.

''There is a very strong feeling, particularly in Paris, Rome and Bonn,

that they want a second inter-governmental conference on political union in the second half of this year, reporting back in 1991,'' Haughey's spokesman said.

Only Luxembourg and Britain have expressed problems with a second conference. As a tiny country, Luxembourg is reluctant to accept further integration, while Thatcher has long opposed further integration, expressing fears of a loss of national sovereignty.

Adding to the pressure for integration, French President Francois Mitterrand and West German Chancellor Helmut Kohl urged Haughey to expand the April 28 agenda to include arranging ''intensive preparations'' for an inter-governmental conference on monetary and economic union to be held by the end of the year.

''Taking account of the profound transformations in Europe, of the establishment of the interior market and the realization of Economic and Monetary Union, we judge it necessary to accelerate the political construction of Europe of the 12,'' Mitterrand and Kohl said in a statement.

Anticipating a discussion of the rapid pace of change in East and West Germany, the EC Commission Thursday issued a 13-page document outlining three steps for incorporation of East Germany into the Community.

The report, which will be reviewed Saturday, said Community law should apply ''integrally and automatically'' in East German territory as soon as German unification is completed.

#90110u1694 04/20/1990 ~United Press International

SOMERS, CT (APRIL 20) UPI - The state's maximum-security prison was under lockdown Friday after eight guards were injured in a brawl that broke out during a Moslem religious service, correction officials said.

The fight broke out Thursday night between two inmates taking part in a Ramadan feast in the mess hall. When guards tried to intervene they were attacked by a small group of inmates, said Correction Department spokesman Michael Donahue.

''As our officers responded, a group of inmates turned on them,'' said Donahue. The Ramadan feast is celebrated twice a year by Moslem inmates to mark the end of a period of fasting, Donahue said.

State police were notified and the prison's 1,400 inmates were locked in their cells while guards searched non-living areas for weapons and other contraband, Donahue said.

He said the lockdown would last at least through Friday.

Eight officers were injured, including three with neck and face lacerations who were taken to Johnson Memorial Hospital in Stafford. One also suffered a puncture wound of the cheek.

#90110u1738 04/20/1990 ~United Press International
LOS ANGELES (APRIL 20) UPI - Elizabeth Taylor's doctors prescribed potentially life-threatening doses of painkillers to the actress, but their conduct does not warrant criminal charges, the District Attorney's Office said Friday.

However, the office will refer the allegations against the physicians, William Skinner, Michael Gottlieb and Michael Roth, to the state Medical Board for possible administrative sanctions.

Skinner, identified by investigators as Taylor's primary physician, is medical director of the chemical dependency center at St. John's Hospital and Health Center in Santa Monica. Gottlieb is the immunologist who reported the first AIDS case in the United States. Roth is a former

partner of Gottlieb's.

Prosecutors said that the physicians displayed poor judgment in prescribing the massive amounts of drugs to Taylor, who they said was exposed to the possibility of a fatal overdose. However, the doctors had no criminal intent in prescribing the narcotics, prosecutors said.

Taylor, 58, an Academy Award-winning actress who has frequently admitted her dependence on pills and alcohol, was not a subject of the 1 1/2-year investigation and did not face any possible charges. However, she was interviewed by investigators as part of the probe.

Taylor has been hospitalized since last week with pneumonia. In a statement earlier this week, she denied rumors she is suffering from AIDS.

The physicians were investigated for allegedly prescribing massive amounts of ''Schedule Two'' drugs, which include opiates, barbituates and stimulants, to Taylor in 1987 and 1988.

Deputy District Attorney Daniel Feldstern said in a written report released Friday that Taylor ''has suffered from substance abuse for many years, principally involving pain medication and alcohol,'' stemming partly from chronic lower back pain she has suffered since 1957.

''In view of their entire record, it is clear that the prescribing practices of these physicians fell below the accepted standard of medical practice,'' Feldstern said in his report.

''The poor judgment exercised by these physicians in prescribing massive doses of narcotics exposed their patient to the very real possibility of a life threatening overdose,'' he said.

''However, it is equally clear that these physicians, in addition to trying to resolve the patient's medical condition, were also attempting to deal with her addiction through alternative means of therapy and treatment and that their conduct was devoid of criminal intent,'' the prosecutor said.

Feldstern said the physicians made ongoing efforts to detoxify Taylor and ultimately convinced her to enter a drug rehabilitation program at the Betty Ford Center near Palm Springs in November 1988.

The raven-haired, violet-eyed movie star has been married numerous times, including twice to actor Richard Burton, and has made more than 50 films, including ''Giant,'' ''Suddenly Last Summer,'' ''Cleopatra'' and ''Cat on a Hot Tin Roof.''

She won Academy Awards for ''Butterfield 8'' in 1960 and ''Who's Afraid of

Virginia Woolf'' in 1966.

#90110u1758 04/20/1990 ~United Press International
ATHENS, GREECE (APRIL 20) UPI - Greek and Turkish authorities Friday intercepted two trucks carrying what apppeared to be parts of a giant gun being shipped from Britain to Iraq, officials said.

The first truck, which arrived by ferry from Italy at Patra, some 100 miles west of Athens, was stopped by the Greek customs authorities because the driver did not have export papers from Britain.

The British Broadcasting Corp. reported a second truck had been found by authorities in Turkey, but gave no other details.

Officials said the cargo of the truck, and a trailer attached to it, consisted of steel barrels, and investigations were under way into what they could be used for. Customs authorities suspected they were parts of a

giant gun bound for Iraq.

A Finance Ministry statement issued late Friday said the truck was seized Thursday because it was found to be ''carrying a section of a weapons system to Iraq weighing 29.5 tons.''

A Finance Ministry statement said that under Greek law ''a special license is required for such transport, which had not been requested.''

The truck, driven by a British national, arrived at the Greek port of Patra from Italy and was heading for Iraq through the Turkish port of Mersin. The case was being referred to the judicial authorities, the official statement said.

On Wednesday, British Trade Secretary Nicholas Ridley said the government of Prime Minister Margaret Thatcher was entirely satisfied that steel pipes seized nine days ago in the United Kingdom en route to Iraq were parts of a giant gun.

Iraq denied it was building a gun and said the tubes were parts of a petrochemical complex.

But following a British Department of Trade and Industry investigation, officials said the eight steel tubes were parts of a 40-yard-long cannon, with a 39-inch bore, designed by Gerald Bull, a Canadian artillery expert murdered by unidentified gunmen in Brussels last month.

The semi-official Athens News Agency quoted sources in Patra as saying the truck carried a steel tube 18 feet long, with an outside diameter of 4 feet and an internal diameter of 32 inches, and internal rifling.

The documents accompanying the truck's cargo declared the tube as oil drilling machinery meant for delivery to the Iraqi industry ministry, ANA said.

WASHINGTON (APRIL 20) UPI - Rates on 30-year fixed mortgages increased 0.15 percentage points to 10.41 percent and adjustable-rate mortgages held steady at 8.56 percent this week, the Federal Home Loan Mortgage Corp. said Friday.

The fixed rate last week was 10.26 percent, according to the agency that buys mortgages from lenders and packages them as securities. The fixed-rate average is for a 30-year loan covering 80 percent of a home's cost. The average adjustable-rate mortgage also is for 30 years, but for 75 percent of the home price.

BIRMINGHAM, AL (APRIL 20) UPI - The U.S. delegation to the April 25 inauguration of Violeta Chamorro as Nicaragua's president will include President Bush's son Jeb, 20 members of Congress and Peace Corps Director Paul Coverdell, the White House said Friday.

It was announced earlier that Vice President Dan Quayle, who will be accompanied by his wife Marilyn, would lead the delegation. The delegation also will include several members of a presidential observer group denied access to Nicaragua for the Feb. 25 election, in which Chamorro upset President Daniel Ortega.

The delegation was announced during a political stop Bush made in Alabama as part of a four-day trip around the South.

Jeb Bush is active in Republican circles in Florida, a state that has been home to the leadership of the Contra rebels who fought a decade-long war against Ortega's Sandinista government.

The official delegation selected by Bush includes:

Sens. Richard Lugar, R-Ind.; Christopher Dodd, D-Conn.; David Durenberger, R-Minn.; Patrick Leahy, D-Vt.; Connie Mack, R-Fla.; John McCain, R-Ariz,; Claiborne Pell, D-R.I.; Harry Reid, D-Nev., and Terry Sanford, D-N.C..

Also, Reps. Rod Chandler, R-Wash.; Mickey Edwards, R-Okla.; Jim Slattery, D-Kan.; Tom Tauke, R-Iowa; Anthony Beilenson, D-Calif.; Henry Hyde, R-Ill.; Ileana Ros-Lehtinen, R-Fla.; Cass Ballenger, R-N.C.; Barbara

Vucanovich, R-Nev.; Robert Dornan, R-Calif., and Stephen Solarz, D-N.Y.

Other members include Assistant Secretary of State Bernard Aronson, Chief of Protocol Joseph Reed, former U.N. Ambassador Jeane Kirkpatrick, Customs Commissioner Carol Hallett and Allen Weinstein of the Center for Democracy.

#90110u1784 04/20/1990 ~United Press International

BEIRUT, LEBANON (APRIL 20) UPI - A pro-Iranian group linked to hostage-taking said Friday efforts to free Western captives are ''being translated into action,'' but the White House warned against undue optimism over a promise to free one American hostage.

The Islamic Jihad for the Liberation of Palestine, another extremist group that Wednesday promised to free one of its three American captives within 48 hours, said Thursday the release was delayed by President Bush's refusal to send an envoy to the Middle East.

''We confirm that lots of efforts have been exerted to free the Western hostages,'' said Sheikh Sobhi Al Tofeili, a leading clergyman of the radical fundamentalist group Hezbollah, which is believed to be behind the kidnapping of Westerners in Lebanon. Another Hezbollah official denied the group was holding hostages.

''These talks are now being translated into action,'' Tofeili told United Press International in an interview Friday at his heavily guarded house in Beir al Abed in southern Beirut.

Tofeili hinted that one hostage would be freed soon and that other Western captives will freed in the near future.

Islamic Jihad, in a statement delivered to the An-Nahar newspaper in Beirut Thursday, said: ''Concerning the release of an American hostage, preparations were set to be finalized but the failure of (U.S. Assistant Secretary of State John) Kelly to cooperate stumbled the process.

''We have decided to delay the release until the situation is clarified,'' it said, reiterating its demand that Kelly be dispatched to Syria. Jihad has not said why it wants Kelly involved in the hand-over.

White House spokesman Marlin Fitzwater said Friday Kelly would not be sent and acknowledged the kidnappers could be toying with the United States.

''They do every time,'' Fitzwater said. ''The pattern is very much the same. They announce a release, put out picture or videotape or letters and then there's some demand or reason why it can't happen.

''The hostage situation is pretty much unchanged. Syria still believes there's a possiblity of relief,'' Fitzwater told reporters aboard Air Force One. ''We'll just wait and see if it's real.''

''Our attitude is to be prepared to take all the precautions and the preparations necessary to facilitate it if it does happen but not to get overly optimistic,'' he said. Asked if Bush, who was scheduled to spend the weekend fishing, was trying to act as if it were business as usual, Fitzwater said, ''He's not trying to act like it is. It is business as usual. The president's carrying out his business as has been planned.''

He said the hostage situation ''may or may not require presidential actions, but they aren't the kind of crises that require you to drop everything else.''

The Jihad statement Thursday was accompanied by a Polaroid photograph of U.S. hostage Robert Polhill, 55, looking grim.

Polhill's wife, Feryal, arrived in the Syrian capital of Damascus Friday and held private talks with American officials at the U.S. embassy, diplomatic sources said.

''I do not know who will be released, but I think it is a good start. I hope that by the release of one of the professors, the others will follow '' she said. ''I appeal to all concerned political and spiritual leaders, please save no effort to secure the freedom of the hostages.''

The group had attached a photograph of Polhill's American colleague, Jesse Turner, to its Wednesday statement. The two former professors at Beirut University College were abducted Jan. 24, 1987, along with American teacher Alann Steen and an Indian national, Mithileshwar Singh. Singh, Beirut University College chairman of business studies, was freed in October 1988.

Sheikh Naeem Kassem, another leading figure in Hezbollah, told UPI Friday his group has no links with the hostages. The captives are held with other Islamic groups.''

Bush reiterated Thursday that U.S. policy was not to negotiate with terrorists.

''I think the U.S. position is clear - we do not meet demands,'' Bush said. ''We've been disappointed before; hopes raised only to have them dashed by excessive speculation.

''I would add that we are not talking to the hostage holders,'' he said. ''I would further add that we are grateful to Syria for trying to play a constructive role in what is going on.''

#90110u1797 04/20/1990 ~United Press International
MANAGUA, NICARAGUA (APRIL 20) UPI - Contra rebels in Nicaragua could ignore an agreement to disarm by June 10 if high-ranking Sandinista officials remain in the armed forces after April 25, Contra commanders who negotiated the accord said Friday.

The Contras signed an agreement Thursday for an immediate cease-fire and for rebels in Nicaragua to enter security zones by April 25, the date President-elect Violeta Chamorro of the National Opposition Union, or UNO, is scheduled to take office.

The agreement also calls for safety guarantees for the rebels, who are to hand in their weapons to U.N. peace-keeping forces by June 10.

Oscar Sovalbarro, known as Commander Ruben, told United Press International Friday the guarantees will not be assured ''if the Popular Sandinista Army command remains as it is now.''

Sovalbarro was referring in particular to Defense Minister Humberto Ortega the brother of outgoing President Daniel Ortega, who is commander-in-chief of the armed forces as well as a leader in the Sandinista Front.

''If the situation arises where the structures of the military high command remain intact, I believe it will not contribute to creating the confidence that members of the resistance need to comply with the voluntary demobilization agreement that must be concluded by June 10,'' Sovalbarro said.

Before the cease-fire agreement, the Contras had demanded that Chamorro purge the army officer corps, dominated by Sandinista party militants. But the accord made no mention of those demands.

''The new government needs to think that the Sandinista Popular Army as much as the Nicaraguan resistance must leave the government to make decisions without imposing any conditions,'' Sovalbarro said.

Maximo Rodriguez, known as Commander Wilmer, took the warning a step further, saying ''if the army structures under the new government remain, there is a danger of the war continuing in Nicaragua.''

''If Chamorro does not really exercise her command, Nicaragua could reach a worse situation,'' Rodriguez said, adding that the Contras are still armed and able to defend themselves.

Chamorro has said she plans to fire all high-ranking Sandinista officials

- including Ortega and Interior Minister Tomas Borge - from Nicaragua's military and security forces. The Interior Ministry controls the police.

The UNO government also has announced plans to reduce the size of the 70,000-member armed forces.

Chamorro adviser Alfredo Cesar reaffirmed this Thursday. ''The one point Dona Violeta has emphasized is that when she takes office, the disarmament process will be irreversibly under way,'' he said.

President Daniel Ortega met Thursday with Bernard Aronson, U.S. assistant secretary of state for inter-American affairs, and welcomed the demobilization agreement.

''This is the first time the Contras have agreed to a complete disarmament and demobilization. The date for this to be completed is June 10. If it can be done beforehand, that would be better,'' Ortega told reporters after the meeting.

Ortega said he held ''constructive'' talks with Aronson about the cease-fire and disarmament and that a possible reduction of U.S. military strength in Central America was implied in the discussions.

Aronson refused comment on the meeting.

#90110u1812 04/20/1990 ~United Press International

CHICAGO (APRIL 20) UPI - Commonwealth Edison Co. Friday reported first-quarter earnings dropped 37.5 percent to $87.2 million, or 31 cents a share, from $139.5 million, or 54 cents a share, in the first quarter of 1989. Revenue rose to $1.38 billion from $1.36 billion a year ago.

The company said revenue and earnings figures included amounts subject to refund under court and Illinois Commerce Commission rulings currently being appealed by Commonwealth Edison.

If the appeals fail, the total amount subject to refund - dating back to Jan. 1, 1989 - would be about $330 million, a company spokesman said. The potentially refundable amount applicable to this year's first-quarter earnings would be roughly $66 million, he said.

EAST BERLIN (APRIL 20) UPI - Members of East Germany's Party of Democratic Socialism, the renamed Communist Party, walked out of Parliament Friday after a deputy compared the country's 40 years of communist rule to Adolf Hitler's Third Reich.

Joachim Hubertus Nowack, of the arch-conservative German Social Union, had told deputies that the PDS had failed to learn from history.

''A single apology to the people for 40 years of mistaken policies was not enough,'' he said, adding that if Germans were to accept such an apology, then a ''triple excuse by (Nazi Propaganda Minister Joseph) Goebbels would be enough to forget all that happened during the Nazi era.''

The 66 members of the PDS left Parliament in protest, but only after one of their members reminded deputies that the West German chancellor had once made a similar remark, comparing Soviet leader Mikhail Gorbachev to

Goebbels.

Economics Minister Gerhard Pohl sharply condemned the policies of the old-guard communist government, ousted last fall.

''Never again socialist experiments,'' Pohl said during a parliamentary debate of a government policy statement which Prime Minister Lothar de Maiziere presented to Parliament Friday.

Members of the seven conservative, social-democratic and liberal parties in the government coalition praised de Maiziere's statement, which called for drastic reductions of German troops, swift reunification and guarantees that East Germans will ''not become second-class citizens'' in a unified Germany.

Pohl called for the abolition of the East German state symbol - a compass and a hammer - which adorns the national flag. He also demanded that the national holiday marking the 1949 founding of the communist German state be dropped.

''There was and is only one German nation and that is the reason for the policies of our party,'' said Pohl, a member of the conservative Christian Democratic Union.

PDS leader Gregor Gysi said his party welcomed assurances de Maiziere gave in his statement that his East German government will maintain good relations with its Eastern neighbors and the Soviet Union.

Gysi called for ''the abolition of military conscription by the end of 1990,'' as a contribution to the de-militarization of Europe.

#90110u1843 04/20/1990 ~United Press International

WASHINGTON (APRIL 20) UPI - The United States suffered a record $53.3 billion budget deficit in March, soaring 51 percent over February's deficit of $35.3 billion, the Treasury Department said Friday.

In March 1989, the government ran a deficit of $35.8 billion.

Financial markets had expected a lower deficit figure, in the range of $40 billion, and what is usually a routine monthly annoucement caught many analysts by surprise.

''It's got to be, in part, a fluke,'' said Erich Heinemann, chief economist for Landenburg, Thalmann & Co. in New York.

''This is way off the reservation,'' Heinemann said. ''The underlying

trends are not favorable.''

Robert Dederick, chief economist at Northern Trust in Chicago, said, ''There was an installment of working capital (for the bailout of the savings and loan industry) that could have blown the number up.''

''Income tax refunds ... have been speeded up,'' Dederick said. ''The corporate profits taxes could have came in low. Those are possibilities.''

James Blum, assistant director of the Congressional Budget Office said the $53.3 billion budget deficit in March was the largest ever after a $39.5 billion deficit in May 1986.

For the fiscal year to date, the government is running a $150.9 billion budget deficit vs. a deficit of $128.4 billion for the comparable period in fiscal 1989, the Treasury Department said.

''There has been since (President) Bush took office an acceleration in government spending,'' Heinemann said. ''Now we're seeing some softening in revenues as the economy slows down, and I think, eventually slip into recession.''

As for congressional estimates of a lower budget deficit, Heinemann said, ''These guys are off smoking pot in the corner.''

Based on its latest projections, the Treasury Department estimates the federal budget deficit for fiscal 1990 will hit $123.8 billion, in line with estimates by the Office of Management and Budget.

The fiscal year runs from Oct.1 to Sept. 30.

#90110u1876 04/20/1990 ~United Press International

NEW YORK (APRIL 20) UPI - A French court translator Friday identified statements in which Saudi financier Adnan Khashoggi tells how he purchased 38 ''master paintings'' from a cash-strapped Imelda Marcos in 1985 and 1986 for $6.5 million.

The translator, Ferdinand Dezacharia, described two 1987 depositions taken from Khashoggi in connection with the U.S. probe into the ''Marcos millions'' that were allegedly plundered from the Philippines.

''At that time Mrs. Marcos needed money and suggested giving me the paintings in question as collateral for the amount of money I would lend her,'' Khashoggi said in the depositions, according to the translator.

Mrs. Marcos, 60, is accused of plotting with her late husband to divert more than $200 million stolen from the Philippine treasury into real estate and art investments in Manhattan and around the world.

She is on trial in U.S. District Court in Manhattan on racketeering, conspiracy, fraud and obstruction of justice charges.

Khashoggi, her co-defendant, faces obstruction of justice and fraud charges for allegedly helping the Marcoses in their transactions.

Khashoggi was called before the French judiciary in 1987 to give depositions on U.S. charges of receiving assets that he knew had been ''either stolen, misappropriated or illegally obtained.'' His actions were allegedly in violation of a U.S. court order blocking the movement of Marcos possessions.

Khashoggi testified from his home at Cannes that he instructed a ''representative in Geneva'' to deliver a ''check in the amount of $5.8 million'' and later hand delivered her ''$700,000 in cash'' to the Marcoses.

The interpreter said Khashoggi testified he made the payment by bearer check and cash because the Marcoses ''were experiencing some difficulties and could not collect money by check or by transfer.''

While on the witness stand, the gray-haired translator, a white scarf draped over his shoulders, coughed and sprayed his sore throat with what appeared to be medicine in a white spray bottle.

Khashoggi said he did not have the paintings appraised before buying them because the Marcoses were friends and he trusted them.

#90110u1896 04/20/1990 ~United Press International

NEW YORK (APRIL 20) UPI - More than 50,000 protesters marched across the Brooklyn Bridge Friday, closing the span and jamming traffic in a rally against a federal ruling preventing Haitians and Africans from donating blood.

The marchers took over the bridge before noon and streamed into Manhattan, disrupting traffic around City Hall and prompting the Department of Transportation to issue a gridlock alert. "It's a mess," said Miriam Gaynor, an incident manager with the DOT.

About 50 taxi and livery cab drivers added to the traffic tie ups by joining the march, which concluded with a rally at Federal Plaza. Police said besides disrupting traffic, the rally caused no problems and the bridge was reopened about 2:30 p.m.

The march was sponsored by a group called the Haitian Enforcement Against

Racism, a coalition of religious, student and other organizations and began with speeches in downtown Brooklyn.

The marchers protested a February ruling by the Food and Drug Administration banning Haitians and people born in Africa from donating blood as part of the effort to prevent the spread of the AIDS virus. "It makes us feel bad because it's not true," said Leon Vilaire, 55, a paper handler for USA Today. "It's pure discrimination, pure racism."

The FDA restrictions on blood donors also include homosexuals, intravenous drug users and hemophiliacs and were not meant to single out any one ethnic group or imply that any group had a higher incidence of the disease said agency spokesman Brad Stone.

"A lot of the problems we have is people are misinterpreting it to mean Haitians are at high risk," said Stone. "It's not that the population itself has a greater prevalence of HIV."

He said Haitians and Africans were more likely to transmit the AIDS virus through heterosexual sex, making it more difficult to screen out smaller segments of the population as is done with other ethnic groups. "We understand the concerns of Haitians and others who are affected by this policy and feel stigmatized by it," Stone said.

Coincidentally, the FDA Blood Products Advisory Committee met Friday to reassess the ruling and examine ways to safeguard the blood supply and still allow Haitians and others to donate blood.

"We realize that a very large percentage of those communities probably would be good blood donors. On the other hand, we want to safeguard the blood supply," said Stone.

#90110u1905 04/20/1990 ~United Press International

WASHINGTON (APRIL 20) UPI - Private exporters reported two sales of U.S. corn to foreign buyers with the sales involving 346,000 metric tons worth about $37.8 million, the Agriculture Department reported Friday.

Mexico bought 146,000 tons of corn and an unidentified buyer purchased 200,000 tons. Both transactions call for the corn to be delivered before the corn marketing year ends Aug. 31.

The corn involved in the sale to Mexico was worth about $15.95 million and the corn in the other deal was worth about $21.85 million, based on Chicago prices.

With the latest deal, Mexico has purchased 3.78 million tons of corn since

the marketing year opened Sept. 1.

By law, exporters must promptly report all large sales of grain. Some sales are listed as going to unidentified buyers because it sometimes can take a few days for the identity of a purchaser to become known.

#90110u1920 04/20/1990 ~United Press International

WASHINGTON (APRIL 20) UPI - Scientists may have identified a genetic factor that influences how quickly a person gets sick after being infected with the AIDS virus, it was reported Friday.

Researchers at the University of Pittsburgh and National Institutes of Health said they found a set of genes that may influence how the AIDS virus affects the immune system.

The findings must be confirmed with more research. But the results could lead to a better understanding to how the AIDS virus attacks the immune system and ways to counteract its devastating destruction, the researchers said.

''If it's true, it could have some fairly important impact,'' said Richard Kaslow, chief of the epidemiology and biometry branch at the National Institutes of Allergy and Infectious Diseases in Bethesda, Md.

Scientists have been trying to determine why some people get sick faster than others after being infected with the human immune deficiency virus (HIV), which causes acquired immune deficiency syndrome by destroying the body's natural defense against infection.

In a study published in the The Lancet, a British medical journal, the researchers studied the genetic material of 108 men infected with HIV who are participating in a large nationwide study of homosexual and bisexual men in Baltimore, Chicago, Los Angeles and Pittsburgh.

The researchers compared the genetic material of 49 men who had a rapid decline in immune system cells that are the primary target of the AIDS

virus with that of 59 men who had a slow decline.

The men who had a rapid decline were significantly more likely to have a specific set of genes believed involved in basic immune system function, the researchers found. The genes control how the immune system identifies foreign substances and how immune cells communicate with one another.

The findings suggest some people may be born with genes that make their immune system more susceptible to the AIDS virus by making it easier for the virus to penetrate immune system cells and reproduce inside them, they said.

The findings appear to confirm the results of a previous study conducted in Scotland, and earlier animal studies, the researchers said. But more research is needed to confirm the findings and explore their implications, they said.

''This is part of a long process to identify possible genetic vulnerability to the devastating effects of HIV infection,'' said Charles Rinaldo Jr. of the Unversity of Pittsburgh.

(APRIL 20) UPI - The pro-Iranian group Hezbollah says wheels are in motion toward the release of a U-S hostage in Lebanon. A leading Hezbollah clergyman told U-P-I that ''lots of efforts have been exerted to free Western hostages and these talks are now being translated into action.'' Sheikh Sobhi Al Tofeli hinted that one hostage will be freed soon and other Western captives will be released in the near future.

A Lithuanian government spokeswoman says about 50 Soviet soldiers entered a Communist Party printing facility as about 200 Lithuanian citizens protested outside. Spokeswoman Ellen Gordon says the Soviet troops beat civilian security guards and broke windows. Another Lithuanian spokesman said that some workers ''barricaded themselves in their working rooms'' as protesters outside sang patriotic songs to keep up the morale of the workers.

Solidarity chief Lech Walesa made his last speech as union boss, apologizing for his iron rule but telling critics that his adminstration meant victory for Poland. Walesa made the speech to a union congress in Gdansk, where his successor will be elected tomorrow. The Solidarity congress unanimously passed a resolution backing Lithuania's bid for independence from the Soviet Union.

Former Cincinnati Reds manager and player Pete Rose today pleaded guilty to concealing some 300-thousand dollars from the I-R-S. Rose entered the

plea in federal court in Cincinnati, admitting to felony charges of filing false returns for 1985 and 1987. The deal allows him to avoid more serious charges of tax evasion. Rose faces up to three years in jail and a 250-thousand-dollar fine on each of the two counts.

After the hearing, Rose told reporters- ''I am NOT a bad person, but I did some bad things.'' The income Rose admitted that he failed to report came largely from gambling and personal appearances. He was banned from baseball last August because of his gambling.

(APRIL 20) UPI - The Tokyo High Court today cleared the way for the extradition of the Chinese man who last December hijacked an Air China passenger jet to Japan with 233 people aboard. Zhang Zhenhai says he commandeered the plane to escape torture for his role in last year's pro-democracy demonstrations in Tiananmen Square. The court says Zhang must be returned to China within 30 days because hijacking canNOT be tolerated ''under any circumstances.''

Chinese officials are blasting Britain's plan to grant passports to 225-thousand Hong Kong residents before Beijing's 1997 takeover of the colony. If the bill clears parliamentary hurdles as expected, China has hinted that it may act to counter the plan. Each week, about one-thousand Hong Kong Chinese emigrate, mostly to Canada and Australia. Most are middle-class professionals.

The 26-year-old model and actress who has become known as ''the other woman'' in the Trump divorce denies that she's the cause of BILLIONAIRE Donald Trump's split with his wife, Ivana. Last night, Marla Maples told television interviewers that she loves Trump, but that the two have NEVER discussed marriage. She also said she thinks Ivana is an absolutely beautiful woman... even BEFORE plastic surgery.

#90110u1985 04/20/1990 ~United Press International

WASHINGTON (APRIL 20) UPI - Farmland values are up for the third year in a row since their plunge during the mid-1980s but the four percent gain notched in the past year was the smallest since the recovery began, the government said Friday.

The Agriculture Department said the average acre of land was worth $693 at the start of this year. Values were up in eight of the ten farm production regions with the largest increases - eight percent - in the Southeast and the Northern Plains.

Corn Belt values were up only two percent, compared with a ten percent rise last year for the five-state region of Ohio, Indiana, Illinois, Iowa and Missouri. Ohio had a one percent drop in values and Missouri had the largest gain - four percent.

Department economists said the rise in land values was more moderate than would be expected with the favorable financial conditions of 1989. Net farm income hit a record $48 billion while farm debt dropped. Interest rates were unchanged from 1988.

"The combination of a relatively modest increase in farmland values with the (favorable indicators) suggests farmland investors anticipated the 1989 conditions and the farmland increases in 1987 and 1988 reflected those anticipations," the Economic Research Service said.

Land values crashed during the farm recession of the 1980s, plunging 27 percent from a peak of $823 an acre in 1982 to average $599 in 1987. Even with the recovery, land values still are 16 percent below 1982's record level.

Values began strengthening in 1988 as the farm economy improved. A five percent increase, to $632, was reported in 1988, and last year's report showed a six percent gain to put land values at an average of $667 an acre.

The department said lower corn and soybean prices may have held down prices in some regions while record cattle prices boosted land values and cash rents in other areas.

The eight percent rise in the Northern Plains was aided by a 15 percent spurt in land values in South Dakota. Montana had a 16 percent gain and Idaho was up 14 percent to lead to a five percent rise in values in the eight states in the Mountain region.

Appalachia had a seven percent rise in values while the Lake States - Michigan, Wisconin, and Minnesota - and the Pacific Coast regions were up six percent. The Mississippi Delta region of Mississippi, Arkansas and Louisiana, had a one percent rise in land values.

Northeast region values showed no change. The region covers New England plus New York, New Jersey, Pennsylvania, Delaware, and Maryland. In the Southern Plains - Oklahoma and Texas - values were down two percent.

The department's figures were based on a survey that asked farmers their opinion of the fair market value of land in their home county.

#90110u1990 04/20/1990 ~United Press International

WASHINGTON (APRIL 20) UPI - Private exporters reported two sales of U.S. corn to foreign buyers involving 346,000 metric tons worth about $37.8 million, the Agriculture Department said Friday.

Mexico bought 146,000 tons of corn and an unidentified buyer purchased 200,000 tons. Both transactions call for the corn to be delivered before the corn marketing year ends Aug. 31.

The corn involved in the sale to Mexico was worth about $15.95 million and the corn in the other deal was worth about $21.85 million, based on

Chicago prices. With the latest deal, Mexico has purchased 3.78 million tons of corn since the marketing year opened Sept. 1.

By law, exporters must promptly report all large sales of grain. Some sales are listed as going to unidentified buyers because it sometimes can take a few days for the identity of a purchaser to become known.

#90110u2044 04/20/1990 ~United Press International
WASHINGTON (APRIL 20) UPI - Farmland values are up for the third year in a row since their plunge during the mid-1980s, but the 4 percent gain notched in the past year was the smallest since the recovery began, the government said Friday.

The Agriculture Department said the average acre of land was worth $693 at the start of this year. Values were up in eight of the 10 farm production regions with the largest increases - 8 percent - in the Southeast and the Northern Plains.

Corn Belt values were up only 2 percent, compared with a 10 percent rise last year for the five-state region of Ohio, Indiana, Illinois, Iowa and Missouri. Ohio had a 1 percent drop in values and Missouri had the largest gain - 4 percent.

Farmland values are important because they represent a farmer's major asset and they are a reflection of the health of the farm sector.

Department economists said the rise in land values was more moderate than would be expected with the favorable financial conditions of 1989. Net farm income hit a record $48 billion while farm debt dropped. Interest rates were unchanged from 1988.

''The combination of a relatively modest increase in farmland values with the (favorable indicators) suggests farmland investors anticipated the 1989 conditions,'' the Economic Research Service said, ''and the farmland increases in 1987 and 1988 reflected those anticipations.''

Land values crashed during the farm recession of the 1980s, plunging 27 percent from a peak of $823 an acre in 1982 to average $599 in 1987.

Even with the recovery, land values still are 16 percent below 1982's record level.

Values began strengthening in 1988 as the farm economy improved. A 5 percent increase, to $632, was reported in 1988, and last year's report showed a 6 percent gain to put land values at an average of $667 an acre.

The department said lower corn and soybean prices may have held down prices in some regions while record cattle prices boosted land values and cash rents in other areas.

The 8 percent rise in the Northern Plains was aided by a 15 percent spurt in land values in South Dakota. Montana had a 16 percent gain and Idaho was up 14 percent to lead to a 5 percent rise in values in the eight states in the Mountain region.

Appalachia had a 7 percent rise in values while the Lake States - Michigan Wisconin and Minnesota - and the Pacific Coast regions were up 6 percent.

The Mississippi Delta region of Mississippi, Arkansas and Louisiana, had a 1 percent rise in land values.

Northeast region values showed no change. The region covers New England plus New York, New Jersey, Pennsylvania, Delaware and Maryland.

In the Southern Plains - Oklahoma and Texas - values were down 2 percent.

The department's figures were based on a survey that asked farmers their opinion of the fair market value of land in their home county.

ANCHORAGE, AK (APRIL 20) UPI - Exxon launched the first oil spill response vessel of the new cleanup season Friday, complying with Coast Guard orders to deploy the ship in advance of next month's renewed cleanup.

Exxon had proposed a May start-up for its second season of cleansing Alaska beaches of oil. But Rear Adm. David Ciancaglini, the federal spill coordinator, told Exxon that an advance crew had to be out sooner to deal with critical wildlife areas before migratory birds and seals return next month.

The 175-foot Adele Candies, armed with an oil containment boom to protect sensitive shoreline, sailed out of Seward for Prince William Sound, where oil remains from the March 24, 1989 grounding of the Exxon Valdez, Exxon spokeswoman Jan Cool said.

The 14-person advance cleanup crew may go to beaches the state calls "bleeders" because tides flush out subsurface oil and wash sheens out into the waters. Even thicker oil liquifies in warm spring temperatures as the state's oiled shores thaw out after a six-month winter.

Rookeries and haul-out sites - the islands where seals and sea lions haul themselves out of the water - are off-limits to work crews once the animals return in the spring, so any cleaning at these sites must be done early.

Shoreline survey crews are assessing beaches treated last year to determine which ones need more cleaning and what kind of cleanup would be best. Next week Exxon must have a detailed work plan for state and federal officials to consider.

Exxon wants to use a chemical cleanser it makes, Corexit, for spot washing

on some beaches, company spokesman Hans Jahns said. Another Exxon official John Wilkinson, said the company wants to spray fertilizer on some oiled beaches to stimulate oil-eating organisms, a process known as bioremediation.

Last year, the Coast Guard denied Exxon permission to use Corexit except for limited experimental use. Bioremediation was used as a surface treatment for oil remaining on beaches scoured by high-pressure hot-water spray. Now Exxon proposes trying the process on subsurface oil instead of digging it up.

If bioremediation cannot remove subsurface oil from "bleeder" beaches that pose a constantly renewed spill threat, then "nothing short of severe intrusion would get the oil out," said Burl Wescott of the National Oceanic and Atmospheric Administration. That means excavation.

Exxon has made a point of seeking to use the least intrusive method of cleaning up the environment, but state officials say some beaches hold so much crude oil that the company may need to dig it out.

MOSCOW (APRIL 20) UPI - Soviet troops occupied a Lithuanian printing plant Friday, forcibly ejecting 30 volunteer nationalist guards, as the breakaway republic struggled to cope with Moscow's tightening economic squeeze.

Lithuanian Deputy Prime Minister Algirdas Brazauskas said Cuban sugar bound for Lithuania has been diverted and metal and timber shipments have

been stopped by the Soviets, who earlier in the week cut off oil and limited natural gas in an attempt to force the republic to revoke independence laws.

Officials appeared to be making little progress in replacing Soviet fuel and predicted serious problems within a month unless alternatives are found, but the republic's leaders remained confident.

''Organizers of the blockade will not be able to force Lithuania to her knees,'' Brazauskas said.

Prime Minister Kazimiera Prunskiene, who has so far failed to get promises of help during a Scandinavian trip, vowed: ''We will never withdraw our declaration of independence.''

The printing plant occupied by Soviet troops in Vilnius Friday is one of several buildings whose control has been disputed since the declaration of independence.

The Kremlin maintains that the plant is the property of the Communist Party of the Soviet Union, but Lithuanian officials say it is the property of the local Communist Party, which split with Moscow over the issue of independence.

Soviet troops have occupied about a half-dozen other party buildings in the republic's capital Vilnius since Lithuania's Parliament declared independence March 11, but rarely have they used much force.

The Lithuanian government information bureau said about 1:30 p.m. Friday approximately 50 armed Soviet soldiers broke into the printing plant through back windows, pushed some of the volunteer guards to the ground and hit them with sticks and then pushed them out of the building.

Among those guarding the facility - which now prints publications of the independent Communist Party as well as other periodicals - was Lithuanian Parliament member Zigmas Vaisvila.

The official Soviet news agency Tass disputed the Lithuanian accounts of the incident Friday, saying Soviet troops had been guarding the plant since March 30 and simply threw out members of the Sajudis nationalist movement who had barged in.

The official television news show ''Vremya'' and Radio Moscow's Interfax print service, however, appeared to confirm the Lithuanian account that nationalists had controlled the plant until Friday.

Lithuanian officials said workers had barricaded themselves behind some interior doors in the plant to keep the soldiers from the printing

presses. Several hundred people gathered outside to show support for the workers.

In Moscow, U.S. Ambassador Jack Matlock held talks at the Soviet Foreign Ministry, and Soviet Ambassador Yuri Dubinin went to the State Department in Washington to meet Secretary of State James Baker, but both sides said the visits were routine.

President Bush has been critical of the Soviet economic sanctions against Lithuania and U.S. officials have warned of possible harm to bilateral relations, but so far no retaliatory measures have been announced.

Lithuanian officials in Vilnius said they still hoped for talks with Moscow as a way out of the crisis, but they emphasized that the declaration of independence was not negotiable.

Officials said they did not know what they would do if the Soviet Union maintained a long-term blockade and alternative supplies could not be found.

Gasoline rationing of about 8 gallons per car per month have already been imposed and Brazauskas told Parliament businesses including agriculture would be seriously limited also, the Lithuanian information bureau said. Even with the restrictions the republic could run out of fuel within a month.

''The economic situation is reaching a critical point,'' he said.

Lithuanian President Vytautas Landsbergis said if the Soviets kept up the embargo the republic would appeal to international agencies to declare Lithuania a ''disaster zone'' and provide help.

''The Soviet Union is seeking to cause unemployment and cause unrest,'' Landsbergis said. ''They want to close us down as in a prison, keep us in the cold.''

Even as Lithuania was struggling to cope with the sanctions, Soviet President Mikhail Gorbachev was warning Estonia, another Baltic republic, that it will face the same economic sanctions as well as rule by decree from Moscow if it persists with its independence drive.

Endel Lippmaa, a professor and a legislator from Estonia, said Gorbachev made his tough position known Thursday in talks with Estonia's President Arnold Ruutel and its prime minister, Edgard Savisaar.

Lippmaa, who also participated in the talks, said the Soviet leader offered Estonia special status within a new Soviet federation with unprecedented political and economic freedom.

But at the same time, Gorbachev said, according to Lippmaa, ''If you go on with your independence drive, you may face the same situation as in Lithuania and you may face presidential rule.''

Under presidential rule, local organs of power can be bypassed, and entire regions, including republics, can be ruled directly from Moscow by decree.

Unlike Lithuania, which declared its independence on March 11, Estonia's Parliament has passed an act of ''a transition to indepdendence,'' but apparently the mild wording did not satisfy Gorbachev.

TORONTO (APRIL 23) UPI - Canada's chartered banks raised Friday their prime lending rates half a percentage point to 14.75 percent, a day after

the country's central bank pushed its rate up to 13.77 percent.

The Royal Bank of Canada, the Toronto Dominion Bank, the Bank of Montreal and the Canadian Imperial Bank of Canada wasted little time responding to the Bank of Canada's decision to boost the key rate to 13.77 percent following Thursday's weekly treasury bill auction.

Douglas Peters, chief economist at the Toronto Dominion Bank, said the banks were responding to increased pressure from the central bank to keep rates from easing.

The banks had seen their margins reduced in recent weeks as the Bank of Canada continued to push its key rate upward, Peters said.

Thursday's action by the central bank marked the fifth consecutive increase ordered since March 23. Higher interest rates are central to the Bank of Canada's ongoing battle to cut inflation.

Higher prime rates also resulted in increased mortgage, personal loan and investment certificate rates at some banks.

(APRIL 20) UPI - Lithuanians are limited to a monthly ration of eight gallons of gasoline after a Soviet crackdown to get the Baltic republic to rescind its independence. A government spokeswoman also reports that

Soviet troops entered a Lithuanian Communist Party printing plant, breaking windows and beating guards. The facility prints mostly journals. A central facility where most of Lithuania's newspapers are printed is NOT affected.

A pro-Iranian group in Lebanon says Washington's refusal to send an envoy to the Middle East delayed the release of a U-S hostage. The Islamic Jihad for the Liberation of Palestine says that failure to send Assistant U-S Secretary of State John Kelly to Syria interfered with the release of an American hostage in Lebanon. But another group believed to be holding Americans says efforts to free the hostages are ''being translated into action.''

Ex-Cincinnati Reds manager Pete Rose avoided income tax evasion charges in a plea-bargain deal that called for him to plead guilty to concealing income from the I-R-S. Rose pleaded guilty in federal court at Cincinnati, admitting to filing false income tax returns for 1985 and 1987. Rose told reporters after today's hearing- quoting now- ''I am NOT a bad person, but I did some bad things.'' Rose was banned from baseball last year because of gambling.

(APRIL 20) UPI - NASA engineers are installing batteries on the Hubble Space Telescope to prepare for the space shuttle Discovery's lift-off on Tuesday. The countdown begins tomorrow, and Discovery's five crew members will return to Cape Canaveral, Florida, on Sunday for final preparations. The launch was delayed two weeks because of work to replace a faulty hydraulic unit that grounded the ship four minutes before lift-off on a mission to set the telescope in orbit.

Most Oklahoma teachers are back in the classroom today. Their return ends a four-day walkout that last night led the state Senate to O-K a 230-Million-dollar tax bill to boost teacher salaries and school funding. Teachers will receive a 15-hundred-dollar annual pay raise over the next five years. Last year, the average Oklahoma teacher's pay was 22-thousand dollars, the third-lowest in the nation.

(APRIL 20) UPI - Colombian police say they have foiled a drug cartel plot to attack three leading figures in the war on drugs. Authorities yesterday raided a house outside Medellin's airport, seizing a cache of weapons, including a rocket and machine guns. Police are now looking for two Spanish mercenaries they believe were hired to kill the police generals who are hunting fugitive drug czar Pablo Escobar.

April rains are dampening most of the country today. Showers and thunderstorms have hit the East coast, the Ohio Valley, the Midwest, the Northwest and Texas Panhandle. In northern Texas, a fast-moving front has dumped four inches of rain. Rising waters have caused widespread street flooding and have closed a number of streets and underpasses.

#90110u2253 04/20/1990 ~United Press International

NEW YORK (APRIL 20) UPI - Michael Milken, the Wall Street junk bond king who drove the market to dizzying heights in the 1980s and faced insider trading and rackeetering charges, Friday agreed to plead guilty, sources close to the case said.

Roger Hayes, the deputy U.S. attorney in Manhattan who is supervising the case, had set a Friday noon deadline for the former head of the junk bond department at Drexel Burnham Lambert Inc. to reach an agreement on a plea bargain or face expanded charges in the insider trading case.

A source close to the case who asked not to be identified said an 11th-hour plea bargain had been reached after lengthy negotiations that stretched late into the afternoon.

The specifics of the plea bargain arrangement and the amount of fines that Milken had agreed to pay were not immediately known.

Less than hour before the plea bargain agreement was disclosed, the U.S. Attorney's office in Manhattan said no official statement would be made until Monday.

If an agreement had not been reached, a grand jury was to convene Friday to consider expanded charges against Milken. The grand jury did not meet

as Milken's team of lawyers led by Arthur Liman of Paul, Weiss, Rifkind, Wharton and Garrison finalized the details of the deal with prosecutors.

Prosecutors had warned that Milken had two options: either to plead guilty or face expanded charges, including a possible maximum 20-year jail term on racketeering charges stemming from his insider trading activities at Drexel. The junk bond giant, which helped finance many multibillion-dollar takeovers in the 1980s, filed for bankruptcy protection in February.

Milken already faced civil charges of insider trading brought against him by the Securities and Exchange Commission in September 1988. In March 1989 a federal grand jury handed up criminal charges of racketeering, conspiracy and securities fraud against Milken.

The criminal indictment against Milken contained 98 counts of securities fraud, including violations of the Racketeer Influenced and Corrupt Organizations Act and was largely based on allegations made in 1986 by convicted felon and former Wall Street investor Ivan Boesky.

The prosecution's weak point, according to Milken's lawyers, was that most of the evidence against him came from Boesky.

Prosecutors spent several months trying to build up the government's case against Milken by seeking additional evidence from his former colleagues and other Wall Street sources.

Earlier this week sources close to the Milken case said his lawyers were pressing for a jail term of not more than five years and a $650 million fine in exchange for the plea bargain.

Cable News Network reported Milken had agreed to a five-year jail term and $600 million in fines in the plea bargain agreement reached with the government Friday.

The sources said Milken, unlike Boesky, was reluctant to cooperate with the government's ongoing investigations into insider trading on Wall Street.

Boesky paid $100 million to settle civil charges, was barred for life from working in the U.S. securities industry and sentenced to three years in jail.

Drexel, Milken's firm, pleaded guilty to six felony counts and agreed to pay a$650 million fine in 1989 to avoid an indictment on racketeering charges.

Other former Drexel executives who entered a guilty plea on insider trading charges included Denis Levine, who paid $11.6 million in fines and

was sentenced to two years in jail. Levine cooperated with the government investigation.

Martin Siegel, a former investment banker at Drexel, also pleaded guilty on insider trading charges and paid a $9 million fine.

#90110u2260 04/20/1990 ~United Press International

ROANOKE, Va. (APRIL 23) UPI - The ITT Electro-Optical Products Division said Friday it was laying off one-fifth its work force, as another company challenged its contract to make night-vision goggles for the Army.

ITT spokesmen said the layoffs were were not related to the challenge.

Employee relations director Don Hershey said 220 hourly employees and a small number of salaried employees will lose their jobs within a couple months because the company recently lost its contract to make Generation II goggles for the Army.

The $164 million contract being challenged by Litton Electro-Opticals of Arizona is to make Generation III goggles.

The Generation II goggles represented 15 percent of the division's business last year and about six percent this year.

Hershey said all employees will get 60 days' notice.

Litton wants to know why ITT got the contract for Generation III goggles last month when Litton's bid for the project was $25 million lower.

ITT Vice President Robert G. Williams confirmed the General Accounting Office is conducting a routine 90-day investigation of the challenge, which was filed by Arizona's senators, Dennis DeConcini and John McCain.

ITT is likely to call on its own political muscle in the battle. Virginia Sen. John Warner has visited the plant and credited its goggles with saving lives during the invasion of Panama.

Litton may have to lay off up to half its employees in the fall when its current contract with the Army runs out.

''This is a serious protest,'' Williams said. ''It is going to get nasty.''

NEW YORK (APRIL 20) UPI - The dollar moved up on the West German mark and other main currencies in New York trading Friday as tension rose in the Soviet-Lithuanian faceoff and pessimism about German monetary union resurfaced.

Traders said the deutsche mark weakened on news that Soviet troops burst into a Lithuanian Communist Party printing plant in Vilnius, Lithuania's capital, and roughed up security guards. That was seen as a worrisome escalation of Moscow's campaign of pressure against Lithuania.

''The mark is being affected by talk of a major crisis in a couple of days '' said Credit Suisse treasury vice president Francoise Soares-Kemp.

''Things are beginning to get more serious there,'' said corporate trader Mark Morris of National Westminster Bank, referring to the Soviet effort to force Lithuania to recant its declaration of independence.

In late New York trading, the dollar was changing hands at 1.6875 marks, up from 1.68 late Thursday. Against the Japanese unit, the dollar fetched 157.45 yen, up from 156.95.

The mark also fell on discord in East and West Germany over the rate at which East German marks should be converted to deutsche marks when the two nations merge their economies. East Germany wants one-to-one conversion, but financial markets fear this could unleash strong inflation.

Players are edgy about a forthcoming decision, said Soares-Kemp, so they are ''bullish on the dollar ... as an alternative to the uncertainty.''

Corporate foreign exchange manager Robert White of First Interstate Bank Corp. in Los Angeles said yen trading was ''a bit of a roller coaster'' as the unit bobbed up and down against the dollar.

Markets were roiled the day before by comments from Treasury Undersecretary David Mulford that the yen was too weak. Players appeared undecided about whether the Japanese currency would firm up or weaken

again.

Other dollar rates: 1.4905 Swiss francs, up from 1.4850; 5.6675 French francs, ahead from 5.6450; and 1,239.50 Italian lire, up from 1,234.

The British pound eased to $1.6380 from $1.6445.

In Europe, the dollar moved up against the mark and other currencies on news of the new troubles in Lithuania. Traders said it was helped by the market'sperception that it was oversold earlier in the week as well.

The dollar closed in Frankfurt at 1.6815 marks against 1.6765 Thursday and also rose in Zurich, to 1.4900 Swiss francs against 1.4805.

In London, the pound retreated to $1.6350 against $1.6450.

The U.S. unit moved higher in Paris and Milan to 5.6495 French francs against 5.6235 and at 1235.25 Italian lire against 1229.40.

In Tokyo, traders said the dollar declined on position adjustment, closing at 157.75 yen compared with 157.90 yen Thursday.

Japanese institutions, particularly life insurance companies, showed strong interest in dollar buying, but many players sold dollars in anticipation of a further decline in the U.S. currency.

Republic National Bank in New York closed cash gold at $376.50 an ounce, off from $377.50 Thursday. The New York Commodity Exchange settled gold at $376.60 an ounce, down from $377.30. In Zurich, gold fell to $375 an ounce compared to $375.50 Thursday. London gold fell to $375.25 an ounce from $376.25.

Republic closed cash silver at $5.115 an ounce, up from $5.09. Comex spot silver moved up to $5.099 an ounce from $5.067. Zurich silver rose to $5.07 an ounce from $5.06, but London silver was unchanged at $5.10 an ounce.

#90110u2307 04/20/1990 ~United Press International
(APRIL 20) UPI - Crude oil prices leveled off in roller-coaster trading Friday that mirrored the week's market and its uncertainties over whether the OPEC cartel will be able to curb overproduction that has created a global glut.

On the New York Mercantile Exchange, the benchmark West Texas Intermediate crude for May delivery slid 11 cents to $17.95 a barrel after trading as high as $18.45 and as low as $17.52 a barrel.

Trading volume was a heavy 102,637 contracts.

WTI crept up 17 cents on the week after closing as low as $16.96 a barrel Wednesday, when a meeting between Saudi Arabia, Kuwait and the United Arab Emirates failed to yield any apparent curb on overproduction.

Production by Kuwait and the United Arab Emirates way beyond their assigned OPEC quotas has poured more crude onto the world market than current demand can absorb.

Saudi Arabia is the cartel's largest producer and in the past has raised or lowered its output to enforce output quotas of the 13-nation Organization of Petroleum Exporting Countries, which pumps more than a third of the world's crude.

WTI rocketed $1.10 a barrel Thursday after OPEC officials announced an emergency meeting May 2 in Geneva to stop the decline in prices that saw crude lose 14 percent of its value earlier this month.

''The market is a combination of traders worried about what OPEC can do and others who are skeptical that they will do anything,'' said Peter Beutel of Elders Futures Inc.

''There was a lot movement all around, but the market came back to where it was'' both on the day and on the week, said Mary Haskins of Paine Webber Inc. in New York.

The market situation was complicated by the fact that Friday was the last day of trading in the May WTI contract. The June contract becomes the WTI spot contract Monday.

The WTI June contract closed down 5 cents to $18.87 a barrel on the Merc.

The spread of nearly $1 between the prices of May and June crude reflects poor demand for near-term crude because storage tanks are spilling over, Haskins said.

This situation is not going to change quickly, the analyst said, and barring a refinery explosion or some other oil catastrophe there should be a continuing downward pressure on the price of the June WTI contract.

U.S. crude inventories currently stand about 50 million barrels over last year. ''You can't get rid of 50 million barrels of crude oil overnight,'' Haskins said.

On the U.S. Gulf Coast cash market, prompt delivery WTI fell 10 cents to $17.95 a barrel, 15 cents higher than a week ago.

On the European spot market, Britain's widely traded North Sea Brent was quoted at $16.57 a barrel, up 7 cents on the day and 57 cents on the week.

The UAE's Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - gained 3 cents to $13.95 a barrel, up 45 cents on the week.

Sun Co., of Radnor, Pa., raised the posted price it will pay for crude at the wellhead by $1.25 a barrel to $17 a barrel for WTI.

Both Marathon Oil Co., the Findlay, Ohio, unit of USX Corp., and Du Pont's Houston-based Conoco Inc. subsidiary raised their wellhead prices another 25 cents to $17 a barrel for WTI. The two had increased the price $1 Thursday.

All three companies had lowered the price 75 cents Wednesday.

On the Merc, unleaded gasoline for May delivery settled at 61.93 cents a gallon, up 15 cents on the day and 3.38 cents on the week, while prompt delivery gasoline was being quoted at 61.80 cents a gallon, a gain of 0.30 cent on the day and 3.35 cents on the week.

Although crude has been ruling the overall oil market, ''gasoline is the firmest element of all,'' Haskins said.

With inventories being built up for the summer driving season, demand for wholesale gasoline is approaching its peak, the trader said.

Home-heating oil rose 0.14 to 52.94 cents a gallon on the Merc, down 0.89 cent on the week. The fuel fell 0.35 cent on the prompt delivery New York Harbor cash market to 57.45 cents a gallon, 3.4 cents less than last week.

#90110u2310 04/20/1990 ~United Press International

WASHINGTON (APRIL 20) UPI - The B-2 stealth bomber has developed problems in the titanium rear deck surface of the first plane built, a problem that will delay resumed flight tests by four or five days, an aviation magazine reported Friday.

Aviation Week and Space Technology, in an article prepared for release in Monday's edition but made available to United Press International, said that isolated areas of the rear deck just behind engine exhaust outlets have been found to have been subjected to greater ''thermal expansion'' than anticipated.

Citing unidentified Air Force officials, the magazine reported that the distorted sections of titanium panels will be cut out and replaced with new patches. Although patching is acceptable for near-term flight tests, it is not a long-term solution because it introduces surface characteristics that could reflect radar energy. That would increase the plane's visibility to probing radar beams.

An Air Force spokesman said Friday that a routine inspection found ''small localized areas'' of titanium that ''had some greater thermal expansion than they thought.''

The spokesman, who asked not to be identified, said the problem was ''not a structural integrity kind of thing'' and would not present a flight safety problem.

He stressed that it was not a problem in the plane's exotic composite materials, which aid in its ability to escape detection.

The magazine reported it was unclear how the patches will affect plans for initial tests of the bat-winged plane's ability to elude radar.

It said that fixing the problem on later production models is considered the more significant concern now because of titanium shortages throughout the aerospace industry. The magazine said long lead times for acquiring single piece sheets of the material could affect B-2 production schedules.

The thermal expansion problem was found during an inspection after routine engine ground runs on March 30, the magazine reported, although it may have been present earlier. The aircraft has about 160 hours of engine operation and more than 30 hours of flying time.

Air Force officials said the expansion problems did not represent a safety problem, the magazine said. Flight tests are due to resume before the end of the month.

The news about the thermal expansion problem comes at a time when the program is under intensive Pentagon review as part of a major aircraft review that Defense Secretary Dick Cheney will discuss on Capitol Hill next week.

The administration wants $5.5 billion in the 1991 defense budget for five more of the planes, a figure that could be in jeopardy both because of the new-found problem and because of the pressure to cut defense spending.

#90110u2351 04/20/1990 ~United Press International

NEW YORK (APRIL 20) UPI - Stocks headed south this week as a surge in interest rates in the bond market and fears of a revival of inflation took their toll on the market.

The Dow Jones industrial average lost 15.99 Friday to close at 2695.95 and finished with a loss of 55.85 points, or about 2 percent, on the week.

Among the broader market averages, the New York Stock Exchange composite index fell 4.77 points to close the week at 184.06. Standard & Poor's 500-stock index fell 9.22 to 335.12.

Declines led advances 1,387-536 among the 2,175 issues traded this week. Big Board volume totaled 745,166,830 shares, compared with 534,383,970 a week earlier and 892,767,790 a year ago.

The stock market's performance Monday was its strongest of the week. Prices closed mixed after an early rally sparked by a surprisingly strong earnings report from International Business Machines Corp. failed to hold.

Big Blue reported first-quarter earnings of $1.04 billion, or $1.81 a share, up about 9.5 percent from the $950 million, or $1.61 a share, earned in the same period a year ago. The performance exceeded many analysts' expectations.

But on Tuesday fears of rekindled inflation took center stage as the government reported a 0.5 percent jump in March consumer prices. A 0.2 percent increase had been expected. Stocks fell sharply in early trading but then reocvered late in the session as the bond market, which also reacted badly to the news, stabilized.

The stability did not last long, however. Widespread talk Wednesday and Thursday of Japanese selling sent prices tumbling and yields soaring to their highest levels in almost a year. Japanese investors were said to be selling dollar-denominated securities in favor of those denominated in yen to try and boost the weak Japanese currency.

Adding to the pressure on bonds was the impending quarterly Treasury refunding, which has been estimated at $30 billion. The refinancing will dump more supply on an already reeling market.

On Friday, the government reported a record $53.3 billion budget deficit in March, a surge of nearly 51 percent over February's deficit of $35.3 billion. In March 1989, the government ran a deficit of $35.8 billion.

Financial markets expected a deficit figure in the range of $40 billion and the normally routine announcement caught many analysts by surprise.

In late trading Friday, the 30-year bond was down 29/32 to 95 1/2 with a yield at 8.93 percent, the highest level since May 1989. At the end of last week, the yield was 8.59 percent. Treasury notes and bonds lost more than 3 points this week and yields jumped 0.3 point.

Hugh Johnson, chief economist at First Albany Corp. in Albany, N.Y., called the deficit news a real shock.

''Receipts were less than expected, outlays were more than expected, and individual tax returns were on the refund side rather than the pay side,'' he said. ''The cost of the Resolution Trust Corp.'s thrift bailout was in the outlays number. That was the reason for surge in outlays.''

As for the outlook for interest rates, Johnson said he thinks rates will have to go up still further to attract investors to replace the Japanese, who have apparently backed away for the time being.

''No one wants to buy stocks when rates are high and bonds are a good alternative,'' he added.

''The problem is that there has been serious damage to that elusive thing called confidence. It's been bloodied this week and it's going to be difficult to put it back together again soon.''

Brad Weekes, senior vice president in charge of sales and trading at Donaldson, Lufkin and Jenrette Securities Corp., noted the interest rate-sensitive Dow utility average fell through a support level at 210, closing Friday at 208.19. ''That's a signal of still higher rates ahead,'' he said.

On the trading floor this week, IBM was the most active issue, up 22 to 109 3/8 after its strong earnings report.

Philip Morris followed, off 1 to 41. Harcourt Brace Jovanovich was third, surging 1 1/4 to 4 amid takeover speculation involving Thomson Corp. of Canada.

Among the other blue chips, AT&T fell 7/8 to 41, General Electric fell 1/2 to 65 1/2 and General Motors rose 5/8 to 46 3/4.

On the American Stock Exchange, the Amex Market Value index fell 9.92 to close Friday at 347.96. Declines led advances 541-261 among the 995 issues traded.

Amex volume totaled 74,522,645 shares, compared with 50,411,675 traded a week earlier and 62,604,050 traded in the same week a year ago.

B.A.T Industries led the Amex actives, up 1/8 to 12.

The National Association of Securities Dealers index tumbled 10.50 to end the week at 425.80.

#90110u2379 04/20/1990 ~United Press International

BIRMINGHAM, AL (APRIL 20) UPI - President Bush is ''increasingly concerned'' about escalating Soviet pressure on Lithuania but wants to meet with members of Congress next week before revealing what steps he will take in response, his spokesman said Friday.

The president ''would be prepared to announce actions fairly soon'' after his meeting with lawmakers, White House press secretary Marlin Fitzwater said.

Fitzwater spoke with reporters before Bush left Birmingham for a stop in Orlando, Fla., as part of a four-day trip across the South.

''We are increasingly concerned by news reports today of an economic crackdown in Lithuania. Although our information is sketchy, we are disturbed that this signals another unfortunate step in the pressure being brought to bear on Lithuania by the Soviet Union,'' Fitzwater said.

Soviet President Mikhail Gorbachev, in an effort to force Lithuania to rescind a declaration of independence, has cut off oil from the Soviet Union, sharply curtailed natural gas shipments.

On Friday, there were reports the Kremlin had diverted Cuban sugar from Lithuania and that metal and timber shipments had been blocked at the border.

Bush, who has been extremely careful in his response to Gorbachev's moves against the small Baltic republic, has consistently said he wants the conflict resolved through peaceful dialogue.

On Thursday, Bush said there are limits to U.S. patience with Soviet strong-arm tactics, but he has refused to say what his response might be. Other officials have said trade relations between Washington and Moscow would be a likely target for any U.S. retaliation.

The president, asked after he arrived in Florida why he was waiting to act explained that there was ''a lot of consultation going on right now.''

Bush has been consulting with U.S. allies about the Soviet moves against Lithuania for the past two weeks, and Fitzwater said coordinated action against Moscow is being considered. The spokesman said the retaliatory measures ''would involve other countries, would have international implications.''

Fitzwater said the consultations with allies probably will ''be concluded early next week.''

''At that time, President Bush will meet with congressional leaders to advise them of our consulations and to discuss possible courses of action '' he said, adding, ''We continue to urge the Soviet Union to pursue a course of peaceful dialogue in the hope that this matter can be resolved in a responsible manner.''

Fitzwater insisted Bush was not setting a deadline for Gorbachev, but looking ahead to the meeting with congressional leaders. ''We want to know what the Congress feels is the best course,'' he said, ''but I would assume that we would be prepared to announce actions fairly soon after that.''

Bush has a regularly scheduled meeting with congressional leaders Tuesday morning.

In addition to the tighter economic embargo, Fitzwater also pointed to the forcible entry into a printing plant in Vilnius, the Lithuania capital, by Soviet troops.

''We think we need to let the American people know that this is of great concern, know what our process is and that the president should be ready early next week to discuss this matter with the Congress,'' Fitzwater said.

#90110u2422 04/20/1990 ~United Press International

(APRIL 20) UPI - The White House today said the latest tie-up in an offer to release an American hostage is ''just a smokescreen.'' A militant Islamic group yesterday reneged on its promise to free a captive, blaming it on the U-S refusal to send a particular diplomat to Syria. The White House says the kidnappers are toying with the United States.

In Beirut, a leading clergyman of the radical Moslem group Hezbollah today said ''talks are now being translated into action'' to free Western hostages. The leader hinted that one Western hostage would be freed soon and others would follow in the near future. The Hezbollah is believed to back the kidnappings in Lebanon.

In Washington, Soviet Ambassador Yuri Dubinin today defended the Soviet crackdown in Lithuania. Dubinin says Lithuanians violated Soviet laws... forcing the Kremlin to- quote- ''restore the legality and to resolve the crisis by way of dialogue.'' Dubinin says he made a ''routine'' call on Secretary of State Baker today about the Lithuanian situation.

Senator Sam Nunn today outlined his proposal for a trimmed-down defense budget. Nunn is the influential head of the Senate Armed Services Committee. The Georgia Democrat proposed stalling the rail-mounted M-X missile, slowing a key submarine program and freezing spending for ''Star Wars'' nuclear defense research.

Banished baseball great Pete Rose today pleaded guilty to hiding income of nearly 300-thousand dollars from the Internal Revenue Service. Rose appeared in a federal court in Cincinnati to admit to filing false tax returns for 1985 and 1987. Rose faces a maximum of three years in prison and a 250-thousand-dollar fine on each of the two counts.

-30- 1870

#90110u2445 04/20/1990 ~United Press International

INDIANAPOLIS (APRIL 20) UPI - Illinois quarterback Jeff George Friday signed a contract with the Indianapolis Colts, guaranteeing that the Colts will choose the Indianapolis native as the No. 1 pick in Sunday's NFL

draft.

George's contract reportedly will give him $15 million over six years, bettering the six-year, $11 million contract last year's top pick, Troy Aikman, received from the Dallas Cowboys.

Jim Irsay, general manager of the Indianapolis Colts, continued talks into the afternoon Friday with Leigh Steinberg, George's agent, as an evening deadline loomed for completing the deal. The Atlanta Falcons agreed to terms with the Colts on trading their first pick in the draft, contingent upon the Colts signing George by Friday.

While talks dragged on at the team's northwestside complex, George showered at his eastside home and awaited a phone call. When it came, he drove to the team's headquarters and was taken into a private office area.

''If the Colts really want me, then I'll enjoy playing for them,'' he said. ''I'm really excited about the chance to play in my hometown.''

NFL sources said the Colts will give up Pro Bowl tackle Chris Hinton, second-year receiver Andre Rison, their No. 1 pick in the 1991 draft and a fifth-round pick this year. In exchange, the Falcons will give up their No. 1 overall pick plus a fourth-round choice this year and a second- or third-round pick next year.

''I question whether the Colts are giving up too much,'' Hinton said. ''Other players are a little surprised at what they're willing to give up. The two most important things a quarterback needs to be successful are a good left tackle to cover his blind side and a receiver who can go deep. But he's from Indianapolis and those are some of the things that come into consideration.''

George shrugged off criticism that the cost of getting him from Atlanta might devastate the Colts' offense in other areas.

''I don't really worry about all of that,'' George said. ''There are going to be people who are going to criticize Jeff George. All I can do is go out and play the best that I can.''

The team has already lost Pro Bowl running back Eric Dickerson, who says he retired because he worried about staying healthy running behind the Colts' line. Colts quarterbacks have been injury prone, with current players Jack Trudeau and Chris Chandler and former Colts passer Gary Hogeboom having each suffered season-ending injuries over the past four seasons.

Trudeau, a former Illini passer like George, said he wants to be traded if George signs.

''In my mind, they've thrown away the next three or four years,'' Trudeau said. ''I don't think this team will win three or four games next year, and if that's the case, I don't want to be a part of it. In losing Chris and Andre and probably Eric, they've lost virtually their entire offensive production. Offensively we're nothing now.''

(APRIL 20) UPI - In northwest Minnesota, firefighters continue to battle a wildfire that has so far destroyed more than 15-thousands acres of grass and timberland. A spokesman for the Department of Natural Resources says helicopters and backfires are being used to try to put out the blaze, which started yesterday.

The pilot of a twin-engine plane is dead after his plane crashed early this morning near Love Field airport in Dallas. 38-year-old D-A Johnson was killed when his twin-engine plane apparently suffered engine failure and crashed in flames on a residential street near the airport. NO other injuries were reported.

In Chicago, civil rights lawyers are blasting the decision of a Sunday school to expel a five-year-old boy suffering from AIDS. The Moody Bible church has asked the boy to stop coming to school until it decides whether his attendance poses a threat to others. The move came one day after funeral services for AIDS activist Ryan White.

The latest F-B-I figures show that robberies in New York City jumped nearly eight percent last year... an average of 256 per day or nearly six per minute. That makes the Big Apple the most robbery-ridden city in the United States on a per-capita basis, easily topping runner-up Detroit.

-30- 1426
#90110u2520 04/20/1990 ~United Press International
WASHINGTON (APRIL 20) UPI - Federal prosecutors Friday said Mayor Marion Barry initiated the crack cocaine transaction that led to his arrest at a hotel in a Jan. 18 FBI sting, and said Barry was a regular drug abuser who put some of the crack in a coat pocket to take with him before the bust.

In a memorandum filed in U.S. District Court where Barry is scheduled to face a June 4 trial, U.S. Attorney Jay Stephens claimed a sting operation was set up only after a grand jury heard repeated testimony that Barry used illegal drugs for years.

''The government submits that when all the evidence is placed before the court in the present case, the record will unequivocally establish that this was not a situation where the government simply launched an undercover operation as a fishing expedition to see if anyone would bite the bait,'' the government wrote in a scathing 23-page response to a request from Barry's attorney that the charges be dropped.

''Rather ... the credible and substantial testimony of numerous witnesses indicated that in recent years the defendant had knowingly, willingly and repeatedly bought, possessed and used crack, cocaine and marijuana,'' the court papers state.

The memorandum also disclosed that on the night of his Jan. 18 arrest at the Vista International Hotel in downtown Washington, Barry's blood alcohol level was measured at .005 - 20 times below the legal limit for drunken driving. Barry's attorney is expected to claim the mayor's problems stemmed from alcohol abuse.

The government's allegations were the first extensive description of Barry's arrest after he was lured to the hotel by former model Rasheeda Moore, who was working with the FBI. Last week Barry's attorney, R. Kenneth Mundy, asked U.S. District Judge Thomas Penfield Jackson to drop all eight charges of perjury and cocaine possession against Barry, claiming the government had ''manufactured the crime.''

In a legal response signed by Stephens and Assistant U.S. Attorneys Judith Retchin and Richard Roberts, Barry is portrayed as a long-term drug user who cannot legally claim he was an improper target of the undercover investigation.

Mundy claimed an undercover agent brought drugs into the hotel room Jan. 18 when ''it became apparent that (Barry) was preparing to leave without any narcotic activity taking place.''

The government claimed Barry said he would prefer powder cocaine to crack,

but when told only crack was available, gave money to Moore to pay for the drugs.

Barry put a portion of the crack in the pocket of his jacket hanging on a door knob, then ''arranged the crack in the pipe, produced a cigarette lighter and lit the crack,'' the memorandum charges. Mundy had claimed Barry had to be shown how to light the pipe.

''He inhaled deeply on the pipe and held his breath. After exhaling, the defendant again inhaled deeply on the pipe and held his breath. After taking two hits from the pipe, he put on his jacket and called his security officer by walkie-talkie as though he was ready to leave,'' the government contends.

Barry was then arrested.

Mundy has asked that an FBI videotape of events at the Vista not be admissible as evidence.

If convicted of all eight charges stemming from the arrest and a Feb. 15 indictment, Barry could face 20 years in prison and $1.25 million in fines.

After his arrest, Barry spent seven weeks at in-patient substance abuse centers in Florida and South Carolina. He has said he is an alcoholic who also was addicted to prescription drugs, but has not acknowledged using illegal drugs.

''The record will amply demonstrate that no one forced the defendant to go to the hotel room at the Vista hotel; no one forced him to ask for drugs; no one forced him to buy any crack; no one forced him to put a portion of the crack in his jacket pocket to take with him; and no one forced him to smoke the crack,'' the government charged. ''To the contrary, he deliberately engaged in this criminal conduct as he had on scores of other similar occasions.''

#90110u2578 04/20/1990 ~United Press International

SAN DIEGO (APRIL 20) UPI - On the eve of the nation's Earth Day weekend celebration, Vice President Dan Quayle Friday criticized Democrats for playing politics with concerns about the environment.

Talking to reporters after a speech to Republican state leaders, Quayle said Democrats have ignored pressing economic problems in their rush to back environmental causes.

''I think that the Democrats hope that they can politicize the environmental issue to their advantage. They're grasping onto the

environmental issue,'' he said.

''People are for the environment but people also like to eat. And we're talking about jobs,'' he added.

Praising President Bush for his environmental stands, Quayle said, ''It's a Republican president that's been pushing Congress to come up with the most environmentally creative legislation of the decade. ... The Republicans will be there to support the president as he continues to push his environmental legislation.''

Earlier this week, the White House came under fire by European nations for attempting to downplay the urgency of the global warming issue during an international environmental conference. By the end of the meeting, however U.S. officials accepted European assertions that immediate action - not just more research - was needed on global warming.

Quayle was in the San Diego area to address a meeting of state directors of the Republican National Committee. He told party leaders that the GOP will have to increase its presence in state legislatures before it can gain a majority in Congress.

The ''tremendous shortfall'' of Republicans in Congress can be erased by emphasizing GOP stands on key issues, including opposition to tax hikes and support for the death penalty, Quayle said.

He added, ''One of the reasons that I am convinced that we have that deficit is because of the poor showing that we have had in getting the majorities in our state assemblies across the country.''

Asked by reporters if he was concerned about opinion polls that favor dropping him from the 1992 ticket, the vice president said, ''I've seen so many polls and so much numbers thrown at me that I just go ahead and do the job.

''Let the president speak on this issue and let the president make his decision,'' he said.

-30- 2500

#90110u2787 04/20/1990 ~United Press International

TORRANCE, CA (APRIL 21) UPI - A reputed gang member was sentenced to death Friday for the murders of two men, including an Orange County minister who was shot as he prayed in a telephone booth while stranded in South Los Angeles.

Tracy Carter, 19, is the last of three gang members to be successfully prosecuted in the killings.

Carter, who prosecutors said was the triggerman, was convicted in November of two counts of first-degree murder with special circumstance allegations that made him eligible for the death penalty.

Carter also was found guilty of robbing the minister and his wife, attempting to rob the second man he killed and attempting to rob and attempting to murder a third man.

Jurors at the penalty phase of his trial recommended the death penalty, turning down a defense plea to give Carter a sentence of life in state prison without the possibility of parole.

Superior Court Judge Jean Matusinka formally imposed the death sentence on Friday. California executions are carried out in the gas chamber. The sentence received an automatic appeal.

Todd Lavera, 23, another gang member convicted in the case, has been sentenced to 58 years to life in state prison. The third gang member, Andre Moore, 18, pleaded guilty to first-degree murder and robbery and received a sentence of 32 years to life in state prison.

Deputy District Attorney Ann Ingalls said the three gang members killed David Thompson, 27, a licensed minister and an elder at the Greater Zion Apostolic Church in Santa Ana, after his church bus broke down in South Los Angeles in April 1987.

Thompson had gone to a telephone booth to call for help when the trio robbed him and his wife, then shot him in plain view of the woman as he intoned a final prayer. The killers then forced Thompson's wife from the car and drove off.

Hours later, they attempted to rob Leopoldo Salgado, 49, of Los Angeles as he left a liquor store and shot him to death. The three also attempted to rob and tried to kill a friend of Salgado's.

#90110u2814 04/20/1990 ~United Press International

(APRIL 20) UPI - The White House cautions Americans against becoming too optimistic about the release of Western hostages... Senator Sam Nunn is proposing sharp cuts in Pentagon spending... And Pete Rose pleads guilty to tax charges... U-P-I has these top stories and more, next.

The White House says President Bush is conducting ''business as usual'' despite recent teasers about the release of an American hostage in Lebanon.

A militant Islamic group yesterday said it would free an American captive

if a top State Department official flew to Syria within 48 hours. But after Bush refused, the group said the deal will be delayed.

Fitzwater today said the group's excuse is ''just a smokescreen.'' He said the kidnappers have a pattern of toying with the United States.

Fitzwater spoke to reporters on Air Force One en route to a Republican fund-raiser in Alabama. He said Moslem radicals often announce a release, put out pictures or letters and then give a reason why the release can't happen.

Nevertheless, in Beirut, Lebanon, a clergymen of the radical Moslem group Hezbollah hinted that one hostage would be freed soon and that other Western captives will be freed in the near future.

-20

Lithuania says Soviet troops today stormed a printing plant belonging to the Lithuanian Communist Party.

A spokeswoman for the republic's government said 50 soldiers broke windows roughed up security guards and occupied the plant, which mostly prints journals.

The local Communist Party has split over the Lithuanian independence issue and disputes who should control the plant.

Since the republic declared independence on March 11th, Soviet troops have occupied other party buildings on behalf of communists still loyal to Moscow.

Lithuanian government spokeswoman Ellen Gordon said the soldiers remained inside the fence surrounding the plant as a crowd of about 200 Lithuanians gathered outside. Lithuanian Interior Ministry forces arrived several hours later but remained outside.

The White House says it's continuing to talk with allies about how to deal with an energy embargo imposed on the republic by the Soviet Union.

-30- 2337

#90110u2835 04/20/1990 ~United Press International

(APRIL 20) UPI - The battle lines are being drawn over the defense budget.

Senator Sam Nunn today unveiled his plan for cutting the fiscal 1991 defense budget authority by 18-BILLION dollars from the 307-BILLION dollars proposed by Defense Secretary Cheney.

Though far below what the Pentagon wants, Nunn's proposal is far above what House Democrats propose from the so-called ''peace dividend.''

Nunn wields great influence as chairman of the Senate Armed Services Committee.

The Georgia Democrat suggests stalling the rail-mounted M-X missile... slowing a key submarine and submarine missile program... and freezing spending for ''Star Wars'' nuclear defense research.

Nunn deferred a formal suggestion on the B-2 stealth bomber until Cheney makes his recommendation next week. But the senator signaled that the plane must be adequately tested before producing more than two or three a year.

Pete Rose... once a shoo-in for the Baseball Hall of Fame... today pleaded guilty to trying to cheat the Internal Revenue Service.

In a federal court in Cincinnati, Rose admitted to filing false federal income tax returns that hid 300-thousand dollars of income in 1985 and 1987 returns. Much of the money was used in gambling.

Eight months ago, the former Cincinnati Reds star player and manager was banned from baseball for life because of gambling.

Rose remains free during a pre-sentencing investigation. Rose could be sentenced to up to six years in prison and fined up to 500-thousand dollars.

The prosecutor said it's too early to tell if he will recommend that Rose spend time in prison.

After court, Rose said he is ''NOT a bad person,'' but he ''did some bad things.''

Rose said he needs help the rest of his life to treat the ''sickness'' of compulsive gambling.

#90110u2845 04/20/1990 ~United Press International

(APRIL 21) UPI - FRIDAY'S SPORTS TRANSACTIONS

Baseball

Cincinnati - Sent catcher Terry McGriff to Nashville of the American Association (AAA); recalled pitcher Kip Gross from Nashville.

Basketball

Indiana - Placed forward Dyron Nix on injured list; activated forward Calvin Natt from injured list.

CBA - Terminated the franchise of the Santa Barbara Islanders.

NBA - Fined Philadelphia and Detroit $50,000 each; suspended Philadelphia forward Charles Barkley and Detroit center Bill Laimbeer one game each and fined them $20,000; suspended Detroit forward Hastings for one game and fined him $10,000; fined Detroit guard Isiah Thomas $7,500; fined David Greenwood, John Salley, Mark Aguirre, Gerald Henderson and William Bedford of Detroit, and Ron Anderson, Kenny Payne, Kurt Nimphius, Scott Brooks and Leonard Copeland of Philadelphia $500 apiece for incidents in April 20 game.

College

American - Basketball coach Ed Tapscott resigned.

Kalamazoo - Named David Warmack head football coach.

Michigan Tech - Named Rick Yeo athletic director.

North Carolina State - Named Todd Turner athletic director.

Pittsburgh - Assistant athletic director Bob Heddleston resigned.

San Jose State - Signed Terry Shea to 5-year contract as head football coach.

Football

Indianapolis - Signed quarterback Jeff George to a 6-year contract completing deal with Atlanta for top pick in draft; traded wide receiver Andre Rison, tackle Chris Hinton and No. 1 pick in 1991 draft and fifth-round pick this year to Atlanta.

San Francisco - Traded its fourth and fifth-round draft picks to the LA Raiders for the Raiders' fourth-round pick.

-30- 1837

#90110u2894 04/20/1990 ~United Press International

WOONSOCKET, RI (APRIL 21) UPI - A 12-year-old boy became so distressed over the alleged drug use of his mother and father that he informed police who arrested the parents, a published report said Friday.

Paul Lizotte III first talked with friends about his parents then walked into the city police station Thursday afternoon, authorities told the Woonsocket Call.

Ninety minutes later, police anti-drug agents obtained a warrant to search the apartment of Paul Lizotte Jr. and his wife Joan, both 31.

Police reported finding 12 baggies of marijuana in a shoebox under their bed and drug paraphernalia in other areas of the apartment, patrolman Guy Baillargeon said.

The parents were arrested and charged with possessing marijuana and possession with intent to distribute. They were released on personal recognizance pending a court hearing June 21.

The boy reportedly became concerned about his parents when he learned through anti-drug programs at his elementary school about the dangers of marijuana use.

''He understood people could go to jail and his mother would be involved as well,'' Baillargeon said.

#90110u3046 04/20/1990 ~United Press International

HONOLULU (APRIL 20) UPI - Massachusetts Gov. Michael Dukakis, the 1988 Democratic presidential nominee, called for changes Friday in how the media cover presidential campaign.

Dukakis, who lost the election to George Bush in a bitter campaign, told a convention of the Hawaii chapter of the American Civil Liberties Union that news coverage must get beyond ''sound-bite politics.''

''I'm not blaming anyone,'' Dukakis said. ''We should have done a better job of dealing with the kind of negative campaigning that came out of the Bush campaign, and it's our fault for not dealing with it.''

Dukakis told reporters at a newsconference that in 1968 each presidential candidate got about 50 seconds on the network news each night, a figure that dropped to 9.8 seconds by 1988.

''What campaigns spend most of their time on ... is how to beat the other guy on the 10 seconds you get at 6:00,'' he said.

Dukakis also admitted he should have done more to respond to negative campaigning in the 1988 presidential race.

Asked if it was necessary to counter a negative campaign with more

negative campaigning, Dukakis said ''That's a good question.''

In the three major campaigns last fall, three Democrats won despite negative campaigning, he said, but the two who ran positive campaigns barely won, while the candidate who made a tough counterattack won by a large margin.

Dukakis, who is not running for re-election in Massachusetts this fall, said he no immediate plans, but said he is concerned about getting the best and brightest young people into government service.

-30- 1798

#90110u3090 04/20/1990 ~United Press International

(APRIL 20) UPI - The United States and Soviet Union today resumed talks on arms reductions in Washington despite increased friction over Lithuania. While one U-S official called the arms talks ''productive,'' the State Department said the talks raised the issue of Lithuania.

Air traffic controllers are on strike in France. Air officials say the strike forced the cancellation today of more than two-thirds of all flights. The controllers complain that increased traffic led to nine near-collisions last year.

Officials say Greek and Turkish authorities today intercepted two trucks carrying steel barrels suspected to be parts of a giant gun being shipped from Britain to Iraq. Britain says steel pipes seized nine days ago en route to Iraq also were for a gun.

New York Senator Alfonse D'Amato today introduced a bill calling for U-S sanctions against Iraq unless Baghdad permits the inspection of plants suspected of making nuclear, chemical and biological weapons. The move follows recent allegations that Iraq is stockpiling weapons.

Iran's leader is renewing calls for a holy war against Israel. President Hashemi Rafsanjani said that today... World Jerusalem Day... serves as a reminder to all Moslems to- quote- ''cry out for the doom of Israel.''

In Jerusalem, Israel's High Court says Jewish settlers can stay in their Christian Quarter residences... at least for now. Settlers moved into the 72-room building during Holy Week, prompting criticism from Moslems, Christians and Jews.

#90110u3096 04/20/1990 ~United Press International

(APRIL 20) UPI - Three U-S military teams are on their way to Vietnam to try to resolve the status of Americans missing in action since the Vietnam

war. The team plans to excavate U-S warplane crash sites. The military still canNOT account for about 16-hundred Americans.

Police in Manchester, England, are demanding that the British government repay the city more than one-point-six-Million dollars spent on fighting the nearly three-week-old inmate uprising at Strangeways Prison. Seven inmates remain in control of part of the prison.

The Los Angeles District Attorney said today Elizabeth Taylor's doctors prescribed potentially life-threatening doses of pain-killers to the actress. The office referred the allegations to the state Medical Board, but said the conduct does NOT warrant criminal charges.

-30- 970

#90110u3380 04/20/1990 ~United Press International

(APRIL 20) UPI - Accusations arose today that Iraq is getting more parts for a giant gun from Britain. Greek and Turkish authorities say they intercepted two trucks today carrying what appear to be parts of a giant gun. On Wednesday, the British government concluded that steel pipes seized nine days ago in the United Kingdom bound for Iraq were parts of a giant gun. Iraq says the tubes are part of a petrochemical complex.

West Germany today arrested a Foreign Ministry official on suspicion of spying for East Germany for 35 years. That's the fourth alleged spy uncovered in the ministry in the past two weeks. A spokesman for the State Prosecutor's Office says authorities also arrested a member of the West German defense force. He also is believed to have spied for the former communist authorities in East Germany.

Tennessee Representative Harold Ford today predicted a quick acquittal in his influence-peddling trial. Following his attorney's emotional closing argument in Memphis, Ford declared that he feels good and is ready for the jury's decision. The flamboyant Ford is an eight-term Democrat and the only black congressman in Tennessee history. He claims the case against him is a ''vendetta'' by the federal government.

Connecticut officials have ordered a lockdown of a maximum-security prison near Hartford. The move comes after eight guards were injured when they tried to break up a brawl that broke out among inmates last night during a Moslem religious service. The lockdown is expected to continue through tomorrow.

In Washington, a tribe of native Americans officially kicked off Earth Day 1990. Earlier today, American Indian elders prayed to Mother Earth, beginning a weekend of festivities that are expected to bring out at least 100-Million environmental supporters world-wide. Indians were chosen to open the ceremonies because as one spokesman says, for Indians, every day

is Earth Day.

#90110u3689 04/20/1990 ~United Press International

(APRIL 20) UPI - Nicaragua's Contra rebels say they will keep their weapons beyond the June 10th date set for disarmament if the Sandinistas remain in control of the army after President-elect Chamorro takes office next week. Contra leaders today said they will ignore a cease-fire agreement signed yesterday... if Humberto Ortega- the brother of President Daniel Ortega- remains commander-in-chief of Nicaragua's armed forces.

Pope John Paul travels to Czechoslovakia this weekend- the first time a pope has ever visited the East Bloc country. The three masses the pope is scheduled to hold are expected to attract an average of one-Million people

each. John Paul has returned to his native Poland three times since becoming pope.

A court translator in New York City says Saudi Arabian financier Adnan Khashoggi wrote in a deposition that he lent Imelda Marcos six-Million dollars in return for 38 ''master paintings.'' The interpreter said Khashoggi testified he paid by bearer check and cash because Marcos was ''could NOT collect money by check or by transfer.'' Mrs. Marcos is on trial on charges of plotting to divert money stolen from the Philippine treasury into real estate and art investments.

In Colombia, a manager for the El Espectador newspaper is the latest victim of a drug war that has claimed scores of lives. Police are looking for assailants who shot and killed the paper's distribution director today in Medellin. The killing follows an anti-drug editorial in yesterday's issue. The newspaper had suspended such columns for two weeks because of drug cartel death threats.

-30- 1776

#90110u3895 04/20/1990 ~United Press International

(APRIL 20) UPI - The White House today says it's NOT ''overly optimistic'' about the chances of getting an American hostage freed soon. Spokesman Marlin Fitzwater told reporters on Air Force One that President Bush is conducting ''business as usual'' despite the hostage situation and tensions in Lithuania. An Islamic group in Lebanon yesterday said it would delay the promised release of an American captive because a specific U-S envoy did NOT go to Syria.

The wife of American hostage Robert Polhill arrived in Syria today. Feryal Polhill talked privately with American officials at the U-S Embassy in Damascus. An Islamic militant group yesterday released a photograph of her husband along with a statement. Mrs. Polhill asked political and spiritual leaders to ''save NO effort'' to free the captives.

Lithuania reports Soviet troops today seized a Lithuanian printing plant. The troops reportedly hit volunteer guards with sticks and pushed them out of the building. The official Soviet news agency Tass disputes the accounts, but the official Moscow news show appeared to confirm the reports. The republic's officials seemed to make little progress in replacing embargoed Soviet fuel, and predict serious problems within a month.

In Washington, reaction is coming in on Democratic Senator Sam Nunn's proposal today for defense cuts significantly below what the Pentagon wants. Budget director Richard Darman told reporters Nunn's plan is NOT the best. Darman says Democratic leaders are relying too much on defense cuts for deficit reduction. A Republican on Nunn's Senate Armed Services

Committee... Trent Lott of Mississippi... said calls for budget cuts are ''getting out of hand.''

#90110u4050 04/20/1990 ~United Press International

(APRIL 20) UPI - U-S considers response to Soviet pressure on Lithuania... a plea bargain reported for Wall Street's junk bond king... and Texas prepares to execute a killer. U-P-I has the top stories and more next:

The White House says President Bush should be ready next week to spell out what he will do about Soviet actions against Lithuania.

Spokesman Marlin Fitzwater says the president will finish consulting allies on the matter early next week. Bush is to meet congressional leaders Tuesday, and should announce his plan of action ''fairly soon after that.''

Fitzwater spoke with reporters on a presidential trip to Alabama.

Lithuania says the Soviet Union today cut off deliveries of metal, timber, and Cuban sugar in a widening economic war. The Soviets earlier this week cut off most gas and oil supplies.

Lithuania also reports Soviet troops occupied a Lithuanian Communist Party printing plant and threw out 30 volunteer nationalist guards.

In Orlando, Florida, Soviet Foreign Ministry spokesman Gennady Gerasimov defended the action, saying it was ''keeping the law'' because the Soviet Union owns the facility.

He called for the Baltic state to rescind its March declaration of independence and talk with Moscow about separation.

Gerasimov spoke to several hundred people at the University of Central Florida.

#90110u4068 04/20/1990 ~United Press International

(APRIL 20) UPI - Wall Street junk bond king Michael Milken has apparently agreed to accept a plea bargain on insider-trading and racketeering charges.

Specifics are hard to come by, but Milken's lawyers were reported earlier in the week to be working on a deal that would limit Milken to NO serving more than five years in jail and paying 650-Million dollars in fines.

A report today said the plea-bargain agreement was for a five-year jail term and 600-Million in fines.

Milken ran the junk bond department at Drexel Burnham Lambert and was credited- or blamed- for the merger mania and the bull market that dominated Wall Street through the '80's.

A grand-jury indictment was handed up against Milken more than one year ago. A grand jury was scheduled to meet again today to address additional charges against Milken, but it did NOT, as the plea bargain was agreed upon.

The U-S Attorney's office in Manhattan has said that NO official announcement will be made on the case until Monday.

President Bush has released the list for his hand-picked delegation to attend next Wednesday's change of political power in Nicaragua.

Vice President and Marilyn Quayle will lead the group overseeing the inauguration of President-elect Chamorro. They'll be accompanied by many of the members of Congress snubbed by the Sandinista government in February. The Bush delegation of election-observers was denied access to Nicaragua.

Indiana Republican Senator Richard Lugar heads the delegation of 20 members of Congress.

The president's son, Jeb Bush, will also join the delegation. He's active in Republican circles in Florida- a state that frequently played host to leaders of the Contra rebels during their civil war against the Sandinistas.

#90110u4086 04/20/1990 ~United Press International

(APRIL 20) UPI - Convicted killer Jerome Butler awaits death by injection in Texas.

The 54-year-old Butler is to be executed after early tomorrow morning. But he has refused to authorize an appeal, maintaining he does NOT want the execution stopped.

Still, officials have ensured that two judges with the Texas Court of Criminal Appeals will be available to authorize a delay if Butler so desires.

A former cook and truck driver, Butler was sentenced to die for the 1986

slaying of 67-year-old Nathan Oakley, who was shot three times in the back of the head during a 300-dollar robbery.

His execution would be the first in Texas this year, the 34th since the state resumed the practice in 1982, and the 122nd in the nation since the Supreme Court lifted the ban on capital punishment in 1976.

#90110u4149 04/20/1990 ~United Press International

(APRIL 20) UPI - The shuttle Discovery is almost ready to take another shot at giving scientists their best look ever at the universe.

Countdown is scheduled to begin tomorrow afternoon for the shuttle to liftoff Tuesday with the Hubble Space Telescope on board.

The mission is two weeks late because of a hydraulic failure on the launch pad at Cape Canaveral, Florida.

Engineers today installed freshly charged batteries aboard the one-point-five BILLION-dollar telescope.

The ship's five-member crew plans to fly back to Florida from the Johnson Space Center in Houston on Sunday.

Workers also prepared the shuttle Columbia to roll out Sunday morning to another pad for launch May 16th. That mission is to carry a battery of smaller telescopes into orbit to study ultraviolet and X-ray emissions in space.

Budget director Richard Darman says it is ''highly likely'' top-level budget negotiations between President Bush and Congress will begin soon.

Darman told reporters in Washington the economy's sluggish performance since October threatens to increase the fiscal 1991 budget deficit by as much as 20 BILLION dollars.

That's five-BILLION more than Darman's top estimate of just one month ago.

At the Treasury Department today, the government said the United States suffered a record 53-BILLION-dollar budget deficit in March. That's nearly 51 percent over February's deficit, and more than analysts projected.

A larger deficit would make it even harder for Congress to meet the fiscal 1991 deficit reduction target mandated by the Gramm-Rudman balanced budget law.

Darman said the administration is ''prepared to come to the table with

ways to meet'' the higher deficit figure.

#90110u4179 04/20/1990 ~United Press International
(APRIL 20) UPI - The foreign ministers of the European Community met today in Dublin, Ireland, intending to discuss the re-unification of Germany.

Instead, they concentrated on speeding up the unification of Europe. France and West Germany led the way, asking Irish Prime Minister Charles Haughey to plan for political and monetary integration by 1993. They also said the 12 E-C nations should adopt common policies on defense and foreign affairs.

The meeting took place in Dublin because Haughey presently occupies the rotating E-C presidency.

In an official statement, French President Mitterrand and West German Chancellor Kohl said they wanted- quote- ''to accelerate the political construction of Europe.''

Both German and European unification will dominate next week's meeting of the European heads of government, also set to take place in Dublin. The foreign ministers are expected to spend the rest of the weekend preparing for that meeting.

#90110u4207 04/20/1990 ~United Press International
(APRIL 20) UPI - President Bush is in Orlando, Florida, tonight for a Republican fund-raiser. Spokesman Marlin Fitzwater says the president is attending to ''business as usual,'' despite the crisis in Lithuania and the hostage issue.

Another pro-Iranian group released a statement regarding the hostage situation today. The fundamentalist Hezbollah said efforts to free the Western captives in Lebanon are ''being translated into action.''

Israeli helicopter gunships launched a major strike against a Hezbollah base in Syrian-controlled eastern Lebanon, 47 miles southeast of Lebanon today. Earlier, Hezbollah members protested against Israeli occupation of Jerusalem.

In Washington, D-C, today American Indian tribal elders prayed to Mother Earth during official opening ceremonies of Earth Day 1990. Singer Paul McCartney is in Brazil where he'll perform two Earth Day concerts expected to draw about 200-thousand people.

Sources close to the case of Michael Milken say the Wall Street junk bond king agreed to a plea-bargain today to avoid facing worse insider trading and racketeering charges. The Manhattan U-S Attorney's office said NO official statement will be made until Monday.

-30- 1364
#90110u4231 04/20/1990 ~United Press International
(APRIL 20) UPI - Salvadoran President Alfredo Cristiani says his government will resume peace talks with leftist rebels May 3rd. He vows a cease-fire is his first priority. Cristiani is urging Congress to be cautious about imposing any conditions on future aid to El Salvador.

Federal prosecutors say Washington, D-C, Mayor Marion Barry was a regular drug abuser who initiated the crack cocaine transaction that led to his January 18th arrest in an F-B-I sting. Barry is scheduled to go on trial June 4th.

The Senate Agriculture Committee has voted to create two new forestry programs. One will encourage long-term management of private forests and the other will use conservation easements to shelter endangered species or prevent forest land development.

President Bush announced today he has added five sites to the Environmental Protection Agency's National Estuary Program. The five sites will get state, local, and federal help to clean up dirty waters. Boston Harbor, a major symbol in the 1988 campaign, is one of the designated sites.

Pickfair, the legendary home of early film stars Mary Pickford and Douglas Fairbanks is gone. The symbol of Hollywood's golden age has been demolished to make way for an Italian-style villa for actress-singer Pia Zadora and her Millionaire husband.

-30- 1469
#90110u4421 04/20/1990 ~United Press International
(APRIL 20) UPI - Soviet cosmonauts aboard the Mir space station shouldN'T be surprised if they get what amounts to a phone call in space next month. The crew of the shuttle Columbia will try to make a ham radio call to two Soviet space travelers. While the shuttle Discovery is being readied for blastoff on Tuesday, Columbia is scheduled for takeoff May 16th. The astronauts will also talk with as many other ''hams'' as possible, including up to 40 school groups.

The kidnapped grandson of a former Panamanian military leader has been found dead in Panama City. The three-year-old child was discovered one

week after his abduction April 11th. His body had been partially devoured by vultures. The kidnappers had sought one-Million dollars from the family of Colonel Marcos Justine, the military chief of staff in the Noriega regime. Colonel Justine is being held in Florida on embezzlement charges.

Drug-cartel death squads renewed their attacks on the crusading Colombian newspaper El Espectador today- one day after the newspaper resumed running anti-drug editorials. The newspaper's Medellin distribution director was gunned down in the city center of Colombia's drug capital. The newspaper had suspended its editorial column for two weeks because of death threats.

Katherine Hepburn plans to tell her life story. Publisher Alfred Knopf announced in New York City today it will publish the memoirs of the legendary screen actress in hardcover next year. The memoirs are to reflect on Hepburn's childhood, her early days in New York, and her friendships with actor Spencer Tracy and others in the film industry. Describing her decision to write the book now, Hepburn said in a release, ''It's later than you think!''

-30- 1906

#90111d3880 04/21/1990 ~French/German News Agency

MOSCOW, (APRIL 21) - A Hungarian delegation was told by Soviet authorities Saturday that it was forbidden to attend a congress in Lithuania of the local Sajudis nationalist movement, a member of the delegation said.

The Hungarian delegation had been invited by the Sajudis, whose weekend congress is being held in the Lithuanian capital, Vilnius.

Viktor Orban, leading the delegation of four members of parliament of the Hungarian League of Young Democrats, said the Soviet embassy in Budapest had assured them they could go to the Baltic republic via Moscow.

But when they arrived here on Budapest-Moscow-Vilnius airtickets, Soviet officials prevented them from continuing their journey, telling them that "access to Lithuania is forbidden, on presidential orders", Mr. Orban said.

The four were told to return home on the same plane, but intervention by the Hungarian ambassador allowed them to stay for 24 hours. They are due to leave Moscow for Budapest Sunday.

Although foreigners can no longer go to Lithuania, there have been some exceptions in recent days.

A group of Moscow-based foreign correspondants was allowed on invitation by the Soviet Foreign Ministry, but some journalists were not allowed, for

unexplained reasons.

#90111u0216 04/21/1990 ~United Press International
(APRIL 21) UPI - The White House says President Bush is ''increasingly concerned'' about events in Lithuania and will meet with congressional leaders next week to discuss options for retaliation against Moscow. The announcemenct came as the Soviet Union reportedly cut off metal and timber shipments to the Baltic republic.

Poland's Solidarity union passed a resolution Friday backing Lithuania's bid for independence. The union also endorsed Lech Walesa's nine-years of leadership. Earlier, during an emotional speech, Walesa apologized for his one-man rule but reminded critics that under his leadership Poland achieved victory. Walesa goes up for re-election as chairman Saturday.

Wall Street junk bond king Michael Milken may have made the deal of his life Friday. A source close to Milken's case says the trader has agreed to plead guilty to insider trading and racketeering charges. But the U-S Attorney's Office in Manhattan says details of the agreement will NOT be announced until Monday.

Peruvian police are blaming Shining Path guerrillas for a brutal attack on a remote Amazon community. A police spokesman says about 300 rebels raided the village Sunday, herded residents into a central area and opened fire, killing at least 60 people and wounding 20 others. Because the village is so remote, police didN'T find out about the attack until Friday.

-30- 1532
#90111u0228 04/21/1990 ~United Press International
(APRIL 21) UPI - A renowned forecaster is predicting the 1990's will see more severe hurricanes, with the U-S East Coast being particulary vulnerable. William Gray, a professor of atmospheric science at Colorado State University, says years of increased rain in western Africa may cause more hurricanes to hit Florida and the eastern United States.

British naturalist Jane Goodall- a world-famous anthropologist who has spent 30 years studying generations of chimpanzees in Tanzania- is urging consumers to boycott cosmetics and other products tested on animals. Goodall also says her studies illustrate that chimps show affection for their families in ways similar to humans.

Babe, the oldest Asian elephant ever to become pregnant, is in her third day of labor. Officials at the Burnet Park Zoo in Syracuse, New York, say Babe is quiet and peaceful. A birthing team continues to stand by, bloodshot eyes and all, ready to lend a hand when the elephant finally delivers. The birthing process for elephants can take five days.

Janet Jackson was given a star on the Hollywood Walk of Fame Friday during a ceremony attended by two-thousand fans who jammed the intersection of Sunset and Vine to catch a glimpse of the pop singer. Jackson told the crowd- ''DoN'T forget it's OK to have fun, but doN'T forget what's going on in the world around you.'' Her brother Michael received a star in 1984.

-30- 1568
#90111u0241 04/21/1990 ~United Press International
(APRIL 21) UPI - More than 100 million people will observe the 20th anniversary of Earth Day this weekend with a calendar of events to celebrate and reaffirm the world's commitment to a better environment.

In Washington on Friday, American Indian tribal elders sang a prayer to Mother Earth to officially open Earth Day 1990 festivities.

''We give thanks to our mother, the Earth, to the four winds, to our grandmother, the Moon, and to our elder brother, the Sun, '' said Eugene Begay, an elder in the Lac Courte Oreilles Band of Lake Superior Chippewa, translating the prayer given by his uncle, Gaiashkibos.

Begay said the worldwide celebration was particularly important to American Indians because, ''for Indians, every day is Earth Day.''

''It pleases us that our brothers and sisters from families around the world are joining us in giving thanks,'' Begay said. ''It really makes us

feel good.''

As the Indian leaders spoke, activists on the Mall put the final touches on an eco-fair that featured exhibits by dozens of environmental groups, including a ''mini, walk-through'' rain forest in a tent and a giant Disposo-Monster - a spider-like creature made of pizza boxes, paper plates and other trash.

Dubbed Earth Day Expo, the fair had a distinctly '60s-ish ambience, with one booth by the National Organization for the Reform of Marijuana Laws explaining how the illegal herb could help save the Earth.

The group contends using marijuana fibers to make paper would be environmentally preferable because one acre of marijuana produces as much pulp as four acres of trees.

Earth Day also got underway in Brazil, where former Beatle Paul McCartney's participation included mega-concerts in Rio de Janiero's Maracana soccer stadium.

Organizers said the day also would be observed in 135 other nations, with events as varied as the planting of acid-resistant trees in the badly polluted Northern Bohemia region of Czecholslovakia, a roadside cleanup campaign in the Jordan Valley and a flying arch of kites over France's Loire River.

The commemoration is to culminate Sunday with a massive star-studded rally at the Capitol and similar celebrations in other major U.S. and foreign cities.

At the United Nations in New York, about 44 astronauts from 20 countries, including 16 Soviets and 11 Americans, will gather for a ceremony called ''Only One Earth'' which will include a live video link-up with two cosmonauts on the Soviet space station Mir now in orbit.

Gaylord Nelson, who as a Democratic senator from Wisconsin created Earth Day in 1970 to increase awareness about the environment, said public ignorance has impeded the movement.

''The most serious environmental problem that this nation and the world has is a lack of environmental consciousness,'' he told a rally at UCLA.

The Democrat said he borrowed from the antiwar movement's ''teach-ins'' to create Earth Day, and got it off the ground with a total of $4,000 in ''seed money'' from the United Auto Workers union and AFL-CIO.

The first Earth Day is recognized as the birth of the environmental movement and led to the creation of the U.S. Enviromental Protection

Agency.

It also fostered the Clean Air Act, the Clean Water Act, the Endangered Species Act and the Resource Conservation and Recovery Act, which regulates the disposal of hazardous waste.

Amid optimistic hype, there were signs Earth Day had not caught on in some countries and, in a few cases, only accentuated political difficulties.

Activists planning an environmental conference in Hong Kong said they might have to cancel their event due to a lack of interest, despite pervasive pollution in the British colony, which dumps 64 percent of its raw sewage and industrial waste into South China Sea.

And in South Africa, officials in the northern transvaal province booked an Earth Day event at the racially segregated Overvaal resort inside the Swadini nature reserve, meaning it would be a whites-only affair.

(APRIL 23) UPI - TV SCHEDULE:

(Times are EST unless noted)
(R denotes repeat)

MONDAY, APRIL 30

6:30 p.m.
PBS, ''Nightly Business Report.''

7:00 p.m.
(Note: In some regions, news is broadcast at 6 or 6:30 p.m. Check with local affiliates for details.)
ABC, ''ABC's World News Tonight with Peter Jennings.''
CBS, ''CBS Evening News with Dan Rather.''
NBC, ''NBC Nightly News.''

8 p.m.
ABC, ''MacGyver'' - MacGyver is seriously injured whily trying to prevent a priceless Egyptian artifact from falling into the hands of thieves. In a coma, he finds himself a passenger on an ''outward-bound'' ship of souls, where he is miraculously reunited with his parents and grandfather.
CBS, ''Major Dad'' - The Major worries about Holowachuk when the lietenant continues on a quest for danger after returning safely home from combat.
NBC, ''My Two Dads.''
PBS, ''National Geographic Special: 'Inside the Soviet Circus''' -

A visit to four Soviet cities, including Moscow and Minsk, to view their spectacular circuses, considered the ''greatest shows on Earth.''

8:30 p.m.
CBS, ''Newhart'' - Dick innocently insults Tim Conway during a poker game, while Joanna and Stephanie humor Miss Goddard who has no date on her ''25th'' birthday.
NBC, ''Working Girl.''

9 p.m.
ABC, ''China Beach'' - Nurse McMurphy and Beckett join their friends on a rock 'n' roll mystery tour of Vietnam's ghostly Firebase Geronimo, where K.C. gets an extraordinary chance to recall a more innocent time by renewing her relationship with a high school sweetheart.
CBS, ''Murphy Brown.''
NBC, ''Hunter.''
PBS, ''Inside Gorbachev's USSR With Hedrick Smith'' - A four-part behind-the-scenes look at the Soviet Union that puts today's headlines - and the new glasnost and perestroika - into a larger social, economic, cultural, and historical context.

9:30 p.m.
CBS, ''Designing Women.''

10:00 p.m.
ABC, ''Capital News'' - Anne McKenna jeopardizes a source and gives her editors major problems by letting taped comments on an explosive story fall into the wrong hands; Cassy Swann's steely attitude protects her scoop on a big story and earns the attention of a rival reporter; Todd Lunden discovers that he doesn't have the stomach for parlaying a journalism prize into a pay raise.
CBS, ''CBS Special: 'I Love Lucy: The Very First Show''' - Includes the never-before seen ''I Love Lucy'' pilot, lost for 40 years.
NBC, ''Shannon's Deal.''

11:30 p.m.
ABC, ''ABC News Nightline.''
CBS, ''Wiseguy.''
NBC, ''The Tonight Show Starring Johnny Carson.''

12:30 a.m.
CBS, ''Stingray.''
NBC, ''Late Night With David Letterman.''

HUNTSVILLE, TX (APRIL 21) UPI - A convicted killer who refused to appeal his death sentence and said ''I just want to get it over with'' was executed by injection early Saturday for the 1986 slaying of a Houston taxicab driver.

Jerome Butler, 54, was pronounced dead at 12:26 a.m. at the Huntsville

Unit of the Texas Department of Criminal Justice/Institutional Division.

Prosecutors and judges were prepared to halt the execution at a moment's notice and Texas Assistant Attorney General Bob Walt said the state would not oppose a stay of execution - had Butler wanted one.

But he didn't.

''The only thing I have to say is I wish everybody a good life and things like that,'' Butler said in his last statement. ''Everything is OK.''

The inmate nodded at warden Jack Prusley and prison chaplain Carroll Pickett and mouthed the words, ''All right.''

Butler's body reacted violently as the deadly chemicals entered his system through an intravenous tube. His head jerked up and down and slammed against the padded gurney, his eyes remained open and his mouth was slightly agape.

About 20 people from a Amnesty International chapter protested the death penalty outside the prison as the execution took place.

The former cook and truck driver was ordered to die for the June 17, 1986, robbery and slaying of Nathan Oakley, 67, who was shot three times in the back of the head and robbed of about $300.

Butler, who has spent half his life in jail, once noted that if his death sentence were commuted to life, he still would have to spend at least 15 years in prison.

''I'd be in my 70s when I got out,'' Butler said. ''What am I supposed to do then? Go live under a bridge? They could take these cuffs off me and walk me back to (death row) and I still won't resist. I just want to get it over with.''

Butler spent most of Friday watching television and talking with fellow inmates and Texas prison guards, officials said.

He ate very little of his breakfast, most of his lunch, and ordered a final meal of a T-bone steak, four pieces of chicken, fresh corn and iced tea, said prison officials, who added Butler requested no personal witnesses at his execution.

Butler was the first Texas inmate put to death this year, the 34th in Texas since capital punishment was resumed in 1982, and the 122nd in the nation since the Supreme Court lifted its ban on capital punishment in 1976. He was the oldest inmate put to death in Texas since capital punishment resumed.

Robert Streetman, whose death sentence was carried out in January 1988, was the last person to be executed in Texas without pursuing appeals.

Prosecutors said Butler may have killed Oakley because the cab driver recognized him as the man who killed Oakley's friend, A.C. Johnson, in 1973.

Defense attorney Vic Pecorino said Butler had been ''very philosophical'' about his impending execution.

''He's a very intelligent man,'' Pecorino said. ''What he would really want is to be out and free, but that won't happen. He doesn't have a death wish, but he said he's holding his head up and not going out like a whipped dog.''

Butler served 13 years of a 23-47 year sentence in New York's Sing Sing Prison for robbery, attempted sexual assault and accessory to rape, and was released in 1972.

In Texas, he served 10 years of a 30-year sentence for murdering Johnson and was released in 1984. He had been on death row since 1986.

#90111u0392 04/21/1990 ~United Press International
(APRIL 21) UPI - For Bobby Bonilla, returning to Chicago has become sort of a homecoming.

Although he broke into the major leagues with the White Sox in 1986 and still enjoys playing here, he must now do so in the role of the spoiler.

Bonilla smacked a pair of homers and had three RBI, leading the Pittsburgh Pirates to a 9-4 win Friday over the Chicago Cubs in a game shortened by rain in the top of the seventh inning.

''I enjoy Chicago. It's a lot of fun for me,'' Bonilla said. ''I played with the White Sox and I just enjoy coming here.''

He is batting .377 in Wrigley Field and is currently hitting .326 overall.

''I'm seeing the ball extremely well,'' he added. ''It (hitting) is all mental. I try to stay aggressive and go from there.''

Chicago manager Don Zimmer sang Bonilla's praises. ''He's hit some bombs. He's a big, strong guy and keeps hitting them in the seats. You'd think he'd hit it at somebody.''

Bonilla hit his fourth homer into the left field bleachers leading off the second inning to give the Bucs a 1-0 lead.

Two outs later, Sid Bream hit a smash off first baseman Mark Grace and the ball went into short right field for a single. Rafael Belliard followed with a double to left scoring Bream, and when shortstop Shawon Dunston's relay throw went past catcher Joe Girardi for an error, Belliard advanced to third. He then scored on a passed ball by Girardi, giving Pittsburgh a 3-0 lead.

With two outs in the third, Andy Van Slyke singled to right and then

Bonilla walloped his second homer of the game and fifth of the season over the right field bleachers to give the Bucs a 5-0 lead.

Both shots came off loser Mike Bielecki, 0-1, who gave up five runs, four earned, in four innings.

Mike Roesler, 1-0, pitched one inning of relief to earn his first major league win, coming in for starter Walt Terrell, who gave up 10 hits, four runs, three of them earned, in 4 1/3 innings.

The teams waited 1 hour and 15 minutes before the contest was called in the seventh, after the start of the game had been delayed by rain for another 2 hours and 5 minutes.

In other NL games, Montreal nipped New York 2-1, Philadelphia beat St. Louis 3-0, Houston dropped Los Angeles 4-2, San Diego slugged San Francisco 9-2 and Atlanta at Cincinnati was postponed by rain.

In the American League, it was: Milwaukee 5, Boston 0; Toronto 17, Kansas City 6; Baltimore 6, Detroit 0; Minnesota 13, California 1; Texas 6, New York 5; Seattle 6 Oakland 1; and Chicago at Cleveland was postponed by rain.

Expos 2, Mets 1

At New York, Zane Smith scattered three hits over eight innings and Larry Walker hit a solo homer to boost Montreal. Smith, 2-1, struck out five and walked one and Tim Burke worked the ninth for his third save. Loser Ron Darling, 0-2, allowed five hits and two runs before leaving after five innings with a stomach virus.

Phillies 3, Cardinals 0

At St. Louis, Dennis Cook pitched a three-hit shutout and Von Hayes hit a solo home run to pace Philadelphia. Cook, 2-0, who has collected five of his 11 career victories against the Cardinals, notched his third career shutout and fourth complete game. Cardinal starter Bryn Smith, 1-2, took the loss, allowing three runs and six hits in eight innings.

Astros 4, Dodgers 2

At Los Angeles, home runs by Franklin Stubbs and Glenn Davis paced Houston to victory as Jim Deshaies posted his first win of the year. Deshaies, 1-0 gave up six hits and struck out six in eight innings and Dave Smith worked the ninth for his third save. Tim Belcher, 1-1, gave up four hits and struck out eight in seven innings.

Padres 9, Giants 2

At San Diego, righthander Ed Whitson spaced out nine hits and Jack Clark closed out a five-run third inning with a three-run homer to pace the Padres. Whitson, 1-0, struck out three and walked none. Clark's homer, his second of the season, came off loser Rick Reuschel, 0-1, who went six innings, giving up all nine runs.

#90111u0395 04/21/1990 ~United Press International

(APRIL 21) UPI - A pro-Syrian source says any hostage release in Lebanon would be the culmination of a discreet deal involving Syria, Iran, and the United States. The source, who requested anonymity, said the United States took an important step when it released Iranian assets frozen in U-S banks. But White House spokesman Marlin Fitzwater warns against over-optimism regarding a break in the hostage situation.

The Army said Friday it has grounded all 290 of its Chinook medium-lift helicopters. The move comes after cracks were found in the nuts used to bolt a key part of the airframe. An Army spokeswoman says each chopper will need only a one-hour inspection by a single mechanic to make sure there are NO problems with each of the four so-called ''barrel-nuts.''

A government advisory board is asking the Food and Drug Administration to lift a ban against blood donations from Haitians and other nationalities. The F-D-A's Blood Products Advisory Committee urges the agency to find another way of ensuring the safety of the nation's blood's supply from AIDS contamination. More than 50-thousand protesters marched across the Brooklyn Bridge in New York City Friday in a rally against the ban and forced the span to be closed.

-30- 1400

#90111u0398 04/21/1990 ~United Press International

(APRIL 21) UPI - With two outs in the bottom of the ninth inning Friday night, Brian Holman hurled a fastball to Oakland pinch-hitter Ken Phelps. Phelps knocked the ball out of the park, and erased Holman's date with the record books. Holman was one out away from being only the 15th pitcher to ever pitch a perfect game.

Holman took the mound in the bottom of the ninth and forced pinch-hitter Felix Jose to strike out on a check swing, then induced Walt Weiss to ground out to second.

Then ex-Mariner Phelps came to bat. ''It was a fast ball, up a little, in the middle of the plate, and I drove it out. I hit it good,'' he said. It was Phelps' first home run of the season.

Mariners 6, Athletics 1.

Holman then struck out Rickey Henderson to end the game.

''I started thinking about it after the third out of the seventh inning when I struck out Jose (Canseco) on a fastball,'' said Holman. ''I didn't get nervous until the eighth and then my teammates started avoiding me like the plague in the dugout.

''After I got two outs in the ninth, I started to think maybe it was meant to be,'' he said.

''I tried to throw Kenny (Phelps) a first-pitch strike and it was a fastball over the plate and he hit it out. I'd much rather it was something like that than a bloop single,'' Holman said.

''I was disappointed and Jim (Lefebvre, Seattle manager) came out just to make sure I was calm before I finished the game.''

After Holman retired Rickey Henderson to end the game, he was congratulated by his teammates and received a rousing ovation from the Oakland crowd.

Bob Welch, 2-1, went seven innings in suffering the loss. He allowed two runs and six hits, struck out two and walked three.

In other AL games, Milwaukee blanked Boston 5-0, Toronto routed Kansas City 17-6, Baltimore shutout Detroit 6-0, Minnesota trounced California 13-0, Texas edged New York 6-5, and Chicago and Cleveland were rained out.

In the NL, in six innings, Pittsburgh 9, Chicago 4; Montreal 2, New York 1; Philadelphia 3, St. Louis 0; San Diego 9, San Francisco 2; and Houston 4, Los Angeles 2; and Atlanta and Cincinnati were rained out.

Brewers 5, Red Sox 0

At Milwaukee, Tom Filer and two relievers combined on a four-hitter and Rob Deer drilled a three-run home run to lift Milwaukee to a victory over Boston. Filer, 1-1, allowed no runs on three hits in six innings. Chuck Crim recorded the Brewers' first save. It was the second consecutive shutout for the Brewers. Chris Bosio blanked Texas 11-0 Thursday on a four-hitter. Loser Mike Boddicker, 1-2, allowed three runs on four hits in seven innings.

Blue Jays 17, Royals 6

At Toronto, George Bell and Greg Myers each slugged three-run homers and Fred McGriff and Kelly Gruber added two-run shots lifting Toronto to a

victory over Kansas City. McGriff went 3-for-3 with three walks, and Nelson Liriano also collected three hits, including a solo homer. The Blue Jays hammered four Kansas City pitchers for 19 hits. Every Toronto starter notched at least one hit and scored once. Winner Todd Stottlemyre, 1-2, threw five shutout innings. Loser Bret Saberhagen, 1-1, lasted just four innings.

Orioles 6, Tigers 0

At Baltimore, Phil Bradley drove in two runs and Bob Milacki, 1-0, scattered three hits over six innings, sparking Baltimore and dealing Detroit their fifth straight road loss. Cal Ripken Jr. also added three RBI as Detroit starter Jeff Robinson, 0-1, failed to last three innings. Steve Finley added a triple and an RBI single. Tiger shortstop Alan Trammell had his 10-game hitting streak snapped when he walked once and went hitless in three at-bats.

Twins 13, Angels 0

At Minneapolis, Kirby Puckett hit a two-run homer to cap a nine-run fifth inning and Kevin Tapani pitched eight shutout innings to rout California. Five Twins batted in two runs apiece in Minnesota's 1990 home opener. Tapani, 2-1, retired 11 straight batters late in the game. He has given up only two earned runs in three starts this year. Jim Abbott, 0-1, took the loss for the Angels.

Rangers 6, Yankees 5

At Arlington, Texas, Ruben Sierra's three-run homer in the seventh climaxed a Texas comeback and brought the Rangers and Nolan Ryan, 3-0, a victory over New York. Jeff Russell came on to record the last four outs for his second save, despite giving up a two-run homer to Don Mattingly in the ninth. The loss went to Lee Guetterman, 0-1, who gave up Sierra's homer in relief of starter Andy Hawkins. Mel Hall, Rick Cerone and Don Mattingly belted homers to snap the Yankees' longest homerless streak since 1918.

#90111u0411 04/21/1990 ~United Press International

(APRIL 21) UPI - American Indian tribal leaders officially opened Earth Day 1990 on the Mall in Washington, D-C, Friday. They sang ancient prayers to Mother Earth and performed traditional dances. 100-Million people are expected to participate in world-wide celebrations this weekend. Scheduled events include planting of acid-resistant trees in the badly polluted Northern Bohemia region of Czechoslovakia.

The town of Quenemo, Kansas, is being hounded by a canine problem. Quenemo

Mayor Bill Ragan says the small community of 400 people is being terrorized by one-thousand dogs, many of them abandoned and running wild. Dog packs have overturned trash cans and created other messes. A few residents have been bitten. Ragan is NOT sure how the dog population got so large but he wants the Osage County Commission to build a dog pound that would serve the entire community.

-30- 1029

#90111u0422 04/21/1990 ~United Press International

DAMASCUS, SYRIA (APRIL 21) UPI - Pro-Syrian sources said an American hostage would be freed in a "maximum" of two days while a ranking Hezbollah clergyman said promises were ''being translated into action.''

The hopeful statements from the Middle East Friday were countered however by Washington, which continued to downplay reports that a hostage release was imminent.

The Islamic Jihad for the Liberation of Palestine, which is believed to be holding three Americans, said earlier in the week it would release one hostage but warned Thursday that the move was being delayed because Washington had failed to send envoy John Kelly to Damascus.

Despite the setback, sources and a Hezbollah clergyman said Friday it appeared efforts to release at least one of the hostages - it is not known for sure which one - were continuing.

''We confirm that lots of efforts have been exerted to free the Western hostages,'' said Sheikh Sobhi Al Tofeili, a leading clergyman of Hezbollah or party of God, the group believed to be behind the Islamic Jihad group.

''These talks are now being translated into action,'' Tofeili told United Press International Friday in an interview at his home in southern Beirut.

White House spokesman Marlin Fitzwater said Kelly, the U.S. undersecretary of state for Middle East and Asian affairs, would not be sent to Damascus as requested by the Islamic Jihad group.

Fitzwater said the kidnappers could be teasing the United States.

''They do it every time,'' Fitzwater said. ''The pattern is very much the same. They announce a release, put out picture or videotape or letters and then there's some demand or reason why it can't happen.''

A senior pro-Iranian leader, reached by telephone in Beirut, said ''the hostage issue is heading toward a positive end.''

''Syria's public interference in the affair implies that Damascus has

concrete evidence that this plight was close to an end,'' said the leader, who has a wide following among Lebanese Shiite fundamentalists.

Syria has played a public role in the most recent moves toward a hostage release and President Bush thanked Syria for its help in the matter during a news conference in Florida Thursday.

Late Friday, pro-Syrian sources told UPI in Damascus that some ''technical things were to be finalized'' before freeing a hostage.

''The release of a hostage would be the fruit of a discreet deal involving Syria, Iran and the United States,'' said one source, who requested anonymity.

''Concerning Iran, the Americans have recently satisfied them by unfreezing Iranian assets held in U.S. banks,'' a pro-Syrian source in Damascus said.

Iranian leaders have repeatedly said they would be willing to use their influence to free American hostages only if Washington releases millions of dollars held in America since the Shah ruled Iran.

''This (money) issue was solved a month ago,'' the source said. ''Because of that the hostage issue will witness the beginning of its end.''

The sources said either U.S. captive Jesse Turner or his colleague Robert Polhill would be released ''maximum by Monday.''

The Islamic Jihad for the Liberation of Palestine, believed an offshoot of Hezbollah, had said Wednesday that it intended to set free one of its captives within 48 hours provided that Kelly be sent to Syria to finalize the deal.

On Thursday it said in a communique that ''the failure of Kelly to cooperate stumbled the process .... We have decided to delay the release until the situation is clarified.''

Seeking to soften the group's stance, Iran's English-language Tehran Times said Friday the captors should consider the presence of U.S. ambassador to Syria, Edward Djerijian, ''as sufficient and good enough to conduct the arrangements for the release of the hostage'' in Damascus.

Polhill and Turner, along with Alann Steen, were abducted from the Beirut University College, where they were professors, on Jan. 24, 1987.

#90111u0442 04/21/1990 ~United Press International

PRAGUE, CZECHOSLOVAKIA (APRIL 21) UPI - Pope John Paul II, the first pope to visit Czechoslovakia, was greeted in Prague Saturday by a reverent President Vaclav Havel who proclaimed he was ''party to a miracle.''

The pontiff, on his first visit to Eastern Europe since last fall's dramatic people's revolution, knelt to kiss the ground when he arrived at Prague's airport shortly after 11 a.m.

''I do not know whether I know what a miracle is,'' Havel said in a brief welcoming ceremony. ''Nonetheless I dare say at this moment I am a party to a miracle. A man who only six months ago was taken prisoner as an enemy of his own state is welcoming today, as a president, the first pope in the history of the Catholic Church who has ever set foot on the territory of this country.''

The pope was also greeted by the aging Cardinal Frantisek Tomasek but he gently prevented the 90-year-old cardinal from kissing the papal ring, apparently out of respect for his age.

In his remarks, the Polish pontiff said he had longed to come to Czechoslovakia in 1985 to attend celebrations marking the 1,100th anniversary of the death of St. Methodius, who with his brother Cyril brought Christianity to the Slavic people.

The communist government at the time refused to give him permission to make the visit.

''I think it is the work of providence that it is a Slavic pope who came as first pope to this country, who brought greetings from the Eternal City '' he said. ''All believers from Bohemia, Moravia and Slovakia have a shepherd in Rome who understands their language.''

He said the ''trip toward freedom'' for Eastern Europe seemingly began with economic collapse - but said a moral collapse among the former leadership also contributed to the movement.

''The program of constructing a world without God became infeasible,'' he said.

The pope called on believers and non-believers alike to work to transform Czechoslovakia into a true democracy.

The pope immediately launched into his hectic two-day schedule that includes masses in the capital, in the missionary shrine of Velehrad in central Czechoslovakia and outside of Bratislava, the capital of Slovakia in the east of the mostly-Roman Catholic country.

Upwards of 3 million people are expected to attend the services, including

several hundred thousand Poles who traveled from John Paul's neighboring homeland.

In Wenceslas Square, pictures of the pontiff were posted in shop windows and at the base of the statue of St. Wenceslas, Czechoslovakia's patron saint, along with pictures of Havel.

It is the first visit by a pope to Czechoslovakia and John Paul's second to a Warsaw Pact nation.

Although the pope professes to stay out of national politics, the visit coincides with the start of the campaign for the first free elections since 1948, scheduled June 8. His joint hosts are Havel, who led the democratic revolution, and Tomasek.

Church officials say the main theme of the pope's visit will be the renewal of faith in the nations of Eastern Europe.

That may be a big task in Czechoslovakia. Forty years of fierce oppression of religious rights by the communists may have succeeded in producing a nation of agnostics in place of one that had been Christian for centuries.

A survey released Friday by the Prague Institute for Public Opinion Research indicated only 30 percent of those polled believed in God. Of those, two-thirds listed themselves as Roman Catholic.

The true picture may be somewhat different. Although no national figures have been produced on religious affiliation since the war, unofficial estimates suggest nearly half of Czechoslovakia's 15.5 million citizens are Catholic.

The new government has lifted restrictions on the clergy and permitted the naming of new bishops. The church is also asking for return of property that was confiscated after the communist takeover in 1948.

#90111u0443 04/21/1990 ~United Press International
(APRIL 23) UPI - TV SCHEDULE:

(Times are EST unless noted)
(R denotes repeat)

FRIDAY, MAY 4

6:30 p.m. PBS, ''Nightly Business Report.''

7 p.m.

(Note: In some regions, news is broadcast at 6 or 6:30 p.m. Check with local affiliates for details.) ABC, ''ABC's World News Tonight with Peter Jennings.'' CBS, ''CBS Evening News with Dan Rather.'' NBC, ''NBC Nightly News with Tom Brokaw.''

8 p.m. ABC, ''Full House'' - Danny is supposed to be the host of a 24-hour telethon but he falls asleep; Jesse, Joey and the girls provide the entertainment until a surprise appearance by Mike Love of the Beach Boys saves them. CBS, ''Small Talk'' - A new program that looks at the world through the eyes of children. Premiere. NBC, ''Baywatch.'' PBS, ''Washington Week in Review.''

8:30 p.m. ABC, ''Family Matters'' - A TV star with an ego the size of Chicago tries to see how far he can push Carl, who's forced to charge him with assault. CBS, ''Candid Camera's Comedy Shopping Spree.'' PBS, ''Wall Street With Louis Rukeyser.''

9 p.m. ABC, ''Perfect Strangers'' - When Larry's story about Uncle Shaggy, host of a popular children's TV show, unexpectedly causes the man to be fired, Larry and Balki are doggedly determined to help win back his job. CBS, ''Bagdad Cafe'' - With space at a premium, Jasmine and Brenda must share a bed when a busload of guests check in. NBC, ''Nasty Boys.'' PBS, ''Richard Nixon Reflects: An American Interests Special'' - This special edition of the series ''American Interests'' examines the extraordinary career of our 37th president. The program features an extended television interview with the 77 year-old former president in which he shares his candid views on the Communist world, past, present and future.

9:30 p.m. ABC, ''Just the Ten of Us'' - The Lubbock daughters scheme mightily to save a charming pet cow that their father wants to turn into steaks and hamburger. The guest cast features Diane the Cow. CBS, ''Sugar and Spice.''

10 p.m. ABC, ''20/20.'' CBS, ''Dallas'' - After having secretly committed himself to an insane asylum in an effort to coerce Jessica into signing over to him her shares of Weststar stock, J.R. discovers the path to her is littered with bizarre and dangerous patients. NBC, ''Hardball.''

11:30 p.m. ABC, ''ABC News Nightline.'' CBS, ''Wiseguy.'' NBC, ''The Tonight Show Starring Johnny Carson.''

12:00 a.m. PBS, ''Sneak Previews Goes Video.''

12:30 a.m. NBC, ''Late Night with David Letterman.'' CBS, ''CBS Late Movie.''

1:30 a.m. NBC, ''Friday Night Videos.'' PBS, ''Today's Japan.''

2:00 a.m. CBS, ''Nightwatch.''

#90111u0481 04/21/1990 ~United Press International

EAST BERLIN (APRIL 21) UPI - Hundreds of rowdy soccer fans and neo-Nazi skinheads marked Hitler's birthday by pelting police with bottles in East Berlin early Saturday, then swarmed through the Berlin Wall to riot anew in West Berlin.

Seven officers were wounded, four of them seriously, and dozens of rioters were arrested in both sectors of the divided city.

Many hooligans in heavy boots and masks stomped through East Berlin's showcase Alexander Plaza Friday night and early Saturday, exchanging stiff-armed Nazi salutes and hurling obscenities at foreign tourists.

The gangs rained bottles, rocks and other items onto police dispatched to control the mob, leaving seven officers wounded, four of them seriously, authorities said.

After midnight, the riots spread to West Berlin's troubled Kreuzberg district where the mob damaged automobiles, smashed shop windows and plundered a supermarket.

Thirty rioters were arrested in East Berlin and many more were taken into custody in West Berlin.

Berlin authorities said they expected ''planned provocations'' from neo-Nazi elements to coincide with the 101st anniversary of the birth of Adolf Hitler, who was born April 20, 1889.

Worried merchants in East Berlin's Prenzlauer Berg district boarded up their cafes and shops Friday and closed early, fearful of a repeat of violence that erupted on the 100th anniversary last year.

This year's riots apparently were fueled by violence that flared at a soccer match Friday evening between F.C. Berlin and Hansa Rostock. Radical elements from West Berlin teamed with East Berlin skinheads and rowdy soccer fans at the match and the mob of about 300 moved toward the Alexanderplatz.

Clashes with police were reported in the famous East Berlin city square

and in the neighboring Nicolai tourist quarter.

The mobs spat on border guards at the Oberbaum Bridge crossing point in the Berlin Wall as they swarmed into Kreuzberg, police said.

A deputy in the East German parliament, Konrad Weiss of the Democracy Now Party, said authorities had ample reason to expect the rioting.

''It was no coincidence that these riots occurred,'' Weiss said, citing the Hitler anniversary.

He told local radio there is an ''extremist right-wing potential in East Germany, as well as an increasing level of anti-foreigner alienation.''

Weiss faulted East German Prime Minister Lothard de Maiziere and Interior Minister Peter Michael Diestel for failing to get to the scene of the trouble to learn what was going on.

He said Diestel, whose ministry is in charge of East Germany's police, must review police procedures and training to assure officers know how to handle such chaotic circumstances.

Diestel said last Friday that police would be given more authority for dealing with an ''escalating level of violence'' among soccer rowdies. Swift action needed to be taken ''in the interests of our citizens and of our democracy,'' he said.

#90111u0484 04/21/1990 ~United Press International

GDANSK, POLAND (APRIL 21) UPI - Solidarity founder Lech Walesa was re-elected Saturday as chairman of the independent labor movement, defeating two rivals by securing 77 percent of the votes cast at the union's second congress.

Walesa easily overcame token challenges by Andrzej Slowik, a longtime rival from the textile center of Lodz, and Tomasz Wojcik, a university teacher from the southwestern city of Wroclaw.

Each candidate gave a 10-minute speech before the 469 delegates at the congress, who had a chance to ask questions before voting. The body met only once before, in 1981, then was banned under martial law.

Union officials said Walesa received 362 votes - or 77 percent of the ballots cast - to retain his position as chairman of the organization he founded nine years ago.

Walesa suffered a setback Friday, when the congress voted to reduce the

membership of the National Commission, Solidarity's executive body, to 97 seats from 122, thus limiting Walesa's ability to seat supporters. The move was seen as an attempt to curb the powers of the strong-willed union founder.

Walesa's campaign address prompted ovations and applause. He answered one question by indicating interest in becoming president of Poland.

''It sounds like boasting, but I am doing more than the president,'' Walesa said. ''I am doing more and I am going to do still more.''

Walesa has said he believes President Wojciech Jaruzelski has been an inefficient leader.

Walesa also warned of a social explosion if living conditions were not improved.

''The people should live better but the economic system must be changed,'' he said, referring to severe austerity measures adopted by Solidarity Prime Minister Tadeusz Mazowiecki.

''We have not won yet fully. There must be more bread and better living standards,'' Walesa said.

He also spoke of his main rival, Slowik, who often broke ranks with Walesa over strategy during the long struggle against communist rule in Poland, charging that Walesa's leadership style was autocratic and arbitrary.

''Slowik was right in disobeying me,'' Walesa said. ''Various opinions should be allowed to be presented in building of democracy.''

Slowik said Solidarity should not be involved in politics but work as a ''genuine labor organization,'' helping the public fight falling living standards.

The National Commission would not be Solidarity's ''court,'' Slowik said, but ''the parliament of the union.''

''I would be as good as Walesa in running the union,'' Slowik said and added Walesa's prestige was so high that he could represent Solidarity abroad on suitable occasions.

A Solidarity delegate from southern Piotrkow Trybunalski province proposed all 2 million members of the Communist Party and their families be deported to the Soviet Union because they were the members of a criminal organization.

''Let the red star over the Kremlin shine for them,'' said Zbigniew Ingier

who proposed formation of a parliamentary tribunal to assess whether the now disbanded Communist Party had committed high treason.

The idea prompted spontaneous laughter and was unlikely to adopted, not the least because some Solidarity officials have communist backgrounds.

Aleksander Malachowski, a delegate from Warsaw said the idea reminded him of the deportation of more than 1 million Poles to the Soviet Union by Josef Stalin during World War II.

''I don't want the Poles to (be sent to) East again,'' he said.

#90111u0491 04/21/1990 ~United Press International

DAMASCUS, SYRIA (APRIL 21) UPI - Iran Saturday urged the Moslem fundamentalist captors of three American professors to stop delaying the release of one of them and reports from Tehran suggested that a second

captive would be freed.

In the Syrian capital, hundreds of Western and Arab journalists crammed the Foreign Ministry awaiting the promised release of one captive.

State-run television said it would broadcast the hostage's release - the first showing of interest by Syria's government-run media in the release of a Westerner.

Iran's English-language Tehran Times newspaper appealed to the captors to soften their stance and back off from a decision to delay the release of one of the hostages.

''Such a humanitarian act will be met with wide respect and appreciation from world public opinion,'' the newspaper said.

The Islamic Jihad for the Liberation of Palestine, believed an offshoot of the Moslem extremist organization Hezbollah, said Wednesday that it intended to set free one of its three captives within 48 hours provided that U.S. Undersecretary of State John Kelly was sent to Syria to cement the ''deal.''

But in a second statement, the Jihad captors said they were annoyed by Washington's refusal to dispatch Kelly and decided to postpone the release ''until the situation is clarified.''

Jihad backed its statement Wednesday with a Polaroid photograph of U.S. national Jesse Turner. The group's second written declaration was attached to a color photograph of Turner's colleague, Robert Polhill.

Both appeared haggard and defeated in the pictures.

Turner, 42, Polhill 55, and Alann Steen, 54, who all taught at the U.S.-affiliated Beirut University College, were abducted on Jan. 24, 1987, by gunmen disguised as policemen. A fourth professor taken hostage, Indian national Mithileshwar Singh, who held U.S. residency documents, was freed in October 1988.

The Tehran Times, which often reflects official Iranian positions, said Friday the captors should consider the presence of the U.S. ambassador to Syria, Edward Djerijian, ''as good enough to conduct the arrangements for the release of the hostage.''

The newspaper quoted a ''well-informed source'' in Tehran as saying another hostage-taking group intended to free a second U.S. captive imminently. The newpaper did not identify the group.

''We confirm that lots of efforts have been exerted to free the Western

hostages,'' said Sheikh Sobhi Al Tofeili, a leading Hezbollah clergyman. ''These talks are now being translated into action.''

Another senior pro-Iranian leader reached by telephone in Beirut also voiced optimism.

''We know that the hostage issue is heading towards a positive end,'' said the leader, who has wide authority over many Shiite fundamentalists. ''Syria's public interference in the affair implies that Damascus has concrete evidences that this plight was close to an end.''

Pro-Syrian sources told United Press Internationl in Damascus late Friday that some ''technical things were to be finalized'' before freeing a hostage.

There were unconfirmed reports that Washington had taken specific steps to make way for the hostages' freedom, including the freeing of Iranian assets.

''The release of a hostage would be the fruit of a discreet deal involving Syria, Iran and the United States,'' said one source, who requested anonymity.

A pro-Syrian source in Damascus said, ''Concerning Iran, the Americans have recently satisfied them by unfreezing Iranian assets held in U.S. banks.''

Iranian leaders repeatedly have issued a price for their interfere on behalf of the captives: that Washington should release million of dollars in Iranian assets frozen in U.S. banks since the fall of the Shah Reza Pahlavi.

''This (money) issue was solved a month ago,'' one of the sources said. ''And because of that the hostage issue will witness the beginning of its end.''

Pro-Syrian sources said either Turner or Polhill would be released ''at a maximum by Monday.''

The captors, apparently frustrated by the lack of a cooperation by Washington, mentioned the migration of Jews to Israel in Thursday's statement.

''We issue our last warning (to stop the Jews' migration) and call on all civilians to avoid airports, airline offices and airplanes (that transport Jews) because they will be the target of operations our organization will carry out at the adequate time,'' it said.

Islamic Jihad has demanded the release of 400 Arab prisoners in Israel in return for freeing the three professors. But Washington and Israel refused to negotiate the proposed deal.

MINNEAPOLIS (APRIL 21) UPI - Northwest Airlines said it supports one of its pilots who demanded a sobriety test after he was accused by a woman of being drunk prior to a flight from Detroit.

A blood test taken after the accusation showed no alcohol in the man's system. Results of that test were returned Friday. Results of a urine test were expected Monday.

The woman's accusations were apparently influenced by the arrest of three Northwest Airlines crew members last month on accusations of flying while drunk. They were fired and face state and federal charges.

Northwest spokesman Douglas Miller said the pilot, who he did not identify was called in to fly Flight 497 from Detroit to Atlanta Thursday evening after the scheduled pilot was delayed en route from Milwaukee.

The rest of the crew was ready to take off at 8:30 p.m. but the pilot had not arrived so Northwest called an off-duty pilot who lives in the Detroit area. The pilot then drove 50 miles to the Detroit Metropolitan Airport.

Meanwhile, the woman, from Bloomfield Hills, Mich., began telling other passengers on the plane that the pilot was probably drunk or partying and that's why he was late, Miller said.

When the substitute pilot arrived one of the flight attendants took him aside and told him of the woman's concerns.

The pilot ''felt his integrity was being questioned so he asked if the lady wanted to speak to him,'' Miller said. The woman said she did and the pilot met her outside the plane and asked her if she had some concern about his ability to function properly.

''She indicated that she was concerned about his ability to fly the plane '' Miller said. ''He then insisted that he be tested for alcohol and drugs because he didn't want to give any impression or (lend) credence to this woman's accusations.

The pilot left the plane, met with Northwest's chief pilot in Detroit, and went to a clinic, where samples of his blood and urine were taken.

Because the test results were not immediately available, Northwest had to

bring in another pilot to fly the plane, Miller said.

As a result, the DC-9, which carried 70 passengers, was nearly four hours late getting off the ground.

Miller said other passengers became so upset with the woman that she and her husband decided not to take the flight.

''The passengers were quite angry at the woman for making a totally unfounded charge,'' said William Julien, a Minneapolis radiologist aboard the plane.

Miller said Northwest has never experienced such an incident before. He said the airline believes the pilot, who has flown for Northwest for 20 years, was justified in his actions.

LOS ANGELES (APRIL 21) UPI - The closest ally and friend of Ferdinand Marcos has agreed to surrender a Los Angeles bank to the Philippines to avoid prosecution on charges he used the institution to launder money for the late dictator, it was reported Saturday.

Robert S. ''Bobby'' Benedicto will surrender ownership of the California Overseas Bank to the Aquino government in exchange for the United States dropping racketeering and conspiracy charges against him, the Los Angeles Times said in its Sunday editions.

The previously undisclosed terms were part of an unusual settlement reached in complex negogitations on three continents among U.S. prosecutors, Philippine officials and lawyers for the bank and Benedicto, the Times said.

Legal experts said the agreement represents the first time in U.S. history that a bank has changed hands as a result of a criminal case.

Prosecutors said California Overseas Bank was a prime tool in the ''looting of the Philippines.'' Bank officials admitted in court that phony accounts were set up to funnel money out of the Philippines.

More than $42 million moved through one of the fictitious accounts during a two-day period in 1981 was used to buy a skyscraper on Fifth Avenue in Manhattan, proseuctors said in court documents.

Millions more were transferred through California Overseas ''in part to pay for Imelda Marco's jewelry purchases in New York,'' prosecutors say.

Prosecutors would not discuss the settlement but U.S. officials defended what it called a ''rational and reasonable agreement'' that will return millions of dollars to the economically troubled Philippines.

The bank, with assets of nearly $150 million, has a market value of more than $30 million. Sources close to the Philippine government said the government will operate it for a while and then sell it.

Benedicto, 73, the bank's chairman who remains a fugitive, was indicted in 1988 with Ferdinand and Imelda Marcos on charges of fraud, racketeering and conspiracy.

Sources told the newspaper that Benedicto has avoided arrest traveling among Hong Kong, Spain and Venezuela using false names and numerous passports.

One Philippine official close to the negotiations told the Times that Benedicto is ''an old man. He's tired of feeling hunted.''

The most controversial element of the agreement means Benedicto will not have to testify against Imelda Marcos, now on trial in a New York federal court.

The banker, who befriended Marcos 50 years ago in law school and was godfather to the dictator's son, refused to testify against Imelda. His refusal was a major obstacle to the settlment.

''There's certainly no love lost between my client and Imelda, but he wouldn't put himself in a position to hurt Marcos's children,'' said Los Angeles attorney Wayne W. Smith.

Assistant U.S. Attorney Charles G. LaBella, who is prosecuting Marcos and co-defendant Adnan Khashoggi, refused offers by Benedicto to turn over only 25 percent of his bank interests.

The deal also represents the clearest indication yet of the linkage between the New York criminal case against Imelda Marcos and a Los Angeles federal civil suit that seeks to strip the former first lady of a sizeable share of the $5 billion the Marcoses and their friends are suspected of stealing from their country.

Formal announcement of the settlement is expected in early May in federal court when California Overseas is sentenced on wire fraud charges.

The bank was founded by Benedicto in 1976 and has branches in Los Angeles, Beverly Hills, Westwood, Marina del Rey, Encino and Guam.

#90111u0572 04/21/1990 ~United Press International
(APRIL 21) UPI - Around the world... around the clock... U-P-I brings you the world, next:

54-year-old Jerome Butler was executed early this morning in Huntsville, Texas, for the 1986 slaying of a Houston taxi driver. Butler refused to appeal his death sentence although state officials would NOT have objected to such a request. In his last statement Butler said... quoting here... ''Everything is O-K.''

Lithuania is accusing the Soviet Union of further tightening the economic screws by diverting more staples from the Baltic republic. Lithuanian Deputy Prime Minister Brazauskas says Cuban sugar bound for Lithuania has been diverted and metal and timber shipments also have been stopped by the Soviets.

Speaking in Florida, Soviet Foreign Ministry spokesman Gennady Gerasimov accused Lithuanians Friday of ''biting the hand that feeds them.'' Gerasimov says it would be illegal and a ''gross interference'' for any nation to recognize Lithuania as an independent state.

President Bush also is in Florida, where he plans to spend today fishing. Bush says the Kremlin could face U-S economic sanctions sometime next week if the coercion of Lithuania continues. So far, Bush has refrained from direct criticism of the Soviet action in Lithuania.

The Bush administration is trying to downplay reports that a hostage release is imminent in the Middle East... despite assurances from pro-Syrian sources that an American hostage in Lebanon would be freed in a ''maximum'' of two days. Sources cannot say for sure which U-S hostage... if any... will be released.

-30- 1745
#90111u0573 04/21/1990 ~United Press International
(APRIL 21) UPI - More than 100-Million people are expected to observe the 20th anniversary of Earth Day this weekend. A massive star-studded rally is planned for tomorrow in Washington. Similar celebrations will be held in other major U-S cities. Organizers say the day also will be observed in 135 other nations.

An evangelical church in Chicago has reversed its ban on an AIDS-infected five-year-old from its Sunday school. The NON-denominational Moody Church initially banned the youngster just one day after the Indiana funeral for AIDS victim Ryan White. The boy's parents say they may NOT send him back anyway.

A government advisory board recommends that the Food and Drug Administration end a ban on blood donations from Haitians and other nationalities. The ban was put in place to prevent the spread of the deadly AIDS virus. The panel says the ban is unnecessary and ''stigmatizing.''

The countdown for the shuttle Discovery begins later today for its scheduled Tuesday blastoff to carry the Hubble Space Telescope into orbit. The launch comes two weeks late because of work to replace a faulty hydraulic unit that grounded the ship four minutes before liftoff April 10th.

NASA says the crew of the space shuttle Columbia will attempt a ham radio chat with two Soviet cosmonauts aboard the Mir space station next month. If successful, the radio link-up will be the first in history between Soviet and American spacecraft that did NOT involve relays from the ground.

#90111u0589 04/21/1990 ~United Press International

CHARLOTTE, NC (APRIL 21) UPI - A federal judge said Saturday he was exaggerating when he urged that all AIDS victims be exiled to Australia, explaining he meant only those who continue to spread the disease should be shipped out.

U.S. District Judge Robert Potter, known as ''Maximum Bob'' for his tough sentences, said he used hyperbole in suggesting Thursday that drug-laden planes from Colombia should be shot down and AIDS victims sent to Australia.

''It was my way of making a point that for some things you don't have any easy solutions,'' Potter said. ''I can see why anyone who has AIDS or who has a family member who has AIDS would be upset with anybody who said they should ship AIDS patients to Australia.''

Both the initial AIDS remark, reported in Friday's Charlotte Observer, and Potter's explanation Saturday, drew criticism from AIDS activists.

Les Kooyman, executive director of Charlotte's Metrolina AIDS Project, a support group for AIDS victims and their families, called Potter's remarks ''frightening.''

''For a federal judge to be offhandedly making these comments is horrendous for our community. North Carolina has laws to restrict someone who is knowingly spreading the AIDS virus.

''And why Australia?'' Kooyman said. ''Even if the judge made this remark in humor, it is because of insensitivity like this that the disease is spreading the way it is. So little is being done.''

Potter, who rarely makes public appearances outside of U.S. District Court in Charlotte, proposed exiling AIDS patients and shooting down planes from Colombia in remarks Thursday night to 35 students at Belmont Abbey College.

The judge, who bears a strong resemblance to Judge Wapner of ''The People's Court'' television show, is no stranger to controversy.

Last year he lived up to his ''Maximum Bob'' monicker by throwing the book at television evangelist Jim Bakker, sentencing him to 45 years in federal prison for his conviction on fraud charges.

Potter said the sentence earned him a large quantity of hate mail, including one letter predicting he will go to hell and another from ''Mrs. Jesus Christ,'' who threatened to wipe out the city of Charlotte.

''You get your name in the paper and everyone wants to write to you and tell you their problems,'' said Potter.

The judge, nominated to the federal bench eight years ago by Sen. Jesse Helms, is a conservative. Potter told the college students he favors the death penalty, opposes legalization of drugs and favors a tax hike to build prisons but not to build art museums.

#90111u0611 04/21/1990 ~United Press International

(APRIL 21) UPI - TODAY'S PEOPLE

POST PUNK PRINCESS AFFIANCED: Princess Stephanie of Monaco is engaged. Palace sources say the daughter of the late Grace Kelly and Prince Rainier will marry Jean-Yves Le Fur on the French Riviera in Monaco in June. The palace said Stephanie, 25, would tell more about her engagement to friends at the Parisian restaurant ''Le Telegraphe.'' The irrepressible princess has captured headlines for launching a line of bathing suits and perfume, and for her short-lived romance with actor Rob Lowe. Stephanie, looking lean and punkish with short spikey hair, made a video of her singing debut with a top-selling tune called ''Ouragan.''

MCCARTNEY DOWN TO EARTH: Paul McCartney celebrated Earth Day festivities in Rio De Janeiro this weekend. The British rocker, in town to perform two concerts, was promoting ecological awareness in South America's largest country. McCartney, a member of Friends of the Earth, is the first former Beatle to visit Latin America since the band's breakup 20 years ago. The singer-songwriter and his wife Linda McCartney arrived in Brazil Wednesday. McCartney planned to wear an Earth Day 1990 T-shirt and open both concerts with a minute of silence for the preservation of the planet.

RATING NORVILLE: Sagging ''Today'' show ratings have prompted top NBC executives to consider moving Deborah Norville from her new anchor slot to the Sunday edition of ''NBC Nightly News.'' New York Newsday reported that low ratings and NBC affiliates' dissatisfaction with the show's performance since Norville replaced Jane Pauley in January led to the discussions. The newspaper quoted network sources as saying a decision on Norville's future has not been made. Dick Ebersol, president of NBC sports and a senior vice president in charge of ''Today,'' ''emphatically''

denied discussions on Norville's removal. The blonde anchor has a five-year, $1 million-a-year, no-cut contract with the network.

ROUGHING IT WITH ROTH: Rock singer David Lee Roth hauled his band off to a sleazy hotel in Vancouver, British Columbia, to record his latest album. The former Van Halen front man says the hotel has streetwalkers right outside and a strip joint in the basement. ''There's something to me that's very comforting about the sounds of breaking glass and squealing female laughter followed by sirens,'' Roth says of the ambiance. ''It's part of my musical constitution, if nothing else.'' Roth says his $15-a-night room is so small that he can almost reach from wall to wall. ''But the room has character,'' he said. ''Everything is chippin' off the walls.''

GLIMPSES: Pop singer Janet Jackson became the second member of the famed Jackson clan to receive a star on the Hollywood Walk of Fame. Jackson, promoting her ''Rhythm Nation 1814'' album, told a crowd of 2,000 not to ''forget what's going on in the world.'' Her brother, Michael Jackson, received his star in 1984. ... Off-duty sheriff's deputies have been hired to protect the Indiana home of gospel singer Sandi Patti after Tuesday's arson fire trashed her corporate offices. The blaze destroyed Patti memorabilia, including four Grammy awards. ... Two-time Pulitzer Prize-winning playwright August Wilson will receive an honorary doctorate degree and give the 1990 commencement address at Hamline University in St. Paul, Minn., next month. Wilson won his second Pulitzer for drama for ''The Piano Lesson,'' which opened on Broadway this week. He won his first Pulitzer in 1987 for his play ''Fences.''

#90111u0628 04/21/1990 ~United Press International

ISLAMORADA, FL (APRIL 21) UPI - The patient pursuit of tarpon and bonefish was the order of the day. But it was a far different waiting game that President Bush played Saturday while skimming across the flats of Florida Bay with fishing buddies in tow.

The situation in Lithuania and the prospect of seeing an American hostage freed in Lebanon created an undercurrent of anxious anticipation as Bush went about a long-planned weekend of sportfishing.

As the angler in chief showed off his stuff for an upcoming ''American Sportsman'' television special, the rest of his large traveling party lolled about at a beachfront resort hotel, awaiting developments that could shatter the serenity of his vacation weekend.

Bush acted oblivious to crisis as he soaked in the sun and sea breezes of the Florida Keys, hoping his well-known love of the outdoors will underscore his concern for the environment on Earth Day weekend.

As he did so, problems created by events abroad served to illustrate both the extreme caution he has exercised in foreign affairs and practical limitations on American influence.

The hostages in Lebanon have been a source of undisguised frustration. Unable to force their release, Bush had little to do but wait to see whether the Islamic Jihad for the Liberation of Palestine fulfilled its promise to release an American.

In the case of Lithuania, Bush held out hope that words would preclude the need for action in pushing Moscow and Vilnius toward accommodation and prevent further escalation of a conflict threatening the recent warming trend in U.S.-Soviet relations.

Firm in his view that the survival of Soviet President Mikhail Gorbachev is in the best strategic interest of the West, Bush for weeks has placed the broad geopolitical importance of the U.S.-Soviet relationship ahead of his principled support for Lithuanian independence.

His decision to refrain from inflammatory rhetoric or direct criticism, choosing instead to promote peaceful dialogue that has yet to materialize, has given Gorbachev leeway to maneuver an end to the tempest that could hamper his progress on domestic reforms and foreign policy.

Only in the past few days has the U.S. position undergone subtle change. But in edging toward possible retaliation against Moscow for its intimidation of Lithuania, Bush has moved only at an incremental pace, cranking up the pressure one small step at a time.

When threats of ''appropriate responses'' to further Soviet coercion appeared to have no effect at midweek, Bush took the step of notifying allied leaders of the options being considered as a prelude to possible action.

Citing additional evidence Friday that the Soviet economic pressure on Lithuania had intensified, he ratcheted up the American response once again by announcing he would meet with congressional leaders early next week to discuss U.S. moves against Moscow.

''I would assume that we would be prepared to announce actions fairly soon after that,'' White House press secretary Marlin Fitzwater told reporters.

The meeting with congressional leaders was a logical next step in a

process that began a week before with signals that Moscow could face a suspension or loss of urgently needed economic cooperation with the United States for his treatment of Lithuania.

Bush sharpened the U.S. position Tuesday by warning of ''appropriate responses,'' a vague term given definition Wednesday by Secretary of State James Baker. Testifying on Capitol Hill, Baker said expanded bilateral commercial relations - a key priority for Gorbachev's drive to restructure the Soviet economy - could be jeopardized by the tension over Lithuania.

The disclosure Thursday of allied consultations placed the threat of retaliation in the open. The announcement Friday that he would meet with congressional leaders signaled readiness to carry out the U.S. warnings to Moscow, but carefully avoided committing Bush to specific action.

The result was additional time: time for both sides in the standoff over Lithiuania to consider the implications of escalation and for Bush to refine his position and hope a turn of events will free him of any need to exercise options he would prefer to see go unused.

#90111u0645 04/21/1990 ~United Press International

ATLANTA (APRIL 21) UPI - A homebuilders organization is trying to save from the wrecking ball a structure where Margaret Mitchell wrote most of ''Gone With the Wind.''

The Homebuilders Association of Georgia is proposing to renovate and remodel the battered three-story structure situated on a parcel of prime real estate near downtown Atlanta.

Mitchell lived in the Midtown apartment house from 1925 to 1932, affectionately referring to her abode as the ''Dump.''

If members of the organization have their way, the decaying home will house a museum honoring Mitchell on the first floor and the association headquarters on the second and third floors, Dan Saye, president of the Homebuilders Association, said Friday.

The association has been talking with officials of the Mitchell House, the non-profit group formed to save the property, and with the company that owns it, Childress-Klein Properties.

Saye said the group would like to complete renovations in time for the January 1991 National Homebuilders convention in Atlanta. To complete the project, the association will contribute $150,000, but needs an additional $300,000 to $400,000 in donations from other builders around the state and nation, Saye said.

In October 1989, the Atlanta City Council voted to give the building landmark status under the city's strong new preservation ordinance. Under that ordinance, it can't be razed or altered unless proven to be a health hazard.

UPI Special Report - Earth Day '90
By GEORGE LOBSENZ

(APRIL 20) UPI - Earth Day was born a scruffy, ragtag child of the 1960s, a loosely organized ''happening'' modeled on the Vietnam War campus protests but carrying a more benevolent message of a greener, cleaner future.

With only the skimpiest of national coordination, thousands of communities and universities across the country spontaneously put on modest, home-grown rallies, parades, concerts and tree-plantings on April 22, 1970 to raise public consciousness about the environment.

''It just burbled up from the grassroots,'' recalls Gaylord Nelson, who as a U.S. senator from Wisconsin first proposed Earth Day after reading a magazine article in the summer of 1969 about anti-war ''teach-ins.''

''I only raised $190,000 and you don't organize 20 million people and 10,000 grade schools and high schools and 2,000 municipalities on that kind of money. Most of it we didn't organize at all. They organized themselves.''

Twenty years later, Earth Day has shed its counterculture origins and entered the mainstream in a big way, complete with corporate sponsors, glitzy media events starring rock stars and Hollywood celebrities, network television specials and a host of official government proclamations and observances.

It also bloomed into an international celebration encompassing 135 countries. The planned festivities include the opening of the first bike path ever in Iran, a walkathon in Singapore to raise money to save rhinos, a procession of sailboats off Copacabana Beach in Rio de Janiero, a flying arch of kites over France's Loire River and the rolling of a huge globe through the town of Vac, Hungary, after which it will be ceremonially washed.

Some activists are literally traveling to the end of the Earth to dramatize the issue: A team of U.S., Soviet and Chinese mountain climbers

are scaling Mount Everest in hopes of reaching the summit on Earth Day. There, they plan to transmit live television pictures around the world via satellite and beam a program of environmental messages into deep space.

The end result, organizers hope, will be the largest demonstration in human history, involving 100 million people worldwide, and the beginning of a global environmental movement.

The explosion of interest in Earth Day reflects the new urgency and scope of the world's pollution problems, which are far more serious than could have been imagined two decades ago.

The original Earth Day focused on the visible deterioration of America's backyard, the sewage and industrial discharges fouling rivers, lakes and coastlines, the choking shroud of smog over most cities and the trashing of forests and other natural areas.

While those problems continue to loom large in many parts of the world, Earth Day 1990 is a call to arms against overarching environmental crises that are not readily apparent, yet threaten the future of mankind.

The most prominent concerns are global warming and depletion of the Earth's protective ozone layer, both just discovered by scientists over the past five years and both feared capable of wreaking drastic changes in weather, the oceans, forests and agriculture through the next century.

As the modern industrial age enters middle age, there also is growing anxiety about the flood of toxic chemicals that man has dumped into the environment, with most of the public uproar over the use of pesticides on food crops.

The American Chemical Society outlined the dimensions of the brave new chemical world earlier this year when it announced the creation of the 10 millionth new chemical compound since 1957, given the jaw-paralyzing name: cis-(+)-4,6,7,8,8a,8b-hexahydro-6,6,8b-trimethyl-3H naptho(1,8-bc)furan.

The expanded list of environmental fears is not the only aspect of Earth Day that has changed.

Perhaps an even more striking difference from 20 years ago is the ardent embrace of Earth Day by the same corporations reviled as despoilers of Mother Nature in 1970.

From coal companies to chemical manufacturers to automakers, American industry has seized on Earth Day as the ideal opportunity to trumpet its newfound environmental sensitivities and, by the way, promote its cleaner products for the 21st century.

Public relations wizards are invoking Earth Day to hawk toilet tissue made of recycled paper, low-polluting varnishes and paints, polyester carpeting spun out of recycled plastic ketchup bottles and even Wall Street brokerage services that search out profitable ''green'' stocks.

#90111u0705 04/21/1990 ~United Press International

DUBLIN, IRELAND (APRIL 21) UPI - The European Community responded to an impassioned plea from Lithuania Saturday and urged Moscow to lift ''coercive'' economic sanctions imposed to quash the Baltic republic's bid for independence.

''Measures of a coercive nature can make no contribution to the search for a solution through dialogue,'' said a declaration by the 12 European Community foreign ministers.

Irish Foreign Minister Gerard Collins said the statement should be considered a call for the Kremlin to stop restrictions on fuel and food shipments to the rebellious republic, and not for Lithuania to give up its dream of freedom.

The foreign ministers met to prepare for a summit of European Community heads of government in Dublin April 28 that will focus on German unification and accelerating the pace of European political and economic union.

In Copenhagen earlier, Lithuania's Prime Minister Kazimiera Prunskiene made a dramatic appeal for Western nations to ''help us to break the Soviet blockade of our country.''

''Please do not leave us alone with this problem which affects all of us in Europe,'' Prunskiene said. ''Make it plain to the Soviet Union how seriously you will react to further measures.''

Denmark's Foreign Minister Uffe Ellemann-Jensen carried the Lithuanian message to Community colleagues, saying Prunskiene sought ''moral and political support for the republic, recognition, and pressure on Moscow,'' said Collins, whose country now holds the rotating presidency of the Community.

The Kremlin cut gas, oil and food supplies to Lithuania to pressure Vilnius into a compromise on its declaration of independence.

In a show of force, Soviet troops Friday entered a Lithuanian printing plant, breaking windows and roughing up workers.

Collins said the Community declaration expressing ''serious concern'' at

the economic measures would be delivered to Moscow by Irish Ambassador Patrick McCabe as soon as possible.

It calls for both sides to ''exercise maximum restraint and to avoid actions that can only lead to a further deterioration of the situation,'' and ''not to carry through measures which are inconsistent with this objective.''

''They are firmly of the view that an outcome acceptable to all must be sought and that this is possible only by means of discussion,'' the measure said of Community members.

The European Community pledged to monitor the situation in Lithuania.

Next week's leadership summit was called to discuss German unification but appeared set to instead focus on preparations for swifter political union of the 12 Community nations.

Irish Prime Minister Charles Haughey, who is European Community president until July, said it became clear during his two-week tour of European capitals that there was strong pressure for an accelerated movement toward political and economic unity.

A Franco-German initiative to be reviewed by the foreign ministers urges the Community to plan for political and monetary integration by 1993 and said the 12 nations should adopt common policies on defense and foreign affairs.

''The consensus view is that it should be proceeded with quickly. This view is dictated by what's happening in Europe and other parts of the world, that we should expedite our own unification and integration and so on,'' Haughey said Friday night after meeting with Prime Minister Margaret Thatcher in London.

Thatcher is the most strident opponent to further integration, fearing a loss of national soverignity.

French President Francois Mitterrand and West German Chancellor Helmut Kohl urged Haughey Thursday to arrange for ''intensive preparations'' for an intergovernmental conference on monetary and economic union to be held by the end of the year.

They said in a statement that with the profound transformations in Europe, ''we judge it necessary to accelerate the political construction of Europe of the 12.''

The foreign ministers also reviewed a 13-page document prepared by the European Commission, the Community executive agency, outlining three steps

for incorporation of East Germany into the 12-nation Community.

The report said European Community law should apply ''integrally and automatically'' in East German territory as soon as German unification is completed.

#90111u0729 04/21/1990 ~United Press International

(APRIL 21) UPI - In what organizers are calling the biggest demonstration in history, more than 100 million people worldwide will plant trees, fly kites, release butterflies and otherwise commune with nature Sunday to celebrate Earth Day 1990.

Organizers made final preparations Saturday for mass rallies scheduled in virtually every major city in the United States and some 135 other countries to mark the 20th anniversary of the first Earth Day on April 22, 1970, the ''happening'' that launched the U.S. environmental movement.

The national Earth Day 1990 rally was to be held at the Capitol in Washington featuring actor Tom Cruise as master of ceremonies and a slew of rock stars, including John Denver, Olivia Newton-John and Bruce Hornsby.

President Bush planned to take a few minutes out of his vacation weekend in Islamorada, Fla., to mark the day. At an early morning ceremony, Bush was to present one of his daily ''point of light'' awards to Reef Relief, a Key West group dedicated to saving coral reef, and then go fishing.

The group would rather have the president ban offshore oil drilling in the Keys. But the White House says Bush has yet to reach a decision on the proposal that has been before him since January.

Later Sunday, Bush was to telephone a U.S.-Soviet-Chinese mountaineering expedition that was poised to ascend to the summit of Mount Everest on Earth Day. If successful, the climbers plan to transmit live video pictures by satellite around the world.

Bush also was to telephone an Earth Day Rally at Columbia River Gorge in Washington state.

There also were to be scores of more offbeat events across the nation, including:

-An American Indian sunrise ceremony to be performed atop Cadillac Mountain in Maine, the first place the sun's rays touch North America.

-A costume parade at the St. Louis Zoo depicting threatened and endangered animal species worldwide.

-The release of thousands of butterflies by schoolchildren in New York's Central Park.

-A ''jazz funeral'' for badly polluted Lake Pontchartrain in New Orleans to be followed by a symbolic cleansing ceremony.

-A ''walk along the water'' on Santa Monica Pier in Los Angeles.

A similar rainbow of festivities will take place around the world on all seven continents.

In France, environmentalists were to march up a glacier in the Alps and carve a giant thermometer in ice to dramatize concerns about global warming. Another group of activists will hoist some 2,000 to 3,000 kites in a flying arch over the Loire River at Tours.

West and East German bicyclists were to converge on the Brandenburg Gate in the center of Berlin for an Earth Day celebration.

In Brazil, there was to be a musical show on Rio de Janeiro's famed Copacabana Beach followed by the arrival offshore of a fleet of ''caravelas,'' the type of sailboats used by Portugese settlers to reach South America in the 16th century.

In Uganda, a massive rally was scheduled for the marketplace of Kampala with songs, plays and dances featuring environmental themes.

In the Philippines, 20,000 people were expected to link hands to symbolize unity for the Earth and then disperse for a tree-planting campaign.

And even in beleagured Lithuania, citizens were planning to put aside their worries over their independence struggle against Soviet authorities to put on an eco-fair in the capital of Vilnius.

Several events were aimed at demonstrating increasing awareness that international cooperation was needed to address global environmental problems such as climate change and ozone depletion.

At the United Nations in New York, about 44 astronauts from 20 countries, including 16 Soviets and 11 Americans, will gather for a ceremony called ''Only One Earth'' that will include a live video link-up with two cosmonauts on the Soviet space station Mir now in orbit.

The national Earth Day festivities in Washington officially began Friday on the Mall with a prayer to ''Mother Earth'' by leaders of about ten American Indian tribes from around the nation.

After the Indian ceremony, environmental activists opened a three-day eco-fair that featured dozens of exhibits, including a ''mini, walk-through'' rain forest in a tent, a 40-foot inflatable blue whale and a giant Disposo-Monster - a spider-like creature made of pizza boxes, paper plates and other trash.

But not everyone was enthusiastic about Earth Day.

The John Birch Society, based in Appleton, Wis., placed an advertisement in Saturday's Chicago Sun-Times that says ''environmental concerns have been grossly exaggerated in a deliberate campaign to gain support for radically altering the American people's way of life.''

-30- 4981

#90111u0736 04/21/1990 ~United Press International

(APRIL 21) UPI - President Bush considers sanctions against the Soviets.

Earth Day observances begin.

U-P-I has this and other top news today.

President Bush is in Florida today... where he plans a day of sport fishing that will be filmed by a television crew.

But while Bush demonstrates his skill with rod and reel... his attention will NOT be far from the reported imminent hostage release in the Middle East and Soviet actions against its republic of Lithuania.

Like his predecessor, Ronald Reagan, Bush has been frustrated by the hostage crisis in Lebanon. Unable to win their release... Bush has been able only to wait and see whether the Islamic Jihad fulfills its promise to release an unidentified American within two days.

In regard to Lithuania... Bush has placed U-S-Soviet relations ahead of Lithuanian independence. However, he indicated yesterday that the Kremlin may face U-S economic sanctions if Soviet coercion of Lithuania continues.

Bush is reluctant to pressure Soviet President Gorbachev on Lithuania because he believes that Gorbachev's survival is in the best interests of the West. Increased pressure on Gorbachev could weaken his hold on the Soviet Union.

-30- 1369

#90111u0739 04/21/1990 ~United Press International

(APRIL 21) UPI - Millions of people the world over will display their commitment to the planet this weekend by observing tomorrow's 20th

anniversary of Earth Day.

Organizers say participants from 136 countries will take part in a wide range of activities aimed at celebrating a cleaner, more environmentally sound planet.

In Washington, activities got underway yesterday. A group of native Americans intoned an ancient prayer which thanks the Earth, the Sun, the Moon and the four winds.

Other activities in the nation's capital include an expo on the Mall designed to educate Americans about environmental issues. Among the displays for eco-browsers are the giant Disposo-Monster- a spider-like ceature made of pizza boxes, paper plates and other trash.

In New York, more than 40 astronauts from 20 countries will gather for a ceremony called ''Only One Earth.'' The occasion includes a live video hookup with two cosmonauts on the Soviet Mir space station.

The first Earth Day led to the birth of the environmental movement and groundbreaking legislation such as the Clean Air and Water Acts.

The Bush administration tried to reclaim a position in the environmental stakes yesterday when Vice President Quayle accused Democrats of politicizing the environment and failing to deal with pressing economic problems.

Earlier this week, the White House was criticized at an international conference on global warming for failing to take the lead in the effort to reduce ozone-depleting pollutants.

-30- 1694
#90111u0740 04/21/1990 ~United Press International
(APRIL 21) UPI - For the 122nd time since the Supreme Court rescinded its ban on capital punishment, a death row inmate has been executed in the United States.

The latest person to be sent to death is convicted killer Jerome Butler.

54-year-old Butler was pronounced dead this morning at the state prison in Huntsville, Texas, after receiving a lethal injection.

Butler was sentenced to death for the 1986 slaying of a Houston cab driver. Texas authorities say they were prepared to issue a stay of execution had Butler requested it.

But Butler refused to ask for his execution to be halted because it would

have meant that he would have remained incarcerated until he was in his 70's. He'd already been in jail half his life.

Before receiving his lethal shot, Butler wished those around him a ''good life.'' He then nodded his head and mouthed the words ''all right'' before receiving his deadly dose.

-30- 1073

#90111u0746 04/21/1990 ~United Press International

(APRIL 21) UPI - U-S intelligence agencies say economic woes are worsening for Soviet President Gorbachev as he tries to transform the Soviet Union into a market economy.

A C-I-A and Defense Intelligence Agency study says the Soviet economy plunged into a state of ''near crisis'' last year... registering its worst performance and making daily life miserable for most citizens.

And what's worse, both agencies say there's ''little prospect'' the Soviet economy will improve in the near future... and the possibility exists that economic conditions could ''deteriorate sharply.''

The agencies told the Joint Economic Committee that Gorbachev fulfilled his pledge to cut defense spending. He's reduced expenditures four to five percent in real terms in 1989... and further cuts are likely the next two years.

But C-I-A officials testified that Gorbachev failed to make consumer goods more available by shifting investment away from defense and heavy industry. They say that's largely because his economic reforms have NOT gone far enough.

-30- 1209

#90111u0754 04/21/1990 ~United Press International

(APRIL 21) UPI - Germany's Nazi past came back to haunt it yesterday in East Berlin.

Members of East Germany's Communist Party stormed out of Parliament after a deputy compared the country's 40 years of communist rule to Adolf Hitler's Third Reich.

Joachim Nowack of the arch-conservative German Social Union told deputies that the Party of Democratic Socialism... the renamed Communist party... had failed to learn from history.

Said Nowack... ''A single apology to the people for 40 years of mistaken policies was NOT enough.'' East Germany's parliament last week issued a

statement apologizing for the Holocast and World War Two.

Elsewhere in East Berlin, hundreds of neo-Nazis and skinheads went on a rampage... clashing with police in downtown Alexanderplatz. Authorities say the melee injured a dozen people, some of them seriously.

Officials say 300 skinheads, many wearing masks... headed downtown in East Berlin after a soccer match and went on a rampage. They reportedly attacked strollers and hurled bottles and other objects at police.

Rumors had spread in East Berlin earlier that neo-Nazi elements were planning provocations to coincide with the anniversary of Hitler's birth 101 years ago on April 20th, 1889.

-30- 1408

#90111u0794 04/21/1990 ~United Press International

PROVIDENCE, RI (APRIL 21) UPI - Health and Human Services Secretary Louis Sullivan asked physicians Saturday to remember they are in a ''serving profession'' and to extend help to the poor and minorities.

In remarks prepared for delivery at the opening of a Brown University medical building, Sullivan said the country faces ''sweeping debate'' over ''critical'' health care questions.

Among the issues is how to restrain soaring medical costs, provide for 33 million Americans with no insurance, adequately care for an aging population and create an effective partnership between government and the private sector.

The key to solving the ''crisis'' must come from the medical profession itself, Sullivan said.

''It must always adhere to the highest and noblest understanding of its purpose - to serve humanity,'' he said. ''Physicians must always be aware that medicine is, above all, a serving profession.''

In a news conference prior to his speech, Sullivan said he does not consider physicians failing to live up to the standard to be a ''major problem.''

But he expressed concern over cases where patients have been refused treatment because they lack insurance or have problems that physicians are reluctant to treat.

''There has been a number of instances where physicians have hesitated to treat patients with AIDS,'' Sullivan said. ''There is an orthopedic surgeon at San Francisco General Hospital who has had a high profile in

medicine because she has indicated her intention to resign from that hospital because of the problems there.''

Sullivan said he wants to remind physicians that the prestige and trust they enjoy lies in adherence to the ideal that their primary duty is to serve.

In his speech, Sullivan called on physicians to work toward meeting the health needs of poor and minority citizens.

''An excess burden of morbidity and mortality weighs them down, as reflected in some 60,000 excess deaths among our black, Hispanic, and native American communities every year from cancer, cardiovascular disease and stroke, alcohol and drug abuse, diabetes, homicide, infant mortality, and AIDS,'' he said.

Less than 7 percent of physicians in the country are black, Hispanic or native American, and the percentage must grow, Sullivan said.

The medical community also must do more to promote healthy lifestyles and disease prevention, he said.

''Although in the past the medical profession has been reluctant to advise patients about personal behavior, we desperately need your trusted and credible voices in this endeavor,'' Sullivan said.

-30- 2812

#90111u0838 04/21/1990 ~United Press International

NEW YORK (APRIL 21) UPI - Deborah Norville will remain the host of the ''Today'' show, NBC officials said Saturday, denying a published report that the network has considered moving her to the weekend evening news.

New York Newsday reported in its Saturday editions that the network's top executives were planning to make the change because of the show's poor ratings and network affiliates' dissatifaction with Norville's performance.

NBC news officials said the report was false and blamed it on rumors and speculation that have surrounded Norville since she replaced Jane Pauley as host of the ''Today'' show in January.

''When there's a ratings slide it's natural for people to begin speculating what changes might be made to improve the situation,'' said Peggy Hubble, director of news information at NBC.

''But it is simply untrue that NBC news executives have plans to remove Deborah Norville from the ''Today'' show and put her on weekend nightly news,'' said Hubble.

But William Bolster, vice president and general manager of KSDK, St. Louis and head of the NBC affiliate advisory board's news committee, said: ''The biggest problem in the affiliate world is the 'Today' show.''

Norville was in Nicaragua Saturday and Sunday to interview President-elect Violeta Chamorro and outgoing president Daniel Ortega. She was expected to be back on the air Monday, Hubble said.

Newsday, quoting sources, said no decision had been made on Norville's future at NBC. She has a five-year, $1 million-a-year, no-cut contract with the network.

Ratings have dropped for ''Today'' since Norville took over and last week the show received a 16 share, its lowest of the year. ABC's ''Good Morning America'' has won 15 consecutive weeks in the time period, ending ''Today's'' dominance in the ratings that continued through the fall.

-30- 2051

#90111u0860 04/21/1990 ~United Press International

(APRIL 21) UPI - A Texas death row inmate was put to death by lethal injection this morning. Dead is convicted killer Jerome Butler. Texas officials Butler could have had a stay of execution until the last moment... if he'd wanted one. But Butler refused to request a stay and told prison officials in Huntsville that he just wanted ''to get it over with.'' Butler's defense attorney said Butler was ''very philosophical'' about his fate and refused to behave like a ''whipped dog.''

The White House cautions that recent overtures in Lebanon indicating the imminent release of an American hostage could prove to be NOTHING more than words. Presidential spokesman Marlin Fitzwater says kidnappers of Western hostages in Lebanon could be playing an elaborate hoax on the United States. Both pro-Syrian and pro-Iranian sources say the groundwork is being laid for the release of an American held in Lebanon soon.

Tensions remain high between Moscow and Lithuania. Leaders of the breakaway republic say Moscow has diverted sugar, metal and timber shipments in addition the embargo of oil and and a cut in the natural gas supply. The material hardships come as Red Army soldiers commandeered a Lithuanian printing plant yesterday, forcibly removing 30 volunteer nationalist guards.

The White House says it is ''increasingly concerned'' about the situation in Lithuania. President Bush plans to meet with congressional leaders next week to discuss a possible U-S response. Bush has been praised and criticized on Capitol Hill for his hands-off manner toward Lithuania. Presidential spokesman Marlin Fitzwater says U-S retaliation might be in

the offing if Moscow keeps applying economic intimidation.

-30- 1873
#90111u0865 04/21/1990 ~United Press International
(APRIL 21) UPI - White House budget director Richard Darman says it's ''highly likely'' that President Bush and Congress will meet in the near future for budget negotiations. Darman also had a bitter pill for Washington lawmakers when he told reporters yesterday that the country's sluggish economic performance threatens to inflate the fiscal 1991 budget deficit by as much as 20-BILLION dollars.

Exxon performed its rite of spring in Alaska yesterday. It launched the first vessel of this year's cleanup effort of the Valdez oil spill. The federal government brought about the dispatch of the 14-person advance cleanup crew as a means of preparing a critical wildlife habitat that serves as home to migratory birds seals. A large-scale cleanup is scheduled to begin next month.

A decade-long legal battle waged by a pair of California ranchers against the federal government is over. The government agreed to pay a five and one-half Million dollar settlement to the ranchers. Janette Freitas says the out-of-court settlement stems from damage done to the ranch run by Freitas and her husband by selenium-tainted water. It seeped from the adjacent Kesterson National Wildlife Refuge.

The man who organized the first Earth Day 20 years ago kicked off this weekend's Earth Day events in Los Angeles by saying the U-S environmental movement has been stymied by a blaise public attitude. Former U-S Senator Gaylord Nelson says a better educated populace is the only way to preserve the planet. He cited a Wisconsin law that makes environmental education mandatory in public schools.

-30- 1757
#90111u0874 04/21/1990 ~United Press International
CHARLOTTESVILLE, VA (APRIL 21) UPI - John Kluge, who Forbes magazine last fall ranked as America's wealthiest man, and his wife, Patricia, plan to divorce, an attorney for her said Saturday.

''This is a very amicable settlement,'' said Robert Blair, a Washington lawyer.

The couple, who own 10,000 acres in southern Albemarle County, cited irreconcilable differences.

The divorce, which would end their nine-year marriage, will be the third for John Kluge, 76, who has five children by previous marriages. It will

be the second for 41-year-old Patricia Kluge.

Blair refused comment on the financial details on the settlement, but he said Patricia Kluge and the couple's adopted 6-year-old son, John Kluge II will live at Albemarle House and John will reside at nearby Morven.

Over the years, the reclusive couple has donated millions of dollars to the nearby University of Virginia and also given large sums of money to the successful campaign of Gov. L. Douglas Wilder.

In February, Wilder was criticized by some for appointing Patricia Kluge to the University of Virginia's board of visitors. Some were bothered by the fact she once posed nude for a British magazine published by her first husband.

Wilder's press secretary Laura Dillard on Saturday said, ''They are both his friends, and they've asked their friends to respect their privacy, and that's what (Wilder) is going to do.''

Kluge earned his estimated $5.2 billion fortune through the Metromedia chain. He also owns a majority share of Orion Pictures.

-30- 1741

#90111u0929 04/21/1990 ~United Press International

SAN ANTONIO (APRIL 21) UPI - Attorney General Richard Thornburgh said Saturday he was assured by his counterpart in Mexico that the controversal arrest of a suspect in the slaying of a U.S. drug agent would have no effect on joint drug investigation efforts.

Some Mexican officials have criticized the still-undisclosed circumstances surrounding the April 3 arrest of Humberto Alvarez Machain, 42, a physician from Guadalajara, Mexico.

Mexico's Foreign Ministry issued a statement last week saying the Mexican government was concerned about reports alleging the suspect might have been arrested illegally with the participation of U.S. authorities.

Some Mexican news reports alleged the suspect was kidnapped by bounty hunters seeking a reward offered by the U.S. Drug Enforcement Administration. The DEA has denied a reward was offered.

U.S. authorities arrested Alvarez Machain upon his arrival in El Paso, Texas, but have not said how he came to arrive in El Paso. Alvarez Machain is charged in the United States with assisting in the torture and murder of DEA agent Enrique Camarena Salazar in 1985.

Thornburgh said he met last week in Mexico with Mexican Attorney General

Enrique Alvarez del Castillo, and that Alvarez del Castillo assured him the controversy ''was not going to hamper or prejudice'' the cooperation between the two countries.

Thornburgh, who arrived in San Antonio for a speech to a lawyers' group following a two-day drug investigation conference in Mexico sponsored by the Organization of American States, would not comment on how Alvarez Machain was apprehended.

''There's no evidence whatsoever that any DEA agent in Mexico was involved with the apprehension,'' he said. ''The circumstances surrounding the delivery of Dr. Alvarez to the United States still are under investigation.''

But Thornburgh also indicated that how Alvarez Machain arrived in the United States would be of little consequence in U.S. courts.

''Our law clearly subjects to the jurisdiction of our courts individuals who are physically present within the United States without particular regard as to how they came to be here, unless the circumstances are so shocking and reprehensible in their nature that the court will intervene '' Thornburgh said.

''But those types of cases are very rare indeed, and nothing has come to my attention in this case that would indicate any cause for freeing this particular defendant,'' he said.

Alvarez Machain was taken to Los Angeles following his arrest to await trial on murder charges filed in connection with the torture and slaying of Camarena.

Alvarez Machain, one of 19 people indicted in connection with the Camarena slaying, is accused of being present during the torture of Camerena and administering a drug to the agent to revive him when he became unconscious during the lengthy sessions.

Alvarez Machain, who pleaded innocent during an April 10 court hearing in Los Angeles, was ordered held without bond pending trial May 1.

#90111u0956 04/21/1990 ~United Press International

(APRIL 21) UPI - Convicted killer Jerome Butler said he just wanted ''to get it over with''... so he nodded to Texas prison warden Jack Prusley and mouthed the words, ''All right.'' Butler died from a lethal injection early today in Huntsville, Texas.

In Florida today, President Bush will demonstrate his fishing skills for a

television crew. Bush aides will be on duty to monitor the situation in Lithuania and Lebanon.

U-S officials are waiting form word from the Middle East on the latest Arab promises that an American hostage would be freed within two days. Washington is downplaying reports that a hostage release is imminent.

Pope John Paul arrived in Czechoslovakia today for a two-day visit. It's the pontiff's first visit to Eastern Europe since last year's anti-communist revolutions. Shop windows in Prague are filled with commemorative memorabilia.

NASA has cleared the newly repaired shuttle Discovery for the start of its countdown today for launch on Tuesday. The ship's five-member crew plans to fly back to Florida from Houston tomorrow afternoon for final preparations.

Earth Day festivities are being held worldwide this weekend. More than 100-Million people are expected to reaffirm their commitment to a better environment. Organizers say the day will be observed in about 140 nations.

In San Diego, Vice President Quayle yesterday criticized Democrats for playing politics with concerns about the environment. Quayle says Democrats are ignoring economic problems in their rush to back environmental causes.

-30- 1723

#90111u0957 04/21/1990 ~United Press International

(APRIL 21) UPI - Observers at the Solidarity congress in Gdansk, Poland, say Solidarity founder Lech Walesa probably will be elected today to run the trade union in the coming decade. Walesa has led the union for nine years.

Hurricane forecaster William Gray says years of average or above average rainfall in western Africa will mean more severe hurricanes will hit the United States in the coming years... especially in Florida and the East Coast.

A reputed gang member was sentenced to death yesterday in Torrance, California, for the murders of two men, including an Orange County minister. 19-year-old Tracy Carter is eligible for the death penalty.

U-S Navy authorities in the Philippines say an American destroyer in the South China Sea rescued 35 Vietnamese refugees on a disabled boat. The U-S-S Elliot was on a routine mission last night when it spotted the boat.

Civil defense authorities say searing lava from Kilauea Volcano oozed

slowly through a rural housing area on Hawaii yesterday and destroyed two homes. They are the third and fourth destroyed in the last three days by lava.

Three U-S military teams are on their way to Vietnam to investigate a U-S warplane crash site and seek evidence of American servicemen missing in action since the Vietnam War. The joint search is expected to last up to 20 days.

In China, a report says the country's largest southern city has adopted tough new laws banning all unauthorized demonstrations. The report cites ''latent instability'' in the Guangzhou, formerly known as Canton.

#90111u0988 04/21/1990 ~United Press International

ATHENS, GA (APRIL 21) UPI - FBI Director William Sessions urged law students and lawyers Saturday to consider taking jobs helping the poor and for all attorneys to devote more time to helping disadvantaged victims of crime.

''Law students like yourselves who have yet to begin your career should seriously consider a commitment to public service,'' Sessions told students and alumni at University of Georgia Law Day ceremonies. ''Alumni in private practice must guide their firms to offer more service to the community, as well as pro bono assistance to the young and elderly.

''A lawyer who serves only his client is a pitiable mockery of what a truly great lawyer must be. (Public service) is more important today than it ever was before.''

Sessions said the nation's legal system faces two critical issues - drug problems among youth and violent and white-collar crime aimed at the elderly.

''Everyone, no matter what work he or she does, can and should volunteer to help our young people during this time of national crisis,'' Sessions said. ''We must back up our words with actions if we are serious about wiping out the drug scourge.''

Sessions called on the students and practicing lawyers to enter public service to guarantee ''justice literally for all.''

He said justice must be ensured for all citizens so ''our nation will continue to shine as a beacon of hope for oppressed people around the globe.''

In his remarks, Sessions said East Europeans will look to the United

States as a model for new systems of justice as they establish new democratic governments.

''On any day you can pick up the newspaper and find the lead story tracking the fresh breezes of freedom and justice blowing all over the world,'' he said. ''If that thrust for freedom is inspired by our great land, then we must responsibly reexamine our cherished system of law.''

#90111u1039 04/21/1990 ~United Press International

(APRIL 21) UPI - The White House is maintaining a low profile in response to reports from Lebanon that it looks as if efforts to release at least one American hostage will succeed before the end of this weekend. A senior pro-Iranian Hezbollah clergyman told U-P-I that a great deal of energy has been committed toward the release of Western captives.

Presidential spokesman Marlin Fitzwater says President Bush will meet next week with congressional leaders to discuss possible U-S responses to de-fuse tensions between Moscow and Lithuania. Today, Bush will turn his attention away from the pressures as head of state and cast his line angling for fish.

20 years after being inaugurated, Earth Day has grown into a corporate sponsored event spread over the globe. But the founder of Earth Day, former Democratic Senator Gaylord Nelson, says Americans must become better versed on environmental issues to preserve the planet.

It appears as if Solidarity founder Lech Walesa will retain his leadership of the Polish labor movement. But unlike previous union elections, Walesa faces distinct competition. The Nobel Prize winner maneuvered to gain a significant bloc of votes in his favor but had his powers curtailed somewhat when delegates reduced membership of the union's ruling council.

#90111u1049 04/21/1990 ~United Press International

(APRIL 21) UPI - Texas prison officials say death row inmate Jerome Butler spent the hours before his execution this morning socializing with other inmates and watching television. Butler was put to death after eating a last supper of a t-bone steak, fried chicken, corn and iced tea. Butler was convicted of the 1986 killing a Houston cabbie.

The National Weather Service reports shrouds of fog nestling around the Great Lakes and settling in across the Midwest. The pea-soup visibility comes while temperatures reflect the spring. The mercury in the country's mid-section is resting in the 50's, while the Weather Service reports temperatures in the 60's in the South and Mid-Atlantic.

U-S intelligence agencies say the Soviet economy fared poorly last year. In testimony to the Joint Economic Committee yesterday, the C-I-A and the Defense Intelligence Agency said things appear grim for Soviet consumers this year as well because Soviet President Gorbachev's reforms do NOT go far enough.

South Korean prosecutors today asked that a life sentence be imposed against an opposition lawmaker for his foray across the border into North Korea in 1988. He crossed the border in a bid to ease tensions between the neighboring Koreas. His endeavor violated a strict security law that forbids unauthorized contacts with North Koreans.

China's government-run news agency says China's largest metropolis has enacted stiff regulations that forbid unauthorized demonstrations. The legislation in the city formerly known as Canton supplements a national law forbidding such gatherings and was designed to combat ''latent instability'' in China.

Pope John Paul kicked off his first visit to Eastern Europe since last fall's political changes today when he arrived in Czechoslovakia. John Paul said the downfall of communist governments in the region had as much to do with economic problems as moral bankruptcy.

#90111u1054 04/21/1990 ~United Press International

KALAPANA, HI (APRIL 21) UPI - Searing lava from Kilauea Volcano incinerated three more homes and threatened others as molten rock moved slowly through a rural housing area on the island of Hawaii, state authorities said Saturday.

The lava began its destruction Friday morning in the Kalapana Gardens housing area, added a second house during the afternoon and sent the third structure up in flames after dark.

''After destroying the final home last night, the lava continued eastward, filled in a depression, and approached another house. It is about five feet from the house and inching toward the home,'' Bruce Butts, assistant administrator of the state civil defense agency said.

Lava moved to within about 25 feet of another home, virtually surrounded with the cooling molten rock in the back and front of the structure. Street access to the house was cut off, Butts said.

While the flow was stopped for the moment, there was red-hot lava visible in cracks in the cooling crust behind the front, he said.

The advance of the molten rock led civil defense officials Saturday to expand an evacuation order in the rural settlement some 200 miles from Honolulu from 25 homes to 53.

The balance of the Kalapana area was on alert, meaning an evacuation could be ordered on short notice.

The latest destruction brought to 85 the number of homes destroyed since Kilauea began erupting Jan. 3, 1983, beginning its longest and most destructive eruption in recorded history.

The 7-year-long eruption has caused more than $20 million damage to structures, property, and roads. It has also destroyed a park visitor center.

#90111u1093 04/21/1990 ~United Press International

(APRIL 21) UPI - Pope John Paul is in Czechoslovakia on the first day of a two-day official visit. When he arrived, the pontiff said he wanted to visit Czechoslovakia in 1985 to attend celebrations marking the one-thousand 100th anniversary of the death of St. Methodius, who helped bring Christianity to the Slavic people. The communist government at the time refused permission for the visit.

Lithuania is standing firm in its resolve for independence from the Soviet Union in the face of new pressure from Moscow. Lithuanian Prime Minister Prunskiene said... quoting here... ''We will never withdraw our declaration of independence.'' Lithuanian officials say the Kremlin has diverted Cuban sugar as well as metal and timber shipments from the Baltic republic.

Former Wisconsin Senator Gaylord Nelson... who created Earth Day in 1970 to increase awareness about the environment... says public ignorance has impeded the movement. Speaking yesterday at U-C-L-A to kick off Earth Day 1990 festivities... Nelson says a better-educated populace will be more capable of prodding politicians to enact legislation to protect the environment.

The first Exxon vessel is on its way to Alaska's Prince William Sound to begin to the summer clean-up from last year's Exxon Valdez oil spill. Exxon had proposed a May start-up for its second season of cleaning oil from Alaska beaches... but the Coast Guard ordered the oil giant to send an advance crew sooner to deal with a critical wildlife habitat.

#90111u1094 04/21/1990 ~United Press International

(APRIL 21) UPI - The Israeli military says its troops killed six pro-Iranian Hezbollah guerrillas during a raid yesterday into a Syrian-controlled region of Lebanon. Lebanese security sources say Israeli gunship helicopters blasted the Hezbollah base in a village 27 miles southeast of Beirut. Hezbollah confirmed six of its fighters were killed during clashes with Israeli soldiers.

Senator Sam Nunn is trying to find middle ground between what the White House is proposing for defense spending and what House Democrats want to cut. In a speech yesterday, Nunn suggested stalling the controversial M-X missile and freezing spending for the ''Star Wars'' nuclear missile-defense research. Nunn is the chairman of the Senate Armed Services Committee.

The closest living relative of Lenin is blaming Soviet dictator Josef Stalin for the current unpopularity of her uncle. Olga Ulyanova is the daughter of Lenin's younger brother, Dmitri. She told a Soviet newspaper that the fashionable criticism of Lenin, who's the founder of the Soviet state... is nothing less than ''ideological sabotage.''

The San Diego police department unveiled a device that it's billing as the world's first portable electronic drug detector. Officials say the Sentor machine... which is as big as a hand-held vacuum cleaner, can identify tiny amounts of cocaine and heroin. The machine proved so accurate that it detected trace amounts of cocaine on a police official's five-dollar bill.

#90111u1217 04/21/1990 ~United Press International

(APRIL 21) UPI - Solidarity founder Lech Walesa was re-elected as chairman of the independent Polish labor movement, defeating two rivals with 77 percent of the vote cast by delegates at the union's second congress. Walesa easily overcame two rivals, but he did suffer a setback when delegates voted to reduce to 97 from 122 the number of seats on Solidarity's executive committee. The vote was seen as a move to limit Walesa's power.

Hundreds of rowdy soccer fans and neo-Nazi skinheads rioted in East and West Berlin last night and early today, marking the 101st anniversary of the birth of Adolf Hitler. The trouble erupted after a soccer match in East Berlin, then spread throw the Berlin Wall into the West. Seven police officers were injured by thrown rocks and bottles, four of them seriously. Authorities say 30 rioters were arrested in East Berlin and many more were taken into custody in the West.

President Bush is after bonefish in the Florida Keys today... the day after raising the pressure on Moscow another notch in moves to ease the Soviet pressure on Lithuania to give up an independence movement. Bush

warned that ''there are limits'' to American tolerance. He raised the pressure by indicating that the Kremlin could face economic counter-measures next week if it does NOT ease the pressure on the Lithuanian government.

#90111u1327 04/21/1990 ~United Press International

(APRIL 21) UPI - Iran today called on the Moslem fundamentalists holding three American professors in Lebanon to stop delaying the release of one of the hostages. The Tehran Times, which often reflects official Iranian positions, says the captors should consider the presence of the U-S ambassador to Syria- quote- ''as good enough to conduct the arrangements for the release of the hostage.''

The newspaper also suggested that a second captive would be freed soon. The paper quoted what it called a ''well-informed source'' in Tehran as saying another hostage-taking group intends to free a second American hostage imminently. The newpaper did NOT identify the group.

Authorities in East and West Germany arrested dozens of rowdy soccer fans and neo-Nazi skinheads who rampaged in both sectors of the divided city, marking the 101st anniversary of Adolf Hitler's birth. The rioters pelted police with bottles in East Berlin, then swarmed through the Berlin Wall to riot in West Berlin. Seven officers were wounded, four seriously.

Polish Solidarity founder Lech Walesa easily defeated two rivals to win re-election today as chairman of the independent labor movement. Union officials say Walesa received 362 votes- or 77 percent of the ballots cast at the second union congress- to retain his position as chairman of the organization he founded nine years ago.

-30- 1542
#90111u1328 04/21/1990 ~United Press International
(APRIL 21) UPI - Czech President Vaclav Havel proclaimed that he was ''party to a miracle'' today as he welcomed Pope John Paul, the first pope to visit Czechoslovakia. The pontiff knelt to kiss the ground when he arrived at Prague's airport. The pope said he had longed to come to Czechoslovakia, but the communist government at the time refused to give him permission.

Convicted Texas killer Jerome Butler was executed by lethal injection early today in Huntsville, Texas. The 54-year-old Butler was sentenced to death for the 1986 murder of a Houston taxi-cab driver. Prosecutors and judges were ready to halt the execution at a moment's notice but Butler had refused to appeal, saying- quote- ''I just want to get it over with.''

Temperatures were seasonable across the nation today. But Spring thunderstorms triggered heavy rain in southern Illinois, Missouri, Arkansas, Oklahoma, Tennessee, Mississippi and Alabama. Thick morning fog also enveloped much of the Midwest, stretching from the Great Lakes across Iowa and Missouri into Kansas and Nebraska.

#90111u1594 04/21/1990 ~United Press International

(APRIL 21) UPI - There are reports out of Tehran today suggesting that a second American hostage will be released. Hundreds of Western and Arab journalists are crammed in the Foreign Ministry in Damascus, Syria, awaiting the promised release of one hostage. State-run television says it will broadcast the hostage release. In Tehran, Iran today appealed to the Moslem fundamentalist captors of three American professors to stop stalling the release of one of the captives.

Dozens of rioters were arrested in East and West Berlin early today as rowdy soccer fans and neo-Nazi skinheads marked Adolf Hitler's birthday anniversary. Authorities say the crowds pelted police with bottles during rampages in East Berlin and then swarmed through the Berlin Wall to West Berlin, where more riots erupted. Seven police officers were wounded, four of them seriously.

A police investigator in Woonsocket, Rhode Island, said today that a 12-year-old boy reported his parents' alleged drug use to police because he feared they were destroying their lives. The boy told police that he had seen his parents smoke marijuana. He said he became concerned after learning about the health effects and legal consequences of drug use through a drug-education class at school.

A federal judge in Charlotte, North Carolina, says he was only exaggerating whern the urged that all AIDS victims be exiled to Australia. U-S District Judge Robert Potter, known as ''Maximum Bob'' for his tough sentences, says he meant only those who continue to spread the disease should be shipped out. In Potter's words today- ''It was my way of making a point that for some things you don't have any easy solutions.''

An official survey reports that widespread poaching has seriously hurt the elephant and rhinoceros populations in Tanzania's national parks. The survey says that from 1977 to 1987, poachers killed almost half the elephants, leaving a little more than 89-thousand alive from a population of nearly 199-thousand. It says poachers have almost annihilated the rhinoceroses... leaving only 50 rhinos left out of an original population of 25-hundred 13 years ago.

Fishing for tarpon and bonefish is the order of the day for President Bush and his fishing buddies today as they skim across Florida Bay. Bush acted oblivious to the situations in Lebanon and Lithuania as he soaked in the sun and sea breezes of the Florida Keys. Bush hoped his well-known love of the outdoors will underscore his concern for the environment on Earth Day weekend.

#90111u1714 04/21/1990 ~United Press International
(APRIL 21) UPI - Pro-Syrian sources in Beirut say a doctor examined two American hostages earlier this month, apparently in preparation for their release. The source says the two were chosen as a result of a secret deal. The report comes as journalists wait in Damascus for the Islamic Jihad for the Liberation of Palestine to keep its promise to release a hostage.

Lithuania's Sajudis nationalist movement met today... apparently to discuss Moscow's economic embargo that has left the republic without oil, most natural gas and other raw materials. Communists still loyal to Moscow held a separate meeting that also focused on economic problems stemming from the embargo.

In Dublin, Ireland, the European Community today called on the Soviet Union to end its economic embargo against Lithuania. The foreign ministers of the 12 European nations instead urged dialogue to deal with Lithuania's declaration of independence. The statement followed a plea by Lithuania to help end the blockade.

President Bush is spending the weekend fishing in the Florida Keys, but he's also waiting to see what will happen in Lithuania... and on the hostage front in the Middle East. Moscow tightened control over Lithuania this week with an economic embargo. In Damascus, officials are waiting to see if a Moslem fundamentalist group will release a U-S hostage.

Pope John Paul is in Czechoslovakia for a one-day visit... the first ever by a pope to the eastern European country. He spoke to several hundred thousand people today on a plain near Prague, saying Czechoslovakia's emergence from communist dictatorship is in some ways similar to Christ's resurrection on Easter Sunday.

-30- 1844

#90111u1747 04/21/1990 ~United Press International

(APRIL 21) UPI - Rioters in East Berlin last night marked the 101st anniversary of Adolf Hitler's birth by pelting police with bottles... and then damaging cars and shop windows in West Berlin in the early hours today. The group included hundreds of rowdy soccer fans and neo-Nazi skinheads. Some wore masks and exchanged Nazi salutes. Seven police officers were injured, four seriously.

Contra rebels have begun moving toward cease-fire zones in Nicaragua to prepare for disarmament. A Defense Ministry spokesman says the first U-N peace-keeping forces also are scheduled to arrive today. The movements are part of a cease-fire agreement signed on Thursday to ensure a peaceful transition of power on April 25th.

A published report says the closest ally and friend of Ferdinand Marcos has agreed to give up a Los Angeles bank to the Philippines. The report says Robert Benedict will surrender the bank to avoid prosecution on charges that he used the institution to launder money for the late dictator.

A huge fight erupted in Sibiu, Romania, today between supporters of rival presidential candidates. More than one-thousand supporters of liberal candidate Radu Campeanu clashed with equal numbers of fanatical campaigners for the interim president Ion Iliescu.

Villagers in Romania's countryside say almost nothing has changed since the overthrow of former dictator Nicolae Ceausescu in December. Some say food is still rationed. The lack of improvement has led to voter apathy with less than a month to go before Romania's first democratic elections in four decades.

#90111u1792 04/21/1990 ~United Press International

ATHENS, GA (APRIL 22) UPI - The probe into a pair of December mail bombings that killed a federal judge and a black civil rights lawyer in the South has brought no arrests, but FBI Director William Sessions said Saturday he was satisfied with the investigation.

Sessions, speaking at Law Day ceremonies at the University of Georgia Law School, said he believes his agents and other federal investigators have handled the cases properly.

''I am very satisifed with the work that has been done, the energy that has been put into the investigation,'' Sessions said.

A Dec. 16 mail bomb killed 11th U.S. Circuit Court of Appeals Judge Robert Vance in his suburban Birmingham home, and a similar blast two days later claimed attorney and Savannah City Councilman Robert Robinson at his offices in the Georgia city.

Agents speculated the bombings were racially motivated, and on Dec. 27 a group calling itself Americans for a Competent Federal Judicial System mailed a letter to media claiming responsibility for the bombings and threatening more attacks.

The letter said Vance and Robinson were killed in reprisal for the atrocities inflicted upon Julie Love, a white Atlanta preschool teacher who was raped and killed last year. Two black men have been found guilty in that murder.

After the deaths of Vance and Robinson, bombs were mailed to the 11th Circuit courthouse in Atlanta and the NAACP headquarters in Jacksonville, Fla., but the devices did not explode.

Dozens of federal agents have been deployed to investigate the series of mail bombs. The probe led agents to an Enterprise, Ala., junk dealer and to an Atlanta resident convicted of possessing a bomb in 1972, and brought both men considerable media attention. Agents investigated both men but have made no arrests.

#90111u1821 04/21/1990 ~United Press International

BOSTON (APRIL 21) UPI - Garry Galley scored off Craig Janney's fourth assist 3:42 into overtime Saturday night, lifting the Boston Bruins to a 5-4 victory over the Montreal Canadiens and a 2-0 lead in their Adams Division final.

Games 3 and 4 of the best-of-seven series will be played Monday and Wednesday nights at The Forum in Montreal.

Janney, who also set up Boston's first, second and fourth goals, was behind the Canadiens' goal when he pushed the puck out to Galley, who was cutting through the right circle. The defenseman took the puck and flipped it into the far corner, beating Montreal goalie Patrick Roy high on the stick side.

Boston's Cam Neely forced the overtime with his second goal of the game, a

power-play tally with just 1:49 left in regulation. Montreal defenseman Donald Dufresne was whistled for interference with 2:32 remaining when he took down Randy Burridge in front of the Montreal goal.

Neely, with a team-high six playoff goals, scored 43 seconds later from the left circle when he one-timed Ray Bourque's pass from the point, beating Roy inside the near post.

Montreal never trailed until Galley's game-winner crossed the goal line. The Canadiens held four one-goal leads for a total of 18:44.

Boston, is 31-43-3 in overtime playoff games. Montreal drops to 51-44-1. Both teams are 1-1 in overtime in this post-season.

Montreal took a 4-3 lead at 12:50 of the third period on Stephane Richer's second goal of the game and seventh of the playoffs. The right wing scored one-handed, from close range, off the rebound of his own shot.

Montreal has won 21 of its 24 playoff series with Boston, including 19 of the last 20.

The score was tied 1-1 after one period and 3-3 after two. Boston and Montreal were the NHL's top best defensive teams during the regular season but both teams suffered defensive breakdowns in front of their goals.

At 12:28 of the second period, Boston tied the game 3-3 when John Carter scored on a slapshot from the left circle.The Canadiens had taken a 3-2 edge at 5:30 when Shayne Corson scored from close range off a Richer pass.

Richer's sixth goal of the playoffs had put the Canadiens ahead 2-1 only 1:54 into the second period when he scored on a backhander from 6 feet after Boston's Dave Poulin failed to clear a loose puck from in front of the Boston goal. Neely tied the game 2-2 just 1:49 later with a 30-foot wrist shot from the right circle, off a Janney pass.

Montreal scored on its first shot of the game, Mike McPhee tallying at 1:48 with a one-handed shot from 12 feet off Russ Courtnall's lead pass.

Boston tied the game 4:36 later on Brian Propp's second goal of the playoffs. The former Philadelphia Flyer scored on a 10-foot wrist shot after Neely kicked the puck over to him from the slot.

Dave Poulin, who scored the only goal in Game 1, suffered stretched nerves in his neck when he was hit in the second period and sat out the rest of the game.

#90111u1972 04/21/1990 ~United Press International
(APRIL 21) UPI - Pressure is building on Moscow to end its economic embargo against Lithuania, even as the Kremlin twists the screws a little tighter on the rebellious republic.

European Community foreign ministers meeting today in Dublin, Ireland, issued a statement urging Moscow to lift the economic sanctions. They said ''measures of a coercive nature can make NO contribution to the search for a solution through dialogue.''

President Bush also has stepped up the pressure on Moscow. Earlier this week, he notified allied leaders of the possible options he's considering in retaliation. He also says he will meet next week with congressional leaders to discuss possible U-S moves. Bush is in the Florida Keys for a fishing weekend.

Moscow cut off oil and reduced natural gas deliveries to Lithuania this week in an effort to discourage the republic's independence drive.

In Vilnius, Lithuania's nationalist movement met to discuss the Soviet moves, as did communists still loyal to Moscow.

Pope John Paul is in Czechoslovakia for the first visit by a pope in the history of the Roman Catholic Church.

He spoke to hundreds of thousands of people gathered on a plain near Prague, and earlier spoke to priests, nuns and other church officials.

John Paul praised Czechoslovakia's emergence from communist dictatorship... saying it proves the Christian traditions of Europe can NOT be held down by ''lies, violence, indifference and the superficiality of consumeristic life.''

He also warned against the materialistic pleasures that are bound to blossom as Czechoslovakia opens up to the West.

The pope was invited to Czechoslovakia by President Vaclav Havel , the leader of the East Bloc country's peaceful revolution last November against communist rule.

Five years ago, John Paul was refused entry to Czechoslovakia by the communist leadership.

#90111u1989 04/21/1990 ~United Press International
(APRIL 21) UPI - Violent soccer fans and neo-Nazi skinheads passed through the Berlin Wall to mark Adolf Hitler's birthday with riots on both

sides of the city.

Yesterday was the anniversary of Hitler's birth in 1889. Hundreds of vandals threw bottles and rocks at police in East Berlin last night following a soccer match. Seven officers were wounded, four seriously.

The rioting spilled into early morning, and the hooligans spilled into West Berlin. They wrecked cars, smashed store windows and raided a supermarket. They traded stiff-armed Nazi salutes and yelled obscenities at foreigners.

Dozens of rioters were arrested.

Some East Berlin store owners had boarded up their shops yesterday in anticipation of a repeat of last year's violence on the same date.

A deputy in the East German parliament said there are extremist right-wing and anti-foreigner feelings in East Germany.

Lech Walesa easily overcame two challengers today to win re-election as Solidarity's chairman in Gdansk , Poland.

Walesa got 77 percent of the vote to remain the leader of the labor group he founded nine years ago.

One candidate had acccused Walesa of a dictator's arbitrary style. Walesa acknowledged dissatisfaction in the society and the union.

But he tried to smooth over differences in a victory speech that called for Solidarity to stay united and to look at the larger issues confronting cash-strapped Poland.

Walesa told cheering delegates that the union has the power to manage the country and- in his words- ''bring it finally to Europe.''

Walesa dodged questions over whether he wants to become president of Poland, as he has indicated previously.

#90111u1995 04/21/1990 ~United Press International

(APRIL 21) UPI - The FA stealth fighter played debutante today.

Two of the fighters made their public debut with an aerial display for several thousand invited guests and the news media this morning at Nellis Air Force Base in Nevada. That was a prelude to an open house this afternoon expected to draw 150-thousand people.

The black jets took off from a remote base in central Nevada and circled in formation in front of the crowd, tipped their swept-back wings and landed.

The 106-Million-dollar aircraft has been part of the U-S military for five years but was NOT acknowledged by the Air Force until 17 months ago.

NO one was allowed within 20 feet of the computerized fighter.

Stealth technology means a plane can fly undetected through enemy defenses. The secret lies largely in its skin of plastics and non-metallic materials that absorb radar beams.

The countdown is on for the shuttle Discovery.

The fuse began burning today at Cape Canaveral, Florida, for blast-off Tuesday morning.

If everything goes smoothly, Discovery will lug the Hubble Space Telescope into orbit to afford an unprecedented clear view of the cosmos.

The launch is two weeks behind schedule because a faulty hydraulic unit had to be replaced.

Discovery's five-member crew plans to fly back to Florida from the Johnson Space Center in Houston tomorrow afternoon for final preparations.

Also at the Kennedy Space Center, engineers readied the shuttle Columbia for roll-out tomorrow morning to launch pad 39-A. The Columbia is due for lift-off on May 16th to carry telescopes into orbit to study ultraviolet and X-ray emissions from heavenly bodies.

The Spacelab telescopes should complement the work done by the more powerful Hubble telescope.

#90111u1998 04/21/1990 ~United Press International

(APRIL 21) UPI - Tomorrow is Earth Day 1990, the 20th anniversary of the first Earth Day, and organizers are getting ready.

An estimated 100-Million people world-wide will take part in ceremonies marking the anniversary of Earth Day 1970, the ''happening'' that launched the U-S environmental movement.

In the United States, the national Earth Day rally is to be held at the Capitol in Washington, D-C. It will feature actor Tom Cruise as master of ceremonies.

President Bush plans to take time out from his fishing weekend in the Florida Keys to present a ''point of light'' award to a Key West group dedicated to saving coral reef.

Other U-S activities include the release of thousands of butterflies by school children in New York's Central Park, and a costume parade at the St. Louis Zoo depicting endangered animal species.

In Berlin, West and East German bicyclists are to stage a rally at the Brandenburg Gate.

-30- 1094

#90111u2085 04/21/1990 ~United Press International

(APRIL 21) UPI - A Syrian official says one of the American hostages in Lebanon is expected to be turned over to U-S officials tomorrow in Damascus. The news comes after Iran urged the Islamic Jihad for the Liberation of Palestine to stop stalling and release one of three American professors, as promised.

Moslem fundamentalist sources in Beirut say one American captive may already have been freed and may be en route to Damascus. Reports from Tehran and Beirut suggest that a second captive might also be released. Unconfirmed reports say Washington may have freed Iranian assets to make way for the hostage release.

Greek officials say a British driver delivering a truck-load of steel pipes was charged today with illegally bringing arms into Greece. Customs officials say British authorities told them the man was carrying what was believed to be parts for a giant gun being built by Iraq. British officials seized other steel pipes on similar suspicions nine days ago.

Lithuania's Sajudis nationalist movement met today in Vilnius... apparently to discuss Soviet sanctions that have cut off oil and most natural gas to the rebellious republic. The Sajudis delegates also are expected to decide whether the movement will become an official political party.

The countdown began on schedule at 3 p-m, E-D-T, for Tuesday's launch of the shuttle Discovery. NASA officials at Cape Canaveral, Florida, say conditions are ''80 percent 'go' for launch weather-wise.'' If everything goes as planned, the Discovery crew will launch the Hubble Space Telescope into orbit on Wednesday.

-30- 1765

#90111u2090 04/21/1990 ~United Press International

(APRIL 21) UPI - A four-day wildfire on the Red Lake Indian Reservation in northwestern Minnesota burned across approximately 37-thousand acres before it was contained today. Officials back-burned and made tanker drops yesterday. But there is concern that the blaze might flare up if winds pick up later today.

Attorney General Thornburgh said in San Antonio today that he's been told by his counterpart in Mexico that the arrest of a suspect in the slaying of a U-S drug agent would NOT hurt joint investigations. Mexico's Foreign Ministry has expressed concern that the arrest may have been illegal. Thornburgh says there's little chance the arrest will affect the case.

Colombian police are searching for two Sicilian gangsters suspected of helping the Medellin cocaine cartel set up smuggling routes from Colombia to Europe. The security police chief told a Bogota newspaper that two suspected members of the Sicilian Mafia had made contacts with Colombian traffickers.

In the Philippines, a woman officials say was the architect of a rebel campaign against U-S military bases has been captured. Philippine authorities say the arrest deals ''a severe blow to the rebel movement in Central Luzon.'' The suspect was Number-five on the military's wanted list of communist underground leaders.

-30- 1464
#90111u2380 04/21/1990 ~United Press International
(APRIL 21) UPI - Indications are again mounting of an imminent hostage release. A Syrian official who requests anonymity says an American hostage will be handed over to U-S officials tomorrow in Damascus. Moslem fundamentalist sources in Beirut, Lebanon, say one American captive may already be free and on his way to the Syrian capital. Syrian television plans to show the hostage release- the first sign of interest by the state media in the release of a Westerner.

The European Community today came out on the side of Lithuania in its struggle for independence from the Soviet Union. The 12-nation group called on Moscow to end its partial embargo of oil, gas, and other supplies to the Baltic republic. The group's statement from Dublin, Ireland, called for dialogue. The statement was an apparent reply to Lithuania's appeal today for Western nations NOT to leave the republic alone.

Lech Walesa has retained his post as leader of the Polish labor movement he founded. At a meeting in Gdansk today, 77 precent of the Solidarity Union's delegates voted for Walesa's re-election. In his victory speech, Walesa warned of a social explosion if living conditions are NOT improved. Walesa's main rival said Solidarity should NOT be involved in politics but

remain a labor organization to fight falling living standards.

The countdown began today at Cape Canaveral, Florida, for a key flight of the shuttle Discovery. The carefully-scripted count began on time for a Tuesday morning blastoff. NASA spokesman George Diller said the mission is at exactly the same point it was two weeks ago, before a hydraulic breakdown delayed the launch. NASA forecasts an 80-percent chance of acceptable weather at launch time.

-30- 1894

#90111u2532 04/21/1990 ~United Press International

(APRIL 21) UPI - An anonymous Syrian official says a U-S hostage may soon be freed. Other reports suggest a second American captive may be released as well. A well-connected pro-Syrian source in Beirut said late today a doctor examined two American hostages this month in preparation for their emancipation. A pro-Iranian leader with authority over many Shiite Moslems says Syria's public role in the affair implies Damascus has evidence the hostage ordeal is about to end.

Lithuania's Sajudis nationalist leaders met today to discuss what to do about the Soviet Union's cut-back of vital supplies. A Lithuanian government spokeswoman played down a report that Vilnius may be willing to consider a moratorium on full independence. She says Lithuanian President Vytautas Landsbergis may be willing to talk about it, but that doesn't mean he'd accept it.

President Bush is waiting for world events to develop this weekend as he waits for the fish to bite in Florida Bay, Florida. He's hoping his love of the outdoors will indicate empathy for Earth Day. The president also is awaiting a possible hostage release in Syria. And he has warned of U-S sanctions against the Soviet Union next week... hoping Moscow will use the time to ease tensions with Lithuania.

Here's a sampling of activities planned to show concern for the environment on Earth Day tomorrow. In Maine, an American Indian sunrise ceremony will be performed atop Cadillac Mountain, where sunlight first touches North America. A ''jazz funeral'' will be held for badly polluted Lake Pontchartrain in New Orleans. And in the Philippines, 20-thousand people are expected to link hands and then disperse for a tree-planting campaign.

-30- 1881

#90111u2554 04/21/1990 ~United Press International

(APRIL 21) UPI - Pope John Paul is in Czechoslovakia on his first visit to Eastern Europe since the region's communist dictatorships fell last year. In a meeting with the country's bishops, the pope compared the

collapse of communism to the fall of the tower of Babel in biblical times. He says what's needed today is ''a common tongue and a fresh understanding'' to destroy ''all the walls which separate people and nations.''

A radical environmental group vigorously opposes logging in Northern California's redwood forests, and it's taking action to block it. The group Earth First! today called for a 1960's-style campaign of civil disobedience starting next month. Planned activities include blockading of logging roads in the forests, and picketing timber corporations. Says an Earth First! spokeswoman- ''It's going to be a long, hot summer.''

The general public got its first close look today at one of the nation's best-kept secrets. Two FA stealth fighters flew over Nevada in a demonstration for several thousand invited guests at Nellis Air Force Base. An open-house later was expected to draw up to 150-thousand people. The Air Force did NOT acknowledge the existence of the 106-Million-dollar plane until 17 months ago. That was five years after it became part of the U-S military arsenal.

Tomorrow begins National Secretaries Week, and today the sponsors of a new study say secretaries have a long way to go before they are paid what they deserve. Gerald McEntee- head of the American Federation of State, County and Municipal Employees- says secretaries earn less in part ''because they are women.'' The survey also shows that union membership boosts the pay of secretaries and clerical workers by 56-dollars a week, or 29-hundred dollars per year.

-30- 1948

#90111u2648 04/21/1990 ~United Press International

(APRIL 21) UPI - An American hostage reportedly is expected to be freed tomorrow...

Lithuanian nationalists ask the people to endure hardships...

And organizers gear up for Earth Day 1990...

These stories... and more... next, from U-P-I:

An American hostage is expected to be turned over to U-S officials tomorrow in the Syrian capital of Damascus.

That's according to a Syrian official in Beirut who asked NOT to be named. He said the release would take place at the foreign ministry building.

Also in Beirut, Moslem fundamentalist sources say an American captive may already have been released and may be en route to Damascus.

And reports from Tehran and Beirut suggest a second captive might also be freed.

Hopes for the possible release of U-S hostages grew this week when a Moslem fundamentalist group said it would free one of three American professors it's believed to be holding.

But the group Islamic Jihad for the Liberation of Palestine later backed off when Washington refused to send Undersecretary of State John Kelly to Syria to complete the ''deal.''

Iran today urged the group to stop stalling and release one of the hostages as promised.

-30- 1350

#90111u2671 04/21/1990 ~United Press International

(APRIL 21) UPI - Lithuanians heard two conflicting reports today on what should be done amidst the crisis over the republic's push for independence.

The Sajudis nationalist movement urged Lithuanians to endure Soviet economic sanctions that have cut off all oil and most natural gas to the republic.

Sajudis leaders say new shortages are likely. But they say Lithuanians must endure the hardships in order to break away from the Soviet Union, which they described as ''economically impoverished and gripped by chaos.''

Communists still loyal to Moscow presented a different view. They called for the resignation of Lithuania's President Landsbergis , and urged Soviet President Gorbachev to assert presidential control over the republic and abolish its nationalist-controlled government.

The loyalist Communists criticized the Landsbergis government for ''UNconstitutional actions'' aimed at secession. The say the actions ''have led to a deep political crisis.''

In Dublin, Ireland, today.. European Community foreign ministers issued a declaration calling on Moscow to lift what it termed ''coercive'' economic sanctions against Lithuania.

Lovers of air, land and water are set to celebrate their common interest tomorrow on Earth Day.

Organizers are calling the 20th anniversary of Earth Day the biggest demonstration in history. The first Earth Day helped mark the beginning of the modern U-S environmental movement.

Mass rallies are scheduled in virtually every major city in the United States and some 135 other countries.

Actor Tom Cruise will lead the national Earth Day 1990 rally at the Capitol in Washington, D-C. Pop stars John Denver, Olivia Newton-John and Bruce Hornsby will join him.

Earth Day festivities in the nation's capital began yesterday. Today, some 15-thousand music fans paid a minimum of 19-50 per ticket for a pre-Earth Day benefit concert at the Merriweather Post Pavillion in suburban Washington. The concert featured Bruce Hornsby and the Range, R-E-M, 10-thousand Maniacs, and the Indigo Girls.

President Bush is on vacation this weekend in Islamorada, Florida, but will present an award to a Key West group for its work to save coral reefs. The group would rather have the president ban offshore oil drilling in the Keys.

In Garberville, California, the radical environmental group Earth First! called today for a civil disobedience campaign next month to stop the logging of northern California redwood forests.

But NOT everyone is enthusiastic about Earth Day. The John Birch Society, based in Appleton, Wisconsin, took out newspaper ads today... saying ''environmental concerns have been grossly exaggerated.''

-30- 2883

#90111u2685 04/21/1990 ~United Press International

(APRIL 21) UPI - Nicaragua says Contra rebels today began moving toward cease-fire zones in Nicaragua, as a first step toward disarmament.

The first United Nations peace-keeping forces also were scheduled to arrive in the zones today.

Both movements are part of an agreement signed Thursday between the U-S-backed Contras, the ruling Sandinistas, and the coalition elected to take charge of the government Wednesday.

The agreement calls for an immediate cease-fire and for more than 10-thousand Contras to enter security zones by Wednesday. The rebels agreed to hand in their weapons to U-N forces and complete the demobilization by June 10th.

Once the Contras have entered the zones, Nicaraguan forces are NOT to fly over or go within 20 miles of them.

One snag is that a Contra leader yesterday implied the rebels may ignore the agreement if high-ranking Sandinistas are NOT removed from the military.

The Art Deco movement has lost one of its founders.

Family members say Erte... whose full name was Romain de Tirtoff... died today at age 97. Erte was hospitalized with kidney failure three weeks ago on his return to Paris from Maurice Island in the Indian Ocean.

Erte's fashion drawings enlivened American and French fashion magazines in the 1920's and '30's.

Born in Russia, Erte worked in Paris... where his curving, delicate designs met with success among rich clientele.

In 1928, he launched the unisex fashion movement. He said while women dress elegantly, ''men are all dressed like hotel maitre d's.''

Erte's biggest success came from his designs for opera, theater and ballet performances. His influence in art deco spread when he drew fashions for the U-S magazines Vogue and Harper's Bazaar for two decades until photography took over the fashion press.

-30- 1981

#90111u2695 04/21/1990 ~United Press International

(APRIL 21) UPI - A 77-hundred-pound Asian elephant named Babe is in her fourth day of labor, and veterinarians in Syracuse, New York, are NOT sure if her calf is still alive.

Babe went into labor Wednesday, but the process apparently stalled on Thursday. Veterinarians used ultrasound and E-K-G equipment designed for horses to see if the 22-month-old fetus is still alive, but the results were ''inconclusive.''

Burnet Park Zoo official Jim Aiello says the needed technology just ISN'T available. Says Aiello- ''There is NOT a big market for ultrasound machines for elephants.''

But zoo officials remain optimistic. Elephants have spent as many as five days in labor and can stop and rest throughout the process, which is what officials think Babe might have done.

Her pregnancy gained national attention because Asian elephants are an endangered species. In addition, NO captive Asian elephant has ever given birth for the first time over the age of 25. Babe is 36.

-30- 1139
#90111u2736 04/21/1990 ~United Press International
(APRIL 21) UPI - In the Syrian capital of Damascus, Western and Arab reporters are gathered at Foreign Ministry... awaiting the promised release of a U-S hostage. A Syrian official says the hostage is expected to be freed tomorrow.

Earth Day 1990 will be celebrated around the world tomorrow as people spend the day engaged in tree-planting ceremonies, road-side clean-ups and kite-flying festivals. Organizers say there will be mass rallies in almost every major U-S city and 135 nations.

A U-S-Soviet-Chinese mountaineering expedition plans to climb to the summit of Mount Everest tomorrow in honor of Earth Day. If their ascent is successful, the climbers will globally transmit by satellite live video pictures.

The countdown clock resumed ticking today and all systems are go for Tuesday's launch of the shuttle Discovery and its precious cargo- the Hubble Space Telescope. And engineers at Cape Canaveral, Florida, are readying the shuttle Colombia for its May flight.

Health and Human Services Secretary Sullivan called on physicians today to remember they are in a ''serving profession.'' During a news conference at Brown University in Rhode Island, Sullivan expressed concern about patients who have been refused treatment because they have NO insurance.

-30- 1441
#90111u2870 04/21/1990 ~United Press International
(APRIL 21) UPI - A Syrian official says an American hostage is expected to be turned over to U-S officials tomorrow. The official... who requested his name NOT be revealed... said the freed captive will be handed over to U-S diplomats at the Syrian Foreign Ministry building in Damascus. Moslem fundamentalist sources in Beirut, Lebanon, say an American captive already may have been freed and en route to Damascus.

Israel's military today announced it killed six pro-Iranian Hezbollah guerrillas during a raid on a Syrian-controlled region of Lebanon. An Israeli army spokesman said soldiers yesterday attacked armed, uniformed men at a Hezbollah training and attack base, north of Israel's self-declared ''security zone.'' Lebanese security forces said the Israelies used helicopters in the attack.

Tomorrow's Earth Day 1990 celebrations kick off with an American Indian sunrise ceremony atop Cadillac Mountain in Maine, the first place the sun's rays touch North America. U-S festivities also include a national

rally at the Capitol Building in Washington, D-C... and other celebrations in virtually every major city in the United States. People in 135 other countries also will mark the 20th anniversary of the 1970 ''happening'' that launched the U-S environmental movement.

A pre-Earth Day concert today in suburban Washington, D-C, drew some 15-thousand music fans to hear acts such as Bruce Hornsby and the Range, R-E-M, 10-thousand Maniacs and the Indigo Girls. One of the performers, R-E-M lead singer Michael Stipe, said people pay attention to what they say because they're public figures. He said the concert's performers basically are telling their fans to ''educate yourselves'' about Earth Day issues. Tickets cost a minimum of 19-50 for the concert at the Merriweather Post Pavilion in Columbia, Maryland.

-30- 2013

#90111u2880 04/21/1990 ~United Press International

(APRIL 21) UPI - The European Community today urged the Soviet Union to end its pinching of supplies aimed at ending Lithuania's independence drive. The 12 member nations called for negotiations between Moscow and the Baltic republic. Lithuania had asked the European Community for such help, but previously was rebuffed in its request for recognition by the group. The Irish ambassador is to express the community's concerns to Moscow as soon as possible.

In Nicaragua, Contra rebels started demobilizing today under terms of an agreement reached Thursday. The pact calls for a cease-fire and movement of more than 10-thousand rebels into so-called cease-fire zones. Today, rebels inside Nicaragua began moving toward those security zones. They've agreed to arrive in the cease-fire zones by April 25th... the day President-elect Violeta Chamorro takes office.

Nearly 400 people staged a march and rally today in Teaneck, New Jersey, to protest the shooting of a black teen-ager by a white police officer April 10th. The marchers, led by the Reverend Al Sharpton, chanted ''NO justice, NO peace,'' and rallied at the Teaneck Municipal Hall. Sharpton went ahead with the protest despite a plea from the Reverend Jesse Jackson to cancel the march. Police say NO one was hurt or arrested in today's demonstration.

The man Forbes ranked last fall as America's wealthiest man may soon be a bachelor. An attorney for Patricia Kluge said today she and John Kluge plan to divorce. Washington lawyer Robert Blair called the parting ''a very amicable settlement.'' The couple cited irreconcilable differences in their nine-year marriage. The divorce would be the third for 76-year-old John Kluge. He earned his fortune through the Metromedia chain.

#90112d6450 04/22/1990 ~French/German News Agency
MEXICO CITY (APRIL 22) - Relations between Mexico City and Washington have turned chilly as the result of the kidnapping of a gynecologist from Guadalajara to stand trial in the United States.

The doctor, Humberto Alvarez Machain, is accused by U.S. authorities of involvement in the 1985 torture-death in Mexico of U.S. Drug Enforcement Administration (DEA) agent Enrique Camarena.

The doctor was seized April 2 in Guadalajara, in the mountains of west-central Mexico, and flown to El Paso, Texas, then to Los Angeles, where he was arraigned April 10. He has not been charged here with any crime.

Two other suspects in the case -- Ruben Zuno Arce and Rene Verdugo Urquidez -- are also in jail in Los Angeles.

Mr. Zuno Arce, the brother-in-law of former president Luis Echeverria, was arrested in San Antonio, Texas, but Mr. Verdugo Urquidez was arrested in this country by Mexican agents who handed him over to U.S. authorities. DEA agents then searched his house in Mexicali, near the border with the United States, without obtaining a Mexican warrant. Documents they seized were used in the case against Mr. Verdugo Urquidez, who was sentenced to 240 years in jail.

Official sources said the private plane from Mexico with Dr. Alvarez Machain aboard was met at El Paso by DEA agents.

No extradition order was signed or applied for, and Mexican newspapers report that the three kidnappers charged between 50,000 dollars and 100,000 dollars -- a bounty news sources here and in the United States say was offered by the DEA.

In the United States, Time Magazine said the DEA planned to pay a bounty of more than 100,000 dollars, but DEA spokesman Frank Shults said, "There was no reward offered, period. We don't have bounties." He refused to describe the circumstances of the arrest.

Mexican newspapers quoted witnesses who said the kidnappers used a pregnant woman as bait, persuading Dr. Alvarez Machain to leave his consulting rooms. Once he was outside, they said, the kidnappers forced him to get into a car.

The Attorney General's Office here said no federal, state or local police were involved in the kidnapping.

Dr. Alvarez Machain is accused of having injected Mr. Camarena with the

drug pentothal to revive him each time he fainted while being tortured in a bid to find out what he knew about Mexican drug traffickers.

Press reports say the doctor was the gynecologist for the wives and girlfriends of a number of drug traffickers and had operated on the wife of Ernesto Fonseca, known as "Don Neto," who was convicted -- with Rafael Caro Quintero -- of killing Mr. Camarena. Both men are serving jail terms.

U.S. press reports said Dr. Alvarez Machain admitted after arriving in El Paso that he had seen Mr. Camarena twice in a Guadalajara house owned by Mr. Caro Quintero but that he denied having treated him.

The Washington Post reported that the doctor said he saw Mr. Caro Quintero interrogating the DEA agent, and that when he returned the following day Mr. Camarena was lying on a bed unconscious and appeared to be in bad condition, with another doctor treating him.

The Mexican Embassy in Washington submitted "a very strong diplomatic note" to the State Department demanding an explanation of the kidnapping.

President Carlos Salinas de Gortari said Thursday that while Mexico was cooperating "in good faith" with the United States to combat drug trafficking, his government would permit neither traffickers nor their pursuers to break the law.

Mexican Attorney General Enrique Alvarez del Castillo held talks on the affair Wednesday with his U.S. counterpart Dick Thornburgh at an international anti-drug meeting at Ixtapa, on Mexico's Pacific coast.

There, Mr. Alvarez del Castillo (angry to to the point of shouting, according to Mexican journalists) said the kidnapping was "a stupid act committed by stupid people at a stupid moment" which endangered drug fighting cooperation with the United States.

Mr. Thornburgh said he had ordered an internal investigation. The DEA comes under his authority. He canceled a planned press conference in Ixtapa and left hurriedly to return to the United States.

Editorials in Mexican newspapers have warned the affair is threatening relations between the two countries, with La Jornada telling the DEA it should not become involved in the sort of behaviour it is trying to extirpate.

The U.S. Supreme Court ruled recently that suspects kidnapped abroad could be tried in the United States and that evidence could be presented even if it had been seized abroad without the permission of the foreign government.

#90112d6540 04/22/1990 ~French/German News Agency

ANKARA (APRIL 22) - New Zealand's Governor-General Sir Paul Reeves arrived here Sunday for a two-day visit focussing on Wednesday's 75th anniversary of landings in Gallipoli by New Zealand and Australian-led forces.

Sir Paul, leading a 103-strong delegation, was met at the airport here by President Turgut Ozal and Prime Minister Yildirim Akbulut.

He is due to discuss bilateral ties here later Sunday and Monday, with a view to increasing trade links currently worth 25 million dollars in New Zealand exports to Turkey and five million dollars in the other direction.

Turkey may also be a buyer for New Zealand agricultural technology, as part of a vast project to irrigate the southeast of the country. Turkey's Agriculture Minister is currently in Wellington for similar commemoration services and is due to have talks with senior New Zealand officials.

Accompanying Sir Paul is New Zealand Armed Forces chief General John Mace, opposition National Party leader Jim Bolger and a delegation of veterans from the World War I conflict led by 98-year-old Fred Rogers.

Allied forces arrived Saturday on the scenes of battle, to pay an early homage to those who died.

British Prime Minister Margaret Thatcher and Australian Prime Minister Bob Hawke are also due to attend the commemoration, beginning at dawn Wednesday.

At daybreak April 25, 1915, British, French and especially the Australia and New Zealand Army Corps (ANZAC) tried to land on the Gallipoli peninsula, which forms the northwestern side of the straits known as the Dardanelles.

The allies had already lost several warships as they tried for more than two months to force their way past Turkish and German vessels through the 70-kilometer (45-mile) passage from the Aegean to the Sea of Marmara.

But after the Turkish defenders cut their marker buoy, the ANZAC troops had to fight their way ashore under steep cliffs -- instead of on a gently sloping beach -- and an eight-month battle began.

By the time it was over, the British, Australians and New Zealanders had thrown 16 divisions into the campaign, suffering almost 214,000 casualties.

-30- 2352

#90112d7030 04/22/1990 ~French/German News Agency
COPENHAGEN (APRIL 22) - Lithuanian Prime Minister Kasimiera Prunskiene said here Sunday that she was satisfied with an EEC call for dialogue between the Soviet authorities and the breakaway Baltic republic.

Foreign Ministers of the European Economic Community expressed "serious concern" in Dublin Saturday at Moscow's economic blockade of Lithuania and urged dialogue between the Kremlin and the Baltic state.

A statement signed by all 12 foreign ministers of the European Economic Community said that "measures of a coercitive nature can make no contribution to the search for a solution through dialogue".

It added that the EEC would monitor developments in Lithuania.

Ms. Prunskiene, who is making a brief visit here, told a news conference that "the support of the EEC has a great importance for us, especially if the EEC says it is ready to follow developments of the situation.

"I understand that the EEC as an institution cannot recognize a state and that only its individual members can do so," she said.

Danish Foreign Minister Uffe Ellemann-Jensen, who was at the Dublin meeting, said "the Lithuanian problem could be an example of the goodwill of (Soviet President) Mikhail Gorbachev to re-establish cooperation in Europe".

Ms. Prunskiene, who visited Norway before arriving here and is due to leave for Stockholm later Sunday, said she had not "obtained concrete aid this time" from Denmark.

But Ms. Prunskiene said she had the "conviction that we can expect to receive aid if the economic blockade continues". Moscow on Wednesday cut off oil supplies to Lithuania, and while in Norway she sought alternative supplies.

LUSAKA (APRIL 22) - The African National Congress (Anc) is to carry out a census to find out how many members are living in exile in a first move towards their repatriation, the organisation said Sunday.

At the end of a two-day meeting with visiting South Africans from various sectors of society, the Anc also said it was begining a campaign for a general amnesty of the exiles.

''Conditions conducive for the return of exiles are not yet there. There's

absolute necessity for a general amnesty and we will be engaged in campaigns to ensure that those demands are met by the (South African) regime,'' said Jackie Selebi of the Anc executive council.

The Anc said it would be addressing the violence in Natal province in talks next month with the South African government.

ULAN BATOR (APRIL 22) - Some 1,000 people gathered Sunday in Darkhan, Mongolia's third largest city, to protest draft legislation by the ruling communist party ahead of general elections in July, witnesses said.

It was the first such protest outside Mongolia's capital since the government last month ended 66 years of one-party rule amid growing demands for quicker democratic reform.

Sanjasuren Zorig, 27 and the leader of the opposition Mongolian Democratic Association, addressed the meeting, which ended peacefully after two hours.

The protest was forbidden but no police were seen, witnesses said. No further details were immediately available.

Mongolia's new head of state, President Punsalmaagiyn Ochibat, was quoted April 12 as saying the country would hold parliamentary elections in late July, to be followed by presidential elections within a month.

WASHINGTON (APRIL 22) - Two congressional leaders Sunday said they and many of their colleagues were reassessing Soviet President Mikhail Gorbachev because of his handling of Lithuania and may block or stall trade agreements that Moscow wants.

Senate Republican leader Robert Dole and House of Representatives Democratic leader Thomas Foley, both interviewed on ABC Television, said the United States should not offer economic favors to Mr. Gorbachev so long as he continues to punish the breakaway Baltic republic.

"I think right now a lot of us have put him on hold ... now he is backtracking on Lithuania. And a lot of us are having second thoughts," said Mr. Dole.

"Anything that benefits the Soviet Union, we ought to slow-walk it," he added.

Moscow has cut off oil and gas supplies and intercepted food to Lithuania, and is tightening an economic blockade of the republic in a bid to force Vilnius to reverse moves toward independence, which it declared March 11.

President George Bush has indicated he may use economic means to respond to Mr. Gorbachev's crackdown on Lithuania.

The president will announce his response to the Lithuanian crisis this week after meeting with members of Congress, said White House spokesman Marlin Fitzwater.

But strains over Lithuania should not derail the U.S.-Soviet summit set for May 30 to June 3 in the United States, the lawmakers agreed.

"The summit ought to continue at this point," Mr. Foley said.

MILWAUKEE (APRIL 22) UPI - Teddy Higuera pitched a four-hitter Saturday to pace Milwaukee to a 2-0 victory over the Boston Red Sox, giving the Brewers their third consecutive shutout victory.

Higuera, 2-0, struck out eight and walked one as Brewers pitchers extended their scoreless inning streak to a club-record 29. It was the first time in Brewers history that the pitching staff recorded three straight shutouts.

Milwaukee, which dropped its team ERA to 2.28, defeated Boston 5-0 Friday night and downed Texas 11-0 Thursday. It also was the third straight shutout for Milwaukee against the Red Sox. The Brewers defeated Boston 18-0 Monday.

Eric Hetzel, 0-1, allowed two runs - one earned - on three hits in six innings. He struck out two and walked one. Greg Harris and Jeff Reardon each pitched an inning of hitless relief for Boston, holding the Brewers to three hits.

--- AROUND THE AL ---

Twins 8, Angels 0

At Minneapolis, Kent Hrbek and Randy Bush each hit a two-run homer and David West and John Candelaria combined on a six-hit shutout to lead the Minnesota Twins to an 8-0 triumph over the California Angels.

The victory was the fourth straight for the Twins, who reached the .500 mark for the first time this season. The Angels lost their fourth straight

game.

West, 1-2, threw 5 2-3 innings, allowing three hits while striking out six and walking five. Candelaria then came on to pitch 3 1-3 innings of scoreless relief for his first save.

Loser Bert Blyleven, 0-2, gave up nine hits and seven earned runs in four innings.

Indians 8, White Sox 4

At Cleveland, Sandy Alomar Jr. drove in five runs with a two-run homer and a bases-loaded double and Candy Maldonado added a solo home run to lead the Cleveland Indians to an 8-4 victory over the Chicago White Sox.

Cleveland starter Tom Candiotti, 2-0, allowed four Chicago runs on four hits in the first inning, then did not allow another hit before leaving after the seventh inning. Cecilio Guante pitched the eighth and Doug Jones worked the ninth for Cleveland.

After doubling in three runs to highlight a five-run Cleveland fourth, Alomar belted an 0-1 pitch off reliever Bill Long over the left-field fence in the sixth inning with Keith Hernandez on first to give the Indians an 8-4 lead. It was the second major league home run for Alomar, a rookie catcher obtained from San Diego in the Joe Carter trade. He has hit safely in seven straight games.

Carlos Martinez hit a three-run homer in the first inning for Chicago, the first home run allowed by the Indians this season.

Blue Jays 5, Royals 1

At Toronto, Junior Felix collected three hits, drove in three runs and stole two bases, lifting the Toronto Blue Jays to a 5-1 victory over the Kansas City Royals.

Felix finished the game with a .385 batting average and 15 hits in 39-at bats. Seven of his hits have been for extra bases.

Dave Stieb, 3-0, allowed six hits and two walks, before departing with runners at first and second and none out in the sixth. He has allowed just three earned runs in 17 innings.

Duane Ward followed Stieb and, after Bo Jackson was erased at third on the front end of a double steal, set down eight batters in order. Tom Henke pitched the ninth.

Tigers 3, Orioles 2

At Baltimore, Gary Ward's two-run single followed Allan Trammell's RBI double in the eighth inning, sparking the Detroit Tigers to a 3-2 victory over the Baltimore Orioles.

The Orioles had a three-game winning streak snapped after blowing a 2-0 lead.

Detroit, which was winless in five road games, picked on relief pitcher Jay Aldrich, 1-2, after Jay Tibbs had four-hit the Tigers over six innings.

Urbano Lugo, 1-1, earned the win with one-hit relief pitching over two innings. Mike Henneman pitched the last two innings for his third save in six appearances.

Tigers starter Dan Petry issued four of his five walks in the first inning as Baltimore took a 1-0 lead.

Phil Bradley, who has hit in 13 straight games dating to September 27, opened the first inning with a single and scored on a double play.

Athletics 7, Mariners 6

At Oakland, Carney Lansford singled home Rickey Henderson from second base with two outs in the 11th inning, lifting the Oakland Athletics to a 7-6 victory over the Seattle Mariners.

In the 11th, Rickey Henderson ripped a two-out double off Seattle reliever Jerry Reed, 0-1. Lansford then lined a 1-2 pitch into center field and Henderson scored easily to give the A's their ninth victory of the season.

Dennis Eckersley, 1-0, who entered the game in the 11th and retired the side in order, gained the victory.

Trailing 6-4, the Athletics rallied to tie the score in the ninth. Terry Steinbach led off with a single and scored on Stan Javier's triple. Two outs later, Rickey Henderson blooped an 0-2 fastball into right field to score Javier, evening the score 6-6.

Henderson stole two bases in the game and now has 880 career steals, placing fourth on the all-time list. He needs 13 to pass Ty Cobb as the all-time American League leader. Lou Brock has the major league record with 938 thefts.

Ken Griffey Jr. had three hits for the Mariners, including a three-run home run and drove in a career-high four runs.

#90112f0378 04/22/1990 ~United Press International

CINCINNATI (APRIL 22) UPI - The Cincinnati Reds extended their season-opening winning streak to a team-record nine games Saturday, when Barry Larkin singled home two runs and Jack Armstrong won his third game in an 8-1 victory over the Atlanta Braves.

Armstrong, 3-0, limited the Braves to one run and five hits over six innings, dropping them to 1-8 with their seventh straight loss. Armstrong struck out seven and walked one.

Braves starter Marty Clary, 0-1, fanned two and walked six in 5 1-3 innings.

Larkin, leading the NL with a .564 batting average, went 1-for-4 with two RBI and walked twice.

The Reds took a 2-0 lead in the first inning, scoring two unearned runs on third baseman Jim Presley's error on Todd Benzinger's grounder with two outs and the bases loaded.

Cincinnati made it 3-0 in the second when Mariano Duncan walked, took second on Armstrong's sacrifice and scored on Sabo's double.

--- AROUND THE NL ---

Mets 5, Expos 2

At New York, Frank Viola fired a seven-hitter over 8 2-3 innings and Darryl Strawberry and Kevin Elster homered, powering the New York Mets to a 5-4 victory over the Montreal Expos.

Viola, 3-0, struck out eight and walked one before leaving with two on in the ninth. He took over the National League lead in innings pitched with 22 1-3 and in strikeouts with 24. John Franco got the last out for his fourth save.

Montreal starter Oil Can Boyd, 1-1, gave up five runs and eight hits over seven innings, striking out two and walking one.

Strawberry gave the Mets a 2-0 lead in the fourth inning with his second home run of the year. Keith Miller led off the inning with a single and stole second. One out later, Strawberry belted a 3-1 pitch from Boyd deep into the right-field bullpen.

Elster's first homer of the season gave the Mets a 5-1 edge. Barry Lyons stroked a one-out single before Elster drove a 1-0 pitch from Boyd just inside the left-field foul pole.

(APRIL 22) UPI - A Syrian official said Saturday one American hostage is expected to be released to U-S officials in Damascus on Sunday. And Moslem fundamentalist sources in Tehran and Beirut say a second hostage may be freed. A pro-Syrian source says earlier this month a doctor examined two American hostages chosen to be released as part of a secret deal.

The Lithuanian Sajudis movement and communists loyal to Moscow met separately Saturday to map out their futuresin the face of a Soviet economic boycott. The Sajudis group told Lithuanians to prepare for many months of hardship in the name of freedom. The communists called on Soviet President Gorbachev to abolish the republic's nationalist-controlled government.

Organizers say 100-Million people worldwide will commune with nature Sunday by planting trees, releasing butterflies and flying kites. Earth Day 1990 is an effort to focus attention on environmental problems such as global warming, acid rain and the deforestation of places like the Amazon jungle.

(APRIL 22) UPI - The Serengeti Wildlife Research Institute in Tanzania released disturbing findings Saturday regarding the elephant and rhinoceros population in the African nation. The institute says widespread poaching has more than cut in half Tanzania's elephant population during the past 10 years. And out of an original population of 25-hundred rhinos 13 years ago, Tanzania now is home to only 50 rhinos.

F-B-I Director William Sessions is urging law students and lawyers to consider taking jobs helping the poor. Speaking at University of Georgia Law Day ceremonies Saturday, Sessions remarked- ''Alumni in private practice must guide their firms to offer more service to the community.''

Romain de Tirtoff, the internationally celebrated art deco designer better known as Erte has died at the age of 97. A spokeswoman for a New York art gallery that shows Erte's art work says the fashion illustrator was hospitalized in Paris three weeks ago. His family did NOT release the cause or location of his death.

#90112u0175 04/22/1990 ~United Press International

TOKYO (APRIL 22) UPI - Prime Minister Toshiki Kaifu will reaffirm Japan's financial aid to Asia during a tour of Southwest Asia later this month, news reports said Sunday.

Kaifu, 59, is scheduled to leave Tokyo next week on a week-long tour of India, Bangladesh, Pakistan, Sri Lanka and Indonesia, major dailies reported.

Kaifu will be the first Japanese prime minister to visit the region in many years. Former prime minister Yasuhiro Nakasone visited India and

Pakistan in 1984 while former prime minister Nobusuke Kishi made a trip to Sri Lanka in 1957.

Kaifu will be the first Japanese leader to visit Bangladesh since the two countries established diplomatic relations in 1972.

During his tour, Kaifu will emphasize Japan's basic policy attaching importance to its relations with Asian countries and promise Japan will actively support efforts to eliminate poverty in order to contribute to peace and stability in the region, Kyodo News Service said.

In his address before the Indian parliament April 30, Kaifu will pledge Japan's support for the democratization process in Nepal and other countries, it said.

The Sankei Shimbun newspaper said Kaifu in his address will propose promotion of cultural interchanges and technological cooperation for the preservation of environment between the two countries, the daily said.

It said the Japanese prime minister will pledge Japan's financial aid to Bangladesh, including construction of dams and technological cooperation for prevention of natural disasters.

TOKYO (APRIL 22) UPI - North Korean voters went to the polls Sunday to elect deputies to the Ninth Supreme People's Assembly, or parliament, the official Korean Central News Agency reported.

''All the registered voters participated in the elections except those on foreign tour or out in the ocean,'' the agency said in a brief dispatch monitored in Tokyo.

President Kim Il Sung and his heir-designate son Kim Jong Il are among registered candidates for the assembly, a rubber stamp for the country's ruling Communist Party.

The elections were held nearly six months ahead of schedule, raising speculation there may be a change in the country's leadership.

North Korea is one of few communist countries which has appeared to withstand the democratization movement sweeping Eastern Europe.

The previous elections were held in November 1986, and analysts said it is unusual for the North Korean legislature to hold new elections before its four-year term expires.

The elections came a week after Kim celebrated his 78th birthday April 15.

Kim has ruled the communist-controlled northern half of the Korean Peninsula since the country was founded after World War II.

BRATISLAVA, CZECHOSLOVAKIA (APRIL 22) UPI - Czechoslovakia, whose citizens have been dominated by foreign powers for centuries, may now be looking to their Christian heritage to determine how to use their newfound freedom.

Many Czechs and Slovaks said the weekend visit of Pope John Paul II - the first ever by a pope to Czechoslovakia - may inspire them to ponder what they want their country to become.

''It's a special day for this nation, because freedom is connected with the history of this nation,'' said Karol Izdinsky, a middle-aged Slovak who was working as a volunteer during the papal visit.

''We are no longer under the influence of the Soviet Union or somebody else today,'' he said. ''The pope comes to tell us very important things: what to do with this freedom, how to use it and making something beautiful from it.''

What is now Czechoslovakia was Christianized in the 9th Century. Although Slovakia in the east was under Hungarian rule for 1,000 years, the Czech lands in the west were independent until the rise of the Habsburgs in the

early 17th century.

A new independent Czechoslovak state emerged in 1918, but enjoyed only two decades of freedom before being engulfed by Hitler's Nazi Germany. After World War II came four decades of communist domination in which religious activities were suppressed.

Now, with the end of communist domination, Czechs and Slovaks face the task of rebuilding long-buried traditions and re-thinking their values.

''I think it's a great event for all of us, even those who are not Christians or regular churchgoers,'' said Gabriela Stefaneckova, a psychologist who works at Bratislava University.

She said she was especially impressed by the pope's address in Prague to more than 300 cultural leaders including the nation's top artists and scientists.

''I think this feeling of love and understanding among people is something we really miss,'' she said, referring to the period in which Christian values were scorned and most citizens were afraid to speak out.

''I hope this visit will have consequences in the spiritual life of all people - even those who didn't think of values like love, family and other things.''

The pope seemed to find the warmest reponse in Slovakia, which is overwhelmingly Catholic.

But earlier in the day at Velehrad in Moravia, one of Czechoslovakia's most famous shrines, participants at the mass expressed a similar fervor.

''We were crying with joy to see the Holy Father,'' said Alsbeta Murajdova a grandmother who was perched on a camp stool in the mud with a pair of binoculars, wearing the traditional peasant kerchief.

President Vaclav Havel, Czechoslovakia's leading playwright, spoke often about the loss of moral fabric suffered by his people during the period of communist rule - a time when he himself was often imprisoned.

Although more than half of its 15.5 million citizens are considered Catholic, a recent government survey found that only 30 percent of those polled believe there is a God.

#90112u0309 04/22/1990 ~United Press International

NEW YORK (APRIL 22) UPI - The Indianapolis Colts opened the NFL draft

Sunday by officially announcing Illinois quarterback Jeff George as the No. 1 pick.

The Colts acquired the rights to George by giving the Atlanta Falcons wide receiver Andre Rison, tackle Chris Hinton and draft picks.

George, an Indiana native, signed a 6-year, $15 million contract with the Colts Friday.

Commissioner Paul Tagliabue announced the choice to begin the 12-round draft. About five rounds will be completed Sunday, with the conclusion of the draft Monday. George joined Tagliabue on the podium and displayed a No. 11 Colts jersey.

The New York Jets selected Penn State running back Blair Thomas with the No. 2 pick. The Jets gambled that Thomas' surgically reconstructed knee is sound. Thomas played a full senior year after sitting out the 1988 season.

The Seattle Seahawks traded with New England for the third pick, and selected Miami defensive tackle Cortez Kennedy, a 6-foot-2, 290 pounder who can dominate the inside of the line.

The Seahawks gave up their two first-round picks - the eighth and 10th of the draft - and their third round pick this year, plus their fourth-round pick in 1991 for the Patriots' first pick this year and their second-round 1991 selection.

Tampa Bay used the fourth pick on Alabama linebacker Keith McCants, who left school after his junior year and was the subject of many rumors as the draft approached. A story in Sunday's Atlanta Journal-Constitution said McCants would need knee surgery that would cost him the 1990 season.

McCants called the story ''mind boggling'' and said his knee was not a major concern. Buccaneers Coach Ray Perkins recruited McCants at Alabama and was willing to take a chanc on him.

#90112u0328 04/22/1990 ~United Press International

CORWIN SPRINGS, MT (APRIL 22) UPI - Economic mismanagement by devils in power ties has set mankind up for a hard fall that starts Monday, when 25,800 years of bad karma comes due, according to a controversial religious group building bomb shelters near Yellowstone National Park.

''They plan famines. It's really a terrible thing,'' said Murray Steinman, spokesman for the Church Universal and Triumphant, which is fighting back with the only weapon it has - prayers chanted rapidly in an effort to mitigate bad karma.

Steinman said although Monday is the day a dozen years of shattering events will begin in the world, according to prophecies by church leader Elizabeth Clare Prophet, the survivalist sect plans to do no more than continue its daily prayers.

Inside a huge blue steel barn that is the church's main chapel, believers sit in padded metal chairs and chant ''decrees'' for peace and other causes 24 hours a day, just as they chanted to halt forest fires in Yellowstone two years ago.

Their rhythmic, nasal drone increases in pitch and speed to a whine, interspersed by dour organ music like that in more traditional churches.

Prophet teaches that angels cast out of Heaven for defying God eons ago have assumed human form and taken control of grain trading companies, banks and other power centers in order to create havoc and dupe mankind into bearing the devils' share of bad karma.

Economic collapse, nuclear war, environmental poisoning and other cataclysms will repay the karma debt over the next 12 years, after which survivors can seek the Golden Age of Aquarius through inner peace and enlightenment, Steinman said.

''People aren't attracted to the religion by fear of nuclear war,'' said Steinman, 42, a former Jew whose spiritual search led him to the Berkeley, Calif., counterculture in the 1960s. ''People are attracted to this because of their mystical impulses.''

According to Steinman, Prophet is in contact with ''Ascended Masters'' like Buddha and Jesus, who balanced their karma through a series of incarnations and have returned to God, though they retain individual personalities.

The church was founded in 1958 by Prophet's first husband, Mark Prophet, who died of a stroke in 1973. Mrs. Prophet moved its headquarters from Malibu, Calif., to Montana in 1986.

But the church's preparations to survive nuclear war in the steep, clefted mountains of the Paradise Valley have caused environmental poisoning.

Newly installed underground tanks leaked 31,000 gallons of gasoline and diesel fuel, enraging environmental groups and valley residents already alarmed by the church's dire predictions and rumored weapons stockpiles.

In response, the state of Montana ordered excavation of all 35 fuel tanks installed by the church.

The church's rush to complete and stock its shelters delighted some

business owners, but frightened residents who had long been leery of its blend of Christianity, Hinduism, astrology and prophecy.

And rumors the church was stockpiling weapons were fueled when Prophet's husband, Edward Francis, and another CUT member pleaded guilty last December to buying $130,000 worth of .50-caliber semiautomatic rifles and ammunition under a false name.

However, Park County Sanitarian Ken Anderson said he saw no evidence of arms caches when he inspected septic systems for the church's 756-person shelter complex and dozens of smaller, private shelters.

''I'm not afraid of any potential threat to residents or county officials '' he said, but admitted, "I had a few butterflies before that first inspection."

As many as 3,000 CUT members may be living in the area, mostly between Livingston and Yellowstone, said Steinman, who would not reveal the church's membership figures.

In addition to praying and teaching, the 600 church staff members raise lambs for wool and organically farm oats, hay, wheat, barley and vegetables on CUT's 30,000-acre ranch, he said.

''The goal ultimately is to have a self-sufficient, spiritual community,'' he said.

Many members, who mostly seem to be in their 30s and 40s, live 20 miles to the north in the church's unpaved subdivision of Glastonbury, where prefabricated houses too new to have lawns sit next to large, glass-fronted natural wood homes. Wagons and bicycles are scattered on the lawns, the children are clean and their parents look lean and healthy, which Steinman credited to the macrobiotic diet the church encourages.

#90112u0342 04/22/1990 ~United Press International

ATLANTA (APRIL 22) UPI - Civil rights and political leaders gathered Sunday for a memorial service honoring the Rev. Ralph David Abernathy, who wanted his funeral to resemble the rites for his close friend and colleague, Martin Luther King Jr.

Abernathy, who died of cardiac arrest Tuesday, told his family he wanted his requiem to parallel the funeral services held in 1968 for King, who Abernathy served as confidant during the tumultuous civil rights struggles of the 1950s and 1960s.

Jesse Jackson, another former King aide, was to speak at the memorial

service Sunday evening at the West Hunter Street Baptist Church, where Abernathy was pastor for 29 years.

Abernathy's body was to be displayed publicly at his church Sunday afternoon following regular worship services.

Civil rights leaders have honored Abernathy in death with an outpouring of grief, in contrast to harsh criticism of him last year after the publication of his autobiography, ''And the Walls Came Tumbling Down,'' which described what Abernathy said were King's extramarital affairs.

''Ralph was there at all the points of crisis and challenge,'' Jackson wrote in Sunday's Atlanta Journal-Constitution. ''Those who are the beneficiaries of his work must pay homage and thanks.

''Those with no dirt under their fingernails, no mud on their shoes, no sweat on their brows, no nights in jail, no blood trickling from their bodies, are doubly obligated to pay homage,'' Jackson wrote.

Abernathy's funeral, scheduled for noon Monday, was to be followed by a procession along Martin Luther King Jr. Drive to Lincoln Memorial Park Cemetery, where many poor working blacks are buried. A mule-drawn wagon was to carry Abernathy's body to his tomb.

Twenty-two years ago this month, after King was assassinated, there were two services and a mule-drawn bier carried King's body to a cemetery in south Atlanta, although he was later entombed in a crypt beside Ebenezer Baptist Church, where he preached.

''The reason he desired to be drawn by mules to his resting place is it represents humility,'' said Abernathy's niece, Brenda Russell. ''It symbolizes the poverty issues brought to the forefront of the poor people's campaign.''

Abernathy and King organized the Poor People Crusades, which took place in May 1968, following King's death. Thousands converged on Washington, D.C., in mule-drawn wagons to dramatize the plight of the poor.

Abernathy will be entombed in a mausoleum at Lincoln Memorial, a shady cemetery in northwest Atlanta that sits near a now drug-plagued neighborhood a few blocks from the street named in honor of King.

Cemetery spokeswoman Jan Parker said Abernathy's crypt will be inside a chapel on a grassy knoll.

His epitaph will read, ''I tried.''

Security for the funeral was to be tight because of the December mail

bombings that killed a federal judge in Alabama and a civil rights attorney in Savannah, Atlanta police Deputy Chief Eldrin Bell.

#90112u0356 04/22/1990 ~United Press International

ATHENS, GREECE (APRIL 22) UPI - A British truck driver testified Sunday in an inquiry before a magistrate on charges of bringing into Greece what authorities believe to be part of the world's largest gun being built in Iraq.

The semi-official Athens News Agency said Paul Ashwell 26, of Northampton, Britain, testified for three hours before a magistrate in Patras, some 100 miles west of Athens. He was detained last week on charges of smuggling arms into the country and is awaiting trial.

Ashwell entered Greece April 6 driving a truck carrying a 29.5 ton steel tube, alleged to be part of a huge cannon en route to Iraq.

Greek judicial authorities in Patras decided to jail Ashwell until a full inquiry was completed. Officials said the inquiry could last a month and would require testimony from customs authorities, army experts and a British customs official who arrived recently in Patras to examine the truck's cargo.

Ashwell told a public prosecutor earlier he was innocent of the charge of bringing part of a weapons system into the country because he was unaware of his truck's contents, loaded in Sheffield, Britain.

Authorities in Patras indicated Sunday they were considering dropping the charges of arms smuggling, a criminal offense punishable by a 5- to 20-year jail term. Instead, officials said Ashwell may be charged with a misdemeanor carrying a jail term up to 3 years by paying a fine, as allowed under Greek law.

Officials said Ashwell was stopped in Patras April 6 because his documents were incomplete. Suspicions that his cargo was part of a huge cannon destined for Iraq arose only after British customs seized similar steel pipes found to part of a weapons system.

Last week a truck with a similar cargo from Britain was stopped at a checkpoint in Istanbul, Turkey, and two people were detained. Turkish authorities said steel tubes on the truck, en route to Iraq, were sent to the Istanbul Technical University for further investigation.

The Iraqi embassy in Athens denied in a statement Saturday that the cargo on Ashwell's truck was part of a huge cannon Iraq was building.

#90112u0362 04/22/1990 ~United Press International
(APRIL 22) UPI - Around the world, around the clock... U-P-I has the latest news.

A Syrian official says one American hostage is expected to be turned over to U-S officials in Damascus Sunday. Other reports from Tehran, Iran, and Beirut, Lebanon, say a second hostage also may be freed. Iran had urged the Moslem fundamentalist captors to stick by their promise to release a hostage.

Organizers of Earth Day 1990 are preparing for world-wide events Sunday that're expected to draw 100-Million people. Earth Day festivities are being held throughout the United States and 135 other nations. Two events include a ''walk along the water'' on Santa Monica Pier in Los Angeles and the release of thousands of butterflies by schoolchildren in New York's Central Park.

Lech Walesa was re-elected Saturday as chairman of Poland's Solidarity Union. Walesa took 77 percent of the ballots cast to retain his position as chairman of the organization he founded nine years ago. He urged the worker's union to take a more active role in Poland's affairs. In his words- ''Everything in our country is in our hands.''

-30- 1274
#90112u0372 04/22/1990 ~United Press International
(APRIL 22) UPI - The countdown toward Tuesday's launch of the shuttle Discovery started Saturday afternoon. If all goes well, the shuttle, its five-member crew and the BILLION-and-a-half-dollar Hubble Space Telescope will blast-off 14 days after being grounded by a faulty hydraulic power unit.

A Marine Corp jet crashed near a swamp in Givhans, South Carolina, Saturday... forcing its two pilots to parachute to safety and scaring a couple who saw jet parts roll through their yard. A Marine spokesman says the Harrier jet was on a training flight. The pilots were hospitalized in stable condition.

Kilauea Volcano in Hawaii destroyed its fourth house in two days Saturday night. Molten-hot lava snaked through the Kalapana Gardens and incinerated the 86th house burned since the latest eruption began in January 1983. Civil Defense officials say the seven-year-long eruption has caused more than 20-Million dollars in damage.

-30- 1089

#90112u0405 04/22/1990 ~United Press International
LOUISBURG, NC (APRIL 22) UPI - Greg Smith puckered up to George Gershwin's ''Rhapsody in Blue'' to claim the top honor in the 17th Annual National Whistling Championship.

Smith, 32, of Raleigh, N.C., also whistled ''Boogiewoogie Bugle Boy'' to capture the title of grand champion in the contest Saturday that featured participants from more than 20 states.

Smith edged out last year's champ Sean Lomax, a San Diego, Calif., navyman known as the ''whistling sailor.'' Lomax came in second place with ''The Barber of Seville'' and ''The Theme From Superman.''

Jeffrey Tillett, 10, of Centerville, N.C., won the children's title and Amy Rose, 16, also of North Carolina, defended her title as the nation's best whistling teenager. Tillett whistled Brahm's ''Lullaby'' and Rose chose selections from Mozart.

Smith won $300 cash, two roundtrip airline tickets to anywhere in the continental United States and perhaps a shot at television.

''The David Letterman show usually has the winner on there,'' said Allen Dehart, founder of the National Whistling Convention.

The search for the country's best whistler started in January when more than 3,000 people were considered for the contest. Each contestant must perform a classical song and a popular tune.

The competition, with 45 whistlers vying for the grand championship, was about the toughest ever. The judges had to break a three-way tie to award first place, said DeHart.

The competition also attracted its largest audience, he said.

''Now there's a following. People are showing a new respect for whistling as an art form,'' said Dehart. ''It is more than that, it is a vocal art form.''

Peter Hassell of New Rochelle, N.Y., was named best supporting male whistler and Mimi Drummond of Horshan, Pa., won best supporting female whistler.

-30- 2013
#90112u0446 04/22/1990 ~United Press International
GDANSK, POLAND (APRIL 22) UPI - Delegates to the Solidarity Congress Sunday dispersed a small anti-Semitic rally organized by protesters claiming that too many Jews are in Solidarity leadership and government

institutions.

''Polish Parliament, television and government should be Polish,'' a poster, displayed by one of some 30 demonstrators, read.

''There are many Jews in the Parliament, although only 15,000 Jews live in Poland,'' said a young male demonstrator.

The protesters staged the rally following a mass in St. Brigidas church in Gdansk attended by some 2,000 people, including all 488 Solidarity delegates.

Some of the demonstrators, most of them young, charged that Prime Minister Tadeusz Mazowiecki, a Catholic intellectual, was Jewish.

Others said that all Jews expelled by communist authorities during the anti-Semitic campaign of 1968 were invited by Mazowiecki to return to Poland, jeopardizing jobs needed for Poles in a time when unemployment is growing.

There are 318,000 unemployed in Poland and experts say the number could rise to more than 1 million.

''Those Poles of Jewish descent were born in Poland and they have the right to live here,'' one Solidarity delegate told the demonstration.

After terse words were exchanged, the delegates went by bus to the monument erected in the front of the Gdansk shipyard in memory of more than 50 workers killed by police during the 1970 rioting.

Lech Walesa on Saturday disclosed he received letters from Poles charging him with ''selling Poland'' to communists and Jews, a reference to a compromise he reached with communists last year paving the way for the legalization of the union.

On Sunday, Labor Minister Jacek Kuron urged the delgates to map out effective policy to aid the unemployed.

''There is an economic program but there is no social policy program,'' he said, adding that the union should take a tougher stand during negotiations with the government to improve the situation of the unemployed.

In another development the congress adopted a resolution calling for early parliamentary and presidential elections.

''The congress demands totally free and democratic elections to the Parliament and direct elections of Polands president (to be held) in the

spring next year,'' the resolution said.

-30- 2538

#90112u0447 04/22/1990 ~United Press International

JERUSALEM (APRIL 22) UPI - Israel's Construction and Housing Ministry acknowledged Sunday it contributed $1.8 million toward the controversial purchase of a house in the Old City's Christian Quarter where Jews moved in during the Christian Holy Week.

It was the first time Israeli officials confirmed their financial involvement in the takeover of the 72-room building, around the corner from the Church of the Holy Sepulchre, traditionally considered the site of the burial of the crucified Christ.

In the West Bank, Gaza Strip and East Jerusalem Sunday, Palestinians observed a general strike on the ''Day of Jerusalem'' organized by the underground leadership of their 28-month-old uprising. The strike was called to denounce the April 11 takeover of the Christian Quarter building by 150 Jews.

The Palestinian leadership's latest leaflet said the strike was to ''assert Islamic-Christian solidarity in the capital of the state of Palestine in the face of the aggressors.''

Acknowledging its financial involvement in the purchase of the Christian Quarter building, the Construction and Housing Ministry, run by David Levy of the right-wing Likud Party, said it had taken part in the ''redemption of buildings in the Old City'' in the past.

But left-wing parliamentarian Yossi Sarid called the ministry's role ''unprecedented'' and ''a political provocation.''

The ministry's statement Sunday came in response to Sarid's claims the government agency provided $1.8 million to a public company affiliated with the Jewish National Fund. The fund is an organization founded in 1901 to purchase and develop land on behalf of the World Zionist Organization for Jewish settlement.

The Construction and Housing Ministry said the $1.8 million comprised 40 percent of the price of the Christian Quarter building and the remainder came from ''various contributors.''

In response to criticism it failed to obtain the necessary approval for the allocation of the money, the ministry said the contribution was made according to Israeli law and with the agreement of the Finance Ministry's budget branch.

''The purchase of foreign properties in Israel, and especially in Jerusalem, including church properties, has been performed for many years by government, public and private bodies,'' the ministry said.

The purchase of the building, called St. John's Hospice, was ''done according to the will of the buyer and the will of the seller,'' the ministry said.

But the Greek Orthodox Patriarchate maintains it owns the building and Martyros Matossian, an Armenian who lived in St. John's Hospice for nearly 40 years, had no right to sell or lease the house. The issue of ownership is before an Israeli court.

Relatives of Matossian said their family believed they were turning over the building to a Lebanese Christian.

The uprising's leadership has ordered the execution of Matossian, who reportedly has left the country, but announced the death sentence would be stayed indefinitely.

The status of the 150 Jews who moved into the house April 11, four days before Easter Sunday, is before Israel's High Court, which ruled Friday against the immediate eviction of the newcomers. The court expects to hear arguments this week on the patriarchate's attempts to evict the Jewish residents.

#90112u0484 04/22/1990 ~United Press International

CAPE CANAVERAL, FL (APRIL 22) UPI - For the first time since the 1986 Challenger disaster, two shuttles are being readied for blastoff within a single month, but NASA officials say the launch work is not overly ambitious and that safety is not being compromised.

The shuttle Columbia was hauled to launch pad 39A early Sunday with its sister ship, Discovery, set for liftoff Tuesday from nearby pad 39B, just 1.7 miles away. If all goes well, Columbia will take off just three weeks later on May 16.

Despite the busy launch schedule, NASA officials say safety remains the watchword.

''Nobody is rushing getting our launch off the ground just to get us off by a certain date,'' Columbia co-pilot Guy Gardner said last week. ''They're all making sure not only that the hardware is ready, but also that the people will be ready and have adequate time to recuperate from one launch to the next.''

The last time two shuttles were mounted atop the Kennedy Space Center's twin firing stands was Jan. 12, 1986, when Columbia took off from pad 39A with Challenger poised atop pad 39B for what turned out to be its 10th and final voyage 16 days later.

Coincidentally, Discovery is being readied for liftoff Tuesday on what will be its 10th voyage, a showcase flight to carry the $1.5 billion Hubble Space Telescope into orbit.

In other coincidences reminiscent of 1986, Columbia's cargo originally was scheduled for launch following Challenger's final flight and two of Discovery's crew members - co-pilot Charles Bolden and flight engineer Steven Hawley - took off aboard Columbia on the flight preceding Challenger's.

NASA managers did not originally intend to have two shuttles in final processing for launch at the same time, but hydraulic problems delayed Discovery's initial launch try April 10, grounding the shuttle for repairs.

Discovery's delay, in turn, pushed Columbia's flight back one week, from May 9 to May 16. Roll out to the pad came Sunday in part because of a requirement to service one of the shuttle's high-tech telescopes by Friday to avoid scheduling problems later. The work is planned for Monday.

Challenger was destroyed by a booster failure and in the wake of the disaster, NASA was blamed for sacrificing safety to meet an overly ambitious launch schedule.

''Pressures developed because of the need to meet customer commitments, which translated into a requirement to launch a certain number of flights per year and to launch them on time,'' wrote the presidential commission that investigated the disaster. ''Such considerations may occasionally have obscured engineering concerns.''

But shuttle crew members say safety remains the agency's top priority.

''NASA, following the Challenger accident, has been methodically and carefully working ... to get a good launch rate,'' said Vance Brand, Columbia's commander. ''We have managers who are not complacent and they know where the dangers, where the limits are. Nobody's going to push us over to exceeding those limits.''

One of the concerns about launching flights in close succession is that data from problems experienced during one flight might not be fully assessed before the next.

''When flights come in rapid succession, current requirements do not ensure that critical anomalies occurring during one flight are identified

and addressed appropriately before the next flight,'' wrote the Challenger commission in its final report.

In the wake of the Challenger disaster and criticism about trying to meet an overly ambitious schedule, NASA managers established an internal rule requiring four weeks between missions to fully evaluate the results of one flight before launching the next.

For Columbia's flight, shuttle program chief Robert Crippen waived one week of that requirement, which delayed Columbia's launch from May 9 to May 16.

#90112u0492 04/22/1990 ~United Press International

BY BOGDAN TUREK - UPI

GDANSK, POLAND (APRIL 22) UPI - Nine years after he established Solidarity as the first independent labor movement in what was then communist-ruled Eastern Europe, Lech Walesa has become the most powerful man in Poland as he consolidates his leadership over the union.

Walesa was re-elected Saturday as union chairman, receiving the support of 77 percent of the delegates to the Solidarity congress. In 1981, at the first Solidarity congress, Walesa got 54 percent of the vote.

''If Poland had been normal, I would be repairing lamps now,'' said a smiling Walesa, once an electrician in the former Lenin Shipyard.

With Solidarity leading the government since last year, Walesa's influence spread to new areas and institutions.

''Walesa is like an orchestra who is able to do everything,'' said Bogdan Olszewski, a Solidarity official in Gdansk.

It was Walesa's charisma that paved the way for the Solidarity candidates to win in the partly free parliamentary elections last April.

''Walesa is an independent political force and (has) unquestioned authority,'' said the newspaper Czas, published in the southern Polish city of Krakow. ''If he were to demand the dissolutions of Parliament, the Parliament would dissolve itself a day after tommorow.''

''He who has the right to use the name of Walesa for his support, he wins '' a political expert said.

In a way, Solidarity's new double role weakened the union leadership as former organizers became members of the Parliament and the government. One

of them is Prime Minister Tadeusz Mazowiecki, a Catholic intellectual who cooperated with Walesa during the 1980 strike in the Gdansk shipyard tha led to the formation of Solidarity.

It is no secret that Mazowiecki consults Walesa before he makes crucial decisions.

But Czas, a newspaper published by the free-market Union of Real Politics, said a controversy has emerged between Walesa and Mazowiecki over the presidency. The paper said Mazowiecki wants to keep Gen. Wojciech Jaruzelski for a time in the presidency as economic reforms are implemented, arguing that replacing him might destabilize the country and ruffle Moscow's sensitivities.

''But Walesa wants to change him right away,'' Czas said.

Walesa once openly admitted he wanted to run for president to replace Jaruzelski, who along with Interior Minister Czeslaw Kiszczak is the last communist official who retains office, but has no social base support.

Jaruzelski has said he does not intend to serve his full term, which expires in 1994. He also said he will not quit before the next parliamentary elections.

#90112u0500 04/22/1990 ~United Press International

(APRIL 22) UPI - Earth Day 1990 dawned Sunday with a flowering of ''green'' celebrations worldwide, ranging from a mass sunrise hike up a Maine mountain to a reef protection plan by President Bush to a kite fly-in in the embattled Lithuanian capital of Vilnius.

Around the globe, millions took to the outdoors to plant trees, clean up garbage and attend mass rallies to mark the 20th anniversary of the first Earth Day on April 22, 1970, and pledge a contining commitment to protecting the environment into the 21st century.

One of the largest gatherings took place on the steps of the Capitol in Washington, where an estimated 200,000 people chanted ''Save the Earth!,'' boogied to rock bands, listened to celebrities and wandered through a nearby eco-fair featuring a huge inflated whale and a towering wind-power turbine.

''I know that Mother Nature must be feeling good because she gave us such a beautiful day,'' singer Olivia Newton-John told the sun-baked, mostly youthful crowd, some of whom stayed up all night to get front-row seats for the star-studded affair.

Later, John Denver sang his well-known environmental anthem, ''Rocky Mountain High,'' and actor Tom Cruise, wearing a sober black suit, delivered an impassioned speech saying Americans had to change the way they lived to protect the environment.

''If we make the environment sick, it's going to make us sick,'' said Cruise, who repeatedly drew screams from some bedazzled female fans. ''We must demand changes of ourselves first. Do you recycle? If not, start. Have you planted a tree? Do it. You can change things. We must change things.''

Out in the sea of blankets and beach chairs, Kate Perkins, a self-professed flower child of the sixties, recalled taking part in Earth Day events in New York's Central Park 20 years ago.

''I've been interested in nature since I was a child,'' Perkins said, wearing a flower in her straw hat and asking people not to step on her bare feet in the tightly packed grounds.

Some celebrants became too exuberant and walked across the Capitol's flower beds, drawing this rebuke from one speaker: ''Please don't step on the tulips. This is Earth Day, not trample day.''

Tens of thousands thronged Times Square in New York City, where a huge globe was lofted above the crowd as American Indians in traditional costume performed dances on a huge stage in honor of Mother Earth.

More than 100,000 people jammed Chicago's Lincoln Park to hear local politicians and musicians and thousands of others turned out for similar events in Boston, Philadelphia, Indianapolis and scores of other cities.

The day began with dozens of sunrise ceremonies, including a mass, pre-dawn walk up Cadillac Mountain in Maine by some 800 flashlight-carrying hikers. They watched Indian rituals and a spectacular sunrise in what is considered the first place where the sun's rays hit North America.

Beachgoers breakfasting at dawn on south Florida's sandy shores watched as a plane piloted by environmental activists flew by pulling a banner urging greater efforts to save endangered sea turtles that use the state's beaches for laying eggs.

President Bush, vacationing in the Florida Keys, also was up early to observe Earth Day with a dawn news conference where he announced a non-binding international proposal to protect coral reefs off the Keys by closing those waters to big ships and hazardous cargo.

Standing on the beach under a palm tree, Bush also said he would soon announce a decision on a proposal to ban off-shore oil drilling off the Keys. He told supporters of the ban they would not be ''too disappointed''

by his decision, but he refused to elaborate.

Then the self-proclaimed ''environmental president'' headed off for a second day of bone fishing in bright blue and green seas.

In the Soviet Union, the news agency Tass reported that residents of the embattled Lithuanian capital of Vilnius put aside their struggle for independence to plant trees, hold a parade of bicycles and fly kites in the city's ancient Vingys Park.

In the new African country of Namibia - which became independent from South Africa March 21 - some 700 people marched through the capital of Windhoek and held a ceremony in the gardens below parliament, where Minister of Wildlife, Conservation and Tourism Niko Bessinger called on youth to be environmental watchdogs.

In Britain, hikers clambered up Britain's highest mountain, Ben Nevis in Scotland, to clear the 4,406-ft-high peak of litter.

#90112u0529 04/22/1990 ~United Press International

NEW HAVEN, CT (APRIL 22) UPI - Seven Peruvians who stowed away in a cargo vessel loaded with copper were ordered returned to their country, the U.S. Coast Guard said Sunday.

A shipping agent for the Santa Rita had notified the Coast Guard Saturday that the crew of the 570-foot Peruvian cargo vessel discovered the stowaways aboard ship.

The Coast Guard, police and federal immigration agents were on hand about 7 a.m. Sunday when the vessel docked at the New Haven Terminal. The officials boarded the ship to verify that the stowaways were on board.

''They are in the custody of the ship's lockup and they will be leaving when the ship leaves,'' said Coast Guard Petty Officer Joseph Coughlin.

He said the vessel was scheduled to begin its return trip to Peru at 5 p.m. Sunday after unloading its cargo.

U.S Customs and Immigration and Naturalization Service agents interrogated the stowaways, but none of the officials were available to provide details about the seven.

Coughlin said the stowaways boarded the vessel somewhere in Peru. The ship had made an earlier stop in Philadelphia before heading to New Haven, he said.

#90112u0533 04/22/1990 ~United Press International
HOUSTON (APRIL 22) UPI - Republican gubernatorial nominee Clayton Williams admitted in an interview published Sunday that he paid prostitutes for sex a number of times in Texas and in Mexican border towns when he was a young man.

The Houston Post reported that Williams made the admission Saturday while in Scottsdale, Ariz., where the candidate was attending a meeting of All-American Wildcatters, a private fraternity-like group for independent oilmen.

''Why of course,'' the 58-year-old native of West Texas said when asked if he had ever patronized a prostitute. ''It's part of growing up in west Texas.''

The newspaper said Williams recalled his first experience with a prostitute was at age 16, but he said it has been 35 years since he's paid a prostitute.

The millionaire rancher, oilman and businessman said the voters will decide how serious those youthful excursions were, but that he does not believe it should make any difference what he did in his private life as a youth.

He stressed it has no bearing on his leadership capabilities as a mature adult.

''I've never claimed to be a perfect man,'' he said. ''If doing drugs 10 years ago is all right, then certainly I think going to a Mexican border town 40 years ago is all right.''

The drug reference was toward Ann Richards, the Democratic party's nominee for governor. Richards was accused during a mud-slinging primary runoff against Jim Mattox that she used illegal drugs prior to undergoing treatment in 1980 for alcohol addiction.

The Post said that in recent weeks prostitution has become a question about Williams in political circles.

At least one of his Republican primary opponents, the newspaper said, sent an aide to Williams' home base in Midland in hopes of nailing down rumors Williams used prostitutes in his adult years.

''We came up with nothing, zero,'' a source told the newspaper.

More recently, The Post said, some Democrats have been working behind the

scenes to get depositions from anyone with first-hand knowledge about Williams being involved with prostitutes in any way during his colorful business career.

Williams also said he patronized prostitutes while a student at Texas A&M University, which then was an all-male institution.

''It was kind of what the boys did at A&M,'' he said. ''It was a lot different in those days. The houses were the only places you got serviced them.''

Williams's wife of 25 years, Modesta, said she was unfazed by the issue.

''What he did before we were married is certainly his business,'' she said. ''That doesn't bother me at all. Everbody has a past, and for the west Texas boys, that was part of their growing up. I hope no one is offended.''

#90112u0537 04/22/1990 ~United Press International

BELGRADE, YUGOSLAVIA (APRIL 22) UPI - Voters went to the polls Sunday to elect Croatia's parliamentary deputies in the first free elections in 50 years that may turn Yugoslavia into a confederation or break it into small separate states.

In the northwestern state of Slovenia, where an opposition coalition is likely to replace a communist government, 1.5 million voters went to a second round of polls Sunday to choose between a communist and an opposition candidate for Slovenian president.

Election officials in the Croatian capital of Zagreb and the Slovenian capital of Ljubljana said first results of the elections for local communal and republics' parliaments would be known Monday.

In Slovenia, a state of 2 million, the ruling Communist Party in the first round of elections two weeks ago garnered enough votes to emerge as the largest single party but lost to the Demos United opposition bloc.

Veteran Slovenian communist leader Milan Kucan, 49, edged opposition leader Joze Pucnik, 58, after the April 8 elections and Slovenians Sunday were deciding between the two men.

Kucan had won 44.4 percent, short of the 51 percent needed to grab the office in the first round, and Pucnik received 26.6 percent of the vote two weeks ago. Both qualified for the second round, leaving behind two other candidates.

Kucan is in favor of an autonomous Slovenia state within the Yugoslav loose federation or confederation, while Pucnik advocates an independent Slovenia outside Yugoslavia.

The multi-party elections in Slovenia and Croatia were held after the Yugoslav Communist Party disbanded in disagreement between reformists and Serbian-led traditionalists in January when the ruling party abolished its 45-year-old monopoly on power in the country of 23 million.

In the April 8 elections in Slovenia, the Communist Party of Slovenian reformists won 17.3 percent of the votes, followed by the Liberal Party with 15.4 percent, Christian Democrats with with 13.3 percent and the Peasants Association with 12.2 percent. All other Slovenian parties won less than 10 percent.

The Demos opposition parties won more than 50 percent, followed by a coalition of the communists and Socialists with more than 20 percent.

In Zagreb, 250 miles west of the Yugoslav capital of Belgrade, Croatian election officials said more than 3.5 million voters were choosing 365 deputies for the three-house Croatian parliament out of 1,706 candidates.

Monday, about 1.6 million people employed in Croatia are to elect deputies in parliamentary houses of workers.

Croatia, Yugoslavia's second biggest state, is to stage a second electoral round in two weeks.

#90112u0548 04/22/1990 ~United Press International

JERUSALEM (APRIL 22) UPI - Sirens wailed and traffic came to a halt for two minutes Sunday as Israel remembered the millions of Jews killed in the Holocaust.

During the opening ceremony for Holocaust Martyrs' and Heroes' Remembrance Day Saturday night, Prime Minister Yitzhak Shamir said the Nazi-engineered Holocaust during World War II must never fade from memory. He called the current wave of immigration of Jews from the Soviet Union a renewal of the Zionist vision.

Movie theaters were closed Saturday night, except for those showing films about the Holocaust.

As part of the remembrance day Sunday, names of those killed during the Holocaust were read out throughout Israel in an operation called ''A name for every lost soul.''

Army Radio broadcast a special Holocaust memorial program, including songs and stories by Holocaust survivors and their children.

At 10 a.m. Sunday, a siren wailed for two minutes in memory of the 6 million Jews systematically murdered as part of Adolf Hitler's ''final solution to the Jewish question.'' Gypsies, homosexuals and political opponents from across Nazi-occupied Europe also were killed during the Nazi reign.

In downtown Jerusalem, motorists stepped out of their cars and pedestrians stopped where they stood, bowing their heads or staring ahead amid eerie silence, expect for the siren.

One soldier who had been crossing the street when the siren sounded stood with his arms at his sides in the middle of the road.

#90112u0549 04/22/1990 ~United Press International

ANCHORAGE, ALASKA (APRIL 22) UPI - So many climbers are flocking to North America's highest peak that the National Park Service has erected a new monument to them high up the mountain - an outhouse.

A record number of climbers, 1,009, tackled Mount McKinley last year, and that number could be topped again this year as the climbing season began with two dozen climbers heading up the 20,320-foot mountain Sunday.

The rise in climbers has brought a heightened consciousness in environmental concerns, especially sanitation, to the towering snow-covered crown jewel of the Alaska Range, park service mountaineering rangers said in interviews.

Chief among those concerns is human waste. Far from urban America and its problems of garbage, sewage and waste of all kinds, rangers are working to keep the continent's greatest mountain clean.

In a state with so many spectacular mountain ranges - including the country's 16 highest mountains - McKinley evokes superlatives. Many Alaskans call it ''Denali,'' its original Tanaina Indian name meaning ''the great one.'' Some Alaskans simply call it ''The Mountain,'' as in, ''The Mountain is out today,'' meaning it has come out of the clouds.

On a cloudless day, McKinley is clearly visible from Anchorage, the state's biggest city, 150 miles south as the eagle flies.

The mountain, which helps make Denali National Park Alaska's top tourist attraction, epitomizes pure untouched Alaska beauty from afar. Up close it is not quite as clean as rangers would like, though few visitors get that

close.

Sunday a helicopter was to deliver an outhouse to the 7,000-foot base camp. Ranger Scott Gill said the selection of the date was ''happenstance,'' but the coincidence of the Earth Day event did not escape those whose job it is to protect one of Earth's giants and encourage climbers to do the same.

''More than ever, we are aggressive in talking to climbers about sanitation,'' Gill said from the ranger station in Talkeetna, the jumping off point for McKinley expeditions.

''We've never been able to adequately deal with the human waste problem,'' chief mountaineering ranger Bob Seibert said. Even with outhouses now on the mountain, He said all climbers are told to carry plastic bags for their waste and toss them into crevasses out of sight, ''but that isn't working.''

In two weeks, as the climbing season approaches its peak, another outhouse will be installed at the 14,000-foot level, Gill said.

Outhouses at 7,000 feet and 14,000 feet are not new. But one at 17,000 feet is new and represents something of a monument to the growing number of climbers seeking - and succeeding - in setting foot at the topmost point on the continent for a few chilling moments before cold and altitude drive them down.

Few helicopters can fly to McKinley's 17,000-foot level - usually the last camp before climbers attempt the summit - even for a life-and-death rescue Seibert noted. But an outhouse has gone in to help keep the mountain clean.

Outhouses also protect climbers' health, Seibert noted. Climbers melt snow and ice for drinking and cooking during their trek. At some places on the mountain - where perpetual winter preserves what inconsiderate climbers leave and where there is little precipitation - clean snow can be hard to find.

The rising number of climbers, and a growing threat to McKinley's purity, made rangers decide last year that a latrine was needed at 17,000 feet.

More climbers mean ''long lines to use the world's most scenic outhouse,'' Seibert said. A 17,000-foot commode may compete for the rank of highest, too.

One thousand climbers may not not seem like a crowd, but since the average ascent takes nearly three weeks, that means McKinley had 18,000 to 20,000 visitors nights last year, ''an astounding number'' in a climbing season that runs from late April until the end of June, Seibert said.

Last year, 524 climbers reached the summit, an average 52 percent success rate, below the 1988 record of 562 peak successes.

''Denali is light years ahead of other mountains'' in cleanliness, Seibert said, thanks to increased emphasis on sanitation and, admittedly, to a privy here and there, especially the new one at 17,000 feet. It is nothing more than a box over a hole carved into ice-hard snow, but McKinley is cleaner because of it.

''There's still a little mess from past years,'' Gill said. ''Granted, it's only the 1990s, but we're thinking about what it's going to be like in 2050.''

#90112u0561 04/22/1990 ~United Press International

KUWAIT (APRIL 22) UPI - The commander of the Iraqi Air Force said Sunday he has orders to attack Israel if the Jewish state launched a raid on Iraq or any other Arab country, an official Iraqi radio station reported.

The Iraqi commander did not clarify whether his country's threat of retaliation would also stand if Israeli jets raided Palestinian targets in Lebanon or Tunis.

''We have orders to attack Israel if (it) raids the territory of Iraq or any other Arab country,'' Iraqi Air Force commander Lt. Gen. Mozahim Saab Hassan told the Saut Al Jamaheer, Baghdad's official Voice of the Masses Radio.

''Our rockets and planes can reach Israel,'' Hassan said in the broadcast, monitored in neighboring Kuwait.

Arab radio stations said Israeli jets on Saturday pounded pro-Iranian Hezbollah positions in the Bekaa valley, northeast of Beirut, killing a number of people.

Since the last Arab-Israeli war in 1973, Israel has also raided a nuclear reactor under construction near Baghdad in 1981 and the Palestine Liberation Organization headquarters in Tunis in 1985.

Military experts believe the Iraqi air force played a crucial role in the eight-year Iran-Iraq war, suspended two years ago under a U.N.-sponsored cease-fire. Iraq's air force is considered to be the most powerful in the region after Israel's.

Iraqi President Saddam Hussein, projecting himself as the champion of Arab rights, said last week he had ordered commanders of Iraqi missile

formations to attack Israel with advanced chemical weapons if the Jewish state attacked any Iraqi city. He said he had ordered them not to await orders from the high command.

Saddam began his verbal attacks on Israel after accusing Western states of launching a smear campaign against him following the execution last month of a London-based journalist.

Since the execution, British customs agents foiled an alleged plot to smuggle 40 U.S.-made nuclear weapons triggers to Iraq. British officials later accused Baghdad of trying to import from Britain parts to make a ''super-gun'' capable of firing chemical warheads at any target in the Middle East, including Israel.

Hassan said Iraq had proved its might during the Gulf war, ''when our planes attacked targets deep inside Iran, twice as far as any spot in Israel.''

Iraqi jets were able to refuel in midair while on long-distance missions such as attacking Iranian oil targets in the Strait of Hormuz in the southern Persian Gulf, some 60 miles from Iraq.

#90112u0575 04/22/1990 ~United Press International

DHAKA, BANGLADESH (APRIL 22) UPI - At least 37 people died Sunday in two districts of northern Bangladesh, raising to 137 the death toll in the current rain season, authorities said Sunday.

One hundred people had died in different areas in April as storms swept through rural villages, uprooting trees and smashing houses.

Thirty-one people were killed Saturday and 80 injured as rains and winds lashed the Siragnaj district, 185 miles north of Dhaka, officials said. Six people died in the Netrokona district, some 110 miles north of the capital.

Officials said thousands of people have been left homeless as their houses were blown down by strong winds in all the affected areas. Many areas suffered serious crop damage.

-30- 894

#90112u0591 04/22/1990 ~United Press International

(APRIL 22) UPI - Former Ohio political heavyweight Frank Lausche is dead at the age of 94. Lausche was a judge before becoming mayor of Cleveland. In 1944, Lausche won the first of four two-year terms as governor, a post he held until 1956 when he successfully ran for the Senate. Lausche held

office until 1968. Along the way, he alienated members of his Democrat Party by his anti-union stances and by alleging communist involvement in the civil rights movement.

A spokesman for a subsidiary of American Cyanamid says the parent company is considering modifying manufacturing techniques that call for the use of mercury. This word follows the temporary closing of a South African plant that reprocesses the toxic heavy metal. South African authorities shut down the reprocessing plant after detecting contamination of nearby water supplies and improper storage methods.

Today marks the start of National Secretaries Week. A new study indicates that despite an average tenure of seven years, most clerical workers are under-paid and their work goes unrecognized. However, there may be good news for the clerical work-force. Although the median annual salary for secretaries in 1988 was 15-thousand-600 dollars, unionized labor earned an additional 29-hundred dollars a year.

Demonstrators gathered once again in Teaneck, New Jersey, to protest the April 10th shooting death of a black teen-ager by a white police officer. Yesterday's activities occurred without incident. The rally was organized by controversial activist Al Sharpton despite pleas by community organizers and civil rights leader Jesse Jackson to NOT hold a rally. Sharpton dismissed his detractors by comparing himself to Martin Luther King.

-30- 1884

#90112u0592 04/22/1990 ~United Press International

GDANSK, POLAND (APRIL 22) UPI - Representatives of Bulgarian and Romanian free unions said Sunday they were inspired by Solidarity in their struggle against the totalitarian regimes in their countries.

Constantin Trenchev, leader of Bulgaria's free trade union who came to the Solidarity congress as an observer, said at the news conference his was the second free labor union formed after Solidarity in the East bloc.

Solidarity was founded in 1980, then outlawed with the onset of martial law in 1981. It came to power last year after the communist government allowed the union to take part in the semi-free parliamentary elections. The union gained a landslide win and then formed a government.

''It was Solidarity that originated the process of liberating Eastern Europe from the 'red plague,''' said Trenchev, leader of the union Podkrepa.

He said Podkrepa, or Support, had only seven members when it was formed in February 1989. Now it boasts 200,000 members.

''Not all communists are to be blamed for the persecution of Bulgarians but murderers should be punished according to the law,'' he said, referring to trials during which innocent people were sentenced to death for their non-communist views under former dictator Todor Zhivkov, who ruled Bulgaria for 32 years.

Marius Avram, leader of the Romanian labor union Fratiaone, which claims 1 million members, said his organization must compete with the communist unions that have 2.5 million members and are favored by the present government.

Avram said the future of Romania was uncertain because ''President Ion Iliescu is attempting to re-establish a new communist rule'' following the December execution of dictator Nicolae Ceausescu.

#90112u0610 04/22/1990 ~United Press International

KALAPANA, HAWAII (APRIL 22) UPI - Searing lava from Kilauea Volcano surged further into a remote housing area Sunday, destroying a home for the sixth time in three days.

''A quick surge brought lava to within about 5 feet of the house at 4 a.m. HST (10 a.m. EDT),'' said Bruce Butts, assistant administrator of the Hawaii County Civil Defense.

''The lava touched the house at about 5 a.m. and the home was completely destroyed by 5:30 a.m.,'' he said.

The latest fire was the sixth in the rural Kalapana Gardens housing area since Friday and brought the number of houses destroyed in the volcano's 7-year-long eruption to 88.

Activity remained gradual but constant Sunday, with most of the lava heading in an easterly direction along three unpaved streets, Butts said.

The flow was about 75 to 100 feet from a north-south road that bisects the housing area, he said. The closest untouched house to the lava flow was about 25 to 30 feet away, Butts said.

Activity at the main vent of Kilauea remained constant, with the volcano spewing out about 650,000 cubic yards of lava daily, Hawaiian Volcano Observatory scientists said.

Lava has claimed 12 homes in 1990, 10 of them this month.

Earlier in the year, civil defense officials placed the damage done by the

volcano to homes, property, and roadways since January 1983 at more than $20 million. No estimates have been made yet on the recent destruction.

Two homes succumbed Saturday to the relentless push of the molten rock through the community on the southeast side of the island of Hawaii, some 200 miles from Honolulu.

Three house were incinerated Friday as the lava moved through the interior section of the rural settlement.

#90112u0628 04/22/1990 ~United Press International

PARIS (APRIL 22) UPI - Kazem el-Khalil, the eldest member of the Lebanese Parliament and Lebanese Liberal Party founder who vehemently opposed the presence of Palestinian guerrillas in southern Lebanon in the early 1970s, died Sunday of a heart attack at age 89, his family said.

El-Khalil's death in Paris brought the number of surviving Lebanese deputies to 70, in addition to Lebanese President Elias Hrawi and former President Amin Gemayel, out of the 99 who took office during the last elections held in 1972.

As the doyen of the battered Lebanese Parliament, it fell to el-Khalil to preside over the election of Lebanese President Rene Moawad after a peace accord reached last year at Taif, Saudi Arabia, since the mandate of Lebanese Parliament President Hussein Husseini had expired.

Moawad subsequently was assassinated.

A follower of former President and Liberal Party leader Camille Chamoun, el-Khalil was the son of a wealthy landowning family from the southern port of Tyre. He was born in 1901.

He trained as a lawyer at Damascus University and first served as a deputy under the French mandate from 1937 to 1943. After independence he was elected as a deputy for Tyre from 1953 to 1967 before winning the last electoral contest before the civil war in 1972.

A fierce opponent of the growing Palestinian guerrilla presence in southern Lebanon in the early 1970s, el-Khalil left the south in 1973.

Since the start of Lebanon's civil war he lived in Christian east Beirut in a sprawling villa in the suburb of Hazmieh. He had three sons, including one currently serving as Lebanon's ambassador to the Netherlands.

His funeral was to be held at Damascus in accordance with el-Khalil's wish to be buried at the shrine of Sayeda Zeinab.

#90112u0659 04/22/1990 ~United Press International

UMTATA, SOUTH AFRICA (APRIL 22) UPI - Black leader Nelson Mandela assailed the right-wing white opposition party Sunday and rejected President Frederik de Klerk's insistence that the African National Congress end its armed struggle pending the outcome of power-sharing talks.

Mandela, speaking before as many as 75,000 people in the nominally independent black homeland of Transkei, also criticized Britain for lifting some sanctions against Pretoria but announced he hoped to meet British Prime Minister Margaret Thatcher on July 6.

Against the backdrop of a mounting right-wing backlash over de Klerk's reformist policies, Mandela lashed out at the leader of the right-wing Conservative Party, Andries Treurnicht, accusing the former Cabinet minister of stirring white hysteria.

''In the South Africa that we envisage and are busy building, there will be no place for racist practices,'' Mandela said, speaking alternately in English and Xhosa from a platform overlooking a hillside packed with cheering supporters.

''It must be clear to Dr. Treurnicht and other right wingers that they belong to the past and not to the present nor to the future.

''We make a special call to our white fellow South Africans to reject these evil attempts to further polarize us as South Africans,'' he said. ''There are still backward elements who openly advocate racism and racial war.''

The 71-year-old Mandela is on a six-day visit to the Indian Ocean coastal homeland of Transkei, the land of his birth, for the first time in more than 30 years. On Thursday he plans to visit his birthplace in Qunu, about 18 miles from Umtata.

De Klerk, who freed Mandela from 27 years' imprisonment in February and lifted a 30-year ban on the African National Congress, last week challenged the movement to publicly announce an end to the limited guerrilla war it has waged since 1961.

He said he intended to raise ''continued war talk'' when his government meets an 11-member delegation of the ANC for three days of talks starting May 2 on obstacles standing in the way of formal power-sharing negotiations.

''Only succesful negotiations can convince us to ban the armed struggle,''

Mandela told the crowd. ''Peace will come as a result of negotiation. It is not negotiations which must come as a result of peace.''

''While we recognize the changes Mr. de Klerk has implemented and those that he is still promising as significant, we are saying not enough has been done to make us reconsider any of our strategies,'' he said.

Since the Feb. 2 unbanning of the ANC, the movement has made close ties with Transkei military ruler Maj. Gen. Bantu Holomisa, the first soldier to seize control of one of South Africa's four nominally independent black homelands.

Two other homelands, Ciskei and Venda, have since fallen under military rule in bloodless coups by soldiers who raised the prospect of improved ties with the ANC and ''reincorporation'' into South Africa.

#90112u0702 04/22/1990 ~United Press International

MOSCOW (APRIL 22) UPI - Estonia's prime minister Sunday promised the Lithuanians whatever help his tiny Baltic republic could offer against the Soviet embargo that was imposed to force Lithuania to revoke independence laws.

In the third Baltic republic of Latvia, a largely Russian bloc of deputies formed a pro-union group called ''Soyuz'' to try to block Parliament from declaring independence on May 3 when it convenes in Latvia's capital of Riga.

Because Latvia's population is 49 percent non-Latvian, with the majority of those being ethnic Russians, the Soyuz group would be more powerful than similar but smaller anti-independence groups in Lithuania and Estonia.

Estonian Prime Minister Edgard Savisaar, addressing the second day of the congress of Lithuania's Sajudis nationalist movement, said that Estonia has only limited ability to render aid to Lithuania but still would lend a hand.

''We will do what we are able to do to help,'' he said at the Sajudis congress in the Lithuanian capital, Vilnius.

No nation has offered to send supplies to counter last week's cutoff of oil and natural gas by Moscow. Norway and Sweden told Lithuanian Prime Minister Kaziemiere Prunskiene that Lithuania would have to deal with oil companies and pay for supplies in hard currency.

Lithuanian Deputy Prime Minister David Ozales reported last week that Moscow was delaying transactions of Lithuania's hard currency reserves,

which are held in the foreign trade bank in the Soviet capital, further tightening the noose around Lithuania.

In a telegram sent Sunday to Soviet Premier Nikolai Ryzhkov, Ozales said Lithuania's factories would be able to fulfill contracts with the Soviet Union for only a few more days because of lack of naturual resources and fuel.

Lithuania is the sole Soviet producer of vital electrical cables, posing the possibility that industrial paralysis could rebound throughout the vast Soviet Union in what would be a boomerang effect of the blockade. Lithuania also exports electric motors, televisions and electronic goods.

The approximately 3,000 delegates to the Sajudis congress debated whether to remain a public movement, convert into a political party, or split up into several parties.

The official Soviet news agency Tass said ''no split in the ranks of Sajudis has occurred'' and that the majority spoke against transforming the mass movement into a party.

The Sajudis movement told Lithuanians Saturday to brace for long months of hardship in the name of freedom from ''an empire that is economically impoverished and gripped by chaos.''

The faction of Lithuania's rump Communist Party that remained loyal to Moscow after the party split in December voted Sunday not to change its name and re-elected Mikolas Burokavicus as party chief.

Andrei Girenko, a Soviet Central Commitee member from Moscow who attended the congress of the Moscow-loyal communists, reiterated in Vilnius that Lithuania ''has the right to secede, but this can happen only by the lawful way.''

The Kremlin has refused to hold official negotiations with Lithuania until it revokes independence legislation passed since March 11, but a delegation planned to travel Monday to Moscow to keep up a semblance of contacts.

The delegation from Lithuania will meet with mid-level Soviet officials, Lithuanian Foreign Minister Algirdas Saudargas said Saturday in Denmark, where he tried to find other sources of fuel at a meeting of European Community foreign ministers.

#90112u0709 04/22/1990 ~United Press International

DAMASCUS, SYRIA (APRIL 22) UPI - Pro-Iranian Moslem extremists Sunday

freed U.S. professor Robert Polhill, 55, from more than three years in captivity in Lebanon.

Polhill was driven to Damascus where, looking haggard and speaking in a coarse voice in an interview broadcast over Syrian television, he said, ''It's a great pleasure to be free again and I would like to say that I'm very happy and very grateful to the people who spent so much time in my case.''

Polhill was apparently freed by his captors Sunday afternoon in Lebanon's Syrian-controlled West Beirut and driven by Syrian intelligence officers to Damascus, where he was to be turned over to the U.S. ambassador Sunday evening.

In the Syrian television interview, filmed while he was being driven from Lebanon to Syria, Polhill looked clean-shaven but tired as he discussed his freedom.

''I didn't really think a lot about freedom while I was a captive,'' Polhill told an interviewer in English.

''As I am free and realize I can wake up in the morning go to the toilet when I want to go, or that I can go out to the refrigerator and get something to chew on when I want to get something to eat, I think I will be able to develop a better sense of freedom,'' he said.

Polhill also referred to Alann Steen and Jesse Turner, two other American professors kidnapped with him on Jan. 24 1987 at Beirut University College.

''I don't think my that my two colleagues ... spent a lot of time thinking about (freedom) either, because you can't spend a lot of time thinking about something you haven't got,'' he said.

White House spokesman Marlin Fitzwater, speaking to reporters in Florida, where President Bush was traveling, said the governments of Syria and Iran played a role in obtaining Polhill's release and thanked them for their efforts.

There was no immediate word on the whereabouts or condition of Steen, Turner or the other five Americans still being held in Lebanon.

''I'm also at the same time still deeply concerned about my two friends and the other men who may be still in the condition I was held,'' Polhill said in the Syrian television interview.

''I feel my happiness tonight still quite a bit toned down by the fact that they are not here with me and I look forward for the day when perhaps we can get together,'' he said.

He said it was difficult for him to speak after spending 39 months in captivity.

Earlier, Syrian Foreign Minister Farouk Al Shiraa confirmed that ''a freed American hostage is on his way to Damascus.''

''If I wanted to have a great big cake, the worst thing to think about is having a big cake,'' Polhill said in his interview. So I didn't dwell on that subject. It certainly means a lot of the little things in life that one doesn't appreciate.''

Polhill, 55, Jesse Turner, 42, and Alann Steen, 51, all professors at the U.S.-affiliated Beirut University College, were abducted on Jan. 24, 1987, by gunmen disguised as police officers. Islamic Jihad for the Liberation of Palestine took credit for the kidnappings and, in the past week, released photographs of Polhill and Turner, but never said who would be released.

Steen's wife, Virginia Steen in Clark Lake, Mich., said in a telephone interview that Sunday was her husband's 51st birthday.

''His release will be the best birthday present, if it happens,'' she said. ''We've been through this so many times before.''

Islamic Jihad for the Liberation of Palestine, believed to be an offshoot of the Moslem extremist organization Hezbollah, first said Wednesday it intended to set free one of its three captives within 48 hours provided that U.S. Assistant Secretary of State John Kelly was sent to Syria to cement the "deal."

In a later statement, the Jihad captors said they were annoyed by Washington's refusal to dispatch Kelly and decided to postpone the release ''until the situation is clarified.''

The Moslem fundamentalist group said its decision to free one of the captives came as a result of mediation efforts by Iranian and Syrian officials and a local leading Moslem figure which the group did not identify.

Syria has apparently been actively attempting to free the hostage through its contacts with the group. U.S. officials reportedly met with Syrian officials at the ministry during the day.

#90112u0732 04/22/1990 ~United Press International

(APRIL 22) UPI - The Air Force let the public to gaze at one of the military's best kept secrets yesterday. Two FA stealth fighters made their

debut at Nevada's Nellis Air Force Base, nearly a year and one-half after the government admitted such planes existed. The bat-wing shaped crafts have been designed to evade radar, which allows forays into enemy territory without detection. A secret congressional grant initiated the stealth program 12 years ago.

Workers at Georgia-Pacific's timber mill in Toledo, Oregon, are nearing the end of the second-month of a walkout against the lumber giant. Yesterday, a mile-long line of workers marched to the mill and called for a boycott of G-P goods. NO new talks are scheduled between the two sides. The work stoppage is based on G-P's demands to stop time-and-a-half pay for Sundays and reduce benefits.

Domino's Pizza may have to develop a new advertising theme in Portland, Oregon, following a decision by a local store owner to stop night-time delivery to a certain area of town. Michael Kauth says his decision is based on rising gang violence in the area and his desire to protect his employees. Kauth's store will remain open for business in the area in question, but only for pick-up orders.

An Italian architect has been named this year's recipient of the 100-thousand-dollar Pritzker Architecture Award... architecture's equivalent of the Nobel Prize. The winner is Aldo Rossi. Rossi incorporates classical themes in his designs, but emboldens them. Rossi is best known in the United States for a monumental arch in Galveston, Texas, the Pocono Pines house in Mount Pocono, Pennsylvania, and the University of Miami's new School of Architecture.

#90112u0750 04/22/1990 ~United Press International

BRATISLAVA, CZECHOSLOVAKIA (APRIL 22) UPI - Pope John Paul II said Sunday he hoped the people of Europe would unite their efforts for ''true peace in freedom and justice'' and announced he will convene a special assembly of European bishops to discuss the sweeping changes under way across the continent.

The Polish pope - ending his 32 1/2-hour visit, his first to Eastern Europe since the toppling of its communist leaderships - said the many nations and citizens that make up Europe share a common 2,000-year-old Christian heritage.

The pope made the remarks following a mass attended by more than 1 million people in the capital of Slovakia, which is overwhelmingly Catholic. It was a far larger gathering than at his mass earlier in the day in Moravia, or on Saturday in Prague.

In another development, Vatican spokesman Joachim Navarro said during a

papal flight from Prague that John Paul has accepted an invitation from Cuban leader Fidel Castro to visit Cuba in early December.

Navarro said the pontiff, who would be back in Rome for Christmas, was invited by Cuban bishops last year and that invitation was followed up by Castro's.

After two world wars and four decades ''during which an erroneous ideology forced them into separate and hostile blocs,'' the nations of Europe seek agreement and understanding, John Paul said.

''It is my hope that, overcoming all difficulties, the peoples of Europe will unite their efforts in order to strengthen mutual solidarity, effective cooperation, and true peace in freedom and justice,'' he said before boarding his plane for Rome.

After a mass earlier in Velehrad, one of Czechoslovakia's holiest shrines, the pope announced he would convene a special meeting of European bishops to give them ''the opportunity to reflect more attentively on the importance of this historic moment for Europe and the church.''

The pope stressed repeatedly during his brief visit to Czechoslovakia that the political and economic changes under way must be accompanied by moral and spiritual renewal.

Communist Prime Minister Marian Calfa, who leads a coalition government dominated by non-communists, said the pope's visit has encouraged the nation as it moves toward democracy with the first free elections in four decades scheduled June 8.

''Your visit has addressed all the positive in us, despite the different opinions we may have,'' Calfa said.

In Velehrad, the pope gave a private audience to Polish Prime Minister Tadeusz Mazowiecki, who had flown in for the mass from Warsaw.

The gesture - a meeting of a head of state and a head of government outside of official channels - apparently caused some protocol problems, Czechoslovak radio reported.

The pope was greeted in Bratislava by Alexander Dubcek, the communist hero of the failed ''Prague Spring'' of political and economic reforms that were crushed by the Warsaw Pact invasion in 1968.

Dubcek, a Slovak now president of the Federal Assembly, was banished to his native Bratislava for two decades. But he rose to prominence again during the November revolution and holds the figurehead position in the parliament as part of a bargain that put playwright Vaclav Havel in the

president's office.

During his homily, the pope praised the courage of those who remained faithful to the church during four decades of repression, including priests who were jailed, religious orders that were banned, parents forbidden to teach their children Christian values, and children ''trained in falsehood, the first example of which was the denial of God.''

Although some estimates suggest nearly half of Czechoslovakia's 15.5 million citizens are Catholics, a survey released Friday showed only 30 percent of those polled believed in God.

The pope said his morning mass at Velehrad, one of Czechoslovakia's holiest shrines and a major pilgrimage center since the 19th Century. It is associated with the brothers Cyril and Methodius, who brought Christianity to the Slavic people in the 9th Century.

The trip was of special significance for the Slavic pope, who was invited to Velehrad in 1985 by Cardinal Frantisek Tomasek to lead celebrations on the 1,100th anniversary of the death of Methodius.

The communist authorities refused permission for him to come and attempted to turn the celebration into a ''festival for peace.'' Church officials ignored the attempts and nearly 200,000 believers gathered under heavy police surveillance in the first mass act of defiance against the communist leadership since the 1968 Warsaw Pact invasion.

#90112u0779 04/22/1990 ~United Press International

CAPE CANAVERAL, FL (APRIL 22) UPI - The shuttle Discovery's crew flew back to Florida Sunday for blastoff Tuesday on a critical flight to carry the $1.5 billion Hubble Space Telescope into orbit, 14 days late because of hydraulic problems.

''Well, here we are again!'' Discovery skipper Loren Shriver said shortly after the crew arrived at 1 p.m. EDT. ''We feel very confident that things are going to go well this time.''

Air Force meteorologists predicted a 70 percent chance of good weather at launch time Tuesday, although an approaching frontal system could cause problems should it slow down or stall Monday as it moves through the area.

With Discovery's countdown ticking smoothly toward a second launch attempt engineers Sunday hauled another shuttle, Columbia, from the cavernous Vehicle Assembly Building to pad 39A for liftoff May 16 to ferry a battery of more modest telescopes into space.

Columbia and its mobile launch stand, carried by a powerful crawler-transporter, was mounted on the pad at 2:36 p.m. and officials said work at both of NASA's shuttle launch complexes was on schedule.

The last time two shuttles were mounted on NASA's two launch stands was Jan. 12, 1986, when Columbia blasted off from pad 39A with the ill-fated Challenger poised on pad 39B 1.7 miles away for what turned out to be its 10th and final voyage a scant 16 days later.

Coincidentally, Discovery is making its 10th flight. If all goes well, Shriver, 45, co-pilot Charles Bolden, 43, Steven Hawley, 38, Bruce McCandless, 52, and Kathryn Sullivan, 38, will blast off on the 35th shuttle mission at 8:31 a.m. EDT Tuesday.

Vice President Dan Quayle, chairman of the National Space Council, may attend the launching if his schedule permits, sources said.

Discovery's first launch try was called off just four minutes prior to liftoff April 10 after one of three auxiliary power units, or APUs, malfunctioned. The APUs pressurize the shuttle's hydraulic system for steering during launch and their operation is crucial for a safe flight.

NASA managers decided to replace the faulty APU, a complex job never before attempted at the launch pad, delaying the flight beyond four days and forcing space telescope engineers to remove and recharge Hubble's six nickel-hydrogen batteries.

Both jobs combined to delay a second launch attempt until this week, although the work went smoother than expected and engineers ultimately shaved a day off the launch processing schedule, moving the flight up from Wednesday to Tuesday.

''The ground team here worked very hard, got the APU replaced and tested '' Shriver said. ''The Hubble Space Telescope has a healthy battery charge on it so it's all ready to go and we feel very confident. We're going to come out OK Tuesday morning and if not, we'll just keep try ing until we do.''

NASA test director Michael Leinbach said the countdown was proceeding smoothly and, ''We're not working any problems at all.''

The goal of the year's third shuttle flight is deployment of the Hubble Space Telescope, the most expensive satellite ever built and one expected to revolutionize humanity's knowledge about the birth and fate of the universe.

Operating in a record 380-mile-high orbit far above Earth's obscuring atmosphere, the 24,330-pound space telescope is expected to open a new,

remarkably clear window on the universe, allowing astronomers to study the light of stars and galaxies created shortly after the birth of the cosmos.

Equipped with a near-perfect 94.5-inch mirror and six sensitive instruments, the space telescope will see objects 50 times fainter than is possible with ground based telescopes and with 10 times the clarity, or resolution.

Using Discovery's 50-foot robot arm, Hawley plans to release the Hubble Space Telescope into orbit about 1:54 p.m. Wednesday.

Once the instrument is checked out and operating on its own, the Discovery astronauts will devote the remainder of their five-day mission to a series of relatively minor experiments before gliding to a touchdown at Edwards Air Force Base, Calif., next Sunday.

Columbia's seven-member crew plans to follow Discovery into orbit May 16 for a nine-day Spacelab astronomy mission. Unlike the Hubble Space Telescope, the instruments aboard Columbia will remain inside the shuttle's cargo bay throughout the flight.

#90112u0828 04/22/1990 ~United Press International

ISLAMORADA, FL (APRIL 22) UPI - President Bush welcomed the release Sunday of Robert Polhill but tempered his gratitude with a call for the ''immediate and unconditional release'' of all other Western hostages held in Lebanon.

''We cannot rest until all hostages are free,'' Bush said in a statement read by White House press secretary Marlin Fitzwater said.

Fitzwater said the administration does not know what prompted the release of Polhill, but expressed hope that the humanitarian gesture would help lead to freedom for the others.

Repeating a long-held Bush policy, Fitzwater also said, ''There were no deals, no negotiations with hostage takers.''

Bush said earlier Sunday, while awaiting the anticipated release, that his offer of goodwill toward Iran would require the release of all the hostages.

''That's the ground rules,'' Bush said. ''And that's the bottom line.''

Fitzwater said Bush was notified by national security adviser Brent Scowcroft of the release, which capped several days of conflicting and ever-changing reports, while bone fishing off the Florida Keys.

In a statement read to a hastily called news conference, Bush said: ''We are pleased at the news that Robert Polhill has been freed by his captors. We are obviously happy for him, his family and his friends.

''We also wish to thank those who had a hand in the release, particularly the governments of Syria and Iran, whose efforts have contributed to the release of this hostage,'' Fitzwater said.

''Our satisfaction at the release, however, is substantially tempered by the knowledge that seven other innocent Americans as well as a number of foreign nationals are still being cruelly held hostage in Lebanon,'' Fitzwater said in calling on ''all parties who hold hostages, or who have any influence, to work to obtain the immediate and unconditional release of the remaining hostages as a humanitarian gesture.''

Polhill, 55, Jesse Turner, 42, and Alann Steen, 51, all professors at the U.S.-affiliated Beirut University College, were abducted Jan. 24, 1987, by gunmen disguised as police officers. Islamic Jihad for the Liberation of Palestine took credit for the kidnappings.

Five other Americans also are being held hostage in Lebanon, including Terry Anderson, Beirut bureau manager for The Associated Press, who has been held captive for more than five years - longer than any other American.

Fitzwater said Bush planned to telephone Polhill, who will be taken with his wife to Wiesbaden, West Germany.

Although details of Polhill's release were sketchy, Fitzwater said the Syrians assisted in his release by providing the United States ''information on a continuing basis'' and helping ''facilitate the release in the final hours.''

The spokesman also said Iran, which has long had strained relations with the United States, ''indicated they were supportive'' but noted he did not have any details about what may have been involved.

Fitzwater reiterated that the United States believes Iran has influence over the hostage takers, and indicated they would be a key in a future releases.

''We would hope that this would be the forerunner to others and would point the way to the 'goodwill begets goodwill' summation at some point,'' he said. ''But at this point, with seven hostages still in captivity, the situation has not changed a great deal.''

Bush, in a signal directed at Tehran, has said on repeated occasions that

''goodwill'' in the form of help in freeing the hostages would yield some kind of reciprocal gesture from the United States, which for years has waged an official campaign of economic and political isolation against Iran.

Administration officials said Sunday that release of a single hostage could bring an expression of American gratitude and reaffirmation of the offer of improved relations, but all but ruled out any significant change in U.S. policy as long as others remain in captivity.

The fate of the hostages has been clouded by indications of a power struggle in Iran between President Ali Akbar Hashemi Rafsanjani and more radical Iranian leaders.

U.S. officials said the release of a single hostage would be an inconclusive sign that Rafsanjani has won that struggle and is prepared to seek Western help to rebuild an economy devastated by the Iran-Iraq war and international sanctions.

In the 15 months that have passed since Bush first offered Tehran the prospect of better relations with the West, there have been recurrent rumors of shadowy negotiations and indirect contacts between the United States and Iran.

#90112u0835 04/22/1990 ~United Press International

ANCHORAGE, AK (APRIL 22) UPI - Alaskans from a dozen towns hurt by last year's Exxon Valdez oil spill spent Earth Day cleaning up after Exxon, but the oil company opposed local cleanup efforts and complained to the Coast Guard.

Exxon documents reveal the oil giant opposed state-sponsored local cleanup and appealed to the Coast Guard to discourage them.

Exxon launches its second season of cleanup next month because oil remains in the environment even after winter storms and last year's $2 billion effort.

The Exxon Valdez smashed into Bligh Reef March 24, 1989, spilling nearly 11 million gallons of oil into Prince William Sound and the Gulf of Alaska. Gooey oil lingers beneath the surface. Oil has hardened into asphalt pavement on some islands. Pools of oil remain in a few places. Some rocks sport sticky black patches. And oil stains are common even on the best-cleaned beaches.

Local communities, unwilling to wait for Exxon to resume cleanup, took their concerns, along with state money and encouragement, and began their

own work.

Exxon opposition to the grass roots cleanup ''didn't interfere at all,'' said Leslie Pearson, an Alaska Department of Environmental Conservation field worker who said local crews were picking up tarballs, oily mousse patties and debris left by last season's Exxon cleanup crews.

Community cleanup by Valdez, Cordova, Chenega, Whittier and seven towns on Kodiak Island began earlier this month. More crews went out Sunday. This work was to continue until May 1 - official start-up for Exxon.

A Feb. 15 letter from Exxon cleanup manager Otto Harrison to Coast Guard Rear Adm. David Ciancaglini, the federal on-scene coordinator, said, ''Exxon will not support this type of program and will accept no liability for the safety of those people working on the program or for any environmental damage which might be caused by an activity we are not involved with.''

Harrison directed his opposition at plans conceived by Cordova, a fishing town, and wrote Ciancaglini, ''We encourage you to not approve this particular program and to discourage other similar programs.''

Harrison recognized ''Cordova has concerns regarding sensitive fishing areas'' and conceded that ''a lot of thought and effort went into the preparation'' of community cleanup plans, but he told Ciancaglini that work was unsafe, difficult to monitor and ''not necessary.''

The two-page letter was obtained by United Press International.

Ciancaglini, in a March 6 letter to Cordova Mayor Bobby Van Brocklin, lifted some of Harrison's language almost verbatim, echoing Exxon sentiments.

In follow-up interviews, Harrison reiterated that winter weather made April cleanup unwise and insupportable. Coast Guard Commandant Paul Yost, questioned about this during a recent trip to Alaska, said ''that's the view of Exxon and I don't disagree with it.''

Last April, after the March spill, Cordova fishermen also launched their own cleanup and at the same time the official Exxon cleanup was beginning.

As it turns out, this April has been as dry and mild as last year and Pearson said local crews have gotten a lot of work done, despite Exxon opposition.

Biggest and busiest of them, sponsored by Prince William Sound Conservation Alliance in Valdez, launched its third cleanup crew Sunday. Valdez crews alone have filled 432 bags with debris, half of it oily, including some

unused Exxon supplies, alliance director Nancy Lethcoe said. She said crews collected five tons of oily debris and garbage. They also found 36 dead otters.

Lethcoe said Exxon had ''misplaced concerns and unreasonable fears'' about an April cleanup.

''Exxon's a very large corporation that has a lot of assets and there's always a fear that people will use any excuse to sue them,'' she said. ''They are basically out-of-state people that see Prince William Sound as a remote and dangerous place and don't have experience to make good judgments for winter operations... We felt quite confident we could conduct safe operations.''

Lethcoe said her group also had a point to make: ''We wanted to push winter cleanup to show we wouldn't tolerate oil companies saying it's unsafe to conduct winter cleanup because if it is unsafe, then the (Alaska oil) pipeline should be shut down in the winter, and we don't want the pipeline shut down.''

A Cordova fishermen, who asked to go unnamed but who answered the phone in the city spill response office, noted that fishermen worked on the spill last April and this April, and he suggested that Exxon opposed cleanup help from local communities ''because they don't want people going out there to see how bad it still is.''

If Exxon fails to complete the cleanup this summer, Pearson said local cleanup crews will return to work in the fall.

#90112u0856 04/22/1990 ~United Press International

DAMASCUS, SYRIA (APRIL 22) UPI - U.S. professor Robert Polhill, smoking a cigarette nervously and looking exhausted, called his release Sunday ''a great pleasure'' after more than three years in captivity in Lebanon.

Wearing an ill-fitting dark suit and speaking in a hoarse voice, Polhill, 55, said it was difficult for him to speak after spending 39 months as a hostage.

''It's a great pleasure to be free again and I would like to say that I'm very happy and very grateful to the people who spent so much time in my case,'' Polhill said in an interview broadcast over Syrian television.

''I'm also at the same time still deeply concerned about my two friends (fellow professors and hostages Jesse Turner and Alann Steen) and the other men who may be still in the condition I was held. ... I look forward for the day when perhaps we can get together,'' he said.

''As to our specific conditions, I can tell you that it could have been a lot worse. We were bored ... but were not maltreated in any way. In fact, the young men who guarded us (were) ... polite to us and ... helpful to us and tried (to) give us things within restrictions.''

A clean-shaven Polhill, who lost weight in captivity and who spoke in awkward English, said he and his colleagues were not allowed to speak loudly and that was why his voice appeared strained.

''The first day in captivity was somewhat more memorable than the other days in captivity. We had some things to read, but we were deprived of materials that would tell us anything about current news.

''We had some books, some playing cards, but no news. We were very much in the dark about what our own status was and ... being bored was probably the worst part of the whole thing, whether we will never be released or what.

''In fact, I know that the two men who were left behind ... and the others who are still in captivity in other places ... are probably encouraged that I have been released, although quite possibly they don't know that,'' he said, smiling briefly.

Asked what freedom meant to him, Polhill said: ''Freedom is something, believe it or not, neither I nor my two associates spent a long time thinking about.... We did not spend a lot of time thinking or talking about freedom.''

Polhill, asked what he would like to say to the world, said, ''One thing I probably should say is that I was little bit surprised today to find out the specific demand that these men (captors) are making. ... (It) seems to be precisely the same demand they made about two weeks after we were kidnapped, so we seem to be right back to ground zero.

''Aside from that, I don't have any other message that I think I'm supposed to be carrying to the people of the world, and I ... find it rather surprising. I thought that those 400 (Arab detainess in Israel) had been released.

''I really don't have any plans for the future, except to see my wife and my mother and my sons and friends and family and people I have not seen in at least 39 months.''

(APRIL 22) UPI - China has acknowledged that ethnic unrest shook a predominantly Moslem region earlier this month. Government television in the affected region says troops were sent into the area to quell an uprising by a band of ''ruffians.'' Violence between the two sides left 22 people dead, including six security personnel. Beijing has expressed concern that the region, located near Soviet hot-spots, would imitate its Soviet neighbors.

Colombian authorities say they are on the look-out for at least five Europeans who are working hand-in-hand with the Medellin cocaine cartel. Included in this group are two suspected Sicilian gangsters who authorities in Colombia and Europe believe are designing a distribution system for cartel drugs throughout Europe.

The Serengeti Wildlife Research Institute has disturbing news to consider this Earth Day. In a survey conducted for the Tanzanian government... the Research Institute says poachers have nearly wiped out the African country's rhinoceros' population- slashing it from a population of 25-hundred 13 years ago to a mere 50 today. The number of elephants world-wide has been more than halved in the past decade to some 89-thousand today.

Philadelphia took time out yesterday to mark the bi-centennial of Benjamin Franklin's burial. Franklin, perhaps the most famous citizen to hail from the City of Brotherly Love, was laid to rest on a rainy April 21st, 1790. Mayor Wilson Goode told a crowd of several hundred people that NOTHING could diminish Franklin's achievements- NOT even a cold, miserable drizzle.

#90112u0872 04/22/1990 ~United Press International
LONDON (APRIL 22) UPI - Nigerian President Ibrahim Babangida survived a violent coup attempt Sunday by Christian soldiers claiming their people have suffered discrimination under his Moslem-dominated government, reports and officials said.

Babingida, who himself took control of Africa's largest and most populous nation in a bloodless June 1985 coup, told reporters in a brief news conference in Lagos that the army was rounding up remaining rebels.

Ringleaders would be dealt with in the same way as those who had staged the last coup attempt, a December 1985 bid by mid-ranking army officers that was put down, he said. Those officers were executed.

Sani Abacha, the army commander and chairman of the joint chiefs of staff, issued a call on Nigerian Radio for all coup members to surrender.

Residents of Lagos contacted by telephone said gunfire and explosions had stopped and the fighting was over.

Babingida said his personal aide, Lt. Col. A.H. Bello, had been slain in the combat at Dodan barracks, the president's residence and the seat of his military council.

An unspecified number of soldiers assaulted the facility with small arms and mortars but were repulsed by troops loyal to Babangida.

The plotters also occupied Nigerian Radio and broadcast claims of having overthrown the government before the station was retaken by government troops.

A speaker who identified himself as Maj. Gideon Ngwororoka said they had seized power on behalf of Christian-dominated southern and central Nigeria where he claimed the people had been ''reduced to slavery'' by the largely Moslem ruling elite, which hails from the north.

He accused Babingida's government of being ''dictatorial, corrupt, drug-baronist, inhumane, sadistic, deceitful, homosexually inclined and unpatriotic.''

More than half of Nigeria's 115 million people are Moslem, and Ngwororoka's statements - which smacked of a personal conflict with Babingida - failed to inspire any revolt among the Christians, who comprise about 40 percent of the nation.

Military commanders at bases in the north promptly declared their loyalty to Babingida, who has been given a clear warning of the volatility of his nation, which has witnessed six coups since gaining independence from Britain in 1960.

Nigeria's population is booming at a rate of 3 percent a year and most anti-government sentiment in caused by economic hardship rooted in longstanding communal and tribal animosities.

Babangida is a Moslem from the middle of Nigeria and is regarded by most observers as an astute observer who has tried to bridge the north-south, Moslem-Christian divide.

But Christians accuse him of favoring Moslems in his official appointments and bitterly opposed his installation earlier this month of a sultan in the northern region of Sokoto, a move they saw as politically inspired.

Last week, students at three universities rioted against the government, which they accused of corruption and mismanagement.

Nigeria has a $30,000 million foreign debt and has been hit by the slump in world food prices and the oil glut, which has reduced the profitability of its main export.

Babangida last May pledged his military council would hand over power to civilians by 1992 and lifted a ban on political parties to allow them to be formed in time for elections.

Yet he recently criticized the emergence of parties along tribal lines and proposed forming two basic parties, one slightly left-wing and the other conservative.

The nation from 1967 to 1970 was wracked by a civil war, when members of the Ibo tribe proclaimed secession and formed in the oil-rich east the nation of Biafra. Federal forces, mostly of the Yoruba tribe, eventually won the war, which left 1.5 million people dead in fighting and famine.

#90112u0970 04/22/1990 ~United Press International

(APRIL 22) UPI - It's still NOT known for certain whether an American hostage has actually been released today. Sources in Syria and Lebanon have said that an American hostage has been sent from Lebanon to Syria to be released to U-S officials. Howver, President Bush warned this morning against raising false hope. He said he had NOT heard of any developments in the promised release. The State Department also could NOT confirm the report of a hostage release.

President Bush was up early today in the Florida Keys to kick off the Earth Day observance. Bush presented one of his daily ''point of light'' awards to Reef Relief, a Key West group dedicated to saving coral reef. He then went fishing. More than 100-Million people in 135 countries around the world are expected to celebrate the 20th anniversary of Earth Day today.

The countdown is proceeding at Cape Canaveral for Tuesday's scheduled launch of the space shuttle Discovery. If all goes well, Discovery will

send the one-point-five-BILLION-dollar Hubble Space Telescope into orbit. Engineers also plan to roll the shuttle Columbia out to its launch pad today for a May flight. NASA has NOT had two shuttles on the launch pad since Columbia took off from pad 39-A January 12th, 1986.

There are reports of an attempted coup in Nigeria today. One Nigerian radio station reported that the coup was successful. The British Broadcasting Corporation said there was a violent power struggle in the west African nation, but an offical in London said he did NOT know if the military government had been overthrown.

More than 300-thousand people attended a mass said by Pope John Paul in Czechoslovakia today at the shrine revered as the birthplace of Slavonic Christianity. In 1985, communist authorities denied the pontiff permission to visit the shrine. After the mass today, the pope announced that he will call a special assembly of European bishops to assess the significance of the changes sweeping Europe.

#90112u1100 04/22/1990 ~United Press International

(APRIL 22) UPI - The on-again, off-again effort to release an American hostage in Lebanon apparently is off again. The pro-Iranian Moslem group that promised to free an American captive today is now saying the release won't take place for another 24 hours because the effort has been- quote- ''obstructed.''

Earlier, sources close to the Islamic Jihad for the Liberation of Palestine had said the release was so imminent that one of the hostages was already en route from Lebanon to Damascus, Syria... where U-S officials were waiting. But President Bush said this morning he'd heard NOTHING and the State Department also was UNable to confirm it.

Reports and officials say a violent military coup attempt against Nigeria's government apparently has been crushed. Supporters of President Ibrahim Babangida say they are back in control of the West African nation. But there are reports of ongoing sporadic fighting in the capital of Lagos and the whereabouts of Babangida remain UNknown.

President Bush today gave an Earth Day salute to a Florida group that protects coral reef. During a six-minute sunrise ceremony in Islamorada, Florida, the president announced a non-binding international proposal to close sensitive waters off the Florida Keys to big ships and hazardous cargo.

Civil rights and political leaders from around the nation are gathering in Atlanta for a memorial service this evening for Ralph Abernathy. The 64-year-old civil rights activist died Tuesday of cardiac arrest.

Abernathy has said he wanted his funeral to resemble services for his best friend and confidant, Martin Luther King Junior.

-30- 1803

#90112u1109 04/22/1990 ~United Press International

(APRIL 22) UPI - At Cape Canaveral, Florida, the countdown clocks are ticking away toward Tuesday's blastoff of the space shuttle Discovery, the long-awaited launch to boost the one-point-five BILLION-dollar Hubble Space Telescope into orbit. Discovery's flight is running 14 days behind schedule after being grounded by a faulty hydraulic power steering unit.

Pope John Paul today announced a special conference of European bishops to discuss the political changes sweeping the continent. The pontiff celebrated mass for more than 300-thousand Czechs. The pope's two-day trip to Czechoslovakia is of special significance since he was refused permission to visit the country in 1985 by communist authorities.

(APRIL 22) UPI - Eastern Australia is being hit with the worst flooding in the country's history. Officials are blaming unseasonal rains for the unexpected flooding that killed two people and forced thousands to flee their homes for higher ground. The government is using military aircraft to rescue families stranded on rooftops and to drop fodder for isolated livestock in flood-ravaged Queensland. Agriculture officials said overall livestock and property losses would be enormous, running into many Millions of dollars.

Nations around the globe are celebrating Earth Day 1990 with rallies, concerts, tree plantings and cleanup projects. President Bush kicked off the U-S observance of Earth Day with a proposal to protect Florida's fragile coral reefs. Bush, who is in Islamorada, Florida, for a vacation weekend, honored Reef Relief, a Key West group dedicated to saving Florida's coral reefs. Bush told the early morning ceremony- ''Individuals can and do make a difference.''

#90112u1444 04/22/1990 ~United Press International

(APRIL 22) UPI - Beirut Radio is reporting that a man believed to be an American hostage was seen being released to Syrian intelligence officers in Syrian-controlled west Beirut today. The reports says the man got into a car belonging to Syrian intelligence parked outside a hotel... and apparently headed for Damascus.

White House officials traveling with President Bush in Florida say they canNOT confirm the reports regarding the release of an American hostage. A very cautious Bush earlier today told reporters- ''I doN'T want to be a part of raising the hopes of families and then NOT have anything happen.''

State-run Nigerian Radio says an attempt to oust Nigeria's president has failed, but sporadic fighting continues. The violent coup attempt was started by soldiers protesting alleged mistreatment of Christians by the Moslem-dominated government. There's NO word on the whereabouts of President Ibrahim Babangida.

Discovery skipper Loren Shriver said ''Here we are again!'' as the five shuttle crew members arrived at Cape Canaveral today in preparation for Tuesday's blastoff. Meterologists predict a 70 percent chance of good weather at launch time Tuesday morning. Discovery will carry the Hubble Space Telescope into orbit.

Civil rights leader Ralph Abernathy wanted his funeral to be similar to that of his close friend Martin Luther King Junior. And it appears his wishes will be fulfilled. Civil rights activists and political leaders from across the country are expected to gather for a memorial service for Abernathy in Atlanta later today. Abernathy died of a heart attack Tuesday.

-30- 1790

#90112u1489 04/22/1990 ~United Press International

(APRIL 22) UPI - Pope John Paul in Czechoslovakia today called for Catholics to NEVER again be treated as ''second class citizens.'' Speaking to nearly one-Million people in Bratislavia, the Pope criticized 40 years of communist totalitarian rule. He decried bishops being imprisoned, priests being threatened, and children being denied Christian education.

North Korea held national elections for parliament today. The People's Assembly is a rubber stamp for the ruling Communist Party. The elections were held six months ahead of schedule, raising speculation that there may be a change in leadership. President Kim Il Sung has ruled since North Korea was founded after World War Two.

Australia is deluged by the worst flooding in its history. Floods swept a woman and a young child to their deaths in eastern Australia. In just four months, the region has already received the amount of rain it normally gets in a year. More than one-thousand people have evacuated the cattle town of Charlesville.

Delegates to the Solidarity Congress in Gdansk, Poland, today dispersed a small anti-Semitic rally. Protesters claimed that too many Jews are in Solidarity leadership and government institutions. One Solidarity delegate told the 30 demonstrators that Poles of Jewish descent were born in Poland and have the right to live there.

Earth Day celebrations today near the town of George, Washington, will bring together President Bush, rock 'n' roll star Chuck Berry and Mount Everest climbers. Berry will perform live, while the climbers will send a

video message, and the president plans to telephone.

#90112u1621 04/22/1990 ~United Press International

ST. LOUIS (APRIL 22) UPI - Gino Cavallini scored on a rebound with nine seconds remaining in the third period Sunday night, lifting the St. Louis Blues to a 5-4 victory over the Chicago Blackhawks in Game 3 of their Norris Division final.

St. Louis leads the best-of-seven series 2-1 with Game 4 scheduled for Tuesday night in St. Louis.

Cavallini scored his first goal of the playoffs, lifting a rebound of a Gordie Roberts' point shot over sprawled Chicago goaltender Greg Millen.

St. Louis goaltender Vincent Riendeau stopped 44 shots and Brett Hull scored two goals and added two assists for the Blues.

The Blackhawks had taken a 4-3 lead at 14:38 of the third period before Brett Hull tied the score for the Blues 43 seconds later. Hull tipped in a shot by Roberts from the point for his second goal of the game and 10th of the playoffs.

Chicago pressed St. Louis goaltender Vincent Riendeau hard in the third period, outshooting the Blues 21-7 for the period and 48-28 for the game.

The Blackhawks outshot the 13-0 before the Blues finally put one on net with 8:30 left in the third period. Chicago began the period on a power play and had two other power plays but couldn't get one by Riendeau until 7:34 remained.

Trailing 3-2, Bob Murray scored off Riendeau's pad at 12:26 to tie the score. Murray was behind the net and his shot caromed off Riendeau into the net for his first goal of the post-season.

Steve Thomas put Chicago ahead 4-3, 2:12 later. After taking a check behind the St. Louis goal, Thomas came around in front and while lying on the ice, directed in a shot by Greg Gilbert.

Jeff Brown had given the Blues a 3-2 advantage with a power-play goal at 10:18 of the second period. Rod Brind-Amour and Hull made crisp passes heading up the ice on a break and Brown, left alone in the left face-off circle, slid a wrist shot along the ice, beating Millen.

The Blues scored just 18 seconds into the game on a goal by Sergio Momesso - the quickest goal in St. Louis playoff history. Hull passed out from the corner to Peter Zezel, who was camped in the crease. Zezel was knocked down by Bob Murray but pushed the puck to Momesso, who lifted it over

Millen's left shoulder.

Doug Wilson scored on power-play goal at 17:48 of the first period to tie the score 1-1. Michel Goulet passed to Wilson, who scored on a slap shot from the top of the slot.

The Blues took a 2-1 lead just two seconds into a power play with 3:14 left in the period. Adam Oates slid a faceoff through his legs to Hull, who wristed the puck in from the side of the right circle. It was his fifth power-play goal, setting a Blues playoff record.

Chicago tied the score 2-2 at 4:38 of the second period on a goal by Dave Manson. Rookie Jeremy Roenick made a cross-ice pass across the crease to Manson, who was all alone at the bottom of the right circle. alternate lead

OILERS 5, KINGS 4

To hear Craig Simpson tell it, one would think the Edmonton Oilers were almost glad to see the Los Angeles Kings score twice in the final 40 seconds of the first period.

After Los Angeles grabbed a 3-1 lead with the two fastest goals in its playoff history, the Oilers awoke to score four unanswered goals in the second period. Simpson triggered the outburst with his second goal of the game, and Edmonton was on its way to a 5-4 victory and a 3-0 lead in its Smythe Division final.

''We were fortunate to get out of the period just down 3-1,'' said Simpson whose team was outshot 13-1 in the opening session. ''(The two goals) brought everything into perspective. If we had left the ice tied 1-1 I don't think we would have dug down like we did.''

Bill Ranford turned in another brilliant effort in goal for Edmonton, stopping 35 shots, including all but one of the 26 he faced in the final two periods.

''I guess I just tightened up; it's hard to explain,'' Ranford said.

The Oilers, eliminated in the first round by the Kings last year, can advance to the Campbell Conference final as early as Tuesday night with a victory in Game 4 at the Forum.

Only two teams in NHL history - Toronto in 1942 and the New York Islanders in 1975 - have won a series after trailing 3-0.

''Last year we were down 3-1 (in the series with the Oilers); this year it's 3-0,'' Kings owner Bruce McNall said. ''Maybe this team has to have adversity. All year when we've been down we've been able to come back.''

Edmonton scored its five goals on only 10 shots and won despite taking only 18 shots - just one more than the club playoff low - to 39 for Los Angeles.

The Oilers held Wayne Gretzky, who appeared slower than usual because of his back injury - without a point in the series until he gloved the puck, dropped it and scored from the crease with 69 seconds left to make it 5-4.

The Kings had pulled goaltender Mario Gosselin with 1:54 left. He stayed off the ice the rest of the way, but Los Angeles failed to get another shot on goal.

The Kings played without No. 1 goaltender Kelly Hrudey, who suffered bruised ribs in Game 2. Ron Scott, who played only 12 games during the regular season, started in his first playoff appearance but was replaced by Gosselin in the second period.

Simpson brought the Oilers to within 3-2 at 5:34 with his seventh goal of the series. Just 76 seconds later, Kings defenseman Steve Duchesne fell down near his blueline, Petr Klima picked up the puck and raced in to beat Scott with a slapshot.

''That goal really got us going,'' Simpson said.

Edmonton then went ahead to stay at 12:13 when Reijo Ruotsalainen's wraparound attempt deflected off Duchesne's skate and into the Los Angeles net.

Gosselin replaced Scott after that goal, but Adam Graves made it 5-3 less than four minutes later when he came out of the penalty box, collected Mark Messier's pass at mid-ice and streaked in to slip the puck past the new goaltender.

Larry Robinson of the Kings had snapped a 1-1 tie with only 40 seconds remaining in the opening period. Nine seconds after emerging from the penalty box, he stripped the puck from Simpson at the blueline and beat Ranford.

It was the defenseman's second goal of these playoffs, but only his 27th in 212 career postseason contests.

Just 11 seconds later, Todd Elik's blast appeared headed over the net, but it deflected off the outstretched glove of Ranford and trickled over for a 3-1 lead. That gave the Kings the fastest two goals in their playoff history.

Los Angeles had scored first on Tomas Sandstrom's goal 66 seconds into the

game. The Oilers tied it on their lone shot of the period, with Simpson taking a blueline-to-blueline pass from Messier and tucking the puck under Scott. The power-play goal came at 15:26 of the session.

#90112u1693 04/22/1990 ~United Press International

(APRIL 22) UPI - An American hostage is freed in Lebanon... A coup attempt fails in Nigeria... Discovery is poised for blastoff in two days... And Millions worldwide celebrate Earth Day... U-P-I has these top stories and more, next.

White House spokesman Marlin Fitzwater said the governments of Syria and Iran played a role in obtaining today's release of American hostage Robert Polhill. Fitzwater, speaking to reporters in Florida, thanked the governments for their efforts.

President Bush, in Florida for a fishing vacation, is expected to make a statement on the hostage release later today. Fitzwater said Bush may speak to Pohill or his wife, Ferial, who has been in Syria awaiting her husband's release.

There was NO immediate word on the fate of Alann Steen, Jesse Turner or the other five Americans still being held in Lebanon.

In the interview on Syrian televison, Polhill referred to his fellow hostages, saying ''I'm also at the same time still deeply concerned about my two friends and the other men who may be still in the condition I was held.''

He said ''I feel my happiness tonight still quite a bit toned down by the fact that they are NOT here with me and I look forward for the day when perhaps we can get together.''

Polhill said it was difficult for him to speak fluently after spending 39 months in captivity.

Supporters of Nigerian President Ibrahim Babangida say a coup attempt against the government has failed.

Soldiers protesting the Moslem-dominated government's treatment of Christians staged a violent uprising earlier today.

During a radio broadcast, a rebel commander accused government officials of being corrupt, friendly with drug lords, and given to polygamy and homosexuality.

Christians, who make up 40 percent of the Nigerian population, say

Babangida favors Moslems for official appointments.

State-run Nigerian Radio says the coup attempt was foiled, but there are other reports of continued sporadic fighting between loyalist forces and the rebels. The governor of Lagos broadcast a statement saying rebels were being taken into custody.

B-B-C Radio says- ''The plotters may have secured NOTHING more than the Lagos Radio Station and government army barracks.'' The B-B-C further reports there appears to be NO civilian demonstration in support of the coup.

Nigerian authorities have closed Lagos airport and overland routes into the country.

#90112u1748 04/22/1990 ~United Press International

(APRIL 22) UPI - Earth Day is being celebrated around the world today with mass rallies, concerts, tree-planting ceremonies, and nature hikes. The day marks the 20th anniversary of the first Earth Day in hopes of getting people more involved in environmental issues.

Perhaps the largest gathering is taking place on the Capitol steps in Washington, D-C, where about 200-thousand people came to listen to rock bands and various speakers.

John Denver sang his famous environmental tune ''Rocky Mountain High'' and actor Tom Cruise delivered an impassioned speech which drew screams from female fans. Cruise said ''If we make the environment sick, it's going to make us sick.''

In New York's Times Square, a huge globe was lifted above tens of thousands, as American Indians in traditional costume performed dances to Mother Earth.

President Bush marked Earth Day with a sunrise ceremony during which he honored a Key West, Florida, group dedicated to protecting the coral reef. Bush said he soon will announce his decision regarding a proposed ban on off-shore drilling off the Keys. He told supporters of the ban he didN'T think they would be ''disappointed.''

Even Lithuania got into the spirit. Lithuanians put aside the struggle for independence to plant trees, hold a bicycle parade and fly kites.

Everything is on track for Tuesday morning's launch of the shuttle Discovery and its precious cargo, the one-and-a-half-BILLION-dollar Hubble Space Telescope.

The five-member crew arrived in Florida today in preparation for the flight. Shuttle skipper Loren Shriver said- ''We feel very confident that things are going to go well this time.''

Tuesday will be NASA's second attempt to get the telescope into space. Discovery's first launch attempt on April 10th was scrubbed because of a defective hydraulic power unit.

Air Force meterologists say there's a 70 percent chance of good weather at launch time.

With the countdown for Discovery proceeding smoothly, engineers today rolled the shuttle Colombia to the launch pad for a scheduled May 16th lift-off.

-30- 2272

#90112u1770 04/22/1990 ~United Press International

(APRIL 22) UPI - Yugoslavian voters went to the polls today to elect Croatia's parliamentary deputies.

The balloting is Yugoslavia's first free elections in 50 years, and may turn the country into a confederation or break it into small separate states.

In the northwestern state of Slovenia, an opposition coalition is likely to replace a communist government.

The Yugoslav Communist Party abolished its 45-year-old monopoly on power in January.

Election officials said first results woN'T be known until tomorrow.

Voters also went to the polls in North Korea today to elect deputies to the Supreme People's Assembly. That's the rubber stamp parliament for the ruling Communist Party.

The elections were held nearly six months ahead of schedule, raising speculation there may be a change in the country's leadership.

78-year-old President Kim Il Sung has ruled North Korea since the country was founded after World War Two.

Civil rights leader Ralph David Abernathy wanted a funeral parallelling that of Martin Luther King, and today he will get his wish.

The Reverend Abernathy... who died of cardiac arrest Tuesday... served as

confidant and right hand man to King during the strife of the civil rights struggles in the 1950's and 1960's.

Abernathy's body is being displayed publicly at his church in Atlanta today, followed by a memorial service tonight. Former King aide Jesse Jackson will speak at the service.

Abernathy's funeral tomorrow will be followed by a procession to a cemetery where many poor working blacks are buried. A mule-drawn wagon is to carry Abernathy's body.

Two services and a mule-drawn bier also marked King's death.

Abernathy's niece Brenda Russell said Abernathy wanted to be drawn by mules to represent humility and empathy with the poor.

His epitaph will read, ''I tried.''

-30- 2029

#90112u1852 04/22/1990 ~United Press International

(APRIL 22) UPI - American professor Robert Polhill is free after more than three years in captivity at the hands of pro-Iranian Moslem extremists. Polhill appeared on Syrian television as he was being driven from Lebanon to Damascus. He was clean-shaven, but appeared haggard, saying- ''It's a great pleasure to be free again.''

The White House says it's pleased by Polhill's release but said its satisfaction is ''tempered'' by the fact that seven other Americans still are being held hostage in Lebanon. In Florida, White House spokesman Marlin Fitzwater, speaking on behalf of President Bush, thanked the Syrian and Iranian governments for their roles in getting Polhill freed.

African National Congress leader Nelson Mandela blasted South Africa's right-wing white opposition party today while addressing 75-thousand people in the semi-independent homeland of Transkei. Mandela also rejected South African President De Klerk's insistence that the A-N-C end its armed struggle.

The commander of the Iraqi Air Force says he has official orders to attack Israel if the Jewish state stages a raid on Iraq or any other Arab country. The Iraqi commander's remarks were broadcast on an official Iraqi radio station, but did NOT specify if Iraq's threat also includes Israeli attacks against Palestinian targets in Lebanon or Tunis.

Traffic halted and drivers got out of their cars today in Israel as sirens sounded in remembrance of Millions of Jews killed in the Holocaust. Two minutes of reflection were punctuated only by the siren's wail. Names of

those killed were read out loud throughout Israel in an operation called ''A name for every lost soul.''

Slow-flowing lava from Hawaii's Kilauea Volcano today took just one-half-hour to destroy another house. The molten rock has now consumed six houses in three days. In the seven years of eruption, it has claimed 88 homes. Scientists say the volcano is spewing about 650-thousand cubic yards of lava daily.

Colombian police in Cartagena today seized a 357-pound shipment of cocaine bound for Italy. The seizure comes a day after police said the Sicilian Mafia was in Colombia to strengthen ties to the Medellin cartel. Officials also say a Basque separatist from Spain is helping the cartel.

The U-S Coast Guard said today that seven Peruvians who stowed away in a cargo vessel have been ordered returned to their country. The crew of a 570-foot Peruvian cargo vessel loaded with copper discovered the stowaways aboard the ship. Authorities say the stowaways will leave with the ship tonight from New Haven, Connecticut.

-30- 2779
#90112u2234 04/22/1990 ~United Press International
(APRIL 22) UPI - Robert Polhill is free after more than three years in captivity in Lebanon. Pro-Iranian Moslem extremists today released Polhill in Beirut to Syrian intelligence officers... who then drove the 55-year-old professor to Damascus, where he was welcomed by U-S officials. Polhill, appearing tired but clean-shaven, said- ''It's a great pleasure to be free again.'' The ex-hostage will be flown to West Germany for a medical examination and to be reunited with his family.

President Bush is welcoming Polhill's release, but he says his gratitude is tempered by the fact that seven other Americans still are being held hostage. Speaking to reporters at the end of a three-day working vacation in Florida, Bush said he spoke with Polhill, his wife and mother. Quoting Bush- ''I told him we will NOT forget the other hostages.'' The president also thanked Syria and Iran for their roles in freeing Polhill.

Earth Day today sparked celebrations of Mother Nature and charges of hypocracy. Consumer advocate Ralph Nader told an audiece in Raleigh, North Carolina, to beware of corporate polluters posing as environmentalists. President Bush announced a coral reef protection initiative in Florida. But at a huge rally in Washington, D-C, the head of the U-S arm of Greenpeace charged the president's commitment to the environment is only skin deep.

Alaskans from a dozen towns hurt by last year's Exxon Valdez oil spill spent Earth Day cleaning up the gooey remains of the disaster. But Exxon

opposes the local clean-up efforts and has asked the Coast Guard to discourage people from taking part in the programs. Exxon's clean-up manager, Otto Harrison, says the oil giant will NOT ''accept liability for the safety'' of anyone taking part in the clean-up. Exxon launches its second season of cleaning up next month.

-30- 2006

#90112u2263 04/22/1990 ~United Press International

(APRIL 22) UPI - Estonia's prime minister is promising Lithuanians whatever help his tiny Baltic republic can offer to off-set Moscow's economic blockade. NO nation has offered to help Lithuania. Norway and Sweden told the Lithuanian prime minister the republic would have to deal directly with oil companies and pay for supplies in hard currency. In the third Baltic republic of Latvia, a largely Russian bloc of deputies formed a pro-union group today to try to block Parliament from declaring independence.

Nigerian President Ibrahim Babangida says he put down an attempted government takeover today. Babingida told reporters in the capital of Lagos that the army is rounding up remaining rebels. Christian soldiers staged the coup attempt. They claim their people suffer discrimination under the Moslem-dominated government. Babingida says ringleaders would be dealt just as in the last coup attempt in 1985. Those rebels were executed.

The Vatican today said Pope John Paul has accepted an invitation from Cuban leader Fidel Castro to visit Cuba in early December. A Vatican spokesman said the pontiff had been invited by Cuban bishops last year. The announcement came as the pope concluded a two-day trip to Czechoslovakia. John Paul also revealed he will convene a special assembly of European bishops to discuss the dramatic changes sweeping the continent.

Israel's Construction and Housing Ministry acknowledged today it contributed almost two-Million dollars toward the controversial purchase of a house in the Old City's Christian Quarter in Jerusalem. Jews moved into the house during Christian Holy Week. The Greek Orthodox Patriarchate maintains it owns the building and the sale was illegal. The issue is before an Israeli court.

-30- 1928

#90112u2412 04/22/1990 ~United Press International

(APRIL 22) UPI - A tired but happy-looking Robert Polhill emerged from more than three years in captivity in Lebanon today. The 55-year-old U-S college professor was released in Beirut and taken to Syria, where he was met by U-S officials and reunited with his wife. Polhill says he was ''bored'' during his ordeal, but was ''NOT maltreated.'' Polhill also said he- quote- ''didN'T really think a lot about freedom while I was a

captive.''

In Queens, New York, Polhill's two sons celebrated their father's release today with pizza and champagne. 26-year-old Stephen says the first thing he'll tell his father is that the New York Giants won the 1987 Super Bowl. Says Stephen- ''He was taken the day before the Super Bowl and he was a rabid Giants fan.'' Polhill's mother, who lives in Fishkill, New York, says- ''He looks good, but he looks a little thin.''

A celebration of Earth Day 1990 drew half-a-Million people to Washington, D-C, today to vote with their feet for the environment. Actor Tom Cruise told the crowd- quote- ''If we make the environment sick, it's going to make us sick.'' Earth Day rallies were held around the world... including a concert in Tokyo, where the price of admission was ten aluminum cans. The cans were crushed into a block in front of the crowd to be recycled.

Jane's new Military Communications yearbook says Western nations urgently need to strengthen their military command, control, communications and intelligence capabilities. Defense experts at Jane's in London say Western armed forces must resist pressure to trim intelligence budgets but must learn to work with less. The report says the improvements are necessary because of UNpredictable situations in Eastern Europe and elsewhere.

-30- 1908

#90112u2423 04/22/1990 ~United Press International

(APRIL 22) UPI - Services will be held in Atlanta this evening for civil rights leader Ralph Abernathy, who suffered a fatal heart attack Tuesday. Abernathy had told his family he wanted his funeral to parallel that of his friend, Martin Luther King Junior. His wishes may be fulfilled. Civil rights and political officials are expected to gather at West Hunter Street Baptist Church where Abernathy was pastor for 29 years. Jesse Jackson is scheduled to speak.

Nearly four-thousand people took part in a ''march of the living'' today to commemorate the Holocaust at two death camps in Poland. The pilgrimage went between the Auschwitz and Birkenau camps, where many of the six-Million Jewish victims were killed during World War Two. Auschwitz survivor and Nobel peace laureate Elie Wiesel took part and asked what kind of world allowed the Holocaust to happen.

Nicaraguan President-elect Violeta Chamorro will NOT enjoy a honeymoon when she takes office Wednesday. 150-thousand workers are on strike and the work-stoppages are affecting everything from telephone service to postal service to the water company. Chamorro also faces a split within her National Opposition Union, or UNO as it's called. The split could make it difficult for her to win National Assembly support for her proposed economic policies.

Thunderstorms beat down on parts of the Southeast today. Showers ran from Arkansas to Florida, and one storm dropped inch-thick hail on Pritchard, Alabama. More severe thunderstorms may be on the way in those regions. Clouds and rain also dampened an Earth Day sunrise ceremony in Boise, Idaho. But sunny skies and temperatures around 70 graced celebrations in the nation's capital and midsection.

-30- 1892

#90112u2601 04/22/1990 ~United Press International

(APRIL 22) UPI - ''Save the Earth!'' was the chant today in the United States and around the world... as Millions of people turned out to celebrate Earth Day.

Rallies and cleanup campaigns ran from dawn 'till dusk in thousands of towns and cities. The day marks the 20th anniversary of the first Earth Day, and is meant to show a commitment to protect the Earth into the 21st century.

More than half-a-Million people turned out for a rally in Washington, D-C, led by actor Tom Cruise. Cruise challenged people to recycle goods and plant a tree.

Pop singer John Denver played his ode to nature, ''Rocky Mountain High.''

Peter Bahouth... head of the U-S arm of the environmental group Greenpeace... compared the environmental commitment of President Bush to a life-size cardboard cut-out of the president, which was only an inch deep.

The president is on vacation in the Florida Keys. But he announced a non-binding international proposal to protect coral reefs off the Keys by keeping out big ships and hazardous cargo.

Bush put off action on whether to ban off-shore oil drilling in the region but said environmentalists would NOT be ''too disappointed'' by his decision.

Earth Day was observed in an estimated 141 countries. There was an open air mass in a heavily polluted region of Poland... a rock concert on an island reclaimed from trash in Japan's Tokyo Bay... and a kite fly-in at the embattled Lithuanian capital of Vilnius.

700 people marched in Namibia, where the minister of wildlife, conservation, and tourism called on the youth to be environmental watchdogs.

But some in the United States remain cynical.

As one 23-year-old man at the Washington rally saw it- ''Everybody's going to go home and continue to pollute.''

-30- 1943
#90112u2632 04/22/1990 ~United Press International
(APRIL 22) UPI - On a day when many celebrated the Earth, others took time out to remember a much more somber concern- the Holocaust of World War Two.

In Poland, nearly four-thousand people from 37 countries took part in a ''march of the living.'' The march between the Auschwitz and Birkenau death camps commemorated where many of the six-Million Jews were killed in the Nazis' systematic plan for genocide.

Nobel peace laureate and Auschwitz survivor Elie Wiesel noted that Russians and Americans were near during the war, but still Jews were being killed.

In Israel, traffic stopped and sirens wailed, as people observed two minutes of silence for the dead of the Holocaust.

In New York City, memories of another atrocity.

Thousands of people rallied today in Times Square to urge the government of Turkey to accept responsibility for the slaying of one-and-one-half-Million Armenians between 1915 and 1923.

Speakers said the U-S government should stop referring to the Armenians' deaths at the hands of the Turkish Ottoman Empire as ''alleged.''

The Justice Department released a study today that finds blacks in America suffer from serious, violent crime much more frequently than whites. The report, covering 1979 to 1986, also says the murder rate for blacks is nearly six times higher than it is for whites.

For every 100-thousand blacks, 31-point-two are murdered... compared to five-point-four for whites. Homicide rates are highest for black males, followed by black females, then white males and white females.

The Justice Department study, entitled ''Black Victims'' also finds that during violent crimes, blacks are somewhat more likely to be physically attacked- 50 percent for blacks and 47 percent for whites.

Findings concerning robberies also are discouraging. The survey showed that 13 robberies occur for every one-thousand blacks... compared to five robberies for whites.

The study is based on bi-annual interviews with about 50-thousand households about their exposure to crime.

#90112u2655 04/22/1990 ~United Press International

(APRIL 22) UPI - NASA is preparing two shuttles for lift-off within one month for the first time since the 1986 Challenger disaster. But agency officials say the launch work is NOT overly ambitious and safety is NOT being compromised.

The shuttle Discovery is being readied for blast-off Tuesday morning and engineers rolled the Columbia to the launchpad today in preparation for a May 16th mission.

Says Colombia co-pilot Guy Gardner- ''Nobody is rushing getting our launch off the ground just to get us off by a certain date.''

NASA managers originally did NOT plan to have Discovery and Columbia launched within such a close time frame. But Discovery's April 10th flight was scrubbed because of a faulty hydraulic power unit.

Discovery will carry the one-point-five-BILLION-dollar Hubble Space Telescope in its cargo bay. Columbia will ferry several more modest telescopes into space.

The National Park Service today erected a new monument to the nation's tallest mountain- an outhouse.

A record one-thousand climbers tackled Alaska's Mount McKinley last year. That number could be topped again this year as the climbing season began with two-dozen climbers striking out today.

The rise in climbers concerns park service mountaineering rangers.

Chief among those concerns is human waste. Today, a helicopter was to deliver an outhouse to the seven-thousand-foot base camp. Ranger Scott Gill says the action coming on Earth Day is ''happenstance.''

Gill says the mountain has ''a little mess from past years.'' He says rangers are trying to protect the mountain's pure beauty both now, and through the year 2050.

#90112u2726 04/22/1990 ~United Press International

(APRIL 22) UPI - In Lebanon, a U-S hostage was freed for the first time

in more than three years. Robert Polhill appeared tired but happy in an interview made while he was being driven to Syria, where he was greeted by U-S officials and his wife.

A pro-Iranian group turned the accounting professor over to Syrian intelligence officers in West Beirut this afternoon. Polhill's release follows weeks of efforts by the governments of Syria and Iran.

The White House says it does NOT know what prompted Polhill's release. But spokesman Marlin Fitzwater says the administration wants to thank those who had a hand in it, ''particularly the governments of Syria and Iran.''

In Fishkill, New York, Polhill's mother expressed joy at her son's release and sadness for the families of the hostages still held. Ruth Polhill added she feels no resentment towards the captors. As she explained- ''We doN'T understand their politics.''

Students held a hazardous waste fashion show today at Rutgers University in New Jersey, modelling the latest in protective gear for toxic clean-up workers. The event was one of many held to celebrate Earth Day 1990.

One of the largest Earth Day gatherings took place on the steps of the Capitol in Washington, D-C. More than half-a-Million danced to rock bands, waded in the Reflecting Pool and wandered through an eco-fair.

#90112u2742 04/22/1990 ~United Press International

(APRIL 22) UPI - Estonia's prime minister says his tiny Baltic republic will do whatever it can to help Lithuania. NO nation has offered to send supplies to Lithuania to counter last week's cutoff of oil and natural gas by Moscow.

Air Force meteorologists are predicting a 70-percent chance of good weather at the time of Tuesday's scheduled shuttle launch. The Discovery crew flew back to Cape Canaveral today to ready for the delayed flight.

The Justice Department says blacks find themselves the victims of violent crime far more often than whites. The government survey released today says the murder rate for blacks is six times higher than it is for whites.

Civil rights and political leaders gathered in Atlanta tonight for services held in memory of the Reverend Ralph David Abernathy. The activist who died Tuesday requested that funeral resemble the rites for Martin Luther King.

-30- 1056

#90112u2866 04/22/1990 ~United Press International
(APRIL 22) UPI - President Bush expressed gratitude today at the release of American professor Robert Polhill. The Islamic Jihad For the Liberation of Palestine released Polhill today after holding the 55-year-old professor hostage for more than three years. But the president tempered his thanks with a call for the ''immediate and UNconditional'' release of the other seven Americans still being held against their will in Lebanon. Quoting Bush- ''This is a mission UNcompleted.''

Jesse Turner and Alann Steen are the two other American hostages still being held by the Jihad. For their families, today brought feelings of anger and joy. In Boise, Idaho, Turner's mother accused the Moslem extremists of ''playing on our emotions.'' And in Clark Lake, Michigan, Steen's wife, Virginia, said she was ''thrilled'' for Polhill... but noted that her husband was spending his fourth consecutive birthday in captivity today.

Organizers of today's Earth Day rally in Washington, D-C, say it was the biggest event there since 1980. They say its size is a sure sign of the dawning of a ''green decade.'' Some in the crowd were skeptical, saying people will continue their polluting ways. Others combined humor with an environmental warning. At Rutgers University in New Jersey, students staged a hazardous waste fashion show. Students modeled the latest in protective gear for toxic clean-up.

Discovery's five-member crew is back in Florida, preparing for Tuesday's second launch attempt. Discovery skipper Loren Shriver says- ''We feel very confident that things are going to go well this time.'' Air Force meteorologists predict a 70-percent chance of good weather at lift-off time. Also at Cape Canaveral today, engineers moved the shuttle Columbia to its launchpad. Columbia is scheduled to take off May 16th.

#90112u2877 04/22/1990 ~United Press International
(APRIL 22) UPI - A Vatican spokesman says Pope John Paul has accepted an invitation from Cuban leader Fidel Castro to visit Cuba in early December. The announcement came following the pope's trip to Czechoslovakia, where he met Communist Prime Minister Marian Calfa. In Velehrad, the pope also met Polish Prime Minister Tadeusz Mazowiecki , who flew in from Warsaw.

African National Congress leader Nelson Mandela had harsh words today for South Africa's right-wing white opposition. Speaking to 75-thousand people in the nominally independent Transkei homeland, Mandela said- ''In the South Africa we... are busy building, there will be NO place for racist practices.'' The black leader also rejected President De Klerk's insistence that the A-N-C give up its armed struggle.

A British truck driver testified today in Patras, Greece, about a truck-load of steel pipes he drove into the country. 26-year-old Paul Ashwell was arrested last week on charges of smuggling arms. Authorities believe the pipes were meant to be part of the world's largest gun being built in Iraq. Ashwell says he's innocent because he was UNaware of his truck's contents loaded in Britain. Authorities may reduce the charges.

Thousands of people rallied today in New York's Times Square to urge the Turkish government to admit killing one-point-five Million Armenians between 1915 and 1923. Mayor David Dinkins said a U-S ambassador told the State Department of the massacre in 1915, but the department now describes the slayings as ''alleged.'' Republican Senator Alfonse D'Amato said Hitler planned the Holocaust knowing few people remembered the Armenians.

FORT MILL, SC (APRIL 23) BUSINESS WIRE - Shareholders of Springs Industries Inc. (NYSE: SMI) Monday elected to the company's board of directors John L. Clendenin, chairman of the board and chief executive officer of BellSouth.

Clendenin, who was elected at Springs' 102 annual meeting of shareholders, heads the largest of the telecommunications holding companies, which owns Southern Bell, South Central Bell, BellSouth Services, and BellSouth Enterprises.

He is also a director of Equifax Inc., National Service Industries Inc., Capital Holding Corp., First Wachovia Corp., The Kroger Co., and Coca-Cola Enterprise Inc.

At the shareholder meeting, held in the auditorium of Fort Mill High School, Springs chairman Walter Y. Elisha described the strategic changes made by the company during the decade of the 1980s.

These included a greater share of the business devoted to home furnishings and industrial products, massive investment in new technology of nearly $600 million, and entry into new businesses through acquisition and product development.

Special guests at the meeting were more than 200 senior students of Fort Mill High School.

Serving on the Springs board with Clendenin will be 11 other directors who were reelected:

Crandall Close Bowles, president and a director of the Springs Co.; Charles W. Coker, president, chief executive officer and a director of

Sonoco Products Co.; Walter Y. Elisha, Springs chairman; Donald N. Frey, retired chairman of the board of Bell & Howell Co.; James P. Kelley, retired executive vice president of Springs; Dan M. Krausse, director and advisor of the Sunwestern Group, and president of the Krausse Co.; Julius Lasnick, executive vice president of Springs; John H. McArthur, dean of the faculty, Harvard University Graduate School of Business; Donald S. Perkins, retired chairman of Jewel Cos. Inc.; Arthur W. Schultz, retired chairman and chief executive officer of Foote, Cone & Belding Communications Inc.; Stewert Turley, chairman of the board, president and chief executive officer of Jack Eckerd Corp.

Clendenin succeeds Ralph Z. Sorenson, professor, Harvard Graduate School of Business Administration and former chairman and chief executive officer of Barry Wright Corp., who retired from the Springs board.

MENLO PARK, CA (APRIL 23) BUSINESS WIRE - U.S. Venture Partners Monday announced that three new general partners -- Irwin Federman, Philip M. Young and Dale Vogel -- have joined the firm in a comprehensive reorganization of the nine-year-old major venture partnership.

Federman and Young were most recently with Concord Partners while Vogel was a general partner with Norwest Venture Capital.

The three will form U.S. Venture's new executive committee, together with co-founder William K. Bowes Jr., H. Joseph Horowitz and Philip S. Schlein, all general partners. Stuart G. Moldaw and Robert Sackman, co-founders and general partners, have moved into venture partner roles, continuing to monitor specific investments but less involved than before in new activity.

In the reorganization, Bruce J. Boehm and Stephen M. Krausz will continue to follow technology and medical investments, while David Folkman and Nancy E. Glaser will focus on the retail area. Annette Campbell-While will become a venture partner while M. Kenneth Oshman continues as a special limited partner.

Federman joined Concord Partners in 1988 after 10 years as president and chief executive officer of Monolithic Memories Inc. Annual sales of the company rose from $20 million to $250 million before it merged in 1987 with Advanced Micro Devices.

A two-term chairman of the Semiconductor Industry Association, Federman is an economics graduate of Brooklyn College and holds an honorary doctorate

of engineering degree from Santa Clara University.

Young has been with Concord Partners in 1988 after 10 years he served as president and chief executive officer of Oximetrix Inc., now Abbott Critical Care, a Silicon Valley manufacturer of high technology medical instruments. Annual sales grew from $1 million to $50 million during his tenure.

Young holds engineering degrees from Cornell and George Washington University and an MBA from Harvard Graduate School of Business.

Vogel joined Norwest Venture Capital in Seattle in 1984. Previously he was president of K2 Corp., a worldwide manufacturer of consumer sporting goods whose annual sales exceeded $50 million. He also served as president of JanSport, an outdoor apparel company, and with The Wickes Co., a diversified retailer.

Vogel is a graduate of San Jose State University, with an MBA from Harvard Graduate School of Business.

SAN DIEGO (APRIL 23) BUSINESS WIRE - Xerox Desktop Software Inc. Monday announced it has agreed to license, on an independent software vendor basis, Graphical Environment Manager (GEM) system software from Digital Research Inc.

The value of the agreement was not disclosed.

The agreement mutually broadens the range and influence of the two companies' pioneer software products: Xerox Ventura Publisher and Digital Research's GEM. It also provides a foundation for future cooperative market development programs.

This agreement continues the relationship that Ventura Software Inc. had established with Digital Research. On March 5, 1990, Xerox Desktop Software acquired Ventura Software.

GEM, developed by Digital Research, was the first systems software that supported mice, windows and bit-mapped graphic images such as icons, drop-down menus and raster fonts for IBM PCs and compatibles. Digital Research develops and markets presentation graphics and illustration applications such as Presentation Team and Artline, which run under the GEM environment.

Xerox Desktop Software publishes the largest and most popular PC-based business application written for the GEM environment, Xerox Ventura Publisher. It has achieved more than a 50 percent market share, according to a Dataquest survey. Dataquest is a well-known market research firm based in San Jose.

The capabilities of Xerox Ventura Publisher on the GEM platform have recently been extended. The version 3.0 upgrade (''Xerox Ventura Publisher Gold Series'') of the product is expected to be available in June 1990.

Xerox Desktop Software is a leading supplier of publishing, forms processing and data base management software solutions. The business unit has been restructured as a wholly owned subsidiary of Xerox and has its headquarters in San Diego.

Digital Research develops and markets operating systems, software development tools and graphics applications for a variety of platforms. Founded in 1976, the company has its headquarters in Monterey, Calif.

SAN JOSE, CA (APRIL 23) BUSINESS WIRE - Pacific Western Bancshares

(ASE:PWB) Monday said that its subsidiary, Pacific Western Bank, has completed its acquisition of the Northern California Division of Household Bank, f.s.b. for an effective purchase price of $9 million.

As a result of the transaction, Pacific Western will add some $205 million in deposits and five new branches. The new facilities include two in Salinas, one each in Pacific Grove and Prunedale and a new branch in downtown Watsonville to replace Pacific Western's branch which was destroyed in last October's earthquake, according to Phillip R. Boyce, chairman and chief executive officer of Pacific Western.

In addition, Pacific Western will relocate its existing downtown Monterey branch to a larger Household facility across the street.

''This transaction significantly increases our presence in the South Bay '' Boyce said. ''By filling in our existing branch system and strengthening our network in such growth areas as the Salinas-Monterey market, we are positioned to continue our strong earnings growth.''

Pacific Western recently announced a 64 percent increase in net income for the quarter ended March 31, compared with the first quarter of 1989. Net income was $4 million, or 31 cents per share, compared with $2.4 million, or 21 cents per share, a year ago.

Headquartered in San Jose, Pacific Western Bank is one of two major independent banks in Northern California. With the completion of this transaction, the bank has $1.2 billion in assets and operates 26 branches in Santa Clara, Santa Cruz and Monterey Counties.

Its parent, Pacific Western Bancshares, operates subsidiaries which offer trust and asset management services and financially oriented data processing and software development services.

#90113b0041 04/23/1990 ~Business Wire

ALAMEDA, CA (APRIL 23) BUSINESS WIRE - Glycomed Inc., a three-year-old company focused on the development of carbohydrates as pharmaceuticals, today announced the conclusion of two private placements totalling $15.5 million.

These financings, completed during the last three months, include an $11.5 million funding closed Monday and a $4 million equity investment from Eli Lilly and Co. announced in January.

Proceeds of the new financing will be used in research and development of carbohydrate therapeutics, initially in the cardiovascular, anti-viral and anti-inflammatory areas. Complex carbohydrates play a number of important physiological roles and are significantly involved in many disease processes.

Glycomed is engaged in developing new pharmaceuticals based on proprietary complex carbohydrate technologies.

Concurrent with the equity investment announced in January, Glycomed and Lilly launched a three-year research and development agreement in vascular restenosis, a major cause of blood vessel blockage affecting more than 1 million Americans.

Nine venture capital firms and European private banks joined with Glycomed's founding investors in the most recent round of financing. Founding investors who offered renewed commitment included U.S. Venture Partners of Menlo Park, Calif., Kleiner Perkins Caufield & Byers, San Francisco and CW Group, New York. Along with Eli Lilly and Co., new investors from the United States involved in the latest round include Accel Partners, San Francisco; Brentwood Associates, Los Angeles; Chancellor Capital Management Inc., New York; and Advent International, Boston.

Glycomed's European investors participating in the latest round are all based in London. They are Abingworth Management Ltd., John Govett & Co. Ltd., Foreign and Colonial, Coutts & Co. and Morgan Grenfell Unit Trust Managers Ltd.

Glycomed is a privately-held company that is developing complex carbohydrates for pharmaceutical applications. The company was formed in 1987 and is headquartered in Alameda, California.

SAN JOSE, CA (APRIL 23) BUSINESS WIRE - BT Tymnet Inc., provider of the international value-added network TYMNET, and Touch Communications Inc., software developer for OSI communications services, announced Monday that they have agreed to begin interoperability testing of their respective X.400 connectivity products.

The goal of this testing is to certify end-to-end interoperability between their products.

The testing will be between BT Tymnet's Dialcom Pathfinder/X.400 product and Worldtalk/400 Gateways for Microsoft Mail, cc:Mail, MHS, Inbox, Quickmail and SMTP. The Dialcom Pathfinder/X.400 service allows users to exchange messages with other systems. Touch's LAN Mail Gateway products provide the X.400 gateway for most popular LAN-based mail products.

BT Tymnet and Touch Communications plan to have the testing completed by May 1990.

BT Tymnet Inc., an international value-added network supplier, is one of the world's largest providers of public, private and hybrid network solutions. The company owns and operates the TYMNET Network which offers protocol conversion, error-protection, enhanced security features, electronic data interchange (EDI), card services and electronic messaging. The TYMNET Network is accessible from most countries throughout the world.

Touch Communications Inc., a privately held company, was founded in March 1985 to develop transparent end-user communications solutions based on OSI (Open Systems Interconnection) standards. In addition to the Worldtalk/400 product family, Touch Communications offers end-user X.400 products for the most popular LAN mail environments.

Touch also offers a complete line of OSI protocols and provides complete systems integration services for OSI communications environments. All of Touch's products are distributed worldwide directly to large end-users, systems integrators and original equipment manufacturers.

SAN FRANCISCO (APRIL 23) BUSINESS WIRE - Susan Weir, 45, has been named vice president--personnel of McKesson Drug Co.

The announcement was made Monday by Joseph Polastri, president of McKesson Drug.

Weir, who has held several personnel posts with the parent firm McKesson Corp. since l976, was most recently vice president--human resources for McKesson's information technologies division. From l971 to l976, Weir was

assistant vice president--corporate personnel for the Bank of America in San Francisco.

Prior to that, she held personnel jobs with Chase Manhattan Bank and Pan American World Airways.

She succeeds Ron Pohls, who has been named staff vice president--personnel of McKesson Corp.

She received her bachelor of science degree from the University of North Carolina in 1967 and did graduate studies at New York University. She is a graduate of the CORO City Focus Program and serves on the human resources advisory committee for Golden Gate University.

CHULA VISTA, CA (APRIL 23) BUSINESS WIRE - Rohr Industries Inc. announced settlement of its remaining dispute with the Washington Metropolitan Area Transit Authority (WMATA).

The parties agreed that Rohr would be paid the sum of $11 million in settlement of its suit for reimbursement of interest paid to finance the manufacture of WMATA's first 300 subway transit cars, a business Rohr discontinued in the 1970s.

Under Rohr's 1972 contract with WMATA, the company manufactured and delivered 300 rapid transit cars in accordance with WMATA-furnished drawings and specifications. As a result of defects in these drawings and specifications, and other actions of WMATA, the company incurred substantial costs, beyond the contract price, as well as schedule delays.

In 1977-1978, Rohr filed some 76 claims against WMATA, requesting contract price adjustment totaling $54.3 million. The claims were the subject of numerous proceedings before the U.S. Army Corps of Engineers Board of Contract Appeals, the U.S. District Court in Washington, D.C., and the U.S. Court of Appeals.

Ultimately, all were resolved through litigation or negotiation, during the period 1981-1984, for $12.3 million, except for the interest claim, which has now been settled as well. The interest claim sought reimbursement of that portion of the company's borrowings used to finance the unexpected, additional costs to manufacture the transit cars.

''We believed from the outset that these claims had substantial merit,''

said a company spokesperson. ''Despite the length of the proceedings and the costly legal expenses, we are pleased that we were finally able to reach agreement with WMATA and put this behind us.''

Rohr designs, integrates, manufactures and supports aircraft engine nacelle systems and components for commercial, military and business aircraft. The company also manufactures solid rocket motor casings and nozzles for space programs.

With headquarters in Chula Vista, Rohr has 10 facilities in the United States and one in Toulouse, France.

SANTA CRUZ, CA (APRIL 23) BUSINESS WIRE - Central Coast Wine Co. of Santa Cruz and Vintage House Distributors of Huntington Park, have joined forces to form The Henry Wine Group.

Committed to product knowledge, customer service, and professional integrity, each company brings to the partnership a high degree of respect within the retail, restaurant and wine industries.

The Henry Wine Group unites two of California's most talented sales forces, representing the highest level of product knowledge in the premium wine business. To further meet the needs of customers, The Henry Wine Group utilizes one of the most streamlined high-technology computer and communication wine distribution systems in the state.

Each salesperson is linked by personal computer to the company's central system. Client's orders are instantly confirmed as the salesperson's PC provides up-to-the-minute inventory accounting.

Warner Henry, chairman of the Henry Group of Companies, has named Central Coast Wine Co. founder Robert Prough as president of The Henry Wine Group. Serving as executive vice president is Greg Gillooly, formerly president of Vintage House Distributors.

''Our new entity brings together two companies that are built on a philosophy of quality products, excellent service and financial strength '' stated Robert Prough. ''We're confident that our combined staffs and facilities give us the resources we need to dramatically impact the entire California market.

The formation of the The Henry Wine Group will allow us to offer an even

broader product portfolio and bring state-wide consistency to brand pricing and marketing.''

LOS ANGELES (APRIL 23) BUSINESS WIRE - Castle & Cooke Inc. Monday reported first-quarter net income of $18.1 million, up from $12.5 million in the same quarter last year.

Earnings per common share were 30 cents, compared with 21 cents in the prior year's first quarter. Revenue increased to $658 million vs. $563 million in 1989.

Dole Food Co. reported higher earnings over last year. The fresh fruit group had increased earnings as its Chilean operations returned to profitability. Results for the fresh vegetables group were down slightly due to lower lettuce prices resulting from increased industry supply.

Packaged foods operations were negatively affected by costs related to expansion of consumer product lines. The dried fruit and nut group had higher earnings.

Castle & Cooke's real estate operations reported higher earnings primarily due to increased residential sales in Hawaii and commercial sales in California.

Castle & Cooke's interest expense net of interest income increased to $11.2 million from $9.9 million in the comparable period in 1989 due to additional debt incurred to support the company's capital investment program.

Castle & Cooke is a holding company conducting business in two primary operating areas: food production and distribution through Dole Food Co. and real estate development.

PASADENA, CA (APRIL 23) BUSINESS WIRE - Nationwide Health Properties Inc. Monday reported its first-quarter earnings for the quarter ended March 31, 1990, of $3,853,000, or 38 cents per share.

Net income and cash flow from operations increased substantially in comparison with the first quarter of 1989 due to reduced interest expense on debt that has been eliminated with the proceeds of a common stock offering completed in January of this year. Revenues were lower due to the sale of 26 of its facilities during 1989.

''Earnings and cash flow are right in line with our expectations,'' said R. Bruce Andrews, president and chief executive officer, ''and support our current policy of paying an increasing cash dividend.''

Nationwide Health Properties is a real estate investment trust specializing in the ownership of health care facilities.

NEW WESTMINSTER, B.C. (APRIL 23) BUSINESS WIRE - Dan Fritz, president of Westwater Industries Ltd., and Jim Rattenbury, executive vice-president of Bentall Development Inc. are pleased to announce that Westwater Industries has acquired BCM Manufacturing Ltd., from the Bentall Group Ltd.

The purchase price was not disclosed.

BCM has been fabricating superior overhead wooden garage doors for over 30 years. From its Langley, British Columbia plant, the company has established strong market share in western Canada, with good representation in the western United States and eastern Canadian markets. During 1989, the company had sales of approximately $17,000 and currently employs over 100 employees. Fritz stated that he does not foresee any significant changes in the company's methods of operation and there are no plans to make any personnel changes.

''The acquisition of BCM,'' stated Fritz, ''reflects Westwater's strategy to purchase established, operating companies which enjoy a good reputation in the light manufacturing sector, demonstrate stable management and have the potential for growth and expanded market share. The BCM product is clearly the highest quality wooden garage door in the marketplace and we are very pleased to be able to bring it under the Westwater umbrella.''

''With the sale of BCM to Westwater, the Bentall Group has achieved another of its corporate objectives,'' Rattenbury explained. ''For some time now we have been engaged in the strategic refocusing of our business on the core activity of real estate development in both western Canada and California.

We are delighted to have found in Westwater a purchaser with compatible goals and objectives for the ongoing development of BCM. Westwater is a vigorous company with a demonstrated track record in manufacturing and we know their enthusiasm for the business will be excellent both for BCM employees and the future growth of the company.''

NEWPORT BEACH, CA (APRIL 23) BUSINESS WIRE - PacTel Cellular, one of the nation's leading providers of cellular telephone service, has named Donald

A. Harris as vice president, corporate development.

Harris replaces Justin L. Jaschke who succeeds Harris as president and chief operating officer of the Bay Area Cellular Telephone Co. (BACTC), of which PacTel Cellular is the majority owner. Harris and Jaschke will assume their new positions effective May 1.

As vice president, corporate development, Harris will be responsible for guiding the company's corporate strategy and planning, corporate marketing new business development, public policy and external affairs.

Harris brings extensive experience in the telecommunications industry to his new role. Since 1988 he has headed the Bay Area Cellular Telephone Co., developing the organization into the Bay Area's premier cellular service provider. Under Harris' leadership, the BACTC subscriber base has more than doubled, and the cellular system has expanded to cover nearly 3,000 square miles.

During his tenure with BACTC, Harris also headed the Pacific Telesis Group management team which helped secure a license for the company and its consortium to build and operate a personal communications network in the United Kingdom.

Prior to joining BACTC, Harris served as vice president of the California region for PacTel Paging. He also served as vice president, operations, for GenCell, a subsidiary of Communications Industries, and as an associate with the management consulting firm McKinsey & Co.

Harris earned his master's degree in business from Columbia University and his undergraduate degree in applied science and engineering from West Point.

In his role as president of BACTC, Jaschke will manage the company's operations and development, guiding the company's introduction of enhanced cellular services and digital technology. His responsibilities will include oversight of BACTC's engineering, finance, and sales and marketing departments.

Jaschke joined PacTel Cellular in 1987 to head corporate development. In this capacity he played a significant role in the company's entry into international cellular markets, and in developing and implementing corporate marketing programs such as voice mail, equipment distribution and priority accounts.

In addition, he was responsible for managing the company's regulatory and external relations, including public policy issues related to the cellular industry.

He served as director of mergers and acquisitions for PacTel Corporation before joining PacTel Cellular. There, he managed many of the corporation's diversification and restructuring efforts. Prior to his tenure with PacTel Corp. he was a management consultant for Morris Associates and Marakon Associates.

Jaschke holds a master's degree in management from the Sloan School of Management, Massachusetts Institute of Technology. He obtained a bachelor's degree in mathematics and computer science from the University of Puget Sound.

PacTel Cellular is a wholly owned subsidiary of Pacific Telesis Group (NYSE:PAC), a diversified telecommunications corporation with headquarters in San Francisco.

NEWARK, CA (APRIL 23) BUSINESS WIRE - Funeral services will be held Wednesday morning for Dick Skuse, 68, of Newark, Calif., a well-known Bay Area publicist who passed away Saturday while undergoing heart surgery.

Born in San Francisco, Skuse began his career as a copy boy at the San Francisco Examineer in 1939.

He joined the Navy in 1942, serving in the Panama Canal Zone and in the Philippines.

In 1951 Skuse started his own public relations agency, Dick Skuse and Associates. In the years that followed his PR accomplishments included:

--Originating the idea of having the 1960 Winter Olympics at Squaw Valley;

--Handling the Shrine East-West football game, the dog show at the Cow Palace and other Cow Palace events;

--Writing in recent years a national syndicated travel column called Our Globe.

Survivors include a daughter, Margaret Ann Traeger of Suguin, Texas; two sons, David in Denver and Richard in Phoenix; one grandchild;a sister, Virginia Roberts of Hayward, and his companion of the last nine years, Masae Ost in Newark.

A mass of Christian burial will be held Wednesday at 10:30 a.m. at St.

Raphael's, 1104 5th St., San Rafael.

Interment immediately after will be at Mt. Olivet cemetery in San Rafael. Visitations may be made at the Chapel of the Roses, 1940 Peralta Blvd., Fremont, on Tuesday from 6-8 p.m.

SANTA ROSA, CA (APRIL 23) BUSINESS WIRE - American Home Shield Corp. (NASDAQ/NMS:AHSCL), a subsidiary of ServiceMaster Limited Partnership, Monday announced unaudited results for the first quarter ended Mar. 31.

The nation's leading home service company reported net earnings for the three-month period of $2.2 million, compared to 1989's first quarter net of $1.5 million, an increase of 44 percent.

Earnings before income taxes were $3.3 million, an increase of 43 percent over the $2.3 million posted in the first three months of 1989.

Unaudited earnings from operations results for the first quarter are approximately $3.7 million. Earnings from operations are defined in the merger agreement between ServiceMaster Limited Partnership and AHS and are the applicable income measurement for determining the amount, if any, which is payable with respect to the Contingent Payment Rights. The earnings target for 1990 is $18.0 million.

AHS gross contracts written in the period decreased by 3 percent $12.8 million compared to $13.2 million last year, and contract revenue increased 7 percent to $14.6 million from $13.6 million. The decrease in gross contracts written resulted primarily from a softening of the home resale market in California.

The ratio of AHS's net direct contract costs to contract revenue in the first quarter dropped to 37 percent compared to 42 percent in the comparable period last year. General, selling and administrative expenses as a percentage of contract revenue decreased to 46 percent from 47 percent in the first quarter of last year.

AHS is the leading and oldest provider in the home service contract business. The company originates and markets home service contracts in 38 states and the District of Columbia that cover the repair and replacement of major home systems, including heating, electrical, air conditioning and plumbing, as well as hot water heaters and built-in appliances.

ServiceMaster is a leader in providing the services of professional cleaning, termite and pest contract, maid service and lawn care to residential and commercial customers through its Consumer Services and Products segment.

These services are offered through a worldwide network of over 4,800 ServiceMaster, Terminix and Merry Maids company-owned and franchised branches who are partners in the ServiceMaster Quality Service Network.

MANHASSET, NY (APRIL 23) BUSINESS WIRE - Long Island Monthly (LIM) will cease publication with its May issue, publisher CMP Publications Inc. announced Monday.

The majority of the magazine's 19-member staff will be placed elsewhere within the CMP publishing organization.

On Nov. 28, 1989, the company announced its intention to sell LIM in order to focus on its business publications in high technology, travel and health.

President Michael S. Leeds said that in spite of the announcement, CMP has continued to maintain the publication for another six months and ''using the services of investment bankers, we have not found a suitable buyer.

''In almost two years,'' Leeds continued, ''LIM has built a large and loyal readership. We are extremely proud of the magazine and the CMP people who created it. Without their dedication to excellence and professionalism, it would not have achieved so much in such a short time.''

CMP Publications Inc., with annual sales of $157 million, is a leading business-to-business publisher. The company publishes 15 newspapers and magazines covering the high technology, travel and health markets.

SAN FRANCISCO (APRIL 23) BUSINESS WIRE - Grubb & Ellis Realty Income Trust (NASDAQ:GRIT) Monday reported 1990 first quarter net income of $378,000, or 14 cents per share, from revenue of $756,000.

This compares to net income of $343,000, or 12 cents per share, from revenue of $636,000 for the like period last year.

The REIT also declared a per share dividend of 18 cents payable May 18 to shareholders of record May 4.

The REIT had previously announced its intention to make quarterly distributions of operating cash flow while it proceeds with its proposed plan to liquidate and dissolve the REIT, which will be considered by shareholders at the annual meeting on May 15.

Grubb & Ellis Realty Income Trust is advised by Grubb & Ellis Realty Advisers Inc., a wholly owned subsidiary of Grubb & Ellis Co., one of the nation's largest real estate services firms.

HOUSTON (APRIL 23) BUSINESS WIRE - In a letter mailed Monday, American General Corp. urged its shareholders to reject Torchmark's tactics and to support the American General board of directors.

The letter raised a number of questions left unanswered in Torchmark's abortive proposal made and withdrawn late last month and its ongoing proxy contest.

The letter said: ''We recently advised you of what we believe was an effort by Torchmark Corp. to pressure your board of directors into negotiating an acquisition proposal under its arbitrary 48-hour deadline....We can't say for certain why Torchmark has chosen to rely on threats, arbitrary deadlines and proxy contests to achieve its ends. We believe Torchmark's actions clearly create far more questions than answers.''

The letter reiterated that: ''Your board has been, and will continue to be

prepared to consider any bona fide proposal affecting your company's future and the value of your investment on a timely, prudent and fully informed basis.''

American General is an insurance and financial services organization with assets of $32 billion and total equity of $4.4 billion. With headquarters in Houston, the company has subsidiaries that operate in 50 states and Canada.

The company groups its operating subsidiaries into three business segments: insurance - home service; insurance - special markets; and finance/real estate.

American General common stock is listed on the New York, Pacific, London and Swiss stock exchanges.

NEW YORK (APRIL 23) BUSINESS WIRE -''ONLY YESTERDAY,'' King World's nightly newsmagazine show anchored by former NBC News veteran John Palmer has been given a firm production commitment for a September 1990 syndication debut.

The announcement was made Monday by Roger and Michael King, chairman of the board and chief executive officer/president, respectively, of King World Productions Inc.

Currently cleared in more than 62 percent of the country, ''ONLY YESTERDAY'' will debut on Sept. 3 and will focus on significant events past and present as well as on intense personal experiences.

Through a kaleidoscope of music and news ''ONLY YESTERDAY'' will present viewers with a whole new perspective on news events and other personal experiences as stories are reconstructed and conveyed with incredible power and immediacy by the people who lived them.

Av Westin, senior vice president of Reality Based Programming for King World is creator and executive producer of the show.

''Response to 'ONLY YESTERDAY' has been fantastic!,'' stated Roger King. ''I expect 'ONLY YESTERDAY' to become an instant hit and King World's fifth franchise in the tradition of 'Wheel of Fortune,' 'Jeopardy!,' 'The Oprah Winfrey Show' and 'Inside Edition.' ''

Already cleared in eight of the top ten markets, ''ONLY YESTERDAY'' has been picked up by WNBC-TV, New York; ABC-TV, Los Angeles; KYW-TV, Philadelphia; KPIX-TV, San Francisco; WBZ-TV, Boston; WDIV-TV, Detroit; KXNS-TV, Dallas/Ft. Worth and WKYC-TV, Cleveland.

Dan Cooper, an Emmy Award-winning local new director, writer and producer and former producer of ABC News' ''20/20,'' will serve as producer of ''ONLY YESTERDAY.'' Cooper is widely recognized as one of the most prominent and innovative forces in reality programming.

Cooper comes to ''ONLY YESTERDAY,'' from Dan Cooper Productions, where he created a series of 14 hour-long shows for ABC News and ABC Video Enterprises entitled ''Great TV News Stories,'' a reality-based compendium of the top television news stories as reported by ABC News.

In his lengthy career, Cooper has worked with the Wall Street Journal Report, HBO, Hearst and Group W. He was assistant new director of WABC-TV's ''Eyewitness News,'' as well as producer of WCBS-TV's ''Channel 2 News from the Newsroom with Rolland Smith and Dave Marash.''

Additionally, he received a special commendation in ''The Politics of Broadcasting: The Alfred duPont Columbia University Survey of Broadcast Journalism 1971-1972'' for his excellent series on ''The Jewish Poor,'' for WCBS-TV.

Cooper has also served as a special consultant to the New York City Police Department and producer of a multi-award-winning series of legal training films combining police-action melodrama and television newsmagazine techniques. He has also produced and directed shows for AT&T, American Brands, Hertz and Revlon.

''ONLY YESTERDAY'' will be produced in New York.

King World is the leading distributor of first-run programming, including ''Wheel of Fortune,'' ''Jeopardy!'' and ''The Oprah Winfrey Show,'' the three highest rated series in first-run syndication and ''Inside Edition '' the sixth highest rated first-run syndication strip which the company also produces.

King World also distributes its own library of 68 feature films and 210 television programs and through its barter subsidiary, Camelot Entertainment Sales Inc., sells national advertising for King World and The Disney Co. television programming. In addition, King World is the owner of WIVB-TV, the CBS affiliate in Buffalo, N.Y.

FORT WORTH, TX (APRIL 23) BUSINESS WIRE - Paul I. Stevens, chairman and chief executive officer of Stevens Graphics Corp. (AMEX:SVGA & SVGB), announced Monday that the company had entered into a letter of intent agreement to acquire all the outstanding stock of Post Machinery Company Inc.

Post Machinery, located in Portsmouth, N.H., manufactures folding carton and corrugated box forming machinery and had sales in 1989 of $15 million.

Stevens stated, ''Acquiring Post Machinery is another step in carrying out our visionary plan of bringing together those product lines that will provide a complete systems solution for our customers. Post's products are being marketed throughout the world and will not only add to our domestic sales but also impact our international marketing effort. We are very pleased with this addition to our family of companies and believe that both our customers and shareholders should benefit from this acquisition.''

Stevens Graphics Corp., headquartered in Fort Worth, designs, manufactures markets and services web-fed printing presses, collators, packaging and related graphic arts equipment on a worldwide basis. The company serves the packaging, commercial, business forms, and currency/securities segments of the printing and packaging industries. Stevens' strategy is to

create, by internal growth and by acquisition, a global company providing the commercial printing and packaging industries with a ''complete systems solution'' for printing, pre-press and post-press equipment.

MOUNTAIN VIEW, CA (APRIL 23) BUSINESS WIRE - Verity Inc. Monday announced TOPIC Real-Time, a breakthrough in text-understanding software that analyzes and selectively routes online real-time information to business professionals based on specified interest profiles.

In addition, the company announced a joint marketing and sales agreement with Dow Jones & Company Inc., for its TOPIC Real-Time technology. As a Dow Jones Alliance Developer, Verity becomes an authorized reseller of DowVision, a new business information service from Dow Jones.

TOPIC Real-Time was developed to solve the problems most business professionals face -- too much information and not enough time to disseminate it. TOPIC Real-Time acts as a ''knowledge agent,'' scanning documents based on content as they arrive from dynamic, online information sources.

If a document contains information pertinent to the user, TOPIC Real-Time immediately alerts the user that the document has arrived and is available for review. With TOPIC Real-Time, every user in a computer network can receive a customized executive briefing that puts the right information into the right hands at the right time.

TOPIC Real-Time is a new product, designed for the real-time analysis and dissemination of news and information. Based on the TOPIC Document Retrieval System, TOPIC Real-Time uses concept-retrieval technology to search for selected information. Rather than simply search for keywords, the system looks for subjects of interest using ''Topics,'' a building block composing a sharable knowledge-base.

A knowledge-base of Topics accurately and comprehensively defines particular subject areas that are most important to an organization, such as investments, companies, competitors, legislation, suppliers and others. The knowledge-base captures the expertise of users in Topics, and applies that expertise to profiling any number of incoming news sources for any

number of users across an organization.

Dow Jones publishes domestic and international newswires, The Wall Street Journal, Barron's, Dow Jones News/Retrieval and the Ottaway group of community newspapers. The company also owns Telerate Inc., a supplier of real-time financial information, decision support products and transaction services to the international business community.

Verity was founded in 1988 to address the rapidly growing commercial market for document retrieval systems. The company has over 100 customers in the commercial and government markets. TOPIC Real-Time is in use at major investment banks, market research firms, and intelligence agencies.

#90113b0617 04/23/1990 ~Business Wire

BEVERLY HILLS, CA (APRIL 23) BUSINESS WIRE - Harry J. Gray, chairman and chief executive officer of American Medical Holdings Inc., (ASE:AMIwi), the parent of American Medical International Inc. (AMI), (London and Zurich Stock Exchanges--AMI) announced Monday that it entered into an agreement to sell its investment in its Swiss hospital companies at an aggregate cash purchase price of 250,000,000 Swiss francs to Klinik Hirslanden AG, with financing provided by Union Bank of Switzerland.

The sale is subject to the obtaining of certain waivers from Swiss authorities.

Commenting on the announcement Gray said: ''The agreement to sell our Swiss operations is another significant step in our previously announced 18 month $1 billion divestiture program. We are very pleased with a contract price which meets our expectations. In addition, we are pleased that the Swiss operations will be sold to Klinik Hirslanden AG, who we believe will continue to provide the commitment to high quality health care that now characterizes AMI's Swiss operations.''

Further Gray said: ''AMI's divestiture program continues to progress on schedule at our pricing expectations.''

AMI was advised by The First Boston Corp.

AMI's Swiss operations consist of four acute care hospitals located in Zurich, Aarau, Bern and Lausanne. The Swiss operations represent the largest privately owned group of hospitals in Switzerland.

AMI, which founded the investor-owned hospital industry in 1960, is an international health care services company which operates 61 hospitals including 48 U.S. acute care hospitals, 6 U.S. psychiatric hospitals and three other hospitals in Spain and Greece.

The U.S. properties are concentrated primarily in the sunbelt states, principally in California, Florida and Texas.

#90113b0619 04/23/1990 ~Business Wire

FULLERTON, CA (APRIL 23) BUSINESS WIRE - Beckman Instruments Inc. (NYSE:BEC) reported Monday sales of $185.5 million for the quarter ended March 31, down 7 percent from the first quarter of 1989.

Net income was $8.0 million, or 28 cents per share. Compared to the 1989 quarter, earnings per share declined 26 percent. The effect of currency reduced reported sales by $1.2 million.

The following are major factors which affected the company's quarter to quarter comparison:

- During the first quarter of 1990 there was a continued reduction, particularly in the United States, of government funding for biological research. As a result sales of instruments from our Bioanalytical Group were below the prior year.

- Deliveries of the newly introduced Synchron CX4 and CX5 clinical chemistry analyzers were higher than normal in the first quarter of 1989 when first shipments were being made against a large initial backlog. By 1990 the backlog and shipments were at normal levels. Market share increases in clinical chemistry over the past 12 months have been gratifying.

- There is an increasing customer preference for operating leases in the diagnostic market. As a result more Synchrons were delivered under lease agreements in the first quarter of 1990. This had the effect of reducing reported sales as compared to the actual number of instruments delivered.

The availability of Beckman's lease program has been an important tool to increase instrument placements and follow-on reagent sales.

- First quarter 1990 investment in research and development was $3.5 million higher than the first quarter of 1989. This was consistent with the company's strategic direction and provided continuity for new product programs.

Louis Rosso, chairman, president and chief executive officer said: ''Beckman, along with other companies that serve publicly funded bioresearch, is experiencing tight market conditions. We are taking steps to manage operating expenses and improve the gross profit rate while at the same time continuing product development programs.

''Operating income before R&D was down only 2 percent for the quarter on a sales decrease of 7 percent. Research and development expenses were up 22 percent which recognizes our long term belief that the explosion in the understanding of biological processes will provide future opportunities.''

Beckman develops, manufactures and markets automated systems and supplies used in biological laboratories for research, quality control and clinical diagnostics. The company has 7,300 employees in 37 facilities throughout the world, and operates in more than 120 countries.

BELMONT, CA (APRIL 23) BUSINESS WIRE - Oracle Corporation, the world's largest supplier of database software and services, and Unisys Corporation today announced an agreement to port the ORACLE relational database managment system (RDBMS) and associated tools to the Unisys 2200 Series of mainframe computers. The development work will take place at Oracle's European development center in Edinburgh, Scotland.

Under terms of the multi-year contract, the two companies agreed that Oracle will have the primary responsibility for marketing and supporting the ORACLE RDBMS and associated tools on Unisys mainframes. Unisys will provide technical resources to support the project. Unisys also announced its intent to make the ORACLE RDBMS available on its A Series of mainframe computers.

Pricing for the ORACLE RDBMS on the Unisys 2200 Series will be competitive with Oracle offerings on similar hardware platforms. ORACLE will be available on the 2200 Series by the end of 1991. No date for the availability of ORACLE on Unisys A Series computers has been announced. ORACLE products are currently available on other Unisys platforms including the UNIX-U Series and BTOS/CTOS systems. About Unisys

Unisys Corporation is a $10 billion manufacturer of information systems including hardware, software, networking and services. Unisys has over 80,000 employees and 60,000 customers in more than 100 countries. About Oracle

Oracle Corporation, headquartered in Belmont, Calif., is the largest supplier of DBMS software and the third largest software and services company in the world.

Oracle develops and markets an integrated line of software products for database management, applications development, decision support and office automation as well as families of financial and manufacturing applications packages. All Oracle products are available on PCs, mini-computers and mainframes, and Oracle is the first and only relational database to run on supercomputers.

The company offers its products, along with related consulting and support services in 90 countries around the world. Oracle is a publicly-held corporation whose shares are traded on NASDAQ/NMS with ticker symbol ORCL.

For further information about Oracle, call Oracle Corporate Headquarters at 800/345-DBMS (345-3267) or write to Oracle Corporation at 20 Davis Drive, Belmont CA. 94002.

PORTLAND, OR (APRIL 23) BUSINESS WIRE - Emerald Computers Inc. the Portland-based manufacturer of the award winning LANstation I diskless workstation, Monday introduced the LANstation II, another exceptional 80286-based diskless workstation for local area networks.

The LANstation II is a high performance diskless workstation completely contained in a 12 inch by 12 inch footprint.

In keeping with Emerald's reputation for exceptional design and engineering, the LANstation II, standing only 2 inches high, comes standard with VGA video support, serial and parallel ports, built-in EMS 4.0 hardware support, and the choice of ARCnet, Ethernet or Token Ring network interfaces.

The LANstation II is available with either a 12.5 or a 16Mhz 80286 processor, up to four megabytes of high speed RAM, and can be equipped with a 1.44 megabyte floppy drive and/or a 20 or 40 megabyte fixed disk.

Like the LANstation I, the new LANstation II is designed and manufactured in the United States by Emerald. Emerald's commitment to quality is clearly evident in the warranty Emerald is able to offer to its customers. The LANstation II is covered by a full two-year warranty and is sold with a 30-day money back guarantee. Emerald Computers also continues its tradition of the 48-hour pledge -- any LANstation II returned to Emerald for warranty service will be repaired or replaced within 48-hours -- guaranteed.

The price for Emerald's manufacturer-direct customers is $995 for an ARCnet LANstation II, $1,095 for Ethernet, and $1,295 for Token Ring LANstation II models.

#90113b0642 04/23/1990 ~Business Wire

PALO ALTO, CA (APRIL 23) BUSINESS WIRE - ALZA Corp. (ASE:AZA) Monday announced net income of $5.5 million, or 16 cents per common share for the quarter ended March 31, 1990, compared to net income of $4.4 million, or 13 cents per common share for the quarter ended March 31, 1989.

Revenues for the first quarter of 1990 were $24.0 million compared to $23.4 million for the like quarter in 1989, reflecting increases in royalty income and research revenue and a decrease in net sales. The decrease in net sales was largely a result of timing differences for shipments to pharmaceutical company clients.

The primary determinant of net income for ALZA is royalty income from sales by client companies of products based on ALZA drug delivery technology.

Royalties and fees for the quarter ended March 31, 1990 were $8.6 million, compared to $6.3 million for the quarter ended March 31, 1989, with a substantial portion of this increase resulting from royalties received from Pfizer based upon sales of Procardia XL in the United States.

Procardia XL was introduced by Pfizer in the United States in September 1989 for the treatment of angina and hypertension and is rapidly gaining market share.

ALZA's product development agreements typically provide for royalties to ALZA on net sales ranging from 5 to 12 percent, with earlier signed agreements, such as the Pfizer Procardia XL agreement, at the lower end of this range and more recent agreements at the higher end. With respect to U.S. sales of Procardia XL, ALZA had an opportunity to select one of two different financial arrangements.

One would result in royalties to ALZA of 5 percent of product sales for approximately four years, and 6 percent thereafter. The other arrangement would result in royalties of approximately 4 percent until the end of 1991, and approximately 7 percent thereafter.

Under each arrangement, the reduced rate for the first few years reflects certain advanced payments and credits available to Pfizer from various ALZA/Pfizer agreements.

Subject to reaching final manufacturing agreements, it is anticipated that this new manufacturing facility will be activated during the current quarter ending June 30. During the early stages of activation, it is likely that the chargeable costs, including depreciation, will exceed third-party manufacturing revenues.

ALZA Corp. is a leading drug delivery systems company focusing on the development, manufacturing, and marketing of a broad range of pharmaceutical products based on ALZA's proprietary technologies. ALZA's therapeutic systems provide for rate-controlled, programmed administration of medication for both human and veterinary applications.

#90113b0643 04/23/1990 ~Business Wire

LOS ANGELES (APRIL 23) BUSINESS WIRE - MAXXAM Inc.

(ASE/PSE/Philadelphia:MXM) Monday reported net income of $33.8 million, or $3.55 per share, for the three months ended March 31, 1990, as compared with net income of $7 million, or 82 cents per share, for the same period in 1989.

Sales in the first quarter of 1990 were $572.3 million, compared with $572.2 million, for the first quarter of 1989.

MAXXAM operates in three industry segments: aluminum operations, forest products operations and real estate management and development. Financial information by industry segment for the three months ended March 31, 1990 and 1989 is as follows:

Operating income for the first quarter of 1990 from aluminum operations increased when compared with the first quarter of 1989 despite slightly lower sales, primarily due to higher volume for alumina and improved performance in the flat-rolled products division.

First quarter 1990 results also included above-market prices for significant quantities of alumina and primary aluminum sold forward in prior periods under long-term contracts and record or near record operating performance at the company's smelters.

Sales from aluminum operations declined $12.4 million, or 2.4 percent, principally because of a significantly lower volume of primary products caused by the sale of two overseas smelters and because of lower primary prices.

Operating income for the first quarter of 1990 from forest products operations increased over the first quarter of 1989 primarily as a result of an overall increase in selling prices and, to a lesser extent, increased lumber shipments.

MAXXAM experienced a reduction in the operating loss from real estate operations primarily as a result of increased sales at its Lake Havasu City, Ariz., and Palmas del Mar, Puerto Rico, real estate developments.

MAXXAM is engaged in aluminum operations through Kaiser Aluminum & Chemical Corp., a fully integrated aluminum producer and a subsidiary of KaiserTech. Forest products operations are conducted through MAXXAM's wholly owned subsidiary, The Pacific Lumber Co. and real estate management and development operations are conducted through several wholly owned subsidiaries.

MOUNTAIN VIEW, CA (APRIL 23) BUSINESS WIRE - Momenta Corp. Monday announced the selection of Kevin M. Mankin to fill the newly created position of director of product marketing.

In this role, Mankin will manage worldwide product definition, hardware, software, communications and peripherals product marketing.

Before joining Momenta, Mankin was marketing director of product development for Zenith Data Systems, one of the top manufacturers of laptop computers worldwide.

During his five years at Zenith, he managed the development of computer systems products that firmly established the company's position as the leeading supplier of IBM compatibles.

Prior to Zenith, he was product marketing manager and director of engineering for Morrow Designs, developer of the world's first portable personal computer.

Mankin reports to John F. Rizzo, vice president of marketing. Rizzo said: ''Kevin's strong success in driving Zenith to the dominant position in the laptop market will provide Momenta with a unique perspective in creating a new class of personal productivity device.

''This device promises to push the envelope of value and technology beyond what current laptop computers can supply.''

Momenta is in the development phase of a radically new personal productivity device that will meet the needs of business professionals in the 1990s and beyond.

Momenta was founded in October, 1989, and currently employs 23 people at its facility in Mountain View.

SAN JOSE, CA (APRIL 23) BUSINESS WIRE - The first SPARC RISC microprocessor for embedded applications runs 18 MIPS at 25 MHz, and is priced below $80.

The CMOS CY7C611 SPARC RISC Controller, from Cypress Semiconductor's Ross Technology subsidiary, is aimed at the next generation of copiers, laser printers, X-terminals, communications controllers and I/O controllers.

The CY7C611 is fully software compatible with Cypress's CY7C601 SPARC microprocessor, and supports a direct interface to system memory. The CY7C611 communicates with external memory via a 24-bit address bus and a 32-bit instruction/data bus.

The CY7C157 Cache RAM can be used directly with the CY7C611 to provide a zero wait-state memory system. The CY7C289 64K x 8-bit Registered PROM is designed to interface directly to the CY7C611, and also delivers zero wait-state performance. As a design option, the CY7C602 Floating Point Unit can interface directly to the CY7C611 to speed floating-point system performance.

The CY7C611 is supported by a wide range of hardware and software development tools. These include the entire suite of compiler and monitor/debugger tools from Sun Microsystems, including Sun's SPARCsim software architectural simulator. Additional support will be available in the second half of this year from Logic Automation's SmartModels simulators and the Biomation CLAS 4000 Logic Analyzer.

Cypress Semiconductor Corp. is a leader in the design, development and manufacture of a broad line of high-performance digital integrated circuits, fabricated using its proprietary 0.8 and 1.2 micron CMOS and BiCMOS technologies.

Cypress offers a range of products, including RISC microprocessors and peripherals, CMOS PLDs (programmable logic devices), static RAMs (random-access memories), PROMs (programmable read-only memories), logic devices, high-speed bipolar and BiCMOS ECL (emitter-coupled logic) devices and high-speed static RAM modules.

Cypress's Ross Technology Inc. subsidiary produces a family of very high-performance microprocessor products based on the SPARC architecture and implemented in Cypress's 0.8 micron double-layer metal CMOS technology.

#90113b0659 04/23/1990 ~Business Wire

BOSTON, MA (APRIL 23) BUSINESS WIRE - Congress can be expected to begin taxing some employee benefit programs such as retirement savings and health care and child care programs as it begins its annual ritual of legislative

changes to meet the deficit reduction goals outlined in the Gramm-Rudman Act, according to Harry Conaway, a principal in the Washington D.C. office of William M. Mercer Inc., the international employee benefits consulting firm.

Speaking to a group of Mercer clients today in Newton, Conaway warned local business leaders that as a result of Congressional and regulatory moves, employers will either have to raise costs to maintain programs or cut the level of benefits provided to employees.

Specifically, Conaway expects Congress this session to implement stricter fiduciary and investment rules for employer-managed retirement plans due to a small number of abuses.

Secondly, he expects Congress within the next year seriously to consider mandating more extensive employer-paid health insurance coverage to aid the 30 million Americans who do not have adequate health care insurance coverage. The result, he said, will likely be increased costs for employers and reduced benefits for employees.

Conaway, the former associate tax legislative counsel to the U.S. Treasury Department, recommended that local companies carefully monitor current and up-coming government legislation and advocated the use of industry associations and coalitions, lobbying, and other proactive vehicles in order for local companies to have an impact.

''Congress' interest in adding new restrictions on the employee benefits area is largely the result of an increasing misinterpretation that current employee benefit programs are being mismanaged by employers to the detriment of their employees,'' said Conaway.

While agreeing that Congress' concerns were legitimate in a small number of instances, Conaway warned that the solutions currently on-the-table would necessarily apply to all companies, and thus, would dramatically increase the financial burden on all employers, not only those firms engaging in improper behavior.

#90113b0660 04/23/1990 ~Business Wire

LOUISVILLE, CO (APRIL 23) BUSINESS WIRE - Storage Technology Corp.

(STK:NYSE) Monday reported a 21 percent increase in revenue and a six-fold increase in net income excluding extraordinary items for its first quarter ended March 30, 1990 compared with the first quarter of 1989.

Revenue for the quarter totaled $259.9 million, compared with $214.1 million for the first quarter last year.

Net income for the first quarter of 1990, excluding an extraordinary charge of $683,000 resulting from the planned redemption of $34.2 million of 13.5 percent Senior debentures, was $9.2 million, or $.34 per share. Net income for the first quarter of 1989, excluding an extraordinary gain of $11.3 million, was $1.5 million, or $.06 per share.

''Revenue and income exceeded our expectations due to better than expected revenue acceptances of our 4400 Automated Cartridge System and 4480 18-track cartridge drives coupled with expenditures that came in below plan,'' said Ryal R. Poppa, chairman, president and chief executive officer.

''We are pleased with the continuing, strong reception for our 18-track tape products overall, particularly the 4400 library. We cannot assure at this time, however, that the 21 percent revenue growth rate we experienced in the first quarter will sustain itself for the balance of the year. Our policy of recognizing revenue on customer acceptance rather than product shipment can contribute to some degree of fluctuation in earnings on a quarterly basis,'' Poppa said.

''We are gratified by the outstanding response to our recent common stock offering of 6.5 million shares. By using the proceeds to retire debt, we have not diluted the existing share base and we will improve our flexibility to invest resources in important future products and technologies. If the 6.5 million shares were assumed to be outstanding at the beginning of the quarter and assuming no use of proceeds, net income would have been $.26 per share rather than $.32 per share,'' Poppa said.

Storage Technology Corp. manufactures, markets and services, worldwide, information storage and retrieval subsystems for high-performance computers.

#90113b0663 04/23/1990 ~Business Wire

NASHVILLE, TN (APRIL 23) BUSINESS WIRE - ALERTINE, a 24-hour, toll-free hotline for employees to report their concerns, recently expanded into Canada, according to Don W. Walker, president of Nashville-based Business

Risks International (BRI).

''Businesses everywhere are finding that when given the opportunity, their employees will do their part to stop company losses. BRI's ALERTLINE Program provides this opportunity by promoting a company's employees as the center for a positive, pro-active campaign to prevent losses,'' said Walker.

ALERTLINE is effective because it provides a safe, uncomplicated way for employees to anonymously report their concerns and serves as a communication bridge to management. ''Loss prevention is our first goal,'' said Jerry Frank, head of BRI's Loss Management Division which manages the ALERTLINE Program and Response Center.

Some of the issues identified and verified through the ALERTLINE are internal theft, fraud, drug use and storage on company property, fraudulent Worker's Compensation claims and expense account padding.

Kay Jeweler's, a U.S. client for over two years, has had tremendous success with the program. Paul Talbott, director of security for Kay Jeweler's, said, ''The ALERTLINE allows employees to do the 'right thing' without having to put themselves in an awkward, embarrassing or even dangerous position.

''With regular encouragement, we believe our employees will report what they know, ensuring future prosperity for our company and our employees.''

ALERTLINE has been operating in the U.S. since 1983. Industries using the program include construction, banking, retail, manufacturing, hospitality, trucking, distribution, insurance, transportation and precious metals.

Business Risks International is a worldwide professional services firm specializing in security consulting, investigations and loss prevention. They provide security consulting services to multinational corporations, government agencies and other business entities.

BRI works with clients to improve security, reduce vulnerabilities and provide continuing support to security programs in a cost-effective manner. BRI has offices in 22 U.S. cities; London, England; Hong Kong; Taiwan; the Phillippines; Singapore; and Thailand.

#90113b0664 04/23/1990 ~Business Wire

TROY, MI (APRIL 23) BUSINESS WIRE - Handleman Company (NYSE: HDL) Monday announced preliminary indications are that sales for the fourth quarter ending April 28, are expected to be slightly ahead of sales for the comparable period last year.

Sales for the quarter ended April 29, 1989, were $151.4 million. Preliminary indications are that earnings per share for the fourth quarter will be between 8 cents and 15 cents per share, compared to 33 cents per share a year ago. Actual results for the quarter and year ending April 28 1990, are expected to be reported in mid-June. Net sales for the year are estimated to exceed $710 million, which would be the highest sales in the company's history. Net sales for the year ended April 29, 1989, were $646.7 million. Although the earnings for fiscal 1990 will represent the second best earnings in the company's history, the earnings are expected to be below last year's record earnings of $1.28 per share.

For the fourth quarter, video sales are estimated to increase approximately 20 percent over year-ago levels of $50.2 million. Music sales during the fourth quarter are expected to be slightly below last year's level of $85.1 million. Book sales are estimated to increase slightly over year-ago levels of $11.7 million and home computer software sales are estimated to decline by more than $1.5 million from last year's level of $4.4 million.

Sales during the quarter have been negatively impacted by significantly higher product returns than a year ago, and by restricted shipments to the majority of the company's customers because of customers' concerns regarding the general retail sales environment and the customers' storewide inventory levels. In addition, music sales continued to be soft because of a lack of strong new releases.

Increased sales by manufacturers of compact disc players leads the company to believe that the sale of compact discs will continue to grow. The Electronic Industries Association recently reported that, for the first calendar quarter of 1990, sales of video cassette recorders (VCR's) are 15.9 percent ahead of sales for the comparable period last year. A larger installed base of VCR's serves to expand consumer demand of for-sale video product. In addition, prices of for-sale video product are continuing to decline, making it more affordable for consumers to buy prerecorded video cassettes.

Handleman Company is the largest rack jobber of home entertainment products to mass merchandisers in North America. Products include prerecorded music, prerecorded video, books and home computer software.

#90113b0676 04/23/1990 ~Business Wire

SANTA ANA, CA (APRIL 23) BUSINESS WIRE - EECO Inc. (ASE:EEC) Monday stated that their previously announced negotiations for the sale of their Maxi-Switch Computer Keyboard subsidiary have been terminated.

EECO Inc. chairman, Robert B. Bonney, stated that the terms of the proposed sale were unsatisfactory to the company's bank which holds liens on the assets involved. The company has entered into discussions with two other potential purchasers for Maxi-Switch.

Bonney also stated that EECO is in preliminary discussions with potential buyers for possible sale of several or all of the company's subsidiaries as going concerns. However, no assurance can be given at this time that any agreement will be reached.

The company's credit agreement with the bank expired on March 31, and the bank has informed the company that it will not extend any further advances to the company. However, the bank has not declared the loan in default.

Such a decision by the bank would have a material adverse affect on the company's operations. In this event, the company would be forced to immediately attempt to secure other sources of funding which may not be available due to the company's current financial condition, and to consider other avenues available to it including a restructuring under the protection of Chapter 11.

#90113b0679 04/23/1990 ~Business Wire

HOUSTON (APRIL 23) BUSINESS WIRE - Browning-Ferris Industries Inc. (NYSE: BFI) Monday reported income from continuing operations for the second quarter of fiscal 1990, ended March 31, 1990, of $71,921,000, or 47 cents per share, on revenues of $708 million as compared to the restated operating results for the comparable prior year period which reflect income from continuing operations of $62,945,000 or 42 cents per share, on revenues of $582 million.

After giving effect to a one-time charge of $295 million for discontinued operations and related operating losses, the second quarter resulted in a net loss of $226,342,000 or $1.48 per share. The results compare with a

net income of $58,783,000 or 39 cents per share for the second quarter of fiscal 1989.

Income from continuing operations for the first six months of fiscal 1990 was $141,697,000 or 93 cents per share on revenues of $1,406 million. The restated operating results for the like six-month period of the prior fiscal year reflect income from continuing operations of $125,144,000 or 83 cents per share on revenues of $1,146 million.

A net loss for the six months ended March 31, 1990 of $159,832,000 or $1.05 per share was reported as compared to net income of $118,433,000 or 79 cents per share for the six months ended March 31, 1989.

On April 5, 1990, the company announced its withdrawal from the hazardous waste collection, treatment and disposal business. As a result of the decision, under a plan approved by the Board of Directors, the company has incurred a one-time after-tax charge of $295 million, or $1.93 per share, net of anticipated proceeds from the sale of the hazardous waste assets and operations.

The provision consists of a writedown of the hazardous waste assets, the immediate recognition of future closure and post-closure expenses of certain disposal sites and other items associated with the decision.

In its announcement the company pointed out that the hazardous waste business represented two percent of revenues in fiscal 1989 and has suffered operating losses for the past year and a half.

The number of common and common equivalent shares used to compute net income (loss) per share for the six months was 152,714,000 vs. 150,684,000 for the first six months of fiscal 1989.

Browning-Ferris Industries Inc. is one of the largest publicly held companies whose subsidiaries and affiliates collect, transport, treat and dispose of commercial, residential and municipal solid waste and industrial wastes.

BFI subsidiaries are also involved in recycling, resource recovery facilities, medical waste services, portable restroom services and municipal and commercial sweeping operations.

#90113b0684 04/23/1990 ~Business Wire

COLUMBUS, IN (APRIL 23) BUSINESS WIRE - Cummins Engine Co. Inc. reports

financial results:

(Dollars in millions, except per share amounts)
(Unaudited)

	FIRST QUARTER ENDED	
	April 1, 1990	April 2, 1989
Net sales	$861.4	$920.8
Earnings before income taxes and minority interest	14.1	28.1
Net earnings	8.9	19.5
Earnings available for common shares	4.3	17.5
Primary earnings per common share	41 cents	$ 1.61
Fully diluted earnings per common share	41 cents	1.45

Cummins Engine Co. Inc., Monday reported first quarter net earnings of $8.9 million, or primary and fully diluted earnings per common share of 41 cents, on sales of $861.4 million.

The company had announced previously it expected to be modestly profitable in the first quarter, which ended April 1.

In the first quarter of 1989, Cummins reported net earnings of $19.5 million, or $1.61 primary earnings per common share and $1.45 fully diluted, on sales of $920.8 million.

First quarter 1990 production of North American heavy-duty trucks was down 23 percent compared to the same quarter one year ago. Cummins' share of this market approximates 50 percent. Despite the drop in demand from its major market, Cummins said several factors contributed to its profitable first quarter, including higher margins on B and C Series engines, increased interest income and reduced warranty expense.

In the fourth quarter of 1989, Cummins reported a net loss of $9.8 million or primary and fully diluted loss per common share of $1.24, on net sales of $855.9 million. Key factors in Cummins' return to profitability in the first quarter were stringent expenditure controls and a significant decrease in warranty expense.

Cummins is a major producer of diesel engines, components and power systems for heavy-duty trucks and industrial machinery.

#90113b0691 04/23/1990 ~Business Wire

NEWPORT, KY (APRIL 23) BUSINESS WIRE - NS Group Inc. (ASE:NSS) Monday announced its fiscal 1990 second quarter and six month results.

Net sales for the second fiscal quarter ended March 31, 1990, were $62.2 million compared to $57 million for the second quarter a year ago. Net income was $3.4 million, or 26 cents per share, vs. $4.3 million, or 32 cents per share, for the comparable quarters.

For the six months ended March 31, 1990, net sales were $118.9 million vs. $101.8 million for the first six months of fiscal 1989. Net income for the six month comparable periods was $6.4 million, or 48 cents per share, vs. $5.1 million, or 38 cents per share, a year ago.

C.R. Borland, president and chief executive officer of NS Group Inc., commented: ''We are extremely pleased with the results of our second fiscal quarter. Tubular product shipments are up 44 percent over the second quarter of fiscal 1989, accounting for the improvement in net sales for the comparative quarters.

''Unfortunately overall weaker pricing in the steel industry in general as well as a decline in steel bar shipments for the comparative quarters resulted in earnings being off from a year ago. More importantly, though we are very pleased that the upward trend has continued for the first six months of 1990.

''Tubular and bar shipments for the second quarter have increased 12 percent and 15 percent respectively, over the first quarter of fiscal 1990. Everything points to an even stronger finish in the second half of the year.''

Borland noted that the company's financial position is very strong, with over $45.5 million in cash and short-term investments, including the proceeds earmarked for construction of Newport Steel's continuous caster.

The new continuous slab caster at Newport Steel is scheduled to begin operation late in the fiscal year, and is expected to greatly improve product quality and operating efficiencies at the tubular steel manufacturer.

NS Group Inc. is a holding company that owns four major operating subsidiaries: Newport Steel Corp., a tubular steel producer; Kentucky Electric Steel Corp., a producer of steel bars; Erlanger Tubular Corp., a processor of tubular products; and Imperial Adhesives Inc., an adhesives manufacturer.

NS Group Inc.'s common stock (symbol: NSS) is traded on the American

Stock Exchange.

#90113b0697 04/23/1990 ~Business Wire

NEW YORK (APRIL 23) BUSINESS WIRE - ASARCO Incorporated (NYSE:AR) Monday announced that its board of directors has approved an enhancement to its previously announced program to expand and modernize the company's copper production facilities at a total capital cost of approximately $350 million.

The enhanced program calls for additional expenditures at the Ray copper mine in Arizona and the El Paso copper smelter in Texas. The expansion program was first announced in February 1989 at a cost of $260 million.

The expansion program will increase total mine output by 81,000 tons of contained copper to 325,000 tons, and copper production at El Paso by 30,000 tons to 110,000 tons of anode copper from concentrates. Completion of the program in 1992 remains on schedule. In making the announcement, Richard de J. Osborne, Asarco chairman, president and chief executive officer said, ''The expansion as now planned will give Asarco greater operating flexibility as it proceeds to integrate its copper mining and smelting capacity by 1992.

The Ray mine portion of the program includes further expanding the mining capacity and installing a new in-pit ore crusher, mill and concentrator at a revised cost of $170 million, or $40 million greater than the original $130 million announced in February 1989. The new mill's planned capacity will increase by 10,000 tons per day up to 30,000 tons per day from the originally planned 20,000 tons per day.

In-pit crushing and conveying of ore to the new mill is still planned, however the company will now construct a new tailings dam at a site near the mine rather than build an 18-mile pipeline to carry tailings from the new mill to the present tailings pond. The increased capacity at the new more efficient mill will allow for a decrease in the operating rate of the existing mill thus improving recoveries and lowering costs.

Existing plans remain on schedule for replacing the present 30,000-ton-per-day crusher adjacent to the open-pit mine with a 60,000-ton-per-day, portable in-pit crusher and conveying system which will considerably reduce truck haulage of ore. The project is scheduled for completion by 1992 and will increase Ray's annual output of copper by an additional 44,000 tons to 159,000 tons.

The modernization of the El Paso smelter will now be implemented at a cost of $81 million, which is approximately $50 million more than that previously announced. The enhanced modernization involves the installation of a new furnace and related ConTop technology developed by KHD of West Germany, instead of retrofitting the existing furnace. The new furnace will have 37.5% more capacity than originally planned and will produce 110,000 tons per year of anode copper from concentrates. Total defined capacity of the plant, which includes treatment of copper scrap, will increase to 135,000 tons per year. Construction of a new furnace also will eliminate the need for an extended downtime period required to retrofit.

Additional mining equipment will also be required. ASARCO Incorporated, headquartered in New York City, is one of the world's leading integrated producers of nonferrous metals, principally copper, silver, lead, zinc and gold. Asarco also produces specialty chemicals, minerals and other industrial products and provides environmental services. Asarco had 1989 sales of $2.2 billion.

NEW YORK (APRIL 23) BUSINESS WIRE - Cushman & Wakefield announced Monday its intention to form a joint venture with a major European commercial real estate firm.

Through the joint venture, a first for the real estate services industry, Cushman & Wakefield will enter into a cooperation agreement with Healey & Baker, a London-based firm specializing in commercial real estate in the United Kingdom and Europe. The announcement was made in New York by Arthur J. Mirante II, president and chief executive officer of Cushman & Wakefield, and in London by Paul Orchard-Lisle, senior partner of Healey & Baker.

Cushman & Wakefield will provide services in the United States and Canada for Healey & Baker clients. Healey & Baker will provide services in the United Kingdom and Europe for Cushman & Wakefield clients. Among the services to be offered will be office and industrial brokerage, consulting and advisory services, and real estate investment banking.

The agreement creates a board of managers which will meet quarterly, and calls for the firms to consult with each other for the planning and expansion of existing operations. Each firm will designate a senior representative in its headquarters office responsible for the joint venture. In addition, Cushman & Wakefield will locate a professional in

Healey & Baker's London office, and Healey & Baker will do the same in Cushman & Wakefield's New York office.

''Healey & Baker will provide our clients the local market expertise they need to plan and execute their real estate activities in Europe,'' says Arthur Mirante. ''Cushman & Wakefield enjoys relationships with numerous American multinational corporations. Healey & Baker has similar relationships with European-based companies. Together we can capitalize on those relationships and provide our clients local market coverage and service. It's the combination our clients need on the eve of the European economic union in 1992.

Founded in 1917, Cushman & Wakefield provides real estate services exclusively to businesses through its 53 offices in major markets throughout the United States. Its diversified services include office and industrial/technology sales and leasing, appraisal, financial and management services, development consulting, and market research. Cushman & Wakefield is a subsidiary of The Rockefeller Group.

Healey & Baker, one of the largest firms of its kind in the United Kingdom is an indpendent partnership that specializes in commercial real estate agency and consultancy in the United Kingdom and Western Europe.

The firm has a strong tradition of retail property and agency. It is a field leader in office, industrial and investment markets. In addition, it provides town planning, asset valuation, property management, and building surveying services. The firm maintains 11 offices throughout Europe.

HADDONFIELD, NJ (APRIL 23) BUSINESS WIRE - United Medical Corp.'s (ASE:UM) income from continuing operations for the quarter ended March 31 was $405,000 or 15 cents per share versus $258,000 or 8 cents per share a year ago.

Revenue for the quarter was $10,544,000 in 1990 compared to $9,526,000 in 1989. Income from discontinued operations was $8,324,000 or $2.76 per share in 1989 reflecting the gain on the sale of Renal Care Centers Corp.

Net income for the first quarter of 1990 was $405,000 or 15 cents per share versus net income in 1989 of $8,192,000 or $2.71 per share on 2,744,000 shares and 3,018,000 shares respectively. Included in 1989

results were the gain on the sale of Renal Care Centers as well as a charge of $390,000 or 13 cents per share reflecting the cumulative effect of adopting FASB Statement No. 96, ''Accounting for Income Taxes.''

John Aglialoro, chairman of United Medical, stated, ''All five of United Medical's business units possess potential for a profitable future. UM's restructuring of the past few years has been successful and we look forward to consistent operating earnings results in 1990.''

MURFREESBORO, TN (APRIL 23) BUSINESS WIRE - National HealthCorp. L.P. (ASE: NHC), one of the nation's largest long-term health care chains, Monday announced first quarter revenues rose 17 percent to $37,722,000, compared to $32,261,000 a year earlier.

Income for the quarter ended March 31, climbed up six percent to $3,457,000 from $3,247,000 for the like period last year. Earnings per unit increased from 47 cents to 50 cents.

NHC President Andy Adams said highlights of the first quarter included the addition of 164 long-term health care center beds. In addition, Adams said the company has increased its cash distribution from 25 cents to 30 cents per unit for the quarter ended March 31. Unitholders of record on March 30 will receive 30 cents per unit. The cash distribution will be paid on May 15.

NHC, a publicly traded limited partnership, now operates 73 health care centers with 8,850 beds. NHC's other services for the nation's elderly include Alzheimer's units, retirement apartments, and homecare.

HOUSTON (APRIL 23) BUSINESS WIRE - Service Corporation International (SRI) announced Monday that it will redeem 50,000 shares of its Variable Term Preferred Stock, Series B on May 9, 1990. On that date, these shares will be redeemed at a price of $1,000.00 per share and the final dividend will also be paid.

The company stated that these shares are being redeemed under the provisions set forth in SCI's Statement of Resolution that established these shares which sets forth the rights, preferences and limitations of the Series B Variable Term Preferred Stock.

SCI is the largest owner and operator of funeral homes and cemeteries in North America. The company owns 551 funeral homes and 124 cemeteries in the United States and Canada. It also owns Provident Services, Inc. which provides capital financing to independent funeral homes and cemeteries. During the year ended December 31, 1989, SCI had revenues of $518.8 million.

#90113b0717 04/23/1990 ~Business Wire

DAYTON, OH (APRIL 23) BUSINESS WIRE - The Reynolds and Reynolds Co. (NYSE:REY) reported sales of $150.9 million and net income of $6.5 million or 61 cents per share for the second quarter ended March 31.

Sales for the six months were $290.3 million with net earnings of $12.7 million, or $1.18 per share.

''In view of difficult market conditions, we are pleased with our performance. We have had seven consecutive strong quarters,'' said David R. Holmes, Reynolds president and CEO.

Reynolds' computer systems segment reported sales of $62.3 million in the second quarter and $120.9 million for the six months.

Incoming orders for Reynolds automotive computer systems have continued to pick up since the National Automobile Dealers Association show in February. ''We announced our 5.0 software enhancements for our ERA in-house computer system at the show, just four months after our 4.0 release. The 5.0 release added several key applications and more than 150 enhancements to the sales, service, parts and business systems.

The ERA system continues to get stronger and stronger. There is no question we have the system that dealers need. Their response at and

since the show has exceeded our expectations,'' said Holmes. He indicated that the company's strengthening order backlog for computer systems will have a favorable impact on the second half of the year.

Sales of the business forms segment of the company were $88.6 million in the second quarter and $169.4 million for the six months. ''Reynolds' business forms segment profits have continued to improve over the second half of last year and have increased over the first quarter. While automotive forms sales have slowed slightly, the bulk of the sales decline has been in the company's general printing business. Part of the general printing decline can be attributed to our intentional exit from some low margin forms business.

''We'll continue to build on sales growth we've achieved from the first to second quarters. Our emphasis on vertical marketing, product diversification and value-added customer service will help us achieve a stronger second half in terms of sales and earnings,'' Holmes said.

Reynolds and Reynolds, headquartered in Dayton, is a major supplier of information processing systems, including business forms and computer systems to automotive, professional, medical and general business markets.

STAMFORD, CT (APRIL 23) BUSINESS WIRE - Lone Star Industries Inc. Monday announced that, as part of the restructuring program announced in November 1989, it has sold substantially all of its 50 percent interest in Mountain Cement Co. and a related cement distribution terminal.

The company today sold 49 percent of the joint venture to its partner, Centex Corp. Lone Star had owned a one-half interest in the Laramie, Wyoming-based cement manufacturer.

Centex, based in Dallas, also purchased Lone Star's cement distribution terminal and related facilities at Salt Lake City. These facilities had been earmarked for sale under the restructuring program.

The terms of the sale were not disclosed.

Lone Star Industries and its affiliates are leading producers of cement and a major source of ready-mixed concrete, sand and gravel, crushed stone

and other construction materials.

LONDON (APRIL 23) BUSINESS WIRE - April 23, 1990, British Gas (NYSE:BRG) Monday announced substantial reductions in the charges for transporting gas through its pipeline network for other organizations who wish to compete with the Company by selling gas direct to larger consumers.

In order to facilitate competition, British Gas has cut its charges by between 20 and 40 percent.

The new detailed tables of charges will enable organizations to see quickly the charges for transporting gas from one of the four terminals where gas is brought ashore to a selection of localities around the country. The tables also show the charges for a range of load factors - i.e. the average usage of the capacity booked in the pipeline network - between 30 percent and 90 percent.

In March 1989, British Gas set up its Gas Transportation Services Department actively to market space in its pipeline system to anyone who wanted to have gas transported within Great Britain. In its first year of existence, the Gas Transportation Services Department has handled more than 4,000 specific requests for transportation charges from the coastal reception terminals to over 2,000 sites.

In February this year, the first contract for gas transportation was signed with Quadrant Gas. Currently, several other negotiations are well advanced.

John Huggins, Director of Gas Transportation Services at British Gas, said: ''This reduction in charges shows our determination actively to market space in our pipeline system. It will help to encourage genuine gas-to-gas competition in the market.''

British Gas, headquartered in London, is the largest integrated company in the Western world and is primarily involved in the purchase, transmission, and sale of natural gas to domestic, industrial and commercial customers in Great Britain. Important support activities to its marketing efforts include appliances trading and customer services to domestic gas customers. British Gas is also active in the exploration for and production of hydrocarbons both offshore and onshore. Expertise developed

in the gas business is offered for sale overseas through British Gas International Consultancy Service. British Gas American Depositary Receipts are traded on the New York Stock Exchange. One ADR is equivalent to ten Ordinary Shares.

#90113b0735 04/23/1990 ~Business Wire

MANSFIELD, MA (APRIL 23) BUSINESS WIRE - Codex Corp. Monday introduced a new backbone architecture for its industry-leading 674X Series of statistical time division multiplexers.

The software-based architecture will be available for the Codex 6740, 6742 and 6745 STDMs and will allow users to create "mesh" data networks consisting of up to 32 nodes.

The Expanded Networking architecture will be available as a system software option on the entire 674X Series. It will allow customers to upgrade current networks using their installed hardware and network links. Expanded Networking provides features on STDMs that previously have only been available on more expensive T-span multiplexers.

The architecture provides sophisticated automatic routing algorithms for advanced network resiliency and constantly redistributes traffic over network links to maintain minimum delay for all connections. It provides "Bandwidth on Demand", initiating dial modem or ISDN links to provide additional bandwidth as needed for the network backbone.

According to Ted Strain, vice president and general manager of Codex data networking, "Codex is committed to helping customers continually enhance the value of their networks. We have developed a new backbone architecture for our flagship stat mux product line to provide advanced functionality for both new and existing data networks."

With Codex Expanded Networking, geographically distributed nodes cooperate as a tightly-coupled entity. Users define network entry and exit points, and the network determines the minimum delay path. As network traffic changes or line quality degrades, the network automatically compensates to maintain the overall optimum performance. Similarly, the network reroutes traffic automatically if a link or a node fails.

Network operators can preconfigure backbone links for automatic temporary

use on switched services, such as the public telephone network, a value-added network, or an ISDN network. Based on user-defined criteria such as time of day or degradation in the quality of links, the network will automatically establish the necessary connection, and then disconnect the link when the need abates.

Also available on the 6742 and 6745 will be X.25 networking functionally over the Expanded Networking backbone. This functionality is currently available on the existing 6742/45 architecture.

The 674X Series is fully managed by the Codex 9800 Series Integrated Network Managment System, and is compatible with Codex's broad product line of T1 and X.25 networking products.

#90113b0736 04/23/1990 ~Business Wire

AKRON, OH (APRIL 23) BUSINESS WIRE - Firestone is extending its recall of tubeless over-the-road truck tires announced earlier this year by an additional 89,500 units to include all tubeless tires produced between mid-1987 and late 1989 in Bilbao, Spain, and imported into the United States. Firestone had announced an earlier recall of 86,000 of these tires on Jan. 4.

The tires being recalled are Firestone-brand tubeless tires bearing a serial number beginning with "VT" followed by a combination of nine numbers and letters.

Because the tires were produced between the 27th week of 1987 and the 43rd week of 1989, the last three digits in the affected serial numbers range from "277" through "439."

The sidewalls of the tires also are stamped "Made in Spain." Also being recalled are Dayton-brand tubeless tires with the designation Dayton WT Radial.

Firestone officials said these tires may develop a small crack in the innerliner. There is the possibility that such a crack in a tubeless tire could eventually cause a sidewall failure.

While the tires have been in service in North America over a two-year period, there have been no reports from users of any accidents or injuries resulting from this condition in these tires.

The innerliner crack condition, however, has been observed in some of these tires when they were removed from service for other reasons, such as

road damage or for retreading.

Firestone officials emphasized that the recall is voluntary and that only the tubeless versions of these tires are included in the recall. Tube-type tires are not involved.

Firestone dealers, stores and customers are in the process of being notified. Users are requested to call Firestone customer relations at 1-800-356-4644 for additional details.

CONTACT: Bridgestone Firestone Inc., Akron, Bob Troyer, (216) 379-6590.

#90113b0739 04/23/1990 ~Business Wire

HAMILTON, Bermuda (APRIL 23) BUSINESS WIRE - Norex America Inc. (ASE:NXA) Monday reported net income for its fiscal quarter ending March 31 of $1,031,958, or 24 cents per share, on revenues of $12,525,712.

This compares with a profit in the January/February/March 1989 fiscal quarter of $436,600, or 10 cents per share, on revenues of $3,148,000 when the company was in its since discontinued cruise business.

The above reported profit includes earnings from continuing operations of $840,695, or 20 cents per share. During the current fiscal 1990 third quarter, the earnings from the company's previously discontinued cruise business were $191,263, or 4 cents per share, on revenues of $323,300, which ws from charter income of a leased vessel.

The company's profit for the nine months ended March 31, 1990, was $2,257,752, or 52 cents per share, on revenues of $25,033,376. This is compared with a profit of $2,249,700 or 51 cents per share on revenues of $9,319,000 for the comparable nine months fiscal 1989, as restated.

This included earnings from the discontinued cruise business where in 1989 there was a profit for the prior year's period of $1,565,900, or 36 cents per share. In the current nine months of the company's fiscal 1990 year, the discontinued operation had a profit of $923,275, or 21 cents per share on revenues of $1,286,000, which was primarily from charter income on the vessel SS Veracruz, which is pending sale in May of 1990.

Kristian Siem, chairman, noted that the continuing operations for both reported years contain the results of Norex America's 80 percent ownership interest in Norgulf Shipping Ltd., a Houston-based chartering firm, which was acquired in July of 1989.

Prior thereto in the previous year, Norgulf was 66.5 percent owned by Norex PLC, the company's principal shareholder, and its results have

therefore been reflected on a 66.5 percent basis in the restated financial results for the 1989 fiscal year.

The income from continuing operations in the current fiscal year was from the company's operating investments in ship chartering, a tanker, cruise ship casino management, all of which operated profitably, and from interest on the company's substantial cash and investment in rig notes.

Norex America Inc. is currently engaged in vessel ownership, tanker chartering, the management of cruise ship casino operations and the ownership of debt interests in offshore drilling equipment. It is pursuing investment and development in shipping and offshore marine activities.

#90113b0740 04/23/1990 ~Business Wire

BRIDGEPORT, CT (APRIL 23) BUSINESS WIRE - Connecticut Energy Corp. (NYSE:CNE) Monday reported earnings of 93 cents per share for the three month period ending March 31, 1990, compared with earnings per share of $1.38 for the same 1989 period.

Weather during the first quarter of 1990 was extremely mild. It was 15 percent warmer than normal and 9 percent warmer than last year. This is a significant factor when most of the company's earnings come from the distibution of natural gas for heating during winter months.

Principally because of the warm weather, the company's net income decreased by 32 percent during the first quarter of 1990 compared to the first quarter of 1989.

Earnings for the 12 month period ending March 31, 1990 were 84 cents per share, compared with 12 months eanrings ending March 31, 1989 of $1.53 per share. Also included in the most recent 12 months ending results are 17 cents per share for nonutility losses in the fourth quarter of 1989.

Connecticut Energy Corp. is a utility and energy holding company whose principal subsidiary provides natural gas service to over 150,000 customers in Fairfield, New Haven and Middlesex counties.

CLEVELAND, OH (APRIL 23) BUSINESS WIRE - At the Annual Meeting of Shareholders of The Lubrizol Corporation held today, L.E. Coleman, Chairman, announced that consolidated revenues for the first quarter which ended on March 31, 1990, were $357.2 million, an increase of 3.5 percent over the very strong first quarter of 1989. Consolidated net income was $29.1 million, or $.80 per share.

Revenues of the Specialty Chemicals segment were $301.5 million, an increase of 4 percent over the same quarter last year. Shipments of specialty chemicals decreased by 4 percent as compared with the first quarter of 1989. Agribusiness revenues were $55.6 million, approximately the same as last year.

Consolidated revenues for the first quarter of 1989 were $345.2 million. Consolidated net income was $30.7 million, or $.82 per share. There were no special items in either quarter.

Dr. Coleman said, ''We are pleased with the first quarter performance of both segments. We believe that this strong performance supports our 1990 forecast of improvement in both volume and revenues and indicates that the relatively weak performance of the 1989 last half was not a trend toward lower business levels.

''Selling prices for our products have been increased both in the last quarter of 1989 and the first quarter of 1990. Increased revenues in the Specialty Chemicals segment on lower volume indicate that our customers have supported these higher price levels. Recognition by our customers of the increased costs of research, development and performance testing required to meet the complex market requirements of the 1990's and the necessity of investing in plant and equipment to avoid anticipated shortages in major additive components have improved the climate for the price increases that are required by our industry.

''The Agribusiness segment achieved improved profit performance on approximately the same revenue due to lower costs of crop seed production and decreased research expense.''

The Lubrizol Corporation, headquartered in Wickliffe, Ohio, is a specialty chemical company engaged in chemical, mechanical and biological technologies serving world markets in transportation, industry and agriculture.

#90113b0768 04/23/1990 ~Business Wire

SACRAMENTO (APRIL 23) BUSINESS WIRE - Pacific West Cable Television (PacWest) has filed a $25 million lawsuit against Turner Broadcasting System Inc. (TBS) and two of its subsidiaries to prevent TBS from cancelling a contract with PacWest that allows the growing cable operator to distribute the successful Turner Network Television (TNT) service, according to an announcement by James C. Parker, an attorney with Farrow, Schildhause & Wilson, which represents PacWest.

PacWest, formed in 1983, currently provides thousands of customers in the Sacramento area with the TNT service and is one of only two cable operators competing in the Sacramento market. Sacramento Cable Television currently the market leader, has witnessed a steady growth in PacWest's market share.

PacWest attributes much of its success to its deployment in November 1989 of a microwave-based ''wireless'' transmission system which is less costly to subscribers than traditional coaxial cable and has been readily embraced by consumers. But TBS claims that use of wireless technology violates the Affiliate Agreement in existence between PacWest and TBS.

PacWest responds that the Turner companies and other unnamed defendants conspired through unfair business and competition practices to maintain a monopoly on cable service in Sacramento by forcing PacWest out of the market.

In court papers, PacWest claims that TNT has threatened to shut off program distribution and thereby deprive PacWest subscribers of TNT's 24-hour-a-day movies, dramatic shows, situation comedies, sports, children's programming, special features and general entertainment programming, including exclusive contracts to cablecast the 1992 Winter Olympics and 47 NFL football games between 1990 and 1993.

Insight into possible ''ulterior'' motives requires an understanding of

the historical difficulties that PacWest has endured in its effort to service the Sacramento cable market. Between 1983 and 1987, PacWest's efforts to enter the Sacramento market were thwarted by the city of Sacramento's refusal to allow more than one cable franchise into the area.

PacWest sued in 1983, and four years later was vindicated and gained entry to the market. The sole provider of cable in the area up until 1987 was Sacramento Cable Television, 95 percent of which is owned by Scripps-Howard Communications. PacWest alleges that TBS is substantially owned and controlled by many of the nation's largest Multiple System Operators (MSOs), companies owning many cable systems in different locations nationwide.

These MSOs oppose any successful establishment of competing broadcast delivery systems. Prior to precedent-setting victories such as the one PacWest won against the city of Sacramento, municipalities had typically granted monopolies to individual cable companies.

PacWest believes that the current dispute is the result of a conspiracy by TBS and unnamed MSOs to thwart the success of any company seeking to compete with those already established as historical monopolies in major markets across the country.

#90113b0771 04/23/1990 ~Business Wire

NEW YORK (APRIL 23) BUSINESS WIRE - ASARCO Incorporated (NYSE:AR) Monday reported net earnings of $35.8 million or 86 cents per common share, for the first quarter ended Mar. 31, 1990, compared with net earnings of $68.6 million or $1.63 per common share, for the first quarter of 1989.

Sales of products and services were $521.2 million in the first quarter of 1990, compared with $618.2 million in the same period of 1989.

The decline in net earnings and sales for the 1990 first quarter, compared with those of the prior-year period, was due primarily to lower metals prices for copper, zinc and silver, partially offset by higher prices and volumes for lead.

Earnings in the 1990 first quarter were also affected by higher inter expense as debt was incurred and excess cash used in funding acquisitions, capital expenditures and repurchases of company stock made over the past year.

The increase in equity earnings in the 1990 first quarter was due to the

inclusion of the results of Mexicana de Cobre S.A. de C.V., acquired by Asarco's associated company Mexico Desarrollo Industrial Minero S.A. de C.V. (MEDIMSA). Asarco began including the results of Mexicana de Cobre in the 1989 third quarter, following MEDIMSA's completion of financing arrangements.

Capital expenditures in the 1990 first quarter were $43.3 million, up from $23.6 million in the prior-year period. The company also paid dividends of $.40 per common share in the 1990 first quarter, compared with $.30 paid in the prior-year quarter, for a total of $16.6 million.

LOUISVILLE, KY (APRIL 23) BUSINESS WIRE - John M. Cranor III, president and chief executive officer of Kentucky Fried Chicken Corp., has been named to the boards of directors of First Kentucky National Corp. and First National Bank of Louisville.

Kentucky Fried Chicken, a subsidiary of PepsiCo Inc., is the world's largest quick service chicken restaurant system. Its combined company-operated and franchised U.S. restaurant sales of $3 billion represent 50 percent of the $6 billion U.S. chicken segment.

Outside the United States, there are KFC units in 57 countries. They have

system sales of some $2.4 billion, bringing KFC total system sales to $5.4 billion.

Prior to his position at KFC, Cranor served as president of Pepsi-Cola USA Fountain Beverage, then as president, Pepsi-Cola East.

Cranor, 43, was born in Independence, Kan. He received a Master of Business Administration degree from the Harvard Business School and is a graduate of New College in Sarasota, Fla. He is married and has one child.

First Kentucky National Corp., a $5.2 billion bank holding company, serves eight communities in Kentucky and southern Indiana through its affiliate bank network and trust and investment management. It is a member of the National City Corp., a $23 billion bank holding company headquartered in Cleveland.

With lead bank, First National Bank of Louisville, First Kentucky National affiliates serve eight communities: In Kentucky, CommerceNational Bank in Lexington; Third National Bank of Ashland; Central Bank & Trust in Owensboro; American National Bank in Bowling Green; and Crestwood State Bank, and in Indiana, First National Bank of Indiana in New Albany and Farmers Citizens Bank in Salem.

First Kentucky Trust Co. is the largest trust company in the state and the 53rd largest in the nation.

With First Kentucky, National City offers a wide range of financial services, including credit card and retail payment processing, leasing, merchant and mortgage banking, venture capital, and small business investment, as well as trust and investment management.

HARTFORD, CT (APRIL 23) BUSINESS WIRE - United Technologies Corp. Chairman and Chief Executive Officer Robert F. Daniell told shareowners Monday at the corporation's Annual Meeting he is confident earnings improvement will continue.

UTC reported record earnings in 1989 and recently announced first-quarter 1990 net income of $134.5 million, a 9 percent improvement from the same period a year ago.

Daniell said a significant portion of the company's financial success is based on substantial cost-reduction activities across the corporation.

He said Pratt & Whitney's program to reduce its costs 30 percent by 1992 is ''emblematic of these efforts, which are now deeply ingrained in UTC and will bear fruit for years to come.''

The corporation's improved management of its assets, particularly working capital, is already paying off, he said. A three-year working capital reduction program is in place and is expected to save $1 billion by 1991.

''In 1989, the first year of the program, we reduced the absolute level of working capital tied up to our businesses by about $350 million, even as revenues rose 7 percent,'' Daniell stated.

Daniell said that UTC is in an excellent position to capitalize on international opportunities, since it already derives half of its revenues internationally. The company's recently announced international alliance with Daimler-Benz ''makes sense in an increasingly global economy,'' Daniell added.

''New opportunities for us on the commercial side in Eastern Europe and the Soviet Union can more than make up for any slack caused by reductions in the defense budget,'' he stated.

He said the corporation will continue to invest in research and development and has done a better job of transferring and applying aerospace and defense technology to its commercial and industrial businesses.

The corporation's determination ''to get back to basics'' also is paying off, Daniell said. ''We continue to scrutinize every operation to see if it fits and where it fits.''

Employees are more involved and take more interest in the business and its customers. Daniell said customers are responding to these initiatives -- presenting UTC with quality awards in aerospace and automotive, placing record commercial jet engine orders, and using and praising OtisLine.

United Technologies provides a broad range of high-technology products and support systems to the aerospace, building systems and automotive industries. The Hartford, Conn.-based corporation's best known products include Pratt & Whitney aircraft engines, Carrier heating and air conditioning systems, Otis elevators and escalators, Sikorsky helicopters, Hamilton Standard aerospace systems, Norden defense systems, and UT Automotive components and systems. Several UTC units supply equipment and services for the U.S. space program.

NASHUA, NH (APRIL 23) BUSINESS WIRE - A Lockheed Sanders-built AN/ALQ-156A missile approach warning system (MAWS) was successfully demonstrated in a series of live missile firing tests conducted during February by the U.S. Air Force's Tactical Air Warfare Center, Eglin AFB, Florida.

The tests on Feb. 14 and Feb. 28 involved live firing of six air-to-air missiles from USAF F-15 and F-16 aircraft. The Sanders MAWS provided 360 degree spherical coverage around a QF-100 drone aircraft on which the system was installed. In each instance, the Sanders ALQ-156A successfully detected the missile approach and provided a cue for activation of appropriate countermeasures. Each missile acted as a surrogate for an enemy air-to-air missile. All missiles were evaluated as having being defeated.

The ALQ-156A tests were the first of a series in which contractor-furnished equipment is being provided at no expense to the Air Force. Major General John A. Corder, commander of the Air Force's Tactical Air Warfare Center, devised the test series as an inexpensive means of addressing a priority requirement for improved missile approach warning.

Under General Corder's plan, existing contractor-furnished equipment is installed on QF-100 fighter drones and tested against live missile firings. The Air Force obtained the results and the contractor, in return, was provided instrumented hardware/software performance data regarding real missiles against a real aircraft.

During the February tests as Eglin, the Sanders ALQ-156A was flown in an externally mounted pod configuration. Sanders is presently under contract with the U.S. Navy for the Full Scale Engineering Development (FSED) phase of the AN/ALQ-156A Missile Detector, Intergrated Defense Avionics Program (IDAP) for use on various Navy tactical aircraft.

The ALQ-156A Missile Detection System consists of an internally mounted receiver/transmitter and buffer box and associated antennas. The receiver/transmitter is a pulse Doppler radar developed by Sanders under contract to the U.S. Army. More than 750 systems are presently operational on Army fixed and rotary wing aircraft. This type of radar permits separation and classification of threats based on speed and cross sectional areas.

Lockheed Sanders is engaged in development, manufacture and sale of advanced electronic systems and products in a broad range of defense electronics markets. The company is a leading producer of electronic and infrared countermeasures for aircraft self-protection. Other major product areas include radars, digital avionics, signal processing, ocean

surveillance, antisubmarine warfare, air defense, training simulation, automated test systems command and control, airspace management, and high technology components.

STAMFORD, CT (APRIL 23) BUSINESS WIRE - Re Capital Corp. (the ''Company'') reported net income for the quarter ended March 31, of $2,296,000 as compared with $2,028,000, for the first quarter of 1989.

Earnings per share for each of the quarters ended March 31, 1990 and 1989 were 34 cents and 30 cents, respectively.

Net premiums written and net premiums earned for the first quarter of 1990 were $22,737,000 and $23,198,000, respectively, vs. $21,006,000 and $21,874,000 for the first quarter of 1989.

The statutory combined ratio for each of the first quarters of 1990 and 1989 was 98.4 percent.

Net investment income was $2,914,000 in the first quarter of 1990 vs. $2,265,000 for the first quarter of 1989. The increase of $649,000 or 29 percent, resulted principally from increased invested assets resulting from cash flow from operations.

The effective income tax rates of 17 percent and 13.4 percent for the quarters ended March 31, 1990 and 1989, respectively result principally from the effect of tax-exempt interest income.

In the first quarter of 1990, the effective income tax rate was negatively impacted by 3 percent as a result of computing income tax expense based on the alternative minimum tax provisions of the tax law.

Cash flow from operations aggregated $9,806,000 in the first quarter of 1990 compared to $10,207,000 for the first quarter of 1989.

Shareholders' equity and statutory surplus amounted to $93,726,000 and $77,657,000, respectively at March 31, 1990 as compared to $87,754,000 and $71,099,000 at March 31, 1989. Shareholders' equity per share increased to $14.43 at March 31, 1990 over the prior year amount of $12.92.

ATLANTA, GA (APRIL 23) BUSINESS WIRE - Georgia Federal Bank FSB has been granted regulatory approval to sell its Perry, Ga., branch.

The transfer between Georgia Federal and CB&T Bank of Middle Georgia becomes effective April 30.

As part of the transaction, CB&T Bank of Middle Georgia will assume all checking, passbook, statement savings and money market accounts. Georgia Federal will retain all time deposits and loans. Customers of the Perry branch will be notified of this agreement by mail. Also, the nine employees at the Perry branch will become employees of CB&T.

''We are pleased with this agreement and feel confident that CB&T will be able to serve Perry customers with the same high level of quality banking that Georgia Federal has provided over the years. It is also an institution Georgia Federal employees can be proud to join,'' said Richard D. Jackson, president and chief executive officer of Georgia Federal.

With assets of over $4 billion, Georgia Federal Bank is the state's largest savings institution and one of the largest retail banks. A wholly owned subsidiary of First Financial Management Corp., Georgia Federal currently operates 64 banking offices throughout Georgia as well as First Family Financial Services, a consumer finance company with operations in eight Southeastern states.

HOPKINTON, MA (APRIL 23) BUSINESS WIRE - EMC Corp. (NYSE:EMC) Monday announced a profit of $1,013,000, 4 cents per share, on revenues of $40,468,000 for the first quarter of 1990 (ended Mar. 31).

These revenues reflect the largest quarter in the history of the company and an improvement of 68 percent over 1989 first quarter revenues of $24,110,000. According to EMC Chairman and Chief Executive Officer, Richard J. Egan, ''This represents the largest quarter in EMC's history.''

''More importantly, when we combine it with last quarter's figures and our now even stronger balance sheet it demonstrates tangible evidence that the changes and investments made in the company and our extensive efforts toward a total quality conscious culture are beginning to pay off.''

EMC's fourth quarter revenues for 1989 were $40,251,000 which also represented a record quarter. Combined with today's figures, an extremely strong balance sheet and renewed confidence from the investor and analyst communities, it would appear that the company has rebounded dramatically from its losses of the past two years.

NEW YORK (APRIL 23) BUSINESS WIRE - At their Annual Meeting Monday, American Express Company shareholders elected three new members to the Board of Directors: George M.C. Fisher, chairman and chief executive officer of Motorola, Inc.; Beverly Sills Greenough, president of the New York City Opera; and Frank P. Popoff, president and chief executive officer of The Dow Chemical Company.

''We are delighted to have such talented and accomplished leaders from diverse business backgrounds join our Board of Directors,'' said James D. Robinson III, Chairman and Chief Executive Officer of American Express Company. ''Their addition brings a new level of depth and breadth to the Company's Board.''

George M.C. Fisher became chairman and chief executive officer of Motorola, Inc. in January 1990, after being elected president and chief executive officer in January 1988. Mr. Fisher, who joined Motorola in 1976, is a member of the U.S. Council on Competitiveness, the Business Roundtable and the Business Council. He is also a director of the Japan Society of New York and is active in international trade issues through advisory groups to the U.S. Trade Representative and the Secretary of Commerce.

Beverly Sills Greenough has been president of the New York City Opera since 1989 and served as its general director since 1979, providing artistic and business leadership that has enhanced the company's international stature. She is a Director of Time-Warner Inc. and R.H. Macy & Co., Inc. The renowned soprano and opera performer is National Chairman of the March of Dimes Birth Defects Foundation and a member of the President's Task Force on the Arts.

Frank P. Popoff became president of The Dow Chemical Company in May 1987 and assumed the additional responsibility of chief executive officer in December 1987. Mr. Popoff, who joined Dow in 1959, is a member of the Business Council, the Business Roundtable, the Conference Board, the U.S. Council on Competitiveness, the American Chemical Society, the U.S.-Japan Business Council and the U.S.-U.S.S.R. Trade and Economic Council. He is also a Director of NCR Corporation, Marion Merrell Dow Inc., Dow

Corning Corporation, Chemical Financial Corporation and Indiana University Foundation.

The Company's entire 19-member Board of Directors was elected at the Annual Meeting. Re-elected as Directors were Anne L. Armstrong, William G. Bowen, David M. Culver, Charles W. Duncan Jr., Richard M. Furlaud, F. Ross Johnson, Vernon E. Jordan Jr., Fred M. Kirby II, Henry A. Kissinger, Drew Lewis, Aldo Papone, Roger S. Penske, James B. Robinson III, Robert V. Roosa, Rawleigh Warner, Jr., and Joseph H. Williams.

American Express Company, a diversified travel, financial and information services company founded in 1850, is a world leader in charge cards, Treavelers Cheques and travel related activities.

It is also a leader in financial planning, securities brokerage, asset management, international banking, investment banking, and information processing and communications services.

#90113b0849 04/23/1990 ~Business Wire
NEW YORK (APRIL 23) BUSINESS WIRE - The Irish Government has announced that the 10 percent rate of corporation tax for manufacturing and international services companies will be extended to Dec. 31, 2010.

As a result, companies planning investments in Europe will have a guarantee that if the investment is in Ireland the maximum tax rate they will face over the next 20 years will be 10 percent.

In publishing the 1990 Finance Bill, the Irish Government stated that their decision to extend the period of guaranteed low tax by 10 years is a strong reaffirmation of a consistent government approach to promoting industrial investment.

Over the past two years Ireland has attracted record levels of U.S. investment as companies gear up to take advantage of the European Communities program to create a single integrated market by 1992.

Major investment from companies such as, Intel, Apple, Motorola, General Electric, Bausch & Lomb, Microsoft, Stratus Computer, Pratt & Whitney, Lotus and Cigna, are currently boosting the already high level of U.S. investment in Ireland.

In total, over 350 U.S. companies have to-date invested $6 billion in

Ireland and employ 40,000 people.

In commenting on the government decision, IDA Ireland's chief executive for North America, P.J. Daly said, ''This decision ensures that Ireland will remain the most profitable location in Europe for U.S. investors well into the 21st century.

''Combined with our other attractions - skilled people and sophisticated infrastructure, it will accelerate the already record flow of U.S. investment.''

#90113b0856 04/23/1990 ~Business Wire
JACKSONVILLE, FL (APRIL 23) BUSINESS WIRE - On Friday, Apr. 20, P-I-E Nationwide Inc. received authority from the Interstate Commerce Commission to manage and control Transcon Lines Inc. of Los Angeles.

This control took effect at 6 p.m. Eastern Daylight Time.

Transcon requested that P-I-E take control of all freight in its system and deliver it to its customers. Over the weekend, all outstanding Transcon freight bills were re-billed into P-I-E's computerized freight management system and the freight was dispatched to P-I-E's destination terminals.

P-I-E expects the majority of the shipments to be delivered to customers within their normal transit time.

Harold D. Doyle, P-I-E president and chief executive officer, said the transition went smoothly. ''The integration of Transcon's freight into P-I-E went very well when P-I-E systems took over once the freight was secured. This was not a merger of two trucking companies, but the absorption of one company's business into another.

''We don't have the problem of trying to make two seperate, incompatible systems work. Our people and computerized billing system performed flawlessly. Approximately 30,000 shipments were billed into our system over the weekend. All the freight will be delivered this week.''

Transcon personnel are being brought into P-I-E in sufficient numbers to handle the additional influx of business. Sales personnel from both companies were trained over the weekend to assist all customers.

Doyle added, ''We welcome former Transcon customers to P-I-E. Transcon's routes are compatible with ours and the systems are in place to service additional business.''

P-I-E Nationwide is a privatley held company. Majority interest in P-I-E was acquired by Olympia Holding, a Florida-based company, on Apr. 13.

BRAINTREE, MA (APRIL 23) BUSINESS WIRE - Grossman's Inc. (NASDAQ: GROS) Monday reported first quarter sales of $156.9 million, 5.2 percent ahead of sales of $149.1 million from ongoing operations in 1989.

Net loss for the first quarter was $5.4 million, or 21 cents per share, an improvement of 28 percent over the net loss of $7.4 million, or 28 cents per share for the 1989 first quarter.

The first quarter of 1989 included the sales and seasonal operating losses of the Moore's and the Northwest Divisions which were sold during the third quarter of 1989.

Mike Grossman, chairman, president and chief executive officer, said that first quarter revenues were especially gratifying in light of the continued slowdown in the Northeast housing market. He also noted, ''Ours is a seasonal business. Outdoor building activity is constrained by winter weather conditions, and the company historically has a net loss in the first quarter.''

During the first quarter...

-- A sixth Western Division store was opened in La Habra, Calif.

-- The Eastern Division implemented a merchandise expansion program that will be completed in time for the important spring selling season. This program will increase the number of items offered for sale in most stores by approximately 50 percent.

-- Reduction of debt continued as a major priority with an additional

$19.0 million of long-term debt repurchased or paid when due.

Grossman's, a major retailer of lumber and building materials, operates 157 stores in nine Northeastern states and in California.

#90113b0900 04/23/1990 ~Business Wire

BIRMINGHAM, AL (APRIL 23) BUSINESS WIRE - Vulcan Materials Co. (NYSE:VMC) Monday announced that first quarter 1990 sales and earnings from continuing operations were at record first quarter levels.

Sales from continuing operations were $232,020,000, up 7 percent from

1989's first quarter result of $217,510,000. Pretax earnings from continuing operations of $28,174,000 exceeded the 1989 level of $23,684,000 by 19 percent. Net earnings and earnings per share from continuing operations totaled $18,677,000 and 47 cents, reflecting increases of 19 percent and 24 percent, respectively, over the comparable 1989 results of $15,686,000 and 38 cents.

The first quarter effective tax rate was 33.7 percent as compared to the 1989 first quarter rate of 33.8 percent.

Construction Materials sales of $127,996,000 were at a record first quarter level and exceeded the 1989 result of $107,370,000 by 19 percent. The increase reflects higher shipments of crushed stone, resulting principally from improved weather conditions as compared to 1989's first quarter. In addition, unusually severe weather in December 1989 deferred some shipments into this year's first quarter.

Unit stone prices approximated last year's first quarter levels. Chemicals sales of $104,024,000 declined 6 percent from 1989's first quarter record of $110,140,000 due to lower volume and prices, principally for organic products.

Construction Materials earnings were $8,209,000, up sharply from the 1989 level of $618,000, reflecting higher volume as well as the effects of improved operating efficiencies. Chemicals earnings of $19,068,000 were down 16 percent from the 1989 level of $22,793,000, due primarily to lower volumes and prices and the impact of a scheduled plant-wide shutdown at the Geismar, La., plant.

Selling, administrative and general expenses of $24,536,000 increased 4 percent from the same period last year due primarily to higher personnel-related expenses, partially offset by lower provisions for stock-based incentive plans.

Net cash provided by continuing operations amounted to $34,250,000 in the first quarter of 1990 as compared with $53,112,000 in the same period last year. Most of that decline is referable to an increase in accounts receivable in 1990 as compared to a reduction in receivables in the first quarter of 1989. The 1990 increase is attributable to improved sales.

Vulcan is a producer of industrial materials and commodities with significant positions in two industries. It is the nation's foremost producer of construction aggregates and a leading chemicals manufacturer, producing a diversified line of chlorinated solvents and other industrial chemicals.

SHELTON, CT (APRIL 23) BUSINESS WIRE - Northeast Bancorp announced it has rejected a proposal made by The Bank of New York that Northeast seek the assistance of the Office of the Comptroller of the Currency to evaluate the adequacy of Northeast's loan loss reserve.

Northeast stated that under its merger agreement with The Bank of New York it has every right to rely on its independent public accountants evaluation of the adequacy of its loan loss reserve.

Northeast re-affirmed that its Dec. 31, 1989 accounts were rendered an unqualified opinion by Price Waterhouse, its independent public accountants.

Northeast stated that the Office of the Comptroller of the Currency has no jurisdiction over Northeast's subsidiary, Union Trust Co. nor The Bank of New York since both are state chartered banks.

Northeast also stated that Bank of New York is incorrect in its assertion that it has the right under the merger agreement to insist on Northeast seeking a national bank charter before the merger is approved by its shareholders and the Federal Reserve Board.

SAN FRANCISCO (APRIL 23) BUSINESS WIRE - Homestake Mining Co. (NYSE:HM) Monday reported first-quarter net income of $13.2 million, or 13 cents per share, almost double last year's first-quarter earnings of $7.1 million, or 7 cents per share.

The increase reflected a 33 percent gain in gold sales over the first quarter of last year to 274,737 ounces, and a 4 percent increase in average realized gold price to $406 per ounce from $392 in the first quarter of 1989.

Increased volume and improved operating efficiencies helped reduce the company's average cash production cost 4 percent to $268 per ounce from $280. At the same time, gold production increased 36 percent to 291,881 ounces. First-quarter revenues increased 33 percent to $131.6 million from $98.6 million last year.

All of Homestake's gold operations recorded quarter-to- quarter production

increases. The largest gain was Homestake's share of production from its 80 percent-owned subsidiary Homestake Gold of Australia Ltd. (HGAL), which more than doubled to 62,831 ounces.

This included 51,457 ounces from HGAL's 50 percent interest in Kalgoorlie Operations up from 25,444 ounces last year, and 11,374 ounces from HGAL's new wholly owned Fortnum mine, which began production in late 1989. The increase in Kalgoorlie production was largely due to the acquisition of additional mining interests in the second quarter of last year.

Gold production at the Homestake mine in South Dakota increased by 10,280 ounces to 102,398, largely due to improved ore grades in several operating stopes and a 2 percent increase in gold recovery. The company recently announced a $23 million, five-year exploration program to follow up new underground gold discoveries three miles north of the Homestake mine.

The McLaughlin gold mine in Northern California achieved a 13 percent production increase to 71,052 ounces by increasing mill throughput and improving gold recovery. McLaughlin produced its one-millionth ounce of gold in March, five years from its first gold pour in 1985.

Homestake's 25 percent share of production from the Round Mountain mine in Nevada rose to 23,116 ounces from 15,025 in last year's first quarter. The company's Wood Gulch mine in Nevada produced 7,246 ounces, and Homestake's share of production from the Mineral Hill joint venture mine in Montana was 4,648 ounces despite design and operating problems that are currently being corrected.

Homestake's El Hueso gold mine in Chile increased production 7 percent to 20,308 ounces. The Golden Bear operation in British Columbia experienced major startup problems with its roaster feeder during the first quarter but is expected to be in full operation by the third quarter of this year.

In base metals, Homestake's 42.5 percent share of earnings from The Doe Run Co. in Missouri was $5.9 million, down 20 percent from the lead, zinc and copper producer's outstanding first-quarter performance in 1989. The decline was due almost entirely to lower prices and sales of by-product copper and zinc.

#90113b0910 04/23/1990 ~Business Wire

STOUGHTON, MA (APRIL 23) BUSINESS WIRE - John H. Duerden, president of the Reebok Division of Reebok International Ltd., announced Monday a strengthening of the division's international operations.

The operations will be organized into three geographic regions: Reebok Europe, including Western Europe, Eastern Europe, U.S.S.R., the Middle East and Africa; Reebok Asia/Pacific, including Asia and Australasia; and Reebok Americas, including Canada and Latin America.

Peter McGuigan, currently managing director of Reebok UK Ltd., has been appointed managing director of Reebok Europe. McGuigan will immediately assume responsibility for all Reebok operations in the designated countries and will report directly to Duerden.

Prior to heading Reebok UK, McGuigan was chief operating officer for Fleetfoot, Reebok's UK distributor, and before that was managing director of Athena International, the poster, printing and greeting card company. He will be located at Reebok's offices in Bolton, England.

Peter Birch, who was recently appointed director of operations for Reebok Asia/Pacific, based in Hong Kong, will remain in that position, reporting to Duerden.

Al Cherry, who has been working recently on assignment for Reebok in Latin America, has been named vice president, Reebok Americas Region. Cherry has had extensive experience in the athletic footwear industry, both in the United States and Latin America, and was formerly general sales manager for Puma USA. David Lewis, president, Reebok Canada, will report to Cherry, who will be based in Stoughton.

''This restructuring underlines the importance of our international operations and provides the additional focus needed to develop the full potential of the brand,'' Duerden said.

The Bolton, England, office and current Reebok International Ltd. staff will continue to provide logistical and customer service support to all international distributors until further notice. Reebok Canada will continue to be supported from the USA.

Reebok International Ltd. headquartered in Stoughton, is the leading designer and marketer of active lifestyle and perfomance products, including footwear and apparel. The company's operating units include the Apparel Products, Avia, Boston Whaler Boats, Reebok and Rockport divisions. Sales for 1989 totaled $1.822 billion.

(APRIL 23) UPI - TV SCHEDULE:

(Times are EST unless noted)
(R denotes repeat)

TUESDAY, MAY 1

6:30 p.m.
PBS, ''Nightly Business Report.''

7:00 p.m.
(Note: In some regions, news is broadcast at 6 or 6:30 p.m. Check with local affiliates for details.)
ABC, ''ABC's World News Tonight with Peter Jennings.''
CBS, ''CBS Evening News with Dan Rather.''
NBC, ''NBC Nightly News with Tom Brokaw.''

8 p.m.
ABC, ''Who's the Boss?'' - A visit from the census taker stirs memories for Tony and Angela, as they try to answer some questions about their six-year relationship.
CBS, ''Rescue 911.''
NBC, ''Matlock.''
PBS, ''Nova: 'Hurricane!''' - A study of hurricanes and a look at scientific data used to make weather predictions.

8:30 p.m.
ABC, ''The Wonder Years.''

9 p.m.
ABC, ''Roseanne.''
CBS, ''CBS Tuesday Night Movie: 'Child in the Night''' - A drama about a child who witnesses the murder of his father and a psychologist who is assigned to help him remember what he saw.
NBC, ''In the Heat of the Night.''
PBS, ''This Old House.''

9:30 p.m.
ABC, ''Coach'' - Dauber takes pains to impress Judy's visiting aristocratic Southern parents, but when he endangers the life of her mother's pet poodle in the process, Hayden's heroism is called for.

10 p.m.
ABC, ''thirtysomething.''
NBC, ''Midnight Caller.''

PBS, ''Frontline/Other People's Money'' - An investigation of the role that politics played in the savings and loan scandal, which is estimated to have cost taxpayers over $315 billion.

11:30 p.m.
ABC, ''ABC News Nightline.''
CBS, ''Wiseguy.''
NBC, ''The Tonight Show Starring Johnny Carson.''

12:30 a.m.
CBS, ''Stingray.''
NBC, ''Late Night With David Letterman.''

1:30 a.m.
CBS, ''Nightwatch.''
NBC, ''Later With Costas.''
PBS, ''Today's Japan.''

TAIPEI (APRIL 23) - Taiwan approved a record 228.7 million U.S. dollars worth of overseas investment projects by local businessmen in the first quarter of this year, the Investment Commission said Monday.

The investment value of the 78 approved projects represented a massive 595 per cent growth over the same period last year, the Commission said.

Twenty-six cases totalling 60 million dollars were for investment projects in the most targeted country, the United States.

TOKYO (APRIL 23) - Suzuki Motor Co., the Japanese car and motorcycle manufacturer, said Monday it has begun studying the possibility of building motorcycles in Hungary.

Suzuki officials said the company has already reached a basic accord with the Hungarian authorities to start production of small automobiles in 1992 by establishing a joint venture in that country.

They said the company would start a feasibility study of whether it also will be able to assemble motorcycles alongside the car production.

#90113d0230 04/23/1990 ~French/German News Agency

TOKYO (APRIL 23) - The transport ministry is to instruct Japanese shipbuilders not to boost their production volumes to raise their combined world market share from the current level of around 50 percent, a Tokyo financial newspaper reported Monday.

The Nihon Keizai Shimbun, quoting ministry sources, said the move is to head off possible trade frictions with the U.S. and European shipbuilding industries.

The ministry plans to disapprove capital investment by shipbuilders that could lead to a boost in their shipbuilding capacity, in order to hold down their production increases in the fiscal year to March 1991 to less than 10 per cent of the previous year's levels.

It also plans to instruct Japanese shipbuilders to refrain from taking "excessive" orders so as not to lead to a deterioration of their working conditions, the report said.

Ministry officials refused to confirm the report.

The Japanese shipbuilding industry currently has a combined production capacity of 4.6 million tonnes a year (equivalent to 460 standard-size cargo ships), and produced about three million tonnes last year.

According to the Japan Ship Exporters' Association, ship export orders received during the fiscal year to March 1990 increased 43.2 percent from a year earlier to 8.04 million gross tonnes.

#90113d0480 04/23/1990 ~French/German News Agency

TOKYO (APRIL 23) - Moody's Investors Service Inc. said Monday it had cut its credit rating for Japan's Orix Corp., citing the company's exposure to rising Japanese interest rates, real estate and leveraged transactions.

The move, which reduces the credit rating of the country's biggest leasing company from "A-3" to "Baa-2", affects some 250 million dollars in long-term debt, the Japanese unit of the U.S. rating agency said in a statement.

Moody's said the company suffered from a "large structural asset-liability gap and a high likelihood of deterioration in its asset quality.

"The increase in interest rates will result in Orix's funding costs increasing faster than its interest income, thus squeezing margins," it said.

The agency said it was also concerned "about the company's exposure to

domestic real-estate and highly-leveraged transactions. Orix's weak capital base provides an additional factor supporting the downgrade," it added.

TOKYO (APRIL 23) - Japanese chemical giant Kao Corp. said Monday its net profit rose 29.4 percent from a year earlier to 19.9 billion yen (127 million dollars) in the year to March.

The company, Japan's biggest manufacturer of household products, said sales grew 4.6 percent to 545 billion yen (3.47 billion dollars) in the same period.

Sales of laundry and cleaning products rose 4.3 percent to 220 billion yen (1.4 billion dollars) while sales of personal care products climbed four per cent to 184 billion yen (1.2 billion dollars).

Sales of chemical products advanced 4.5 percent to 72 billion yen (459 million dollars) and sales of hygiene products were up 7.5 percent at 69.5 billion yen (443 million dollars).

Kao said its net consolidated profit grew 1.6 percent to 17.8 billion yen (113 million dollars) in the same period on sales which climbed 8.4 percent to 620 billion yen (3.95 billion dollars).

#90113d0550 04/23/1990 ~French/German News Agency

JAKARTA (APRIL 23) - The Indonesian state-owned firm Pertamina Monday announced that it awarded seven oil exploration contracts worth nearly 300 million dollars to foreign companies.

Pertamina also signed engineering and construction agreements with British and Japanese companies as part of a two-billion dollar project to build a new oil refinery, it said in a press statement.

Atlantic Richfield Inc. of the United States signed a contract to renew its operation in the Java Sea while Roy Huffington Inc. (Huffco) of the U.S. signed an ammended contract for its current activity in the Sanga Sanga field in East Kalimantan.

Huffco also signed two new contracts, respectively in Brantas Block in East Java and the Kahayan Block in South Kalimantan.

Total Indonesie of France was awarded a contract to explore in west Natuna in the South China Sea and Texaco Exploration and Chevron International Ltd. of the U.S. will explore in the Soe district in the eastern Lesser

Sunda Islands.

All six contracts were for production sharing which generally split any oil found 80:20 in Pertamina's favour.

A seventh contract was given to Trend International Ltd for exploration in the Birds Head region in Irian Jaya. Pertamina would have a claim for the first half of any oil output and the rest would be split 80:20 also in Pertamina's favour.

The Indonesian oil firm also signed a contract for engineering procurement and construction, and another for offtake agreement for its latest plan to build a new oil refinery estimated to cost some two billion dollars.

The contracts were signed with Foster Wheeler of Britain, Mitsui and Co of Japan, the Far East Oil Trading Co of Japan and British Petroleum Southeast Asia.

The refining facility would be built in Balongan, West Java, immediately after Pertamina secured all the necessary funding currently being negotiated with Japanese financial institutions, company officials said.

#90113d0630 04/23/1990 ~French/German News Agency

Jakarta (APRIL 23) - Liquified natural gas (Lng) and petroleum gas are expected to become Indonesia's largest foreign exchange earner in the 1990s as the country's crude oil reserves dwindle, Mines and Energy Minister Ginandjar Kartrasasmita said Monday.

Indonesian proven gas reserves exceed 90 trillion cubic feet, the largest in the world, and potential reserves have been measured at 200 trillion cubic feet, according to official estimates.

Ginandjar said Indonesia is currently the largest exporter of Lng in the world, supplying nearly 40 percent of total world demand.

He said world demand for Lng and petroleum gas was rising, while Indonesia's gas output has increased from 19 million tonnes to 21.3 million tons a year.

Indonesia's two main gas fields, located in Arun in northern Sumatra and Bontang in East Kalimantan, now produce 9.8 million tons and 11.5 million tonnes, respectively.

Most all of the Lng, 16.5 million tons, goes to Japan, followed by two million tons to South Korea.

Ginandjar said these exports earned some 2.9 billion U.S. dollars, about half the value of Indonesia's yearly crude oil exports earnings.

New contracts with Japan, Taiwan and Singapore will raise the tonnage of Lng exports to nearly 22 million tons this year, he said.

To maintain its share of the world gas market, Indonesia intends to increase its capacity for exploration, drilling and refining, Ginandjar said.

He said significant exploration activity was underway near Natuna Island on the South China Sea where about half of Indonesia's gas reserves at an estimated 45 trillion cubic feet are located.

#90113d0640 04/23/1990 ~French/German News Agency

LONDON (APRIL 23) - The cost of building the Channel tunnel is now put at 7.5 billion pounds (12.3 billion dollars), more than 50 percent above the original estimate, the Franco-British consortium Eurotunnel said Monday.

In its annual report, the consortium said it would have to raise another two billion pounds through bank credits and from shareholders.

Alastair Morton, Eurotunnel's vice-chairman and director, said he was confident Eurotunnel would be able to raise the extra cash.

He blamed the extra cost of the project on higher construction bills and interest rates.

Three years ago the tunnel project was costed at about 4.87 billion pounds and in 1987 the consortium obtained a credit line of five billion pounds from a banking consortium, to add to the billion pounds of its own capital provided by shareholders.

Eurotunnel found itself short of cash in 1990. Creditor banks blocked payment of funds out of the five billion credit line after Eurotunnel was in conflict over the escalating costs of the project with the public works consortium Transmanche Link carrying out tunnel construction work.

The credits were only released in February following agreement between Eurotunnel and Transmanche and pending a new accord between Eurotunnel and creditor banks for the additional financing.

The banks have now agreed to provide three quarters of additional funds needed with the remainder coming from shareholders in a new capital issue later this year.

Eurotunnel said Monday that half the excavation work of the three tunnels - two rail tunnels and a service tunnel - had been completed with work proceeding at a faster pace in recent months.

#90113d1090 04/23/1990 ~French/German News Agency

WINDHOEK (APRIL 23) - Namibia plans to introduce a more liberal exchange control set-up once it leaves the rand monetary system, Namibian Finance Minister Otto Herrigel said here Monday.

Speaking at the opening of a Namibian Economic Policy Research Unit seminar, he said a new economic system with its own currency would not create "economic miracles." But it would supply Namibia with a sizeable number of "monetary tools and economic levers" to allow the country its own monetary policies appropriate to its requirements.

"It is our intention that Namibia, after having introduced its own currency, will implement a far more liberal exchange control system than we are forced to accept at present and as long as the (South African) rand remains our legal tender."

Namibia plans to open its own central bank on June 1, and to introduce its own currency by March 1992.

#90113d1140 04/23/1990 ~French/German News Agency

JERUSALEM (APRIL 23) - Seven Israeli soldiers were killed overnight when two helicopters collided over the occupied West Bank, military sources said Monday.

The accident, one of the most serious in the history of the Israeli Air Force, occurred northeast of the West Bank community of Ramallah.

Five pilots and two technicians died when two U.S.-made Sikorsky CH-54 troop transport helicopters collided and crashed during a training exercise.

The aircraft came down in a field belonging to the Mevo Shilo Jewish settlement in the Israeli-occupied territory.

The army provided no further details on the mishap.

Chief of Staff General Dan Shomron and General Yitzhak Modai, commander of Israel's central military region, went immediately to the scene and army sources said an investigation had been opened.

In the last major Israeli military accident, August 15, 1988, two F-15 fighters crashed after colliding during a training flight over Israel.

#90113d1640 04/23/1990 ~French/German News Agency

SEOUL (APRIL 23) - South Korea's national economy grew at an annual rate of 7.1 percent in real terms during the first quarter of the year, showing a recovery, the central Bank of Korea (BOK) reported Monday.

The country's economic growth was 6.7 percent last year, and 6.2 percent during the first quarter of last year.

But the BOK report added that the balance of payments during the January to March period this year registered a deficit of 1.1 billion dollars due largely to sluggish exports and a sharp increase in imports.

The report forecast that the balance of payments surplus this year is expected to be about 1.2 billion dollars, far short of the government target of two billion dollars.

The report further forecast that this year commodity exports are expected to amount to 65.5 billion dollars (up five percent over last year), but short of the 66 billion dollar government target.

Imports meanwhile are expected to be 68.5 billion dollars, which means a three billion dollar trade deficit is expected.

On a customs clearance basis, exports during the first quarter amounted to 13.9 billion dollars, as against imports of 15.8 billion dollars, registering a 1.9 billion dollar trade deficit.

-30- 1408

#90113d1650 04/23/1990 ~French/German News Agency

JOHANNESBURG (APRIL 23) - The extreme right in South Africa is becoming more explicit in its threats against the country's reform process, with references by its leaders to an armed uprising and an audacious theft of arms from the air force.

The theft, carried out over Easter weekend, came as a chilling reminder to skeptics that within the far-right was a hard core of fanatics prepared to go to any lengths to prevent an end to white rule, and whose repeated threats were not simply bluster.

One of five suspects arrested after the arms snatch was a policeman, which led observers to wonder how far an extreme-right "fifth column" had managed to penetrate the police force.

Far-reaching reforms carried out by President Frederik de Klerk on February 2, including legalization of the African National Congress and its sister organization, the Communist Party of South Africa, drew hostile reactions from many policemen.

On Thursday a former policeman, Piet "Skiet" (Shoot) Rudolph, said in a phone call to a Pretoria daily that he had been behind the raid on air force headquarters in the heart of the capital on the night of April 14.

With complicity from the guards, he got away with a mini-arsenal including assault rifles, pistols, a submachine-gun and several cases of ammunition.

The weapons were intended for use against the African National Congress, he said, warning: "We are now going for the ANC's throat."

Mr. Rudolph is vice-chairman of the Boerestaat (Boer State) Party, which is calling for an exclusively white state that would include the territory of the former independent Boer republics (Transvaal and the Orange Free State plus the north of Natal.)

Party chief Robert van Tonder and Afrikaner Resistance Movement (AWB) leader Eugene Terre'Blanche have been stepping up their threats of violence, even going so far as to mention the possibility of an armed uprising if Mr. De Klerk's policies led to a black government.

Speaking Wednesday in Krugersdorp west of here, Mr. van Tonder said that taken to its logical conclusion, Mr. De Klerk's reform program "leaves us Boers no other option but to take this land through violence and possibly through a coup."

At the same meeting Mr. Terre'Blanche exclaimed: "The night law and order breaks down, that night we will use violence to take over." Earlier in the month he had called on whites to arm themselves, even though most of them are already far from being unprotected.

As if to show that this was no bluff, Mr. Terre'Blanche and Mr. van Tonder made it known that they had set up commando groupings at the grassroots level,
with one "commander" per town and one "general" per region.

Over the past few weeks in various white towns armed militias have made their appearance. Although officially "apolitical" they were set up by "Boers" whose extreme-right sympathies are undeniable.

Questioned last week by Agence France-Presse, an official at the Law and Order Ministry admitted that it would be "naive not to believe there is a threat by right-wing radicals." But he added hastily: "In reality, they

are a small minority."

What the far right lacks in quantities of arms it has in quality, and as Mr. van Tonder said last week: "We have the advantage that all our sons have had military training."

-30- 3547

#90113d1670 04/23/1990 ~French/German News Agency

BEIJING (APRIL 23) - Chinese economic authorities said Monday they expect no significant growth in industrial production in the first half of 1990 as the country pays a price for its austerity program.

But Zhang Zhongji, spokesman for the state statistical bureau, said it was too early to speak of recession or to predict that industrial growth would fall short of the six percent target for 1990.

On the positive side, Mr. Zhang reported that China had an 820 million U.S dollar trade surplus for the first quarter of 1990, due mainly to a drop in imports.

China's exports totaled 10.79 billion dollars during the three months, up 11.6 percent on a year-on-year basis, while imports fell off 13.7 percent to 9.97 billion dollars, he said.

Consumer spending was down but so was inflation, with prices rising at a 3.9 percent annual rate in the first quarter of 1990, the slowest rate since 1988.

"I think the industrial growth will still be low during the second quarter of the year. We could only expect a significant change ... during the second half of the year," Mr. Zhang told a press conference.

After sweeping austerity measures were imposed in September 1988 to cool an overheated, inflation-ridden economy, China's industrial growth slid to 6.8 percent in 1989 after surging 17.7 percent the year before.

Industrial production actually slipped in the last quarter of 1989 and again in January, when it dropped at the rate of six percent annually, its worst drop in a decade, according to official statistics.

But gains at the annual rate of 5.4 percent in February and 1.4 percent in March brought production back to 415.8 billion (88.3 billion dollars) for the first quarter of 1990, the same as for the corresponding period in 1989.

Mr. Zhang said it was "inevitable" for stagnation to occur during a period of "economic readjustment," but added: "We cannot say these phenomena

indicate a recession."

It will be "a very difficult and arduous task" to meet the industrial growth target of six percent for 1990, but "it is still to early to say that we won't be able to accomplish our target."

A state statistical bureau economist, Zhao Minshan, has predicted at best zero growth in industrial production during the second quarter, without ruling out a possible drop.

Growth should resume in the third quarter of 1990 and hit "full steam" in the last three months of the year, Mr. Zhao said in an article published Sunday by the China Daily.

The government has ordered businesses to repay their debts by July, on the grounds that the estimated 23.4 billion dollars in outstanding debt was actually hampering the economy.

But Mr. Zhang stressed that the government would continue to make loans to bail out troubled businesses.

He did not provide figures for the new quarter, but said 19.9 million yuan (4.23 million dollars) were loaned in the first three months of the year, slightly more than double that loaned during the first quarter of 1989.

The market remained slow in the first quarter of 1990, with consumer demand off 3.1 percent from the same period in 1989 contributing to massive inventory overstocks of both industrial and commerical goods, Mr. Zhang said.

The spokesman provided no unemployment figure for the quarter, but he said that at the end of 1989, 3.78 million Chinese were out of work, or 2.6 percent of workers in urban areas.

Some Chinese economists set the figure at four percent, not including surplus labor in the countryside, estimated at about 170 million people.

Mr. Zhang said 3.5 million people returned to rural areas last year after losing their city jobs. He claimed that all of them had found new jobs in agriculture or irrigation projects.

-30- 3998

#90113d1810 04/23/1990 ~French/German News Agency

PARIS (APRIL 23) - The Italian aircraft constructor Aeritalia has signed a 100 million dollar, 10-year agreement with Airbus Industrie to make fuselage sections for the new stretched Airbus A321, it was announced here Monday.

Airbus officials have been involved in discussions with the Italian constructor since 1989. The A321 -- which can carry 186 passengers, 36 more than Airbus 320 -- is due to go into service early in 1994. So far there have been 44 firm orders for the plane from 10 airlines, with others pending.

The A321 Airbus program is being financed for the first time through the banking sector.

Aeritalia will build the front section of the fuselage -- 4.3 metres (yards) long by four metres in diameter -- at its Naples factory and will begin deliveries early in 1992. British Aerospace will construct the rear section.

Aeritalia will not have the status of an associate or partner in the project which would entitle it to share in any possible profits.

Meanwhile the head of Daimler-Benz, the biggest industrial group in West Germany, has sharply criticised French state intervention in the running of Airbus Industrie.

In an interview with the Financial Times published in London, Edzard Reuter said he was sceptical about the possibility of restructuring the Airbus consortium in which Germany is a partner with Britain, France and Spain.

He said he was convinced Airbus could be a commercial success "on condition that the Airbus structure was placed on a private sector, market-orientated basis.

"There are now three partners -- the Spanish, the British and the Germans -- who firmly believe that a market-oriented structure is necessary.

"In the appropriate spirit of friendliness" Daimler will be pushing the French to move further, Mr. Reuter said.

-30- 2016

#90113d1830 04/23/1990 ~French/German News Agency

PARIS (APRIL 23) - Oil exports from the Organization of Petroleum Exporting Countries (OPEC) may have dropped by more than two million barrels a day (mbd) in April due to a fall in purchases from the Middle East, according to the specialist review Petrostrategies issued here Monday.

The magazine said that from assessments on the tanker spot market, oil shipments to the Middle East dropped from 4.7 mbd in March to 3.1 mbd in April. Shipments to Africa fell by 400,000 mbd over the same period,

trimming OPEC exports from 21 to 19 mbd, it said.

The fall means that surpluses will have to be stocked at very high prices either on land or at sea, the review said.

An emergency meeting of OPEC's oil review committee is to be held next week from May 2 in Geneva in an attempt to halt the slide in oil prices which have shed more than three dollars a barrel since April.

Petrostrategies said OPEC wouild try to achieve voluntary and individual cut backs which would ensure a reference price of around 18 dollars a barrel.

OPEC was producing between 23.7 and 24 million barrels of oil a day in March, according to market analysts, instead of the 22 mbd ceiling it set itself.

-30- 1359

#90113d1840 04/23/1990 ~French/German News Agency

MANILA (APRIL 23) - Hong Kong's economic growth will remain low in 1990 if business confidence fails to improve following the China crisis last year, the Asian Development Bank (ADB) said in its latest annual report.

The British colony's gross domestic product (GDP) growth fell to a dismal 2.5 percent in 1989, compared to 7.3 percent in 1988, according to the report issued by the bank's headquarters here at weekend.

The ADB said Hong Kong's export growth rate fell from 39.3 percent in 1988 to 13.7 percent last year, which it attributed both to slackening foreign demand and an appreciation of its currency in real terms.

"The slowdown in Hong Kong can be attributed to a significant deceleration in export growth and a softening in the domestic demand," the report said. "The latter was largely a result of a loss in business confidence following the economic and political disruptions in the People's Republic of China."

"Growth is expected to remain low if business confidence remains weak," the ADB said without mentioning any figures.

Hong Kong, which reverts to Chinese sovereignty in 1997, was shaken by the massacre of pro-democracy demonstrators in Beijing last June. Many of its businessmen and professionals have begun an exodus ahead of the Chinese takeover.

The ADB report said China's growth rate, which cooled down to 3.9 percent last year from an overheated 11.2 percent in 1988, is expected to pick up

to 5.5 percent this year following austerity and other measures adopted in 1989.

-30- 1714

#90113d2310 04/23/1990 ~French/German News Agency

FRANKFURT, West Germany (APRIL 23) - Share prices on the Frankfurt stock exchange slumped dramatically Monday following the announcement that the government had recommended a one-for-one exchange rate for monetary union with East Germany.

Within an hour of the announcement the market indicator DAX fell 46.83 points to 1.837.50, a drop of 2.5 percent.

The announcement also hit the Deutsche mark where it was quoted at 1.6970 against the dollar against 1.6814 at Friday's close.

Stock losses were across the board and blue chips like BMW and Daimler-Benz were hit. BMW lost 19 Deutsche marks to 556 while Daimler Benz shed 39.5 marks to 858.50.

Commerzbank lost 4.70 marks to 282.50 and Dresdner bank shed 9.50 to 411.50 marks.

PARIS (APRIL 23) - Elf Aquitaine is to take over the exploration and oil production activities of British Petroleum in France, the companies announced here Monday.

No financial details of the transaction, which requires government approval, were disclosed.

Elf Aquitaine will take over the Societe Francaise de developpement petrolier BP (SFDPBP) in which BP will have placed its French exploration and production activities.

The agreement takes effect on July 1 and covers 28 oil exploration concessions - nine in Aquitaine in southwest France and 19 in the Paris basin - and nine production units, one in Aquitaine and eight in the Paris basin.

BP France announced in March that it intended to cede its exploration activities in France in order to concentrate investments in refining and distribution.

The new deal means that Elf Aquitaine will increase its oil production in

France from 800,000 to one million tons a year, while proven oil reserves will rise from six to seven million tons.

#90113d2500 04/23/1990 ~French/German News Agency

MOSCOW (APRIL 23) - Soviet presidential spokesman Arkadi Maslennikov Monday played down reports that Soviet leader Mikhail Gorbachev's economic reform programme would mean "shock therapy" or a leap into the unknown for the Soviet Union.

He stressed instead the social guarantees contained in the reforms.

He told a news conference that no reform prorgamme had been adopted by the federal and presidential councils during meetings here last week. Instead the councils had simply studied the "concept" of these reforms.

He said a lot of false information had been published about the reforms.

When first presented, Mr. Gorbachev's package was described as aiming for a market regulated economy by freeing prices, getting rid of state subsidies and allowing for unemployment.

But Monday, Mr. Maslennikov played down this aspect and instead stressed the importance of social guarantees for the poorest sections of society.

To allow unemployment to develop was "inadmissible for socialism."

"We cannot follow the methods of Mrs. Thatcher (British prime Minister Margaret Thatcher). This avenue is closed to us," he said.

Nor could the Soviet Union place on companies the burdens of social protection which were the responsibility of the state, he added.

Earlier this month Leonid Abalkin, first deputy prime minister responsible for the economy, had talked of major increases in raw material prices leading to a doubling of consumer prices. He also mentioned removing state subsidies from bankrupt companies with inevitable unemployment.

Mr. Maslennikov admitted there was "nothing to be optimistic about" in the Soviet economy. Soviet incomes have risen by about 14 per cent during the first quarter of 1990 without a corresponding increase in output.

The reforms are due to come into effect in January next year although some measures could be taken in July this year, he said. He said the programme should be ready to submit to parliament next month.

Economic analysts here said public hostility to price rises and

unemployment has led to fears of social conflict and appears to have led the Soviet leadership to play down the market aspect of reforms and concentrate instead on the social protection which will be offered.

NEW YORK, United Nations (APRIL 23) - The United Nations Monday welcomed Namibia as its 160th member on an overwhelming voice vote by the U.N. General Assembly.

Namibia gained independence March 21 after 75 years of rule by South Africa. Its independence process was overseen by the United Nations.

The acceptance of Namibia by acclamation came during a special session on international economic cooperation.

The 15-member Security Council recommended last week that Namibia be admitted to the United Nations.

U.N. Secretary General Javier Perez de Cuellar, in a welcoming speech, noted that it took "decades of struggle and sacrifice by the Namibian people and their political leadership and decades of support by the international community" for Namibia to make it to the world body.

South Africa agreed to give up mineral-rich Namibia under a U.S.-brokered accord calling on Cuba to withdraw its troops from Angola.

The United Nations' success in Namibia has led other nations to turn to the world body as a forum for problem-solving, Mr. Perez de Cuellar said.

He added that, in order to do its job well, the organization "must be given clear mandates, adequate resources and solid and consistent cooperation by all sides."

TOKYO (APRIL 23) - Sony Corp., Japan's leading electronics maker, said Monday it would increase its imports by 350 percent from the 1989-level to 120 billion yen (764 million dollars) by 1993.

Sony said its 20-company group would also increase its imports by 270 percent to 33 billion yen (210 million dollars), bringing the total imports to 153 billion yen (974 million dollars), up 270 percent.

About 40 percent of the production of the Sony group will be manufactured outside of Japan by 1993, the company added.

Audio products, videotapes and color television parts manufactured in Sony's factories abroad will account for some 60 percent of the total imports, Sony said.

#90113d2750 04/23/1990 ~French/German News Agency

TOKYO (APRIL 23) - Prime Minister Toshiki Kaifu said Monday Japan would continue its defense buildup despite East-West detente.

Speaking at a budget committee session of the House of Representatives, Mr. Kaifuu said he welcomed the easing of East-West tensions but that he saw no need for a review of the defense program outlined in 1976.

"Even amid changes in the international situation, we must adhere to our exclusively protection-oriented defense," Mr. Kaifu said, brushing aside suggestions that Japan should review its 15-year national defense program.

He also said his government had no intention of cutting back a planned defense buildup beginning in fiscal 1991.

KABUL (APRIL 23) - The battle for Jalalabad has ended after more than a year of bitter fighting, and government forces are in control of the eastern city near the border with Pakistan, a top Afghan army general said Monday.

General Mohammed Afzal Ludin told reporters flown to Jalalabad that security forces had pushed back mujahedeen positions and his men were ready with large supplies of food and military hardware to take on the rebels in the event of renewed attacks.

"The battle for Jalalabad is over. This is now a stronghold of the government," Gen. Ludin said, in a claim which diplomats viewed with some reservation.

The diplomats in the Afghan capital said Jalalabad's current calm could be "a temporary peace as the mujahedeen could regroup and attack again."

The reporters during the visit saw residents of Jalalabad moving about freely and shops in markets filled with food and clothes, mostly smuggled across the border from Pakistan.

Gen. Ludin told the reporters that some 58,000 rebels were either killed or wounded by the government troops since the battle of Jalalabad began March 16 last year after the completion of the Soviet withdrawal.

He put as government losses some 3,500 troops and civilians killed or wounded, and property damage at between 15 million and 17 million U.S. dollars.

He said the mujahedeen had fired 580,000 rockets and shells at the city.

Security forces destroyed 37 tanks, 936 rocket launchers, 13 anti-aircraft positions and 542 mortars during the battle.

"The rebels have been pushed back. We have extended our security belt. Rebels are now using long-range missiles, but their attacks are not strong. There is not much danger in Jalalabad now," he said.

He said mujahedeen positions were some 40 to 50 kilometres (25-30 miles) away from his line of control and sometimes the rebels came as close as three kms (1-12 mile) and ran back.

"We have stored a lot of supplies, we are ready for heavy fighting if there is another attack," the general said.

LAGOS (APRIL 23) - More than 160 suspected plotters have been arrested following Sunday's abortive coup by junior officers against President Ibrahim Babangida, a top military assistant to the Nigerian leader said here Monday.

Those arrested included major Gideon Orkar who made the coup announcement over the national radio, the principal staff officer to the president, Colonel Anthony Ukpo, told journalists.

Eleven other soldiers, including a lieutenant colonel, have been declared wanted by the Nigerian army over the coup attempt, he added.

Preliminary investigations have shown that the soldiers were backed by

"rich and powerful men", said Col. Ukpo, a former minister of information.

MAOKENG, SOUTH AFRICA (APRIL 23) - South African police Monday teargassed about 1,000 protestors massed in front of the city council of Maokeng black township.

An AFP correspondent at the scene said that the protestors had gathered at the township 180 kilometres (110 miles) south of Johannesburg, to demand the immediate resignation of the mayor.

After lengthy talks with the organizers of the protest aimed at defusing the tense situation, the head of the riot unit ordered his men to disperse the protestors.

The incident was the climax of a day of protest staged by the Maokeng Democratic Crisis Committee (MDCC), an umbrella organization close to the anti-apartheid African National Congress.

At the peak of the protest at midday, close to 5,000 people gathered around the heavily guarded city council while a seven-woman delegation was presenting a petition to mayor Caswell Koekoe.

They accused the mayor of corruption and of not attending to the needs of the community. The MDCC sees Mr. Koekoe as a "collaborator" of the South African Government.

In the presence of several reporters, Mr. Koekoe rejected the call for his resignation, saying: "I am representing the people" and accused the MDCC of

"intimidating the people".

The police, who had at first issued a deadline to the crowd to disperse extended the ultimatum and tried to convince the protestors to leave peacefully.

It was not immediately known if anyone was injured or detained in the police action.

PRAGUE (APRIL 23) - One thousand people demonstrated here Monday to press for a ban on communist party activities in the Czechoslovak capital until free elections scheduled in six weeks' time, Czechoslovak television reported.

The rally was organized by radical groups including the Movement for Civil Liberty, the Confederation of Political Prisoners and a group formed to support Prague prosecutor Tomas Sokol.

Mr. Sokol has been threatened with disciplinary action after threatening to ban the Czechoslovak Communist Party.

On Tuesday, Mr. Sokol wrote an open letter to the communist party leadership saying that from May 1, the party's activities in the city risked being considered as an offence of "propagating fascism and similar movements".

Mr. Sokol, who has pointed out similarities between communist and Nazi ideologies and practices, has received support from a number of organistions and parties.

On April 11, a 10-minute warning strike was heeded throughout the country to press the party to hand over its property built up over 42 years of communist rule.

Czechoslovakia's first free elctions since 1946 are scheduled for June.

GENEVA (APRIL 23) - The United States will cease paying contributions to United Nations bodies that admit the state of Palestine proclaimed in 1988 or upgrade the PLO's representation, the U.S. mission at the United Nations here said Monday.

The statement came two weeks before the opening of the World Health

Assembly which is to consider the Palestine Liberation Organization's application for Palestine to be made a full member of the World Health Organization. The PLO currently holds observer status at the WHO and other U.N. bodies.

The U.S. mission said that the United States was "required by law to withhold all funding -- assessed and voluntary contributions -- to any United Nations agency that enhances the status of the PLO, such as accepting it as a full member."

It said the United States "does not recognize the state of Palestine, proclaimed by the PLO, because it is not a state within the commonly accepted international law definition, including control of recognized territory."

NEW YORK (APRIL 23) - Hundreds of demonstrators blocked traffic and overturned trash bins along Wall Street Monday to protest corporate environmental policies, but trading began on schedule, authorities said.

Police estimated 700 protesters filled the narrow street of the nation's financial center in a demonstration organized by Earth Day Wall Street Action, a coalition of 60 environmental groups in the United States and Canada.

Purpose of the protest was to focus attention on "institutions responsible for much of the ecological devastation which is destroying the planet."

More than 170 demonstrators were arrested, most of them charged with disorderly conduct, police said.

Police closed one section of Wall Street to everyone but people showing work identification and New York Stock Exchange employees used a side door to enter the building. The markets opened at their usual hour, 9:30 a.m. (1330 GMT).

#90113d4370 04/23/1990 ~French/German News Agency

THE HAGUE (APRIL 23) - A senior Palestinian official said here Monday that tentative agreement had been reached to hold an extraordinary Arab summit by next month to discuss Soviet emigration to Israel.

"Probably it will take two or three weeks" to hold it, said Nabil Shaath, president of the political committe of the Palestine National Council (parliament-in-exile) during a brief stopover in the The Hague. He

emphasized that the summit would "absolutely" take place.

The summit is to be convened either in Baghdad or Tunis.

Mr. Shaath said the Palestinian leadership felt it was both a Palestinian and an Arab problem.

"When Mr. Shamir spoke about a bigger immigration, which means a bigger Israel, he did not specify conquest of the (occupied) West Bank only," he said.

He was referring to a statement by outgoing Israeli Prime Minister Yitzhak Shamir who in January said that stepped up Jewish immigration from the Soviet Union required "a greater Israel."

The expected summit would also discuss the Middle East peace process, Mr. Shaath said.

OSAKA (APRIL 23) KYODO - SANYO ELECTRIC CO. SAID MONDAY IT WOULD RAISE ITS FOREIGN-MADE SEMICONDUCTOR PURCHASE RATIO TO 15 PERCENT BY THE END OF THIS YEAR.

THE 1989 RATIO FOR THE FIRM, WHICH BOUGHT FOREIGN CHIPS MAINLY FROM MOTOROLA INC. OF THE UNITED STATES, WAS 11 PERCENT.

SANYO WAS APPOINTED GENERAL AGENT AT THE END OF LAST YEAR BY MICRON TECHNOLOGY INC., AND ITS FOREIGN CHIP PURCHASE RATIO REACHED 14 PERCENT IN THE JANUARY-MARCH PERIOD OF 1990.

SANYO FORECAST THAT THE 1990 ANNUAL RATIO WOULD PROBABLY BE ABOVE 15 PERCENT BUT THAT UNDER PRESENT CIRCUMSTANCES IT WOULD BE EXTREMELY DIFFICULT FOR IT TO RAISE THE RATIO TO 20 PERCENT BY 1991 -- THE TARGET SET UNDER THE JAPAN-U.S. SEMICONDUCTOR AGREEMENT.

AMONG OTHER MAJOR JAPANESE ELECTRICAL MANUFACTURERS, MITSUBISHI ELECTRIC

CORP. AND NEC CORP. HAVE ALREADY BROUGHT THEIR FOREIGN CHIP RATIO TO THE TARGET LEVEL.

MATSUSHITA ELECTRIC INDUSTRIAL CORP. IS AIMING TO ACHIEVE THE TARGET BY JULY 1991 WHEN THE AGREEMENT IS TO EXPIRE.

HOWEVER, SINCE SEMICONDUCTORS FOR HOME APPLIANCES ARE NOT THE FORTE OF U.S. CHIP MAKERS, IT IS CONSIDERED DOUBTFUL WHETHER SANYO ELECTRIC, A MAJOR MAKER OF HOME APPLIANCES, MAY ATTAIN THE GOAL BY THE TARGET YEAR.

SALT LAKE CITY (APRIL 23) PR NEWSWIRE - Smith's Food & Drug Centers Inc. (NYSE: SFD) today reported record sales and net income for the first quarter of 1990.

Sales for the first quarter ended March 31, 1990, totaled $488 million compared to $399 million last year, an increase of 22 percent. Net income was $8.1 million, up 42 percent over the $5.7 million reported for the like quarter last year. Net income per common share, effected by additional shares issued in connection with last year's public offering, was 32 cents compared to 29 cents, an increase of 10 percent. Sales in same stores (stores opened one year or more) increased 8.7 percent over the first quarter of the prior year.

During the first quarter, Smith's opened two additional combination food and drug centers in Phoenix. Seven obsolete, smaller stores were closed during the quarter, including six stores in Southwest Idaho. Thirteen additional stores, currently under construction, are planned to open during the remainder of 1990.

A new cultured dairy products plant began operation at the end of 1989. Completion of an ice cream plant, also located at the Layton, Utah distribution complex, is scheduled for the end of 1990. Construction will begin shortly on a central distribution center near Phoenix. This new center is scheduled to open at the end of 1991 and will supply stores in the Southwest Region.

Smith's is a regional supermarket chain operating 93 stores in eight intermountain and southwestern states. The majority of these stores are large combination food and drug centers.

CONTACT: Robert D. Bolinder or Matthew G. Tezak both of Smith's Food & Drug Centers Inc., 801-974-1400.

ATLANTA (APRIL 23) PR NEWSWIRE - Days Inns of America Inc. is proud to announce the opening of the Paris - Days Hotel, in Bussy-Saint-Georges, four miles from the construction site of Euro Disneyland and less than 14 miles from the Charles de Gaulle and Orly airports and the city of Paris.

This is the first Days location in France, and was developed through a master license agreement with Days Hotels Europe, S.A., headquartered in Paris. This licensee will develop Days properties through conversion and new construction throughout France, Switzerland, Italy and southern West Germany and expects to open 50 hotels during the next five years.

Days has chosen to expand internationally through the master licensing vehicle, rather than through individual franchise agreements as it does in the United States. To date, international expansion includes 5 open properties in Canada (Cornwall, Toronto and Niagara Falls, Ontario), two in Mexico (Mexico City and Acapulco), and one in The Netherlands (Best). Openings set for 1990 include Sarnia and Niagara, Ontario; two in Vancouver, one in Coquitlam, and one in Clearbrook, British Columbia; Montreal, Quebec; Naarden, Netherlands; Kowloon, Hong Kong; and Augsburg, West Germany. Days also has properties under construction in Bangalore, Surat and Tirupathi, India.

Days Inns of America Inc., with its Days brand inns, hotels, suites and Daystops, is the third-largest hotel brand in the world and the

fastest-growing in the moderate price segment of the market. An international lodging operator and franchisor, the chain has more than 1,600 hotels open and under development in the U.S. and abroad.

#90113p5739 04/23/1990 ~PR Newswire

SAN DIEGO (APRIL 23) PR NEWSWIRE - Mycogen Corp. (NASDAQ: MYCO) announced today revenues of $3,066,000 for the first quarter ended March 31, 1990, compared to $1,831,000 in the same period in 1989. Net loss for the quarter was $675,000, or $.08 per share, compared to a net loss of $735,000, or $.11 per share, in the quarter ended March 31, 1989.

Sales revenue increased as a result of the company expanding its product line in January 1990 by acquiring the exclusive manufacturing and marketing rights to all biopesticide products owned by Safer Inc. for agricultural and other commercial applications. Interest and other income

increased as a result of an increase in available cash due to the joint research agreement with JT Biotech, USA and to an equity investment by Kubota Corp.

Research and development expenditures increased as a result of expanding product development activities. In addition, expenditures were incurred to develop manufacturing processes, support and prepare product registration packages, and conduct field trials. Marketing, general and administrative expenses increased due to the addition of Safer's agricultural and commercial sales and marketing staff.

"The addition of the fatty acid product line complements Mycogen's existing line of environmentally sound biopesticides," said Mycogen Chairman Jerry Caulder, Ph.D. These biodegradable pesticides act on contact to kill certain insects and weeds that are not currently targeted by Mycogen's biopesticides.

Also during the quarter, Mycogen's MVP bioinsecticide became the first genetically engineered pesticide approved by the Environmental Protection Agency for large-scale field testing. MVP targets caterpillar pests, such as the diamondback moth, in a variety of vegetable crops.

In April, Mycogen announced that The Lubrizol Corp. (NYSE: LZ) agreed to purchase 444,444 shares of Mycogen common stock at $13.50 per share. The $6 million equity investment will be used to accelerate research and product development programs and to advance the recently acquired fatty acid products and technology.

Mycogen Corp. develops, manufactures and markets biopesticides as alternatives to chemical pesticides to control a variety of insects, weeds and other pests. Mycogen's biopesticide products are based on natural agents such as microorganisms, fatty acid compounds and highly refined paraffinic oils. The company develops products through the application of genetic engineering technology and innovative formulations.

NEW YORK (APRIL 23) PR NEWSWIRE - Avon Products Inc. (NYSE: AVP) today reported first-quarter net earnings of $15.2 million, compared to $6.2 million in the first quarter of l989, on sales that were virtually even with last year.

Primary earnings per share were 11 cents, compared to a loss of 5 cents in the first quarter last year. A small gain from the sale of Avon's Parfums Stern subsidiary was principally offset by takeover defense costs.

Consolidated net sales were $703.8 million, down slightly from $704.9 million in the first quarter of 1989. Excluding 1989 sales of Parfums Stern, Avon's sales for the quarter were up 4 percent.

"Coming off a strong 1989, our first quarter results demonstrate the growing strength of our business," said James E. Preston, Avon's chairman and chief executive officer. "We expect a very good year in 1990."

Avon's U.S. direct selling business had a 14 percent increase in pretax profit on sales that were level with the first quarter of last year. The domestic division enjoyed the full benefit of cost reduction actions taken last year and continuing this year, Preston said.

Avon International registered a 17 percent increase in pretax profits on a 7 percent sales increase. This strong performance was achieved despite unfavorable currency translation in Brazil and Argentina.

Avon's retail fragrance sales were down 44 percent, reflecting the sale of Parfums Stern. But Giorgio Beverly Hills, the larger and more profitable fragrance subsidiary retained by Avon, increased sales by 12 percent. As expected, Giorgio had a small pretax loss in the first quarter.

Consolidated unit sales were up 1 percent after excluding Parfums Stern from the 1989 total. International units were up 5 percent. U.S. units were down 3 percent, and Giorgio units were up 8 percent.

Avon continued to make substantial progress in debt reduction, Preston said. Debt at the end of the quarter was $695.9 million compared with $1.13 billion at the end of the first quarter last year. Interest expense was down 13 percent.

#90113p5746 04/23/1990 ~PR Newswire

ASHLAND, KY (APRIL 23) PR NEWSWIRE - Ashland Oil Inc. (NYSE:ASH) today reported net income of $1 million, equal to 2 cents a share, for the quarter ended March 31, the second quarter of its 1990 fiscal year.

This compares to a net loss of $14 million, or a loss of 25 cents a share in the quarter last year, which included a $9 million after- tax charge related to an arbitration award in a commercial dispute. Sales and operating revenues were $2.1 billion for the quarter just ended and $1.9 billion in last year's quarter.

For the six months ended March 31, 1990, Ashland had net income of $23 million, or 41 cents a share. This compares to $82 million or $1.48 a share for the period last year. The decline was due to lower results in this year's first quarter. Sales and operating revenues were $4.3 billion for fiscal 1990's first half and $4.0 billion for the period last year.

"Although Ashland improved its results from a year ago, the second quarter again proved to be a difficult earnings period," said Ashland Chairman and Chief Executive Officer John R. Hall, noting that refinery margins, although slightly better than last year, were very weak for most of the quarter.

"Refinery margins were strong in early January but deteriorated rapidly before improving in late March," he said. Consequently, while refining results were better than the 1989 quarter, Ashland Petroleum experienced a small operating loss.

Hall added, however, that Ashland was pleased by an excellent performance from SuperAmerica retail marketing operations and from Ashland Exploration. Equity income from coal investments increased due to higher sales tonnage.

A general softening in the economy led to lower operating income from Ashland Chemical, while results from Valvoline declined as well. APAC

construction operations experienced their normal winter slowdown and, under Ashland's normal accounting practice of deferring winter costs, reported break-even results.

"In summary, the March quarter again proved to be a difficult one, as is historically the case," Hall said. "However, market conditions in the refining industry are improving. Spot crude oil prices at the end of the second quarter were about 12 percent lower than at the beginning.

"Gasoline inventories have declined for the past six weeks and are currently about 2.9 million barrels below last year," he added.

NEW YORK (APRIL 23) PR NEWSWIRE - Time Warner Inc. (NYSE: TWX) reported record first-quarter earnings before interest, taxes, depreciation, and amortization (EBITDA) of $536 million on revenues of $2.741 billion.

Due to interest expense and the amortization of the purchase cost related to Time's acquisition of Warner Communications Inc. (WCI), the company had a first-quarter net loss of $51 million. The loss per common share after preferred dividends was $3.25.

In the financial results released today, Time Warner presented its 1989 figures on a historical and a pro forma basis. The following discussion assumes the pro forma purchase of 100 percent of WCI as of Jan. 1, 1989.

For the quarter ended March 31, 1990, total EBITDA of the company's operating units increased 16 percent to a record $536 million compared with $461 million for the same period last year. Revenues climbed to $2.741 billion from $2.548 billion in 1989.

Magazine division EBITDA for the first quarter was $54 million compared with $70 million in 1989. As expected, the start-up costs of Entertainment Weekly had a negative impact on Magazine results. A softer advertising environment, primarily in automotive and tobacco, was responsible for a decline in advertising revenues while circulation revenues were up modestly.

Time Warner Inc. is the world's largest media and entertainment company. It has operations in magazines including Time, Sports Illustrated, People, Entertainment Weekly, Fortune, Money, Life, the magazines of the Southern Progress Corporation, and 50-percent-owned Whittle Communications.

The company also has operations in filmed entertainment (Warner Bros., Warner Bros. Television, Lorimar Television, Warner Home Video, Licensing Company of America, and DC Comics) and recorded music and music publishing (Warner Bros. Records, Atlantic Recording Group, Elektra Entertainment, WEA International, Warner/Chappell Music, WEA Corp., WEA Manufacturing, Ivy Hill Corp., and Warner Special Products).

Time Warner also has interests in cable television (82-percent-owned American Television and Communications Corporation, and 100-percent-owned Warner Cable); programming-HBO (HBO, Cinemax, The Comedy Channel and HBO Video), and books (Time-Life Books; Book-of-the-Month Club; Little, Brown; Warner Books; and Oxmoor House).

NEWPORT BEACH, CA (APRIL 23) PR NEWSWIRE - Pacific Scientific Co. (NYSE: PSX) Monday reported net income of $913,000, equal to 15 cents a share, on sales of $44.7 million in the first quarter of 1990. In the comparable period a year ago, on sales of $42.4 million the company earned $302,000, or 6 cents a share, from operations and $515,000, or 9 cents a share, in an extraordinary gain from the repurchase of debentures.

Commenting on the first quarter sales, Edgar S. Brower, president and chief executive officer, stated that sales in the just completed quarter were up 12 percent over the same period in the prior year, after adjusting the prior year amount to eliminate the sales of two discontinued instrument product lines.

Orders exceeded shipments in the first quarter of 1990 and the backlog of orders for future deliveries is now $100 million.

Pre-tax profit from operations, in the first quarter of 1990, was $1.4 million, a substantial improvement over the same period in the prior year. In the prior year, the comparable amount was $373,000 which included a $750,000 gain from the sale of the aforementioned discontinued product lines. The income tax provision in the first quarter of 1990 was 36 percent as compared to the prior year provision of 19 percent, due to the greater availability of operating loss carryforward in the prior year.

Sales in the Aerospace Product segment were up 20 percent from the prior year and sales in the Industrial Products segment were up 5 percent. Of particular importance is the substantial improvement in operating profit within the Aerospace Products segment. This improvement is the result of operating efficiencies realized in combining the Kin-Tech and HTL divisions in late 1988 and the profit improvements of the Electro Kinetics

Division.

Brower added that the outlook for the remainder of 1990 is excellent and we see opportunities for continued improvement in sales and profitability.

Pacific Scientific's core business is designing, manufacturing and marketing technology based proprietary products for niche markets. The principal industrial products include electric motors and controls, and measurement and control instruments. Aerospace products include fire detection and suppression systems, aircraft equipment and electric generators and alternators for aircraft and missiles.

#90113p5764 04/23/1990 ~PR Newswire

DEARBORN, MI (APRIL 23) PR NEWSWIRE - Ford Motor Company (NYSE: F) next month will begin applying a special transit coating on its new cars and trucks to help protect vehicles from environmental fallout damage.

Environmental fallout has been a major concern in the auto industry for several years and has intensified since governmental regulations required manufacturers to change the chemical makeup of their paints. Current auto paints, although better for the environment, are more susceptible to damage from acid rain, bird droppings, and other industrial fallout.

Ford invested almost $7 million in 16 North American assembly plants for facilities to accommodate the new coating. Because vehicles are most susceptible to paint damage from environmental fallout during the summer months, the transit coating will be applied to Ford vehicles built between May and October.

"We expect to have new paints, which are more resistant to environmental fallout, on most of our vehicles by the summer of 1991," explained Lee Miskowski, general manager of the Ford Parts and Service Division.

"In the meantime, this new transit coating, which was extensively tested last summer, will go a long way toward improving customer and dealer satisfaction with our paint."

The translucent polymer coating, which will be sprayed on vehicles at the assembly plants, will help protect vehicles during shipment and dealership inventory storage. The coating will be removed at dealerships during the normal pre-delivery prep process.

"This new coating was tested last summer on cars produced at the Atlanta Assembly Plant with very positive results," explained Don Dopierala,

manager of the Paint Materials and Emissions Department, Ford Body and Assembly Operations.

"But it's a temporary solution to an industrywide concern. Our new enamels will provide excellent protection from environmental fallout damage while still meeting EPA regulations to help protect the environment."

The company expects to have improved enamel coatings on most of its new vehicles by the summer of 1991 and all vehicles by the following summer.

PITTSBURGH (APRIL 23) PR NEWSWIRE - PPG Industries (NYSE: PPG) has acquired Establissements Robert Ouvrie S.A., Lille, France, a producer of surfactants and paper specialty chemicals, the companies announced today.

Terms were not disclosed.

Richard M. Rompala, PPG group vice president, chemicals, said Ouvrie, whose 1989 sales exceeded $11 million (about FFr65 million), expands PPG's foundation on which to build a profitable European specialty chemicals business.

PPG's Chemicals Group already produces surfactants in Manchester, England, and has been exporting surfactants and other specialty chemicals to European customers from the United States.

"Lille, in northern France, is an ideal location from which to efficiently serve customers on the continent," Rompala said. "The business also will benefit from combining excellent technology developed by PPG and Ouvrie, which has a reputation for the high quality of its products and service."

Francis Ouvrie, who will continue to manage the Ouvrie unit, said the company "is presently leader in the European market for sugar and fermentation defoamers. The arrival of PPG will strengthen our technological base for sugar and paper chemicals."

Ouvrie primarily serves the beet sugar and fermentation industries. It is a leading supplier of sugar defoamers and also produces chemicals used in papermaking. Pittsburgh-based PPG's specialty chemicals unit serves similar industries, as well as makers of soaps, shampoos and other personal care and various industrial products.

ATLANTA (APRIL 23) PR NEWSWIRE - Georgia-Pacific Corp. (NYSE: GP) today announced personnel appointments for its new Pulp and Bleached Board Division as part of the company's overall reorganization of its pulp and paper business.

The new division includes manufacturing operations at Brunswick, Ga.; Crossett, Ark.; Palatka, Fla.; and New Augusta, Miss.

W.C. "Pete" Howard, currently vice president - manufacturing for Nekoosa Papers, will be responsible for manufacturing operations at each division location.

Clint M. Kennedy, presently Georgia-Pacific vice president - pulp, kraft

paper and containerboard sales, will handle the division's sales and marketing activities for pulp, bleached board and kraft papers.

Stuart R. Carlson, presently director - human resources for Great Northern Nekoosa at Norwalk, Conn., will become director of human resources for the division.

Jerry R. Gilmore, currently division controller - Great Southern Paper at Cedar Springs, Ga., has been named controller for the division.

"The strength of this management team is indicative of the depth of talent at both Georgia-Pacific and Great Northern Nekoosa and will be an important asset to the future performance of this division," said Daniel A. Martinez, currently Georgia-Pacific's senior vice president - pulp and paper manufacturing, who will head the new Pulp and Bleached Board Division.

CANTON, OH (APRIL 23) PR NEWSWIRE - W.R. Timken, Jr., chairman - board of directors, announced today that The Timken Company (NYSE: TKR) has signed a definitive agreement to acquire MPB Corporation of Keene, New Hampshire. The purchase price of approximately $185 million in cash includes repayment of MPB's indebtedness. MPB is a leading U.S. supplier of aircraft, aerospace and other highly sophisticated bearings. Its annual sales are in excess of $120 million.

"This acquisition is consistent with our commitment to expand our core bearing and steel bussineses," said Joseph F. Toot, Jr., president of The Timken Company. "It will move the company into the super precision and miniature bearing markets. This area of the anti-friction bearing market is one in which our company's technical and metallurgical skills will be particularly valuable. MPB and its customers will benefit from our strong research programs, our knowledge in material science, and our technical support to customers."

MPB's principal facilities are two plants in Keene, New Hampshire, and a plant in Lebanon, New Hampshire. MPB employs approximately 1,850 people. Miniature and small bearings manufactured by MPB are used in such applications as aircraft and missile guidance systems, computer disk drives and medical hand pieces. Larger bearings are used in critical applications such as jet engines and aircraft gearboxes.

"MPB will be an important new addition to our global Bearing Business,"

noted Peter J. Ashton, executive vice president - bearings who is responsible for The Timken Company's worldwide Bearing Business. "We also see substantial opportunity to expand further its commercial markets. The employees of MPB are noted for their exceptional skills and this will enhance our competitive strengths. We welcome them to our worldwide team."

The acquisition, scheduled to be completed by May 31, 1990, is dependent upon the receipt of necessary governmental approvals and other conditions, including the repurchase by MPB of certain of its securities.

The acquisition will be financed within The Timken Comapny's existing capital structure. The company indicated that while the acquisition of MPB may affect the timing of other capital expenditure programs slightly, it is not part of the $1 billion investment program announced last year. The company expects no dilution of earnings from the acquisition.

LAKELAND, FL (APRIL 23) PR NEWSWIRE - Sikes Corporation (AMEX: SK.A) announced today that it has agreed to be acquired by Premark International Inc. (NYSE: PMI), for $201 million. Pursuant to the acquisition agreement Premark promptly will commence a tender offer for all shares of Class A common stock of Sikes at a price of $16.40 cash per share.

The tender offer will be followed by a merger in which any remaining Class A shares will be acquired at the same price. As part of the acquisition agreement, the holders of Sikes' Class B common stock have agreed to sell all their Class B shares to Premark for a price of $26.78 cash per share and to tender all of their Class A shares in the tender offer. The Class B shares have been deposited with a custodial agent under irrevocable instructions to sell them upon the closing of the tender offer for the Class A shares. The tender offer will be conditioned on, among other things, anti-trust clearance and tender of at least a majority of the outstanding Class A shares on a fully diluted basis.

The acquisition has been unanimously approved by the board of directors of Sikes, including approval by the majority of the board of directors who do not own any Class B shares. Kelly E. Norton, president and chief executive officer of Sikes Corporation, said that "The acquisition agreement with Premark culminates the extensive consideration by the Special Committee of our board of directors and its financial advisor, Lazard Freres & Co., of the expressions of acquisition interest that the company received from a number of interested parties. The apportionment of the aggregate consideration between the Class A and Class B Shares was the product of arms-length negotiations between the Class B shareholders

and the Class A directors on the Special Committee, who were represented in the negotiations by independent legal counsel and their independent financial advisor, The First Boston Corporation. The board of directors believes that the contemplated acquisition is in the best interests of Sikes' shareholders, employees, customers and other corporate constituencies."

Norton further stated: "We are enthused with the strategic long-term benefit of aligning our company with Premark. Our long-term corporate objectives and commitments to product quality and customer service are very compatible."

Sikes Corporation is headquartered in Lakeland, Fla., and is one of the largest domestic manufacturers of glazed ceramic wall and floor tile. Its Class A shares are traded on the American Stock Exchange.

HOUSTON (APRIL 23) PR NEWSWIRE - CRSS Inc. (NYSE: CRX), reported that its engineering subsidiary has been released to begin the design engineering for a $250 million modernization of Champion International Corporation's (NYSE: CHA) paperboard mill in Canton, N.C.

Construction will begin this fall, and the expected completion date is spring 1993. "This is the largest pulp and paper mill design project we've been awarded so far this year," said C. David Bassett, president of CRS Sirrine Engineers, Inc.

Champion International, based in Stamford, Conn., is a long-time client of Greenville-based CRS Sirrine Engineers, a worldwide provider of industrial facility design services. The mill at Canton produces uncoated free-sheet and bleached paperboard.

CRSS Inc., through its wholly owned subsidiaries, is a diversified design and construction services company. CRSS also has interests in the independent power/cogeneration industry and the acid rain/pollution control market.

NEW YORK (APRIL 23) PR NEWSWIRE - The Chubb Corporation (NYSE: CB) today

announced that net income for the quarter ended March 31, 1990, was $111.1 million or $2.56 per share compared with $104.9 million or $2.48 per share for the first quarter of 1989. These amounts include realized investment gains after taxes of $5.2 million or $.12 per share in the first quarter of 1990 and $3.1 million or $.07 per share in 1989. Net income also includes tax benefits of $2.7 million or $.06 per share in 1990 and $4.8 million or $.11 per share in 1989 relating to the "fresh start" adjustment as a result of the Tax Reform Act of 1986. Per share amounts do not reflect the pending two-for-one stock split to be voted on by shareholders on April 24, 1990.

Property and casualty underwriting loss after taxes amounted to $7.1 million for the first quarter of 1990 compared with income of $4.9 million in 1989. These underwriting results include the "fresh start" tax benefits. Net premiums written were $659 million, an increase of 4.6 percent compared with 1989. The combined loss and expense ratio, after dividends to policyholders, was 102.1 percent in 1990 compared with 99.8 percent for 1989. Catastrophe losses in 1990 amounted to $9.3 million or 1.4 percentage points of the combined loss and expense ratio compared with $3.6 million or 0.5 of a percentage point in 1989.

Investment income after taxes, exclusive of life and health insurance operations, was $93.1 million in the first quarter of 1990 compared with $79.5 million in 1989, an increase of 17.1 percent.

Life and health insurance operations resulted in income after taxes of $10.2 million in the first quarter of 1990 compared with $9.4 million in 1989.

Real estate operations contributed income after taxes of $13.1 million in the first quarter of 1990 compared with $11.7 million in 1989.

CHARLOTTE, NC (APRIL 23) PR NEWSWIRE - Duke Power Co. (NYSE: DUK) today reported first quarter 1990 earnings of $1.13 per share of common stock, unchanged from a year ago.

"The weather was the largest factor in the company's flat earnings results for the quarter," Richard J. Osborne, vice president -- finance, said. "The relatively mild winter weather earlier this year had its effect on our kilowatt-hour sales, and total sales were down by 1.5 percent compared to last year's first quarter," he said.

Earnings for the 12 months ended March 31 increased to $5.13 per share from the $3.83 a share recorded for the same period last year.

Sales to the company's industrial and commercial customers continued to be strong for the 12 months, increasing by 2.8 percent and 6 percent, respectively, Osborne said.

STAMFORD, CT (APRIL 23) PR NEWSWIRE - James Espey, regional managing director for United Distillers' North American operations, announced today the appointment, effective June 4, 1990, of Graham Kettle as the new president and CEO of Schenley Industries, Inc. (Dallas). Schenley is a wholly owned subsidiary of United Distillers, the worldwide spirits arm of Guinness Plc. (London).

Kettle, 42, currently is managing director of Arthur Bell Distillers, which is responsible for United Distillers' sales and marketing operations in the United Kingdom. He will relocate with his family to Dallas upon

taking up his new post at Schenley.

Espey, 47, who in addition to his other responsibilities has been serving as acting president and CEO of Schenley Industries, Inc., since March 29, will become chairman of that company's board, and will continue to be closely involved in its overall operations. Joseph Heid, 43, chief financial officer of United Distillers North America, has been named to the additional post of vice chairman of Schenley.

In announcing the above changes, Espey stated: "Graham Kettle brings to Schenley his broad ranging experience in the liquor industry, a knowledge of United Distillers' business philosophy and strategies, and a demonstrated talent for enhancing distributor relationships. I look forward to having Graham work with me in the U.S., as he did in the U.K., and I will be spending several weeks of each month in Dallas working with him to maximize Schenley's growing potential in the U.S. marketplace."

Espey also announced that responsibility for Schenley's U.S. production operations will be transferred from Dallas to United Distillers' North America headquarters in Stamford, Conn. David Kell, 43, Schenley's vice president, operations will report to Heid in Stamford. "This will better enable Schenley's management team in Dallas to focus their full attentions upon further strengthening the company's distributor network and building our brands," Espey stated.

Schenley Industries, Inc. is a leading importer and distiller of premium branded spirits including Dewar's White Label, the top-selling Scotch brand in the United States, Pinch 15 year, George Dickel, I.W. Harper Bourbon, Gordon's Gin and Vodka, and many other quality brands.

BALA CYNWYD, PA (APRIL 23) PR NEWSWIRE -- Tube City Inc., one of the nation's leading processors and brokers of raw materials for steel mills and foundries, continued its growth with two new facilities.

The announcement was made by Tube City President and Chief Operating Officer Bob Odle.

A 20-acre processing facility, located in Fairfield, Ala., will be managed

by plant manager George Nix. Before coming to Tube City, Nix spent 13 years in a supervisory capacity with Vulcan Materials Co. in Birmingham, Ala. U.S. Steel is the largest customer that will be serviced from this facility.

A trading office has also been opened in Atlanta. This facility will enhance service to existing customers and expand operations to accommodate new customers. The office will be managed by Tim Hable. Hable was previously the Southeastern regional district manager for Luria Brothers in Atlanta. In addition to office management responsibilities, he will be an active trader. Chick Downey Jr. also joins Tube City as a trader in the Atlanta facility. Downey most recently was an account executive with Luria Brothers, based in the Philadelphia, Atlanta and Chicago offices. Susan Klobuchar completes administrative staffing as secretary for the facility. She was also formerly with Luria Brothers in Atlanta.

"The addition of these two new facilities is part of our planned growth strategy for improving service to our customers," said Odle. "It will help to boost our annual tonnage substantially."

Tube City was founded in 1926 in McKeesport, Pa., and is one of the largest privately held processing and trading companies in the United States, serving domestic and international markets, with plants in West Mifflin and Fairless Hills, Pa., and Fairfield, Ala. The main office is located in Glassport, Pa., with brokerage offices in Bala Cynwyd, Atlanta and New York.

JACKSON, MI (APRIL 23) PR NEWSWIRE - CMS Energy Corporation's oil and gas exploration unit, Northern Michigan Exploration Company (NOMECO), today jointly announced with other partners two recent discoveries in the western Gulf of Mexico. The other partners are The Louisiana Land and Exploration Company (LL&E), Equitable Resources Energy Company (Equitable) and NERCO Oil and Gas, Inc. (NERCO).

The discoveries are part of a broad-based exploration effort by the partners in a total of 20 Outer Continental Shelf tracts in the Gulf of Mexico. NOMECO has acquired an interest in the tracts ranging from 25 to 33 percent.

The first discovery was on Galveston Block 313. The well, Galveston Block 331 No. 1, was drilled to a depth of 12,520 feet and encountered gas and condensate pay in the Rob mayeri interval, from 10,400 feet to 10,456

feet. The well tested 11.1 million cubic feet of natural gas per day with 263 barrels of condensate and no water. Flowing tubing pressure was 6,681 pounds per square inch on an 18/64-inch choke. Further drilling is anticipated on this block later this year.

The second discovery was on High Island, South Addition, Block A523. Well No. 1 was drilled to a depth of 11,652 feet and encountered 83 feet of net oil and natural gas pay in three Pleistocene sands over an interval from 10,900 feet to 11,400 feet. A second well to further evaluate this discovery will commence immediately.

NOMECO's working interest participation in both discoveries is 25 percent. Working interest participation for LL&E is 50 percent, Equitable, 12.5 percent and NERCO, 12.5 percent. LL&E is the operator of both discoveries.

Equitable is a subsidiary of Equitable Resources, Inc., and NERCO is a subsidiary of NERCO, Inc., a member of the PacifiCorp family of companies.

NOMECO is among the top 100 U.S. oil and gas companies in production and reserves. It is Michigan's largest independent oil and gas producer, with activities in 14 states and 7 foreign countries.

CMS Energy Corporation (NYSE: CMS) is a $3 billion (sales) diversified energy company with businesses engaged in the distribution of electricity and natural gas, interstate storage and transmission of natural gas, oil and gas exploration and production, independent power generation and utility services. CMS Energy Corporation's principal subsidiary is Consumers Power Company, Michigan's largest utility and the nation's fourth-largest combination utility.

NEW YORK (APRIL 23) PR NEWSWIRE - Cushman & Wakefield announced today its intention to form a joint venture with a major European commercial real estate firm.

Through the joint venture, a first for the real estate services industry, Cushman & Wakefield will enter into a cooperation agreement with Healey & Baker, a London-based firm specializing in commercial real estate in the United Kingdom and Europe. The announcement was made in New York by Arthur J. Mirante II, president and chief executive officer of Cushman & Wakefield, and in London by Paul Orchard-Lisle, senior partner of Healey & Baker.

Cushman & Wakefield will provide services in the United States and Canada for Healey & Baker clients. Healey & Baker will provide services in the United Kingdom and Europe for Cushman & Wakefield clients. Among the services to be offered will be office and industrial brokerage, consulting and advisory services, and real estate investment banking.

The agreement creates a board of managers which will meet quarterly, and calls for the firms to consult with each other for the planning and expansion of existing operations. Each firm will designate a senior representative in its headquarters office responsible for the joint venture. In addition, Cushman & Wakefield will locate a professional in Healey & Baker's London office, and Healey & Baker will do the same in Cushman & Wakefield's New York office.

"Healey & Baker will provide our clients the local market expertise they need to plan and execute their real estate activities in Europe," says Arthur Mirante. "Cushman & Wakefield enjoys relationships with numerous American multinational corporations. Healey & Baker has similar relationships with European-based companies. Together we can capitalize on those relationships and provide our clients local market coverage and service. It's the combination our clients need on the eve of the European economic union in 1992.

The firms have shares value systems, including integrity, client service and an understanding of the emergence of the globalization of real estate. These factors underlie the agreement and are as much a part of Healey & Baker's corporate culture as they are of Cushman & Wakefield's.

Founded in 1917, Cushman & Wakefield provides real estate services exclusively to businesses through its 53 offices in major markets throughout the United States.

Healey & Baker, one of the largest firms of its kind in the United Kingdom is an independent partnership that specializes in commercial real state agency and consultancy in the United Kingdom and Western Europe.

#90113p5801 04/23/1990 ~PR Newswire

ROCHESTER, NY (APRIL 23) PR NEWSWIRE - Eastman Kodak Company (NYSE: EK) announced the adoption of "Health, Safety and Environment Guiding Principles" to which the company has committed in running its operations worldwide.

"Concern for health, safety, and the environment is a natural extension of

our quality management programs," said Kay R. Whitmore, president. "These principles establish formal company-wide guidelines vital for consistent, responsible operations everywhere we do business."

Kodak's principles are modeled after those established by the Chemical Manufacturers Association (CMA) under a program called "Responsible Care." The Eastman Chemical Company, a Kodak business group headquartered in Kingsport, Tenn., is a member of CMA and a signatory to the Responsible Care Program.

The 9 principles are:

-- To extend knowledge by conducting or supporting research on the health, safety, and environmental effects of our products, processes, and waste materials.

-- To operate our plants and facilities in a manner that protects the environment and the health and safety of our employees and the public.

-- To make health, safety, and environmental considerations a priority in our planning for all existing and new products and processes.

-- To develop, produce, and market products and materials that can be manufactured, transported, used, and disposed of safely.

-- To counsel customers on the safe use, transportation, and disposal of our products.

-- To participate with government and others in creating responsible laws, regulations, and standards to safeguard the community, workplace, and environment.

-- To recognize and respond to community concerns about our operations, providing, to officials, employees, customers, and the public, timely information on health, safety, or environmental hazards and recommending protective and preventive measures.

-- To work with others to resolve problems created by past handling and disposal of hazardous substances.

-- To encourage employees to apply off-the-job the same principles for health, safety, and the environment that are applied at work.

Concludes Whitmore, "Combined with recently announced Kodak guidelines regarding post-consumer solid waste, these new principles will be uniformly applied and consistently followed and will strengthen Kodak leadership in corporate responsibility."

#90113p5803 04/23/1990 ~PR Newswire

MONTVALE, NJ (APRIL 23) PR NEWSWIRE - The Great Atlantic & Pacific Tea Company, Inc. (NYSE: GAP) has designated six of its New York Metropolitan area supermarkets as the first collection centers for recyclable plastic grocery bags in the Metro New York area.

The company is urging area residents to deposit the used plastic bags in special barrels located prominently in the A&P stores in Allendale, Park Ridge, Montvale, Midland Park and Wyckoff, N.J., and in the Food Emporium store in New Canaan, Conn.

According to Michael J. Rourke, vice president of communications and corporate affairs for A&P, the recycling program is a cooperative effort between the chain and Sonoco Products Company (NASDAQ: SONO), which supplies the plastic grocery bags used in the company's Metro New York area stores. "The bags deposited in the special barrels will be collected by Sonoco, and recycled for a variety of uses," he said. "The initial phase in these stores will be used as a test period to establish the volume of returns we can expect per store. If we get good customer response, we plan to expand the program to additional stores as rapidly as possible.

"In addition to serving its direct purpose," said Rourke, "the program is also a way to provide customers with meaningful information regarding the fact that many plastics can now be recycled. The entire solid waste issue is extremely complex, and while none of us can hope to solve it overnight, A&P is addressing a number of ways we can contribute to the solution. Recycling plastic bags is one of those ways."

Rourke said that A&P, Food Emporium and Walbaum stores offer customers the option of paper or plastic bags, but in view of the problems associated with the continued use of landfills, key objectives in this program are the reduction of solid waste volume through greater emphasis on recycling.

#90113p5811 04/23/1990 ~PR Newswire

NEW YORK (APRIL 23) PR NEWSWIRE - Crane Co. (NYSE: CR) today reported net income for the first quarter ended March 31, 1990, of $13.5 million or 42 cents per share, compared with $10.7 million or 33 cents per share for the first quarter of 1989, a 27 percent increase in earnings per share.

Sales for the quarter were $352 million compared to $348 million for the same period in 1989.

The company's largest segment, Engineered Industrial Products, had an operating profit of $25.6 million, or 21 percent better than last year's first quarter. Results were higher for Hydro-Aire, U.K. Fluid Systems products, Kemlite and NRI, GmbH. Results also benefited from the inclusion of the Lear Romec acquisition for one month. Crane's defense businesses remain profitable and showed some improvement over last year's results.

Wholesale Distribution, the company's second business segment, reported sales of $164 million, about even with the first quarter of 1989. Operating profit dropped by 3 percent because of lower margins at Crane Supply Canada. Huttig branches continued to be weak in the Northeast and South, but were more than offset by higher profit from continued margin improvement at Palmer G. Lewis as its integration into Huttig continues. The Valve Systems and Control business has been reclassified to the Wholesale Distribution segment since it is principally a distributor of automated valve systems. Performance for this business unit continued strong with improvements in both sales and margins.

Crane Co. is a diversified manufacturer of engineered industrial products, serving niche markets in aerospace, fluid handling, automatic merchandising and the construction industry. Crane's wholesale distribution business serves the building products markets and industrial customers.

#90113p5814 04/23/1990 ~PR Newswire

CADILLAC, MI (APRIL 23) PR NEWSWIRE - Kysor Industrial Corporation (NYSE: KZ) today announced first-quarter results of operations:

KYSOR INDUSTRIAL CORPORATION
THREE MONTHS ENDED MARCH 31, 1990

Sales and Revenues	up 2 percent
Earnings Applicable to Common Stock	up 162 percent
Earnings per share	up 200 percent

George R. Kempton, chairman of the board and chief executive officer, announced today that Kysor Industrial Corporation has resumed its upward profit momentum after reporting a net loss at the 1989 year- end.

Kysor reported earnings applicable to common stock of $1.4 million, or

$0.24 per share, compared with $0.5 million, or $0.08 per share for the first quarter of 1989. For the quarter, sales and revenues increased to a record $59.4 million, up 2 percent from the $58.1 million in 1989.

Kempton commented that restructuring actions at its marine-related components businesses, significant cost-containment efforts throughout the company and improvements in margins in its domestic and overseas commercial refrigeration segments resulted in the strong earnings increase.

Kempton stated, "The company fully expects that 1990 will be a year of improved operating performance, while recognizing soft market conditions in a number of the industries served by the company.

Financial information for the three months ended March 31, 1990:

KYSOR INDUSTRIAL CORPORATION

CONSOLIDATED CONDENSED STATEMENT OF INCOME

(Unaudited, amounts in thousands except for per-share data)

	Three Months Ended March 31	
	1990	1989

#90113p5815 04/23/1990 ~PR Newswire

NAPERVILLE, IL (APRIL 23) PR NEWSWIRE - Varlen Corporation (NASDAQ: VRLN) today said that it has signed a letter of intent to acquire Walter Herzog GmbH of Lauda-Konigshofen, West Germany, the world's leading manufacturer of automated laboratory analysis equipment for the petroleum industry.

The cash transaction is expected to be completed by July.

The privately held company, owned by founder Walter Herzog, has annualized sales of approximately $15 million.

Richard L. Wellek, Varlen president and chief executive officer, said the acquisition supports Varlen's long-term strategy of expanding its laboratory equipment business while increasing its position as a manufacturer of precision industrial products.

"Walter Herzog GmbH serves markets around the world," said Wellek. "It will operate as an independent subsidiary, but its product line compliments the petroleum related instruments of our Precision Scientific subsidiary."

Wellek noted that, in early March, the Precision Scientific, Inc. subsidiary completed the acquisition of the laboratory equipment businesses of HEICO Corporation, which expanded its clinical, educational and research laboratory product lines. The HEICO businesses had combined sales of $21 million in 1989.

"We have made a number of acquisitions during the last 15 months," said Wellek, "but Walter Herzog will be our first overseas acquisition. It will help strengthen our presence worldwide, and supports a key strategy of global growth through foreign acquisitions and increased exports from our domestic operations."

Varlen Corporation is a diversified manufacturer of precision industrial products, primarily serving the transportation and laboratory equipment markets. The company reported sales of $226.7 million and earnings from continuing operations of nearly $10 million for its fiscal year ended Jan. 31, 1990.

CONTACT: Richard L. Wellek, president and CEO or Douglas H. MacMillan, vice president-finance and administration, both of Varlen 708-420-0400.

#90113p5816 04/23/1990 ~PR Newswire

ENNIS, TX (APRIL 23) PR NEWSWIRE - Ennis Business Forms, Inc. (NYSE: EBF) today reported operating results for the year ended Feb. 28, 1990. Sales were $129,606,000 for the current year, compared to $128,170,000 in the prior year. Net earnings for the current year were $21,027,000 ($1.58 a share), compared to net earnings of $18,839,000 ($1.38 a share) in the prior year. Per share earnings computations are based on 13,273,417 shares for the year ended Feb. 28, 1990 and 13,607,279 shares for the prior year.

Fourth quarter sales were $32,037,000 in the current year, compared to $32,673,000 in the same quarter last year. Net earnings for the fourth quarter of the current year amounted to $6,197,000 ($.47 a share) compared to net earnings of $5,630,000 ($.41 a share) for the fourth quarter last year.

Net earnings for the fourth quarter and for the year ended Feb. 28, 1990 include approximately $675,000 (five cents a share) and $869,000 (seven cents a share), respectively, attributable to liquidation of LIFO inventory quantities carried at lower costs prevailing in prior years as compared with the cost of fiscal 1990 purchases. No significant liquidation occurred in fiscal 1989.

The number of shares outstanding and earnings per share of common stock have been adjusted for a three-for-two stock split in July 1989.

#90113p5820 04/23/1990 ~PR Newswire

LANCASTER, PA (APRIL 23) PR NEWSWIRE - Armstrong World Industries' (NYSE: ACK) results for the first quarter of 1990 set new company records for any January-through-March period in sales and earnings from continuing businesses, and in total net earnings, according to a financial report issued here this morning.

Armstrong also said that its Board of Directors is expected to announce by April 30 the quarterly dividend on its common stock.

Company sales in the first quarter of this year reached $640.4 million, an increase of 3.5 percent over the 1989 first quarter level of $618.7 from continuing businesses.

The "continuing businesses" year-to-year comparisons reflect elimination of the 1989 financial results of Armstrong's carpet businesses and of a subsidiary, Applied Color Systems, Inc., which were sold by the company in late 1989.

Net earnings for the first quarter of 1990 were $65.2 million, the new record, compared with $37.4 million for the comparable 1989 period -- a 74 percent increase. Net earnings per share this year were $1.45 on a primary basis and $1.31 on a fully diluted basis, compared with 81 cents in the first quarter of last year (in which only primary earnings per share were reported.)

Net earnings in 1990 included a gain of $8.0 million (reflecting 19 cents

per share on a primary basis and 17 cents on a fully diluted basis) from the cumulative effect of a change in accounting. Effective January 1, 1990 the company adopted the Financial Accounting Standards Board's Statement No. 96, "Accounting for Income Taxes." Net earnings for the first quarter of 1989 included $3.4 million or 8 cents per share from the subsequently discontinued businesses.

After-tax earnings from continuing businesses in the first quarter of 1990 were $57.2 million, compared with $34.0 million in the 1989 period -- a 68 percent increase. Earnings per share of common stock from continuing businesses were $1.26 on a primary basis and $1.14 on a fully diluted basis compared with 1989's 73 cents.

Both years' results included unusual items. In the first quarter of 1990, Armstrong realized a gain on the sale of woodlands in Georgia, which formerly served as a source of raw materials and fuel used in the production of ceiling products. This gain after-taxes amounted to $16.5 million, representing 40 cents per share on a primary basis and 35 cents per share on a fully diluted basis. During the first quarter of 1989, the company realized an after-tax gain of $2.7 million (6 cents per share of common stock) from a settlement of litigation involving insurance coverage for asbestos-related claims.

Armstrong, with headquarters here, manufactures and markets interior furnishings, including floor coverings (resilient flooring and ceramic tile), building products, and furniture, as well as a variety of specialty products for the building, automotive, textile, and other industries.

HOUSTON (APRIL 23) PR NEWSWIRE - Service Corporation International (NYSE: SRV) announced today that it will redeem 50,000 shares of its variable term preferred stock, Series B on May 9, 1990. On that date, these shares will be redeemed at a price of $1,000.00 per share and the final dividend will also be paid.

The company stated that these shares are being redeemed under the provisions set forth in SCI's statement of resolution that established these shares which sets forth the rights, preferences and limitations of the Series B variable term preferred stock.

SCI is the largest owner and operator of funeral homes and cemeteries in North America. The company owns 551 funeral homes and 124 cemeteries in the United States and Canada. It also owns Provident Services, Inc. which provides capital financing to independent funeral homes and cemeteries.

During the year ended Dec. 31, 1989, SCI had revenues of $518.8 million.

DALLAS (APRIL 23) PR NEWSWIRE - Centex Corporation (NYSE: CTX) announced today that a Centex subsidiary has acquired from Lone Star Industries, Inc. (NYSE: LCE), an additional 49 percent of the Mountain Cement Company plant in Laramie, Wyo., in which Centex and Lone Star were 50-50 partners.

In addition, Centex has acquired all the assets of Lone Star's former Salt Lake City, Utah, cement plant. Purchase price of the acquisition was not disclosed.

The Laramie plant was originally acquired by Centex in 1986 and has undergone a major renovation, transforming it into an efficient, dry process operation with a rated annual productive capacity of approximately 450,000 tons. The joint venture, which manufactures and markets cement in the Rocky Mountain region, was formed by the two companies in 1987.

Centex Corporation is a Dallas-based company with operations in home building and mortgage banking, construction products, general construction and savings and loan.

FAIRFIELD, CT (APRIL 23) PR NEWSWIRE -- Acme United Corporation (AMEX: ACU) reported today net income of $411,350, or 13 cents per share, for the three-month period ended March 31, 1990. This compares to net income of $32,155, or one cent per share, for the three-month period ended April 1, 1989.

Net sales for the first quarter of 1990 were $10,854,458, a 16 percent increase over net sales of $9,375,561 in the similar period of 1989.

"The increase in earnings resulted in part from a turnaround in our medical products business in the first quarter as a result of cost-cutting moves and new marketing strategies implemented in 1989," said Henry C. Wheeler, president and chief executive officer.

"In addition, our acquisition of a West German manufacturer of scissors, shears and manicure implements in December 1989, is generating solid sales and profits as well as offering attractive growth potential," he said.

Acme United is a leading producer of metal disposable surgical instruments sterile procedure trays, germicidal products and wound-care packs for hospitals and the after-care market as well as the country's largest producer of household shears, scissors, wooden rulers and yardsticks for the consumer.

CINCINNATI (APRIL 23) PR NEWSWIRE - The Kroger Co. (NYSE: KR) and Fifth Third Bank announced today a commitment of up to $150,000 for a neighborhood community development and revitalization program in the Cincinnati area called "Neighbors to Neighbors."

An initial $50,000 has been pledged by the two companies to provide cash grants in 1990 to support improvement projects, such as building renovation, construction of playgrounds, recreation centers and equipment

purchases for schools, community centers and other community service organizations. The projects are conceived by the neighborhoods and submitted to a peer review committee of community volunteers for approval.

Neighbors to Neighbors is an annual project of Invest in Neighborhoods, Inc., a non-profit coalition made up of 46 all-volunteer community councils. Invest was formed in 1982 as a unique partnership between local business and grassroots neighborhood organizations to raise money to support self-sufficiency.

In announcing their support of Neighbors to Neighbors, Kroger and Fifth Third officials said the vitality of Cincinnati neighborhoods was an important civic, as well as business, goal. Both companies operate a number of retail supermarkets and banking centers throughout the metropolitan area.

"Neighbors to Neighbors illustrates our continuing commitment to the communities we serve, and it is a natural extension of our established working relationship with Kroger through our Bank Marts," stated Ronald A. Dauwe, executive vice president of Fifth Third Bank. "Fifth Third is committed to the revitalization of Greater Cincinnati neighborhoods, and we're proud to team up with people from Kroger and Invest in Neighborhoods in this effort to assist in the economic development of our surrounding neighborhoods," he explained.

Wayne Harris, vice president of the Cincinnati Marketing Area of The Kroger Co. said support of community development is a natural adjunct of the company's strategy of operating neighborhood oriented retail food stores. "Neighbors to Neighbors is an example of how people work together on mutual interests linked to where they work and live," Harris said. "We strive to be part of the neighborhood we serve, and we can further demonstrate the partnership concept of Invest in Neighborhoods through this grassroots program," he added.

More than $120,000 in cash grants have been awarded to communities in the Invest family since the partnership was formed eight years ago. In turn, the funds have been leveraged to generate an additional $750,000 to complete the neighborhood projects.

BETHESDA, MD (APRIL 23) PR NEWSWIRE - Martin Marietta Corporation (NYSE: ML) reported 1990 first quarter earnings increased to $67,093,000, or $1.32 per share, compared with $59,212,000, or $1.12 per share, in the

same period last year.

Sales in the quarter rose to $1,418,870,000 from $1,316,352,000 in the first three months of 1989.

Backlog at the end of the quarter was $12.4 billion versus $11.2 billion at the same time a year ago.

First quarter sales rose from the year-ago level in every operating group except Information Systems, which was about the same as last year. "Aside from Information Systems, earnings improved in each operating group and were especially strong in the Materials Group," said Norman R. Augustine, chairman and chief executive officer. "Results for the quarter are consistent with our expectations that 1990 will be another year of continued earnings growth for Martin Marietta."

MORRISTOWN, NJ (APRIL 23) PR NEWSWIRE - Chemical Bank New Jersey and Princeton Bank and Trust Company today announced they have formalized plans to create a new corporate headquarters at Two Tower Center in East Brunswick.

An agreement has been signed with the Tower Center Associates, a joint venture of the Landis Group and AT&T Resource Management, to lease four floors, approximately 100,000 square feet of space. The new headquarters will consolidate staff now located in three administrative facilities in Morristown and a regional commercial lending unit in Roseland. Approximately 300 employees are scheduled to begin the move in June 1990.

Both banks will maintain a high level of involvement in the Morristown community and existing banking locations will remain unchanged.

The $5 billion asset Chemical Bank New Jersey currently operates 128 banking locations from Cape May to Sussex County. Plans include the opening of a new full-service branch office in Two Tower Center.

Princeton Bank and Trust Company, a Chemical Bank New Jersey affiliate, serves private banking clients through regional offices in Morristown, Montclair, Westfield, Paramus, Princeton and Moorestown.

CINCINNATI (APRIL 23) PR NEWSWIRE - The Penn Central Corporation (NYSE: PC) today reported 1990 first quarter net income of $25 million, or $.38 per share. This compares with the 1989 first quarter income of $24.2 million, or $.35 per share, before a gain on the disposition of foreign wire and cable manufacturing operations. Including this gain, net income for the first quarter of 1989 totaled $92.7 million, or $1.31 per share. Net revenues for the 1990 first quarter increased to $486.6 million from $343.1 million in the 1989 first quarter.

Penn Central's net income is computed after a deduction in lieu of current Federal income tax, because income that would otherwise be taxable is offset by pre-reorganization loss carryforwards. This deduction is not accruable or payable. The company's first quarter 1990 income before this deduction was $37.2 million, or $.57 per share.

Penn Central ended the 1990 first quarter with shareholders' equity of $1.825 billion, or $28.21 per share.

Penn Central operates businesses primarily in the areas of industrial manufacturing, defense services and insurance.

PITTSBURG, TX (APRIL 23) PR NEWSWIRE - Pilgrim's Pride Corporation (NYSE: CHX), an East Texas-based chicken firm, today reported a 200 percent increase in profits for the second quarter ended March 31, 1990, over the same period in 1989. Net income rose to $4.8 million or $.21 per share compared with net income for the previous year's quarter of $1.6 million or $.07 per share. Net sales increased 13 percent to $178.0 million as compared to $158.0 million in second quarter 1989.

For the six months ended March 31, 1990, the company reported a 103 percent increase in net income over the same period in 1989. Net income climbed to $5.0 million or $.22 per share as compared to $2.5 million or $.11 per share in the first six months of 1989. Net sales inceased 11 percent to $340.6 million as compared to $307.9 million in same period in 1989.

According to Lonnie A. "Bo" Pilgrim, chairman and chief executive officer, improved results from the further-processed and prepared foods operation was the largest contributing factor to the increase in operating results over the same period last year.

Pilgrim's Pride Corporation is the fifth largest producer of poultry products and the 18th largest egg producer in the United States, producing more than 825 million pounds of dressed poultry and 41 million dozen table eggs annually. Pilgrim's Pride now employs more than 8,600 persons and operates processing plants, distribution centers, hatcheries and feed mills in Texas, Arkansas, Oklahoma, Arizona and Mexico.

Products are sold under the "Pilgrim's Pride" label to supermarkets, fast food chains and food service customers. The company's primary distribution is through retailers and fast food outlets in the Central, Southwestern and Western United States and through the food service industry nationally.

EAST AURORA, NY (APRIL 23) PR NEWSWIRE - Acme Electric Corporation (NYSE: ACE) today announced earnings of $992,000 for the third quarter ended March 30, 1990, an increase of 26.7 percent over the $783,000 reported for the comparable 13-week period last year.

Earnings per share climbed to 21 cents on 4,715,410 average shares outstanding compared with 17 cents on 4,609,041 shares reported last year at this time. It marked the sixth consecutive quarter in which Acme has produced increased profits.

Sales for the fiscal third quarter tallied $23,915,000 against $23,272,000.

For the 39-week period ended March 30, 1990, Acme earned $2,575,000 or 55 cents per share from operations, compared with $2,240,000 or 49 cents reported a year ago. The company, last year, had reported an additional 10 cents per share of non-recurring income resulting from a change in accounting principle for income taxes.

Sales for the first nine months of fiscal 1990 were $66,778,000 compared with revenues of $66,858,000 generated in 1989.

"We are overcoming softness in our dry-type transformer markets and aerospace contract delays which hampered us in the first half of the year

" G. Wayne Hawk, president and CEO, said. "Reduced demand for our battery chargers and flat sales for standby power supplies also made it difficult to increase growth.

"Beginning with the new calendar year, the market for our dry-type transformers strengthened appreciably. That, coupled with new product introductions and our entry into the Canadian market, has greatly improved performance at our Acme Transformers division," Hawk said.

Hawk also attributed his optimism to stronger sales of custom- designed power supplies and aerospace power products.

"In addition, Acme is beginning to see the results of strengthened marketing efforts in the standby power supply line," he said.

Acme Electric also announced that the board of directors at its meeting on April 20, 1990, declared a quarterly cash dividend of 8 cents per share on the common stock of the company, payable June 4, 1990, to shareholders of record on May 9, 1990.

Founded in 1917, Acme Electric Corporation designs and manufactures power conversion equipment for electronic and electrical systems for industrial, commercial, residential and aerospace applications. Corporate headquarters are in East Aurora, with operations in Cuba, N.Y.; Lumberton, N.C.; Salt Lake City and West Jordan, Utah, and Tempe, Ariz.

MELVILLE, NY (APRIL 23) PR NEWSWIRE - Arrow Electronics, Inc. (NYSE: ARW) today reported strong earnings gains in the quarter ended March 31. Net income for the period advanced to $2.7 million (12 cents per common share) compared with $2.1 million (7 cents per common share) in last year's first quarter and $1.7 million (3 cents per common share) in the immediately preceding quarter. Sales in this year's first quarter climbed to $247 million, exceeding the company's sales of $238 million and $239 million in the year-earlier and immediately preceding quarters, respectively.

"In the first quarter we experienced strong demand across all of Arrow's key product lines, with the result that our average daily orders rose by 9 percent from the immediately preceding quarter," said Stephen P. Kaufman, president and chief executive officer of Arrow. "In addition, our newly formed Capstone Electronics Corp., which exclusively distributes Arrow's

passive, electromechanical, and connector product lines, surpassed our expectations by making a positive contribution to operating income in its first quarter of operations," Kaufman added.

Arrow Electronics is one of the world's two largest distributors of electronic components, systems, and related products.

DEERFIELD, ILL. (APRIL 23) PR NEWSWIRE - Premark International, Inc. (NYSE: PMI) reported today that first quarter 1990 net income declined 41 percent to $13.2 million, or 39 cents per share, from $22.4 million, or 64 cents per share, in the prior year period. Sales increased 3 percent to $620 million.

The decline in net income was due to lower profit at Tupperware and the Food Equipment Group, which more than offset higher profit in the Consumer and Decorative Products Segment. Increased sales in the company's Food Equipment Group and Consumer and Decorative Products Segment offset a slight sales decline at Tupperware.

Tupperware profit was down due to lower sales in Latin America, the United States and Japan, and to higher expenses in Europe. Although the Food Equipment Group reported higher sales because of good performance in Europe, acquisitions, and growth in the service business, profit at the

Group was down primarily because of lower domestic production volume and reduced margins. In the Consumer and Decorative Products Segment lower legal expenses and higher sales at Ralph Wilson Plastics, and a sharp increase in sales and profit at Precor, offset substantially lower results at Tibbals Flooring Company and West Bend.

"Looking ahead, we expect profit to be down in the second quarter compared to the prior year," said Warren L. Batts, chairman and chief executive officer, "as declining dealer activity remains a challenge for Tupperware's U.S. business and difficult industry conditions hamper the Food Equipment Group's domestic operations, Ralph Wilson Plastics and West Bend. In response, Tupperware is boosting its domestic promotional efforts and plans a stronger new product program in the second half. The other businesses are working to reduce costs while continuing to invest in new product, marketing and manufacturing programs that will improve longer-term prospects.

"Although results for the full year remain uncertain at this time, we continue to be optimistic long term because of our quality brand names, solid market positions, and the strategies we are implementing to capitalize on those strengths," Batts concluded.

Premark International, Inc. is a $2.6 billion multinational company that markets premium products under leading brand names such as Tupperware, West Bend, Wilsonart, Hobart, Vulcan, Hartco and Precor. Premark stock is listed on the New York, Pacific and London Stock Exchanges.

PITTSBURGH (APRIL 23) PR NEWSWIRE - Pennsylvania Capital Bank, Pittsburgh's first de novo bank in 15 years, will officially open for business to the public in September, it was announced today.

Donald R. Whitehead, the new bank's chief executive officer, announced today that the secretary of banking for the Commonwealth of Pennsylvania has granted the bank its charter.

Whitehead said Pennsylvania Capital Bank will provide high quality, private banking services to those individuals and businesses with sophisticated financial needs. "We will focus on a full-service approach that delivers all of a client's financial needs through a single relationship officer. In that way, the client will be assured of a highly personalized, professional and timely level of response, regardless of the banking service."

The new bank will be located in the city's "financial district" on the second floor of the Times Building, at 336 Fourth Ave., between Wood and Smithfield streets.

Charles A. Warden, organizer and a director of Pennsylvania Capital Bank, said the bank's capitalization is expected to exceed the regulatory minimum of $5 million. "Our goal is to raise sufficient capital to sustain the bank's growth and provide it a strong base. Response has been excellent. We expect the bank's stock offering to be oversubscribed." Warden is also president of Mid-Atlantic Capital Group Inc., the investment banking firm which is raising the bank's initial capital.

Pennsylvania Capital Bank will offer commercial and consumer loans, a wide variety of checking accounts, time deposits and retirement accounts, and other consumer and business services. Its relationship officers will provide their clients with a level of flexible and creative financing typically reserved for the best commercial borrowers.

More important than products, however, Pennsylvania Capital Bank will offer each client the highest quality, personalized service. For example, instead of conducting business with tellers behind counters, customers of Pennsylvania Capital Bank will meet privately with service representatives seated at desks, in the European fashion of banking. Rather than providing "off-the-rack" bundles of products designed for the broadest appeal, the bank will individually tailor a program of services specifically suited to the particular needs of each customer. In all phases of its operation, Pennsylvania Capital Bank will deliver a level of customer service unparalleled in the Pittsburgh market.

WARSAW, IN (APRIL 23) PR NEWSWIRE - The Boehringer Mannheim Worldwide group of companies, which is privately held by Corange Ltd., is expanding its international business within the field of orthopedics and community patient care by reaching an agreement for the acquisition of Chas. F. Thackray Limited (Thackray) of Leeds, Yorkshire.

The deal brings together two of the world's leading manufacturers of orthopedic devices.

DePuy, a division of Boehringer Mannheim Corp. in the United States, manufactures and sells an extensive range of orthopedic and allied surgical and infection-control products, principally in North America.

In the joint replacement market, DePuy is known for its exclusive Porocoat technology. Key products are the LCA mobile-bearing Total Knee System, the AML Total Hip System, and the AMK Total Knee System.

Thackray is a long-established company based in the United Kingdom, whose main activities are the manufacture and sale of orthopedic products and the provision of health care services to the consumer through ThackrayCare centers. It is known especially for its pioneering total hip replacement work which revolutionized hip arthroplasty, with the Charnley range of products. The latest technological advance is a unique intra-operative hip replacement system called Identifit.

The company also has activities in surgical instruments, infection control and a range of animal care products.

Thackray employs 540 people and has sales in excess of 30 million pounds per annum.

The purpose of the acquisition is to create an international partnership between DePuy and Thackray, with Thackray becoming the operations center for the two companies outside the United States under the ownership of Boehring Mannheim UK Holdings Ltd.

John Thackray, group managing director of Thackray, said: "I am confident that the new arrangement will ensure excellent prospects for Thackray's employees and will provide good opportunities for our future business."

Curt Engelhorn, chairman of Corange, commented: "We see great synergy coming from the creation of a strong manufacturing and sales capability and an enhanced research and development program.

"Through the addition of Thackray, we will be able to expand our growing orthopedics business outside the U.S.A. and extend our group consumer health care activities within Europe."

#90113p5859 04/23/1990 ~PR Newswire

FREEPORT, IL (APRIL 23) PR NEWSWIRE - Newell Co. (NYSE: NWL) today reported that earnings reached a record high for any first quarter in the company's history.

Net income increased 72.1 percent to $24.2 million from $14.0 million last year and fully diluted earnings per share were 40 cents, up 73.9 percent

over the 23 cents achieved in the comparable 1989 period.

For the first quarter, net sales were $257.9 million, down 5.1 percent from $271.9 million in 1989. Sales were lower in 1990 because of the divestitures of the Wm. E. Wright and Carr-Lowrey businesses in late 1989. Excluding the divested businesses, total sales were up 1.2 percent in the quarter; consumer domestic sales were up 4.8 percent.

The record levels of net income (up 72.1 percent) and fully diluted earnings per share (up 73.9 percent) were due to operating margin improvements in several of Newell's businesses, a substantial reduction in interest expense, and a nonrecurring gain from sale of securities. The gain was partially offset by the write-down of certain intangible and other noncurrent assets. Taken together, the gains and charges increased earnings per share by $.09 in the quarter.

The company improved its capital structure during the 1st quarter, primarily from receipt of $48 million gross proceeds from the sale of its investment in Vermont American Corp. (AMEX: VAC). Newell's total debt to total capital ratio was 19 percent at March 31, 1990, down from 25 percent at Dec. 31, 1989.

Newell manufactures and markets high-volume hardware/housewares and industrial products. Hardware/housewares products are sold principally through discount, variety, chain and hardware stores, hardware and housewares distributors, and home improvement centers. Industrial products are sold directly and through distributors to volume purchasers.

#90113p5861 04/23/1990 ~PR Newswire

DETROIT (APRIL 23) PR NEWSWIRE - The Detroit Edison Company (NYSE: DTE) today announced earnings for common stock for the three months ended March 31, of $127.6 million, or 87 cents per share, up 36 percent from the $93.4 million, or 64 cents per share, for the same period a year ago.

Total and per-share earnings for common stock increased in the first quarter due to lower fuel and other power supply expenses, higher operating revenues, lower maintenance expenses and continued cost-reduction efforts throughout the company. Lower fuel and other power supply expenses resulted from the improved operating performance of Fermi-2, greater use of lower cost western low-sulfur coal and sales of energy to other electric utilities. Higher operating revenues resulted from increased rates implemented in January 1990 for the third year of the five-year phase-in plan and for a new expense stabilization procedure under which rates are adjusted for a portion of inflation.

For the 12 months ended March 31, earnings for common stock were $423.2 million, or $2.88 per share, compared with a loss of $185.5 million, or $1.26 per share, for the same period a year ago. The loss for the previous 12-month period resulted from a December 1988 write-off of certain plant costs disallowed by the Michigan Public Service Commission. Also contributing to higher earnings in the current 12-month period were higher operating revenues, lower fuel and other power supply expenses, lower interest charges, lower preferred and preference stock dividend requirements, and higher accretion income resulting from the discounting of certain losses recorded in 1988. These factors were partially offset by higher maintenance expenses associated with the first Fermi-2 refueling outage and higher depreciation and amortization expenses for Fermi-2.

On Feb. 26, 1990, the board of directors increased the quarterly dividend rate on the company's common stock from $0.42 per share to $0.445 per share. The indicated annual dividend rate is now $1.78 per share.

DUBLIN, IRELAND (APRIL 23) PR NEWSWIRE - The Jefferson Smurfit Group

today announced the successful completion of a feasibility study to construct a new, world-class recycled newsprint mill in the northeastern United States of America. It is now intended to proceed with detailed engineering and it is expected that the potential site will be announced in the near future. The project is a further extension of the Jefferson Smurfit Group's strategy to increase the supply of recycled newsprint to U.S. newsprint users.

The 250,000 metric ton facility is planned to be a joint venture between a Jefferson Smurfit Group subsidiary or affiliate and a group of leading newspaper publishers in the Northeast U.S.A. Advance Publications (Newhouse Newspapers), The Boston Globe, Dow Jones & Company, Inc., Ottaway Newspapers, Inc. and Times Mirror Company are among those who have indicated interest in the project. Officials of Jefferson Smurfit Group said they were extremely pleased with the outstanding caliber of the publishers supporting the project.

The new mill will make a major impact on the recovery and reuse of waste paper throughout the Northeastern U.S.A. The plans have received enthusiastic support from agencies and officials of various states. The 300,000 metric tons of waste paper the new mill will consume each year demonstrates the commitment of the Smurfit Group and its potential partners to play a leading role in the recovery and reuse of waste paper.

#90113p5877 04/23/1990 ~PR Newswire

PHILADELPHIA (APRIL 23) PR NEWSWIRE - Directors of Philadelphia Electric Co. (NYSE: PE) today declared a dividend of 30 cents per share on the company's common stock for the second quarter of 1990, a reduction of 45 percent from the 55 cents per share quarterly dividend previously paid.

The second quarter dividend is payable June 29 to shareholders of record May 23, 1990.

PE also announced a major cost reduction program designed to reduce expenses by at least $100 million annually by Dec. 31, 1991.

In announcing the dividend reduction, Joseph F. Paquette Jr., PE chairman and chief executive officer, said, "We deeply regret that this action is necessary. However, the level of rate relief granted by the Pennsylvania Public Utility Commission (PUC) in its Limerick Unit 2 order represents only 44 percent of the $549 million requested and needed by the company.

"The denial of approximately $300 million of annual revenue by the PUC will reduce anticipated future earnings by almost $1.00 per share. Although we are taking steps to improve our operating efficiency and will further intensify our focus on cost control, the significant reduction in our anticipated future earnings necessitates a corresponding reduction of our dividend."

Paquette said that in order to further conserve cash and help restore earnings, the company's $100 million cost reduction program will involve a reduction in pay for top management and the company's board of directors, an early retirement program for employees, a reduction in the number of contract personnel, a cutback in capital spending and charitable contributions, and the elimination of most advertising except for safety and energy conservation.

For the three months ended March 31, 1990, the company reported a loss of $84.0 million, equivalent to 40 cents per share, due primarily to a one-time charge against income of approximately $250 million, equivalent to $1.18 a share, associated with various disallowances made by the PUC in the Limerick Unit 2 rate order. In addition, first quarter earnings were reduced by 4 cents per share to reflect the previously announced settlement with the PUC concerning the company's past purchasing practices.

Without these charges, earnings in the first quarter would have been 82 cents per share, an increase of 25 cents per share compared to the first quarter of 1989, when 2.6 percent fewer shares were outstanding. Earnings for the corresponding period last year were reduced by approximately 24

cents per share because of nonrecurring charges and the costs of the Peach Bottom shutdown.

The company reported that earnings for the 12 months ended March 31, 1990, were $1.38 per share, $0.82 under the earnings for the corresponding period last year. Excluding the first quarter one-time charges against income in 1990, 12-month earnings would have been $2.62 per share, an increase of $0.41 compared to the previous year.

FARMINGTON HILLS, MI (APRIL 23) PR NEWSWIRE - Cellular One and Wayne State University will announce a joint educational program in cellular radio engineering at a check presentation ceremony on Tuesday, April 24, 11 a.m., in the WSU president's office, Room 4200 of the new Facility Administration Building. At the ceremony, Cellular One plans to announce its assistance in the development and funding of a unique cellular radio system curriculum at Wayne State University.

Joining WSU President David Adamany will be Cellular One's President Brian Jones, Dr. Fred Beaufait, dean of WSU's College of Engineering, and Dr. Michael Polis, chairman of the Electrical and Computer Engineering Department at WSU.

In stressing the vital role of mobile communications in society today, President Jones stated the purpose of this upcoming joint program. "Cellular One hopes to aid and enhance the education of those students interested in making cellular radio engineering their career," he said.

Cellular One will fund a course in radio systems design, which will begin in the fall of 1990. They will donate equipment to the WSU College of Engineering's communications laboratory, and will provide continuing technical support for instruction design. In addition to this, the Cellular One facility, and guest lecturers will be available to the instructional program.

Scholarships will be available to undergraduate women and minority students, and a graduate-level fellowship will be available for students desiring to study cellular radio engineering. Cellular One will also provide paid internships or co-op positions for qualifying students. Those students who seek to apply for the fellowship, scholarship and internships should contact WSU's College of Engineering.

This joint program was developed by Wayne State alumnus Kevin Rubens, corporate director, Organizational Development and International Human Resources at the Pacific Telesis Group, a parent company of Cellular One.

Based in Farmington Hills, Cellular One is a provider of cellular service for transportable, installed or hand-held portable cellular phones. Cellular One provides the largest system coverage area in Michigan and northern Ohio, covering 15,700 square miles.

PHILADELPHIA (APRIL 23) PR NEWSWIRE - Philadelphia Newspapers Inc., (PNI) publisher of The Philadelphia Inquirer and the Philadelphia Daily News, today announced new goals for using more recycled newsprint by the year 2000.

The new goals are that The Inquirer and the Daily News, Pennsylvania's largest consumers of newsprint, will use 50 percent recycled newsprint by the year 1995 and 90 percent by the turn of the century. The goals are in keeping with a challenge issued by Gov. Robert P. Casey to Pennsylvania newspapers last fall.

"Our decision to announce these goals represents PNI's deep commitment to recycling," said Robert J. Hall, chairman of PNI and the publisher of The Philadelphia Inquirer and the Daily News. "Although our newspapers are already substantial users of recycled newsprint, these goals further underscore our concern about the environment and the quality of life for future generations."

NEW ORLEANS (APRIL 23) PR NEWSWIRE - The Louisiana Land and Exploration Co. (LL&E) (NYSE: LLX), Northern Michigan Exploration Co. (NOMECO), Equitable Resources Energy Co. (Equitable) and NERCO Oil & Gas Inc. (NERCO) today jointly announced two recent discoveries in the western Gulf

of Mexico.

The first discovery was on Galveston Block 313. The well, OCS-G 11318 Galveston Block 331 No. 1, was drilled to a total depth of 12,520 feet and encountered gas/condensate pay in a Miocene interval from 10,400 feet to 10,456 feet. The well tested 11.1 million cubic feet of natural gas per day with 263 barrels of condensate and no water. Flowing tubing pressure was 6,681 psi on a 18/64 inch choke. Further drilling is anticipated on this block later in the year.

The second discovery was on High Island, South Addition, Block A-523. Well No. 1 on OCS-G 11390 was drilled to a total depth of 11,652 feet and encountered 83 feet of net oil and gas pay in three Pleistocene sands over an interval from 10,900 feet to 11,400 feet. A second well to further evaluate this discovery will commence immediately.

Galveston Blocks 313 and 331 and High Island, South Addition, Block A-523 were acquired at OCS Lease Sale No. 122 on Aug. 23, 1989.

LL&E is the operator of both discoveries with a 50 percent working interest. The working interest participation of the other partners is: NOMECO, 25 percent; Equitable, 12.5 percent; and NERCO, 12.5 percent.

NOMECO is a subsidiary of CMS Energy Corp. (NYSE: CMS); Equitable is a subsidiary of Equitable Resources Inc. (NYSE: EQT); and NERCO Oil & Gas is a subsidiary of NERCO Inc. (NYSE: NER), a subsidiary of PacifiCorp (NYSE: PPW).

#90113p5907 04/23/1990 ~PR Newswire

LOS ANGELES (APRIL 23) PR NEWSWIRE - CalFed Inc. (NYSE: CAL), whose principal subsidiary is California Federal Bank, today reported net earnings for the first quarter of 1990 of $18.9 million, or $0.74 per fully diluted share, an 8 percent increase from $17.5 million, or $0.67 per fully diluted share, for the first quarter of 1989.

Net interest income in the company's financial services segment, the primary determinant of core earnings, grew 28 percent to $128.5 million in the first quarter of 1990, from $100.7 million in the comparable period of 1989. California Federal Bank's interest rate spread at March 31, 1990, was 2.24 percent, 77 basis points greater than the 1.47 percent reported at March 31, 1989, and a slight increase from 2.15 percent at Dec. 31, 1989.

"We have made changes that enable us to produce a high percentage of our earnings from recurring sources," said Jerry St. Dennis, chairman and chief executive officer of CalFed Inc. "This was evident during the first quarter as earnings consisted substantially of income from our core businesses."

CalFed Inc.'s earnings in the first quarter of 1990 benefited modestly from a $1.3 million after-tax gain on the sale of Anglo American Insurance Company Ltd., the company's London-based property- casualty insurance subsidiary. The sale on Feb. 6, 1990, marked the company's exit from the property-casualty business.

The company is continuing to review closely all subsidiary operations for their ability to conform to the company's business strategy and to meet its projected return on equity goals. During the first quarter of 1990, the company agreed to sell its direct response term life and accident and health insurance lines of business to Montgomery Ward Life Insurance Company. The company anticipates that the sale, which is not expected to produce a gain or loss, will close before the end of the second quarter.

As part of its emphasis on operating its businesses more efficiently, the company in the first quarter of 1990 took actions to reduce operating expenses in its banking operations. The company anticipates that these actions will result in a cost savings of approximately $24 million in 1990 as compared with 1989. Because of associated severance expenses, the company does not expect the cost savings to begin to take effect until the second quarter of 1990.

The company originated $1.1 billion in new real estate, commercial and consumer loans during the first quarter of 1990, compared to $1.5 billion in the first quarter of 1989. While some large competitors emphasized fixed-rate lending, California Federal Bank continued to concentrate on adjustable-rate loans. More than 82 percent of loans originated by the bank in the first quarter were adjustable-rate loans.

CalFed Inc.'s primary earnings per share for the first quarter of 1990 were $0.75 compared to $0.70 per share for 1989.

The company's assets totaled $25.3 billion at March 31, 1990, compared to $28.3 billion at March 31, 1989. Stockholders' equity was $1.44 billion at the end of the first quarter of 1990, compared to $1.39 billion at the end of the same period in 1989.

HOUSTON (APRIL 23) PR NEWSWIRE - A Public Utility Commission of Texas (PUC) hearings examiner Friday issued a report recommending disallowance of $215 million of Houston Lighting & Power Company's (HL&P) $2.6 billion investment in the South Texas Project (STP) nuclear plant.

The examiner's report further recommended that HL&P be allowed to offset the disallowance by the present value of HL&P's share of proceeds from the settlement of litigation with the original architect/engineer and constructor of the plant.

The present value of HL&P's share of proceeds from the settlement is calculated to be approximately $202 million.

HL&P is a subsidiary of Houston Industries Incorporated (NYSE: HOU).

#90113p5914 04/23/1990 ~PR Newswire

TORONTO (APRIL 23) PR NEWSWIRE - Abitibi-Price Inc. (NYSE: ABY) reported today a loss for the three months ended March 31, 1990, of $11.3 million, or 17 cents per common share. In the comparable period of 1989, earnings were $26.3 million or 35 cents per share.

Included in the loss for the first quarter was a charge for unusual items totalling $13.7 million before taxes, the major component of which was a write-off of the Jaffe office products business, which is being liquidated. Without this charge, the after-tax loss for the quarter would have been $2.6 million, or 5 cents per common share.

Net sales for the first quarter were $785 million compared with $810 million in 1989, while the operating loss of $5.9 million compared with an operating profit of $48.5 million in the preceding year. Without the charge for unusual items in 1990, the operating loss would have been a profit of $7.8 million.

Chairman and Chief Executive Officer Bernd K. Koken told shareholders at today's annual meeting that the major elements in the operating profit decline were weaker newsprint prices, the write-off of the Jaffe office products division and the poor performance of the groundwood and coated papers divisions.

The operating profit of the diversified group, before the Jaffe write-off, was higher in 1990 than in 1989, and the same was true for building products.

Also contributing to the net loss in 1990 were higher interest charges due to higher debt, plus the non-recurrence of $6.8 million of interest received in the first quarter of 1989 from an insurance claim.

Koken went on to say that even though the price increase for newsprint announced for June 1 was a step in the right direction, he expected newsprint earnings to remain below acceptable levels until continuing additions to capacity are reduced or further machine closures are undertaken. He also stated that groundwood papers are not likely to improve in the remainder of 1990, but that coated papers should rebound shortly from recent poor performance. The operations of the diversified group and building products are also expected to strengthen in 1990.

Abitibi-Price is a major Canadian forest products company with manufacturing, sales and distribution operations in Canada and the United States, plus other investments outside of North America.

SANTA BARBARA, CA (APRIL 23) PR NEWSWIRE - Financial Corporation of Santa Barbara (NYSE: FSB), parent company of Santa Barbara Savings and Loan Association, announced that it realized record earnings of $37.7 million or $1.71 per common share, for the quarter ended March 31, 1990, compared to restated earnings of $5.2 million, or $0.86 per common share, for the quarter ended March 31, 1989.

Philip R. Brinkerhoff, chairman of the board, president and chief executive officer, said, "We are excited by the fact that we have experienced our greatest quarterly profit ever, in fact far exceeding any yearly profit in our history, directly reflecting our restructuring efforts of the past year. The exchange offer of equity-for-debt consummated in this quarter was largely responsible for the very positive quarterly results and proved to be an incredible boon to our capital position. However, it is encouraging to note that we realized a profit irrespective of the gain from the exchange."

"We will continue to aggressively pursue opportunities to increase capital including capital infusion or sale," Brinkerhoff continued. "Even though we are below the capital requirements established by the FIRREA legislation, we are very pleased with our ability over the past year and the past quarter to improve our tangible capital ratio."

On Jan. 8, 1990, the company successfully completed an equity-for-debt exchange offer which resulted in an extraordinary gain of approximately $36.5 million, net of transaction costs and taxes, and an addition to tangible capital of approximately $50 million.

The transaction resulted in an exchange of (i) 37,913 shares of the company's $2.183 Cumulative Convertible Preferred Stock, Series A, (ii) $43.0 million of the association's $50 million issue of 13-3/8% Subordinated Notes due 1998 and (iii) $16.6 million of the company's and the association's $25 million issue of 9 percent Convertible Subordinated Debentures due 2012 for 17,276,750 shares of the company's common stock. The par value of the company's common stock was reduced from $1.00 to $0.01 per share to facilitate the exchange.

The company contributed a portion of the Notes and Debentures acquired through the exchange offer to the association which recognized a gain of $36.5 million, net of transaction costs and taxes, from the extinguishment of the debt.

The net earnings of $37.7 million for the quarter ended March 31, 1990, includes pre-tax earnings from continuing operations of approximately $1.4 million, which is a result of improved net interest income, a gain on the sale of real estate and a reduction in G&A expenses. Pre-tax earnings from

continuing operations for the quarter ended March 31, 1989 was approximately $2.1 million.

#90113p5931 04/23/1990 ~PR Newswire

LOS ANGELES (APRIL 23) PR NEWSWIRE - CalMat Co. (NYSE: CZM) today reported earnings for the three-month period ending March 31, 1990, of $10,398,000 on revenues of $148,130,000.

Comparable first quarter earnings in 1989 were $13,220,000 on revenues of $152,618,000. The 1990 earnings include $5,085,000, or $.17 per share in net gains from the disposal of real estate assets held for sale, while the 1989 income amount included $211,000, or $.01 per share, in such gains.

Inclement weather, heavier than usual winter maintenance and increased oil prices combined to lower 1990's first quarter operating profit margins. The severely depressed economies of Arizona and New Mexico contributed significantly to the unfavorable comparison with last year.

It is not uncommon for the construction materials industry to be affected by inclement weather in the first and fourth quarters of the year. While results of the first quarter are disappointing, sales backlogs are equal to or better than last year.

A. Frederick Gerstell, president and chief executive officer of CalMat, said, "We are optimistic that 1990 results from operations will compare favorably to those of 1989. In line with this expectation, the board of directors in February increased the dividend 14 percent to a new annual rate of $.64 per share."

CALMAT CO.

	Quarter ended March 31	
	1990	1989
Revenues	$148,130,000	$152,618,000
Net income (a)	10,398,000	13,220,000
New income per share (a)	$0.35	$0.43

(a) Includes operating results of, and net gains from disposal of, real estate assets held for sale of $5,085,000, or $0.17 per share in 1990 and $211,000, or $0.01 per share, in 1989.

#90113p5934 04/23/1990 ~PR Newswire
PONTIAC, MI (APRIL 23) PR NEWSWIRE - The General Motors Truck & Bus Group announced today that the redesigned S-truck will be built at the B-O-C Linden, N.J. plant.

Management responsibility for the plant will be transferred to the Truck & Bus Group in 1991 when the Linden facility will build out its production of Chevrolet Corsica and Beretta models. At the same time, Corsica and Beretta production will be increased at the B-O-C Wilmington, Del., assembly plant, the other GM plant currently producing these models. The B-O-C Lansing Automotive Division also is developing the flexibility in its Lansing (Mich.) assembly operations to produce one of the two Chevrolet models in the future. Through March of this year, Corsica/Beretta was the third best selling carline in the U.S., including imports.

The Linden plant, after it is retooled and refurbished, is tentatively scheduled to begin production of the new S-trucks in the fall of 1992. The new S-truck also will be produced at GM Truck & Bus facilities in Moraine, Ohio, and Shreveport, La., where the current model is built.

The GM Truck & Bus Group's Pontiac (Mich.) West assembly plant, which also builds the S-truck, will continue to produce the current model while the plants at Linden, Moraine and Shreveport begin production of the redesigned truck and accelerate to full capacity. Truck & Bus expects that the Pontiac West assembly plant will cease production at the end of the 1993 calendar year.

Renovated in 1987 to include a base coat-clear coat paint shop and larger than the Pontiac West assembly plant, the Linden facility can better accommodate the anticipated increase in S-truck production.

As previously announced, full-size van production at the GM of Canada Scarborough (Ontario) and the B-O-C Lordstown (Ohio) plants will be transferred to the Truck & Bus Group's Flint (Mich.) assembly plant beginning in 1992.

CONTACT: Linda Cook, B-O-C Lansing Automotive Division, 517-377-2211. For more information about Linden, Pontiac, Moraine and Shreveport truck production, CONTACT: Kari Hulsey, GM Truck & Bus, 313-456-7252

#90113p5939 04/23/1990 ~PR Newswire
MINNEAPOLIS (APRIL 23) PR NEWSWIRE - Bemis Company (NYSE: BMS) today reported record first quarter earnings per share of 36 cents, a gain of 20

percent over the first quarter a year ago. Income for the first quarter was $9.4 million, compared with $7.8 million or 30 cents per share in 1989. Sales for the quarter were $271.8 million, up 3 percent from $265.1 million for the first quarter of 1989.

Chairman and Chief Executive Officer Howard Curler said, "The 20 percent increase in first quarter earnings per share was a little stronger than we had anticipated. We are pleased by these results and expect improved performance throughout the year, although this could be tempered somewhat by costs associated with new equipment start-ups and uncertainties in the pricing structure of raw materials."

Bemis Company is a major supplier of flexible packaging and specialty coated and graphics products.

Unaudited results for the three month period follow:

BEMIS COMPANY, INC.

Three Months ended March 31;	1990	1989
Net sales	$271,779,000	$265,098,000
Net income	$ 9,367,000	$ 7,809,000
Earnings per share	$ .36	$ .30
Average common shares & common stock equivalents outstanding (for computation of earnings per share)	25,721,000	25,994,000

#90113p5941 04/23/1990 ~PR Newswire

DALLAS (APRIL 23) PR NEWSWIRE - LTV Missiles and Electronics Group announced today that its missiles division received authority to proceed on a contract valued at approximately $19 million to design and build the photovoltaic electrical power system radiators for NASA's Space Station "Freedom."

LTV has now won contracts for all three radiator systems on the space station. The company had previously won contracts on the central heat rejection system radiators and the solar dynamic power system radiators.

The new contract was awarded by the Rocketdyne division of Rockwell International.

LTV will design, fabricate and test a radiator system that will cool the batteries and power conversion equipment on the electrical power system of "Freedom's" first phase.

"Freedom's" first phase will be the base for experiments including Earth observation, zero gravity for processing materials and pharmaceuticals and astronomy and atmospheric physics observations.

LTV will deliver to Rocketdyne five deployable photovoltaic radiator units -- one qualification and four flight units -- over the next five years.

Each of the units for the pumped liquid radiator system is 50 feet long, 12 feet wide, weighs 1,200 pounds and has eight panels.

Current plans call for the first phase of the space station to be in place for permanently manned capability by mid-1997. The first unit of the photovoltaic radiator system is scheduled to be sent to the station on the space shuttle beginning in 1995.

The central radiator system, under contract to Lockheed, is a heat-rejection system for the crew living area and laboratories in the first phase. This heat pipe radiator system consists of two structures, each with about 40 panels. Each panel is 50 feet long and one foot wide and will be assembled in space by astronauts.

The system also includes a heat exchanger interface device and supporting structure to pick up heat from the station's heat transport loop.

The solar dynamic power system radiator for the station's second phase is under contract to Rocketdyne. "Freedom's" second phase will offer increased electrical power and facilities, including provisions for additional experiments and external construction bases to assemble or service vehicles for lunar and planetary exploration.

Under an approximate $4 million contract, LTV is currently developing a deployable, pumped liquid solar dynamic power system radiator through the preliminary design phase with a $25 million option to build, test and deliver two flight and one qualification unit. The design phase is scheduled for completion in 1992.

LTV's missiles division performed similar radiator work for the space shuttle. It designed and built the eight panels that provide cooling in order to maintain proper temperatures for the vehicle's operating systems, crew compartment and experiments.

The missiles division manufactures missiles, rockets and space systems and is involved in a wide variety of advanced technology, research and applications. It is one of three divisions of LTV Missiles and Electronics Group, which also produces electronics, avionics and military vehicles.

VANCOUVER, BRITISH COLUMBIA (APRIL 23) PR NEWSWIRE - A major restructuring of Fletcher Challenge Canada's (Toronto: FCC.A) senior management, designed to prepare the company for anticipated growth and change in the 1990's, was announced today by President and Chief Executive Officer Ian Donald.

The changes, to take place over the next several months, are: George Pearson, 62, will retire in July from his dual role as executive vice-president and chief operating officer and senior vice-president, pulp and paper.

Doug Whitehead, 44, will be promoted from vice-president, packaging, to senior vice-president and chief operating officer, Canadian operations. Whitehead, a civil engineer with an MBA, joined the company in 1971. He served in a variety of marketing, planning and human resources management positions prior to his appointment to head the company's Crown Packaging division in May 1988.

Jim Christensen, 58, currently senior vice-president, pulp and paper production, will become senior vice-president and technical director, with overview responsibility for technical aspects of all company pulp and paper operations, as well as assisting in the company's search for and assessment of growth opportunities, and directing special projects, such as the company's recycling initiatives. He will report to Ian Donald and will also fill the vacancy on the company's board of directors when Pearson retires.

Bill Sharkey, 52, currently managing director of Tasman Pulp and Paper Co. in Auckland, New Zealand, will return to Canada to become senior vice-president, pulp and paper, responsible for production and marketing activities. Sharkey was vice-president and resident manager of the company's pulp and paper complex at Elk Falls near Campbell River, B.C., before moving in 1988 to Tasman, a wholly-owned subsidiary of the parent Fletcher Challenge Limited and New Zealand's largest single exporter of manufactured goods.

Blair Beaton, 62, currently senior vice-president, finance, will become senior vice-president, special projects, with particular focus on researching the company's growth opportunities. He will also initially continue his responsibility for taxation and insurance matters.

Succeeding Beaton as senior vice-president, finance, will be Keith Winrow,

49, currently vice-president and controller of Canadian Forest Products Ltd., Montreal. He will join Fletcher Challenge Canada in May. Winrow, a chartered accountant and B.Comm, was vice-president and chief financial officer for Great Lakes Forest Products, based at Thunder Bay, Ontario prior to its merger with CPFP.

Donald paid special tribute to George Pearson ''for his many years of outstanding dedication and contribution to our company and its predecessors.'' Pearson joined the company in 1954 and held management positions in Crown Zellerbach Canada's Elk Falls, Interior and Coast wood products operations before becoming CZ Canada's vice-president, pulp and paper group in 1973. From 1981-83 he served as senior vice-president, timber and wood products, with Crown Zellerbach Corp. in San Francisco, returning to Vancouver in 1983 to become Crown Forest Industries' executive vice-president and, a year later, chief operating officer. He was appointed CF's president and CEO in 1986 and played a key role in the merger of Crown and BC Forest Pro ducts into Fletcher Challenge Canada.

A successor for Doug Whitehead at Crown Packaging will be announced in due course.

NEW YORK (APRIL 23) PR NEWSWIRE - The Nippon Credit Bank, Ltd. has agreed to acquire a 10 percent non-voting equity interest in Morgan Lewis Githens & Ahn Group, for $25 million, the bank announced in Tokyo today (April 24).

Nippon Credit Bank, based in Tokyo, is one of Japan's three long- term credit banks with total assets in excess of $100 billion. The bank maintains a branch in New York and an agency in Los Angeles. Its primary business in both Japan and the United States is providing financing for medium and large corporations.

Morgan Lewis Githens & Ahn, Inc., headquartered in New York, is an international investment banking firm founded in 1982 by four former executives of Smith Barney, Harris Upham & Co. The firm has represented more than 50 clients in mergers or acquisitions with a total value in excess of $10 billion. In addition, the firm is the general partner in two leveraged buyout funds and has completed 10 LBO acquisitions with an aggregate purchase price of $1.5 billion.

Morgan Lewis has an extensive merger and acquisition practice in the United States. Nippon Credit Bank said it intends to expand its participation in M&A business to include large cross-border deals involving Japanese and American corporations.

#90113p5958 04/23/1990 ~PR Newswire

SAN DIEGO (APRIL 23) PR NEWSWIRE - IRT Corp. (AMEX: IX) has unveiled its new-generation Fluoroscan(TM) Real-Time Cabinet X-ray Inspection System for inspection and manufacturing process control applications across a wide range of materials, processes and products.

The new system, which features a modernized cabinet enclosure and a high-precision four-post manipulator, is being introduced at the American Foundrymen's Society's CASTEXPO 90, April 21-24, in Detroit's Cobo Hall.

With the appropriate configuration of IRT's advanced system modules -- including X-ray sources, object manipulators, image processing and analysis systems, and lead cabinet enclosures -- a Fluoroscan system can provide real-time X-ray inspection of materials ranging from ultralight ceramics and composites to dense steel castings.

"The improved appearance of the new Fluoroscan system makes it consistent with modern industrial design," said Fred Schlieper, industrial systems marketing manager for IRT. "With smoother cabinet lines, an integrated warning light, and hidden cables, the look of the system better reflects its advanced capabilities and modern application.

"In addition, the four-post manipulator adds a new level of precision to the system's high-quality imaging capability," Schlieper said. "And because the manipulator table has no side wall, it provides a larger, more flexible parts inspection area and allows for increased geometric magnification of imaging features."

The new four-post manipulator in the enhanced Fluoroscan system provides more precise motion control because it eliminates the weight- loading distortion seen with traditional cantilever designs. The improved control is critical in many X-ray inspection applications, particularly where object manipulation and inspection sequences are automated and controlled by IRT's Sequencer(TM) software.

IRT also has announced the introduction of a new controller for its family of Industrial X-ray Systems for real-time and film X-ray applications, and the enhancement of its microfocus X-ray system.

The microprocessor-based controller, designated the IXC3, governs all of IRT's IXRS systems, which are sold as standalone systems and as part of

IRT's Fluoroscan integrated real-time X-ray systems. The controller's vacuum fluorescent display presents messages and prompts in plain English, avoiding the need for a code reference book. The unit features a convenient knob for adjustment of voltage, current, and time settings, and backlighted control buttons for ease of use in dimly lighted areas.

In addition, IRT has expanded the operating range of the HOMX-161(TM) High-Output Microfocus X-ray System through the introduction of a new, advanced water-cooled anode. The new anode -- the X-ray emitting part of the system -- allows film and real-time X-ray operation in two modes: microfocus, for large magnification of small features, and higher-power fractional focus, for the more difficult penetration of thick, dense materials. Because the water cooling extracts more heat than in a conventional air-cooled anode,
the system can operate continuously at higher power levels without risk of damaging the X-ray tube's target.

CONTACT: Fred Schlieper, 619-450-4343 Ext. 432, or Michael Green, 619-450-4343 Ext. 560, both of IRT Corp.

#90113p5959 04/23/1990 ~PR Newswire
NEWTOWN SQUARE, PA (APRIL 23) PR NEWSWIRE - ARCO Chemical Co. (NYSE:RCM) reported first quarter 1990 net income of $125 million or $1.30 per share, compared with first quarter 1989 net income of $116 million or $1.21 per share.

Revenues were $685 million in the first quarter versus $699 million a year ago. Net income includes a $43 million favorable adjustment resulting from adoption of Statement of Financial Accounting Standards No. 96 (SFAS No. 96), partially offset by a $15 million after-tax charge related to future environmental cleanup costs and a $3 million after-tax write-off.

Harold A. Sorgenti, president and chief executive officer, said: "Compared with the first quarter of 1989, margins in most products have improved. We have benefited from lower raw material costs in our propylene oxide core product area and higher methyl tertiary butyl ether prices as a result of higher gasoline prices. These increases have been more than offset by decreases in styrene monomer margins as styrene supply/demand has come into balance."

Gross profit for the first quarter 1990, which was negatively affected by an environmental charge and a write-off totalling $29 million in the aggregate, was $184 million, down $29 million from 1989. Plant operating costs, which include a $5 million pre-tax write-off in the 1990 quarter, were higher than the 1989 quarter. As a result of the company's ongoing site investigation studies, gross profit includes a $24 million pre-tax

charge for estimated future environmental cleanup costs versus a $3 million charge in the first quarter of l989. First quarter 1990 propylene glycol volumes were higher and propylene oxide sales were improved compared to the first quarter in 1989, which were lower due to advance buying in late 1988 before 1989 price increases.

Other income was $15 million in the first quarter l990, down $4 million from a year ago. The decrease is primarily due to lower interest income and lower income from equity investments caused by lower styrene margins at the company's joint venture in Japan.

NEW YORK (APRIL 23) PR NEWSWIRE - The Blackstone Advantage Term Trust Inc. (NYSE: BAT) announced that its registration statement as filed with the Securities and Exchange Commission has been declared effective permitting it to commence its initial public offering of 8,500,000 shares at $10 per share.

Trading in the fund's shares commenced on Friday, April 20, 1990, on the New York Stock Exchange under the symbol BAT. The managing underwriters for the offering were PaineWebber Incorporated (books), Kidder, Peabody & Co. Incorporated, Prudential-Bache Securities Inc., Gruntal & Co., Incorporated and Morgan Keegan & Company, Inc.

The Blackstone Advantage Term Trust Inc. is a newly organized, closed-end investment company. The trust's investment objective is to manage a portfolio of high quality securities that will return $10 (the initial offering price per share) to investors on or shortly before Dec. 31, 2005, while providing high monthly income. The trust will seek to achieve its objective through investing primarily in mortgage-backed securities and zero coupon securities.

The investment adviser of the trust, Blackstone Financial Managemet L.P., currently serves as the investment adviser to fixed income investors in the United States and overseas through five funds with combined total assets in excess of $3 billion.

HOUSTON (APRIL 23) PR NEWSWIRE - Iroquois Brands, Ltd. (AMEX: IBL)

announced today that the filing of its annual report on Form 10-K would be delayed. Iroquois does not anticipate it will be in a position to file its annual report on Form 10-K substantially before May 10.

The primary reason for the untimely filing is a delay in obtaining certain necessary information relating to foreign subsidiaries in order for Iroquois' outside auditors to complete their examination. Management is diligently pursuing all avenues in an attempt to obtain all necessary information in order to satisfy the outside auditors.

PITTSBURGH (APRIL 23) PR NEWSWIRE - Equitable Resources Energy Co. (EREC) announced today that it had participated in two recent oil and gas discoveries in the western Gulf of Mexico with The Louisiana Land and Exploration Co. (LL&E) (NYSE: LLX), Northern Michigan Exploration Co. (NOMECO), and NERCO Oil and Gas Inc. (NERCO).

The first discovery was on Galveston Block 313. The well, OCS-G 11318 Galveston Block 331 No. 1, was drilled to a total depth of 12,520' and encountered gas/condensate pay in the Rob mayeri interval from 10,400' to 10,456'. The well tested 11.1 million cubic feet of natural gas per day with 263 barrels of condensate and no water. Flowing tubing pressure was 6,681 psi on an 18/64" choke. Further drilling is anticipated on this block later in the year.

The second discovery was on High Island, South Addition, Block A-523. Well No. 1 on OCS-G 11390 was drilled to a total depth of 11,652' and encountered 83' of net oil and gas pay in three Pleistocene sands over an interval from 10,900' to 11,400'. A second well to further evaluate this discovery will commence immediately.

Galveston Blocks 313 and 331 and High Island, South Addition, Block A-523 were acquired by EREC and its partners at the OCS Lease Sale No. 122 on Aug. 23, 1989.

LL&E is the operator of both discoveries. EREC's working interest participation in the wells is 12.5 percent. Working interest participation for LL&E is 50 percent, NOMECO 25 percent, and NERCO 12.5 percent.

Equitable Resources Energy Co. is a wholly-owned subsidiary of Equitable Resources Inc. (NYSE: EQT). EREC explores for and produces natural gas and oil primarily in the Appalachian Basin with activities also in the Rocky Mountain and Southwestern regions of the country. NOMECO is a subsidiary of CMS Energy Corp. (NYSE:CMS) and NERCO is a subsidiary of

NERCO Inc. (NYSE: NER), a member of the PacifiCorp (NYSE: PPW) family of companies.

SEATTLE (APRIL 23) PR NEWSWIRE - The board of directors of Airborne Freight Corp. (NYSE: ABF) today declared a two-for-one split of all outstanding common stock for shareholders of record on May 16. The issue date for the additional shares will be May 30. Shareholders will receive one additional share for every share owned on the record date.

Robert Cline, chairman and chief executive officer, said "The stock split was approved in order to help provide increased trading liquidity in the company's common stock." Following the split, the company will have approximately 15,857,000 shares of common stock outstanding.

The board of directors also approved a quarterly dividend of 15 cents per share, on the pre-split shares, payable to shareholders of record May 7. The dividend will be paid on May 21.

Airborne Freight Corp., which operates under the trade name Airborne Express, is the nation's fastest growing air express company. Airborne primarily services Corporate America through the delivery of time-sensitive documents, letters, small packages and heavy freight to more than 45,000 communities and 183 countries worldwide.

WILMINGTON, DE (APRIL 23) PR NEWSWIRE - Hercules Inc. (NYSE: HPC) today reported first-quarter 1990 net income of $33.7 million, equal to $.72 per share.

This compares with 1989 first-quarter net income of $44.8 million, or $.96 per share, exclusive of $15 million, or $.32 per share, which reflects the cumulative effect on prior years of changes in accounting. The 1989 results include net non-recurring gains of $6.1 million, or $.12 per share.

Sales for first-quarter 1990 were $771.4 million, up from the $739.4 million in the comparable period a year ago.

According to David S. Hollingsworth, Hercules chairman and chief executive officer, "Our paper chemicals, fragrance and food ingredients, and

water-soluble polymers business improved over the first quarter of 1989. The packaging film and aerospace business did not perform as well. Profit margins in film continue to be negatively affected by the loss of relatively higher margin tobacco packaging business. In aerospace, profitability declined because of lower sales in the Titan and Delta programs."

MORRIS TOWNSHIP, NJ (APRIL 23) PR NEWSWIRE - Allied-Signal Inc. (NYSE: ALD) today announced that its Bendix Guidance Systems Division developed a significant portion of the system that will point and stabilize the Hubble Space Telescope after its scheduled launch tomorrow.

Bendix Guidance Systems, headquartered in Teterboro, N.J., has provided a significant portion of the pointing control system under a contract with Lockheed Missiles and Space Company, which built the spacecraft for the Hubble Space Telescope.

"The Hubble Space Telescope has a 94-inch, nearly perfect mirror that is capable of extraordinary clarity," said Ken Tompetrini, program manager for the Bendix portion of the pointing control system. "But to achieve this clarity, it must point accurately and stay on target. Therefore, the pointing control system has been designed to be so accurate and so stable that it could pinpoint a target to within two-millionths of a degree. This accuracy is equivalent to hitting a dime with a laser beam from 100 miles away."

The pointing control system provided by Allied-Signal consists of gyroscopes, star trackers and magnetic torquers.

"The gyros draw their design from similar devices which flew on the International Ultraviolet Explorer satellite and the three-satellite High Energy Astrophysics Observatory program," Tompetrini said. "For the Hubble Space Telescope, the performance of the gyros has been even further refined to reduce the output of random noise and provide extremely accurate information."

The gyroscopes measure the rate of rotation of the telescope spacecraft. This information is continuously fed into the computer, which uses the data to calculate the space vehicle's position. The computer then commands the reaction wheels which, when spun, have the effect of moving the vehicle in the desired direction. The action of these wheels can move the spacecraft from target to target, or hold it in a fixed position.

"The telescope is weightless in space so the relatively small wheels, about two feet in diameter, are able to nudge it," Tompetrini said.

In addition to the pointing control system hardware, Allied-Signal is providing the computer for the space vehicle's safe mode system. In the event that the primary flight computer must be switched off, the safe-mode computer can maintain vehicle hardware and scientific instrumentation in a safe condition until the problem can be fixed. "In effect, we keep the hardware warm until the flight computer is back on line," Tompetrini said.

After launch, Allied-Signal's Bendix Guidance Systems will support Hubble Space Telescope data analysis and operations. When scientists on the ground operate the telescope, commands prepared by Allied-Signal engineers at Goddard Space Flight Center will be used to point the vehicle and hold it in position.

Bendix Guidance Systems Division supplies gyroscopic products and space pointing and control systems for the military and space markets.

It is a unit of Allied-Signal Inc., an advanced technology company with businesses in aerospace, automotive products and engineered materials.

BOSTON (APRIL 23) PR NEWSWIRE - Bank of New England Corporation (NYSE: NEB) today announced the appointment of former Deputy Treasury Secretary R.T. "Tim" McNamar (cq) as vice chairman.

McNamar, 51, will be involved with BNEC Chairman and Chief Executive

Officer Lawrence K. Fish and others in the overall strategic and recapitalization efforts of the corporation. He will have specific corporate-wide responsibilities for regulatory compliance; community, government, and investor relations; as well as corporate communications. He will also serve on the boards of directors of BNEC and its affiliate banks, Bank of New England, N.A., and The Connecticut Bank and Trust Company, N.A.

He was deputy secretary of the Treasury from 1981 to 1985. At Treasury, he was responsible for domestic and international capital markets, banking, and tax policy. He served as an alternate governor of the World Bank and International Monetary Fund. He was also the executive in charge of the Treasury Department's LDC debt management and was the principal negotiator for a number of assistance packages during 1982-84. He also served as executive director of the Federal Trade Commission from 1973-77.

Prior to joining Treasury, McNamar was executive vice president and chief financial officer of Beneficial Standard Corp., a diversified financial services holding company based in Los Angeles. In addition, he has served as a banking consultant to banks on both the East and West Coasts. Immediately prior to joining BNEC, McNamar was the managing director of Conover and McNamar, a Los Angeles merchant banking firm.

"Tim McNamar is an able and experienced professional who appreciates and understands both the business of banking and the regulation of banking," Fish said. "He will complement and strengthen a dedicated leadership team in Boston and Hartford committed to stability, sound banking, and the rebuilding of a strong Bank of New England Corporation.

"His breadth of experince in macroeconomics, money and banking, as well as his background in insurance and project finance, will make him a valuable addition to our New England business community," Fish added.

McNamar said, "This is an exciting opportunity for me to become part of a team at a banking institution with a long and illustrious tradition of service to the New England economy.

"From the number of people in the bank whom I've met, it's clear that the long-term future of Bank of New England Corporation is attractive, and I look forward to working with the men and women who are restoring the bank's soundness," he added.

McNamar graduated from Villanova University in 1961, the University of Michigan Law School in 1963, and earned an MBA from the Amos Tuck School at Dartmouth in 1965.

He is married to Karen K. McNamar, and has two grown children by a previous marriage.

Bank of New England Corporation is a Boston-based interstate bank holding company with assets of $25 billion and banking offices in four New England states. Its common stock is listed on the New York Stock Exchange and is traded under the symbol NEB.

NEW YORK (APRIL 23) PR NEWSWIRE - "Only Yesterday," King World's nightly newsmagazine show anchored by former NBC News veteran John Palmer, has been given a firm production commitment for a September 1990 syndication debut. The announcement was made today by Roger and Michael King, chairman of the board and chief executive officer/president, respectively, of King World Productions, Inc.

Currently cleared in more than 62 percent of the country, "Only Yesterday" will debut on Sept. 3, 1990, and will focus on significant events past and present as well as on intense personal experiences. Through a kaleidoscope of music and news, "Only Yesterday" will present viewers with a whole new perspective on news events and other personal experiences as stories are reconstructed and conveyed with incredible power and immediacy by the people who lived them. Av Westin, senior vice president of reality-based programming for King World, is creator and executive producer of the show.

"Response to "Only Yesterday" has been fantastic," stated Roger King. "I expect 'Only Yesterday' to become an instant hit and King World's fifth franchise in the tradition of 'Wheel of Fortune,' 'Jeopardy!,' 'The Oprah Winfrey Show' and 'Inside Edition'."

Already cleared in eight of the top 10 markets, "Only Yesterday" has been picked up by WNBC-TV, New York; ABC-TV, Los Angeles; KYW-TV, Philadelphia; KPIX-TV, San Francisco; WBZ-TV, Boston; WDIV-TV, Detroit; KXNS-TV, Dallas/Fort Worth, and WKYC-TV, Cleveland.

Dan Cooper, an Emmy Award-winning local news director, writer and producer and former producer of ABC News' "20/20," will serve as producer of "Only Yesterday." Cooper is widely recognized as one of the most prominent and innovative forces in reality programming.

Cooper comes to "Only Yesterday" from Dan Cooper Productions, where he created a series of 14-hour-long shows for ABC News and ABC Video Enterprises titled "Great TV News Stories," a reality-based compendium of the top television news stories as reported by ABC News.

In his lengthy career, Cooper has worked with the Wall Street Journal Report, HBO, Hearst and Group W. He was assistant news director of WABC-TV's "Eyewitness News" as well as producer of WCBS-TV's "Channel 2 News from the Newsroom with Rolland Smith and Dave Marash." Additionally, he received a special commendation in "The Politics of Broadcasting: The Alfred duPont Columbia University Survey of Broadcast Journalism 1971-72" for his excellent series on "The Jewish Poor," for WCBS-TV.

Cooper has also served as a special consultant to the New York City Police Department and producer of a multi-award-winning series of legal training films combining police action melodrama and television newsmagazine techniques. He has also produced and directed shows for AT&T, American Brands, Hertz and Revlon.

"Only Yesterday" will be produced in New York. King World is the leading distributor of first-run programming, including "Wheel of Fortune," "Jeopardy!" and "The Oprah Winfrey Show," the three highest rated series in first-run syndication, and "Inside Edition," the sixth highest rated first-run syndicated strip which the company also produces. King World also distributes its own library of 68 feature films and 210 television programs, and through its barter subsidiary, Camelot Entertainment Sales, Inc., sells national advertising for King World and the Disney Company television programming. In addition, King World is the owner of WIVB-TV, the CBS affiliate in Buffalo, N.Y.

GAINESVILLE, Ga., April 23 PR NEWSWIRE - Zahnradfabrik Friedrichshafen AG (ZF), West Germany, and Atsugi Unisia Corp., Japan, have established a joint venture company in the United States. The company, ZUA Autoparts, Inc., will manufacture power steering pumps for cars and light duty trucks starting in 1991.

The plant, representing an eventual capital investment of more than $15 million, will be constructed in Gainesville. The new company will initially supply Unisia-designed aluminum light-weight power steering pumps to several Japanese-owned automobile manufacturers.

The new company will have access to the ample design and manufacturing experience of ZF and Unisia, both of which are leading manufacturers of high-tech automobile components. ZF had worldwide sales of more than $3.5 billion in 1989, and Unisia achieved sales of approximately $1 billion.

The joint effort will be devoted to high-quality, price-competitive supply

to the challenging U.S. market, the company announced.

ZF's worldwide manufacturing facilities produce gears, transmissions, pumps, axles and other drive systems. Markets served include on- and off-road heavy duty vehicles, automotive, marine and special equipment industries. ZF-AG, a Fortune International 500 company, is celebrating its 75th anniversary in 1990.

ST. PAUL, MN (APRIL 23) PR NEWSWIRE - Deluxe Corp. (NYSE: DLX) reported record sales for the first quarter of 1990 were $344,986,986, up 8.9 percent over the first quarter of 1989 when sales were $316,926,087.

Net income for the period was a record $36,050,846, up 18.2 percent from last year's first quarter earnings of $30,494,910. Net income per share for the quarter was 42 cents compared to 36 cents in 1989.

The company had an average of 85,072,400 shares outstanding with par value of $1 per share.

Harold V. Haverty, president and chief executive officer, said that "given the sluggish economy, we are pleased with Deluxe's first-quarter performance. The economy grew at only a modest rate -- however, since all of our operations continued to exercise control over expenses, were were able to achieve a greater gain in pre-tax profits. Because of economic uncertainty, we will continue to be cautious in our hiring and spending."

Deluxe Corp. is an industry leader in providing products and services to the financial payment systems industry. The company is the nation's largest check printer and also provides electronic funds transfer (EFT) software and processing services, ATM card services, new-account verification services, and sales development services to financial institutions. Deluxe's Business Systems Division produces a variety of computer and business forms and related products for small businesses and professional practices. The company's consumer specialty products division markets greeting cards, stationery, and a variety of related products to households.

MAYNARD, MA (APRIL 23) PR NEWSWIRE - Digital Equipment Corporation (NYSE: DEC), the world's leading manufacturer of network computer systems, today announced that its Board of Directors has authorized the open-market purchase for cash of up to 5 million shares of the company's common stock.

This represents approximately 4.1 percent of the company's outstanding shares. The total number of shares of common stock outstanding, as of April 20, 1990, was 122,066,922 shares.

James M. Osterhoff, vice president, finance, said, "We believe the current market value of Digital stock does not reflect the underlying strengths of the company -- its customers, products and the markets it serves, as well as its strong financial position. Our investment decision reinforces management's long-term commitment and confidence in Digital's future. This is an opportunity to build further shareholder value."

The company has already repurchased 18 million shares of its common stock on the open market for $2.1 billion in cash over the last several years.

Digital Equipment Corporation, headquartered in Maynard, Mass., is the leading supplier of network computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

#90113p6046 04/23/1990 ~PR Newswire

DES MOINES, IA (APRIL 23) PR NEWSWIRE - Meredith Corp. (NYSE: MDP) today reported third quarter net earnings of $4,775,000, or 26 cents per share, compared to prior year net earnings of $4,713,000, or 25 cents per share. Net earnings include equity income from Meredith/Burda commercial printing operations. Earnings from Meredith/Burda have been classified as a discontinued business because an agreement to sell the operations is pending, subject to government review.

Third-quarter earnings from continuing operations declined from $2,971,000 or 16 cents per share, in the prior year to $2,003,000, or 11 cents per share, for the three months ended March 31. While profits from magazine operations were significantly higher than a year ago, earnings were weaker in other continuing businesses.

"Third-quarter earnings were down primarily as a result of lower margins in the book publishing operations and soft revenues at our television stations," said Jack D. Rehm, president and chief executive officer.

"Book margins were held down by increased manufacturing costs and additional spending to generate new memberships in the book clubs. Softness in both the local and national ad spot markets caused broadcasting profits to decline."

Improved subscription profitability from Craftways Corporation's two publications, "Cross Stitch & Country Crafts" and "Cross Stitch Quick & Easy," boosted results for magazine publishing. Craftways is a wholly owned subsidiary headquartered in Richmond, Calif.

Results in the Real Estate Group were about event with the prior year. MMT Sales Inc., had a greater loss in the current quarter than in the prior year quarter as a result of lower revenues.

Earnings from discontinued operations increased from $1,742,000, or 9 cents per share, to $2,772,000, or 15 cents per share. This increase resulted primarily from a favorable one-time tax adjustment for Meredith/Burda.

Third quarter revenues increased by 1.2 percent to $199,108,000 from $196,721,000 a year ago.

For the first nine months of fiscal 1990, Meredith reported net earnings of $23,543,000, or $1.27 per share. Fiscal 1989 net earnings for the same period were $25,759,000, or $1.35 per share. Earnings from continuing operations for the nine-month period are $14,474,000, or 78 cents per share, compared to $17,289,000, or 91 cents per share, a year earlier. Discontinued operations added $9,069,000 to earnings during the first nine months of fiscal 1990, compared to $8,470,000 in fiscal 1989.

Meredith Corp. is a diversified media company involved in magazine and book publishing, television broadcasting, residential real estate marketing and franchising, and commercial printing.

An agreement to sell the company's interest in Meredith/Burda, the commercial printing business, to R.R. Donnelley & Sons Co., was announced in December. The transaction is currently expected to close late in the fourth quarter.

CONTACT: Steve Salato of Meredith Corp., 515-284-3386

PHILADELPHIA (APRIL 23) PR NEWSWIRE - Rohm and Haas Co. (NYSE: ROH) announced today it will explore the possibility of selling its Triton surfactant and alkylphenol businesses.

Surfactants are widely used in industrial and consumer applications to alter the surface properties of liquids. The company has retained Goldman Sachs & Co. to assist in the sale.

Rohm and Haas has a leading market position in surfactants and the business has a consistent record of being profitable. However, it has become increasingly important for all major producers to be positioned strategically with regard to key raw materials. The company said it is not so positioned; therefore, it has made the decision to pursue the sale of the business.

In making this announcement, David T. Espenshade, Business Unit director, emphasized that a final decision regarding the future of the business must take into consideration the needs of both external and internal customers. "Rohm and Haas has ongoing relationships with numerous customers who rely on these important materials. Additionally, surfactants are a component of a great many Rohm and Haas products. It is of paramount importance that we protect the interests of existing customers," Espenshade said.

Worldwide sales of Triton surfactants are approximately $100 million and are supported by production facilities in Philadelphia; Deer Park, Texas, and France.

The company indicated that the earliest a divestiture could be completed is the third quarter 1990.

DALLAS (APRIL 23) PR NEWSWIRE - Lone Star Gas Co., a division of ENSERCH Corp., and Oklahoma Natural Gas Co., a division of ONEOK Inc., have entered into a letter of understanding which provides for the purchase by Oklahoma Natural of all transmission and distribution properties of Lone Star in the state of Oklahoma. Lone Star will receive some $34 million cash from the transaction which is expected to close in about six months. Lone Star's before-tax gain on the transaction will be approximately $9 million. Final agreement is subject to the execution of final documents, the approval of both companies' boards of directors as well as federal and state regulatory agencies.

"Lone Star Gas is pleased to enter into this agreement with Oklahoma Natural Gas," said David Biegler, Lone Star chairman and president. "We believe we are acting in the best interests of all customers on our Oklahoma system. Oklahoma Natural Gas is an excellent company with a fine reputation," he concluded.

As a result of this sale, Oklahoma Natural Gas will obtain about 36,000 new customers. This represents approximately three percent of the 1.25 million customers Lone Star Gas currently serves.

#90113p6056 04/23/1990 ~PR Newswire

HOUSTON (APRIL 23) PR NEWSWIRE - General Motors President Robert C. Stempel today called upon the nation's vehicle fleet operators to work with automakers to support several clean-air proposals that will help preserve the variety of vehicles fleet customers require while continuing the progress in cleaning up our atmosphere.

Stempel told the National Association of Fleet Administrators (NAFA) that he knew they were very concerned about a number of legislative proposals calling for fleets to include a percentage of alternative-fuel vehicles.

"If these proposals are adopted, you will bear a big part of the burden," he said. "We think the Senate compromise that calls for manufacturers to demonstrate the ability to make alternative-fueled vehicles is the best approach. I hope the auto industry and NAFA can work together to make the case for that proposal as the legislation is being finalized."

In any case, he said, "We're committed to providing the kind of transportation products that you'll need for your future fleets - whether it's gasoline, diesel, methanol, electric, or something else, whatever it takes to satisfy your customers."

Stempel noted that many fleets were increasing their purchase of GM vehicles, saying fleet operations need high quality, high value cars and trucks, "and I am pleased you recognize the features, value and quality in our new products."

NEW BEDFORD, MA (APRIL 23) PR NEWSWIRE - Aerovox Incorporated (NASDAQ: ARVX), a recent spin-off of Cooper Industries (NYSE: CPE), announced today that the company has acquired the DC wound-film capacitor operation of AT&T Microelectronics. The operation, a part of AT&T Microelectronics Power Systems Business Unit, supplies a variety of DC capacitors used in telecommunications and switching equipment throughout the AT&T system. The purchase agreement includes all manufacturing equipment, documentation

and technology used in the present operation. Aerovox will provide AT&T with DC wound-film capacitors, estimated at $10-15 million is sales during the first year of the agreement.

Equipment will be moved into 60,000 square feet in Aerovox's plant in New Bedford, Mass., begininning in July. Full production is expected to be reached by year end and will require 100 to 200 people. During the six-month transition period, personnel from AT&T will be involved in training Aerovox employees on the new equipment.

"AT&T is confident that Aerovox can fulfill AT&T's requirements for wound-film capacitors," according to Sara Jane Koperski, power supplies vice president. "We've looked closely at Aerovox's capabilities and are impressed by their commitment to satisfying their customers' quality and service needs."

"The acquisition of AT&T's DC wound-film capacitor line represents a tremendous grouwth opportunity for Aerovox", noted company President Clifford H. Tuttle, "and is a natural extension of Aerovox's wound capacitor technological capability developed over 65 years in the capacitor business." Tuttle also said that he expects the company will eventually enter the merchant DC market, opening up a market not presently served by the company.

The common stock of Aerovox, a spinoff of Cooper Industries, began trading on Feb. 26, 1990, in the NASDAQ National Market. The trading sumbol is ARVX.

Aerovox is a leading manufacturer of AC and Power DC capacitors, basic electrical components that store electrical energy and regulate the frequency, timing and condition of electrical signals. The company recently reported record sales of $75.5 million for 1989.

#90113p6066 04/23/1990 ~PR Newswire

CHICAGO (APRIL 23) PR NEWSWIRE - Amoco Corporation (NYSE: AN) today reported estimated consolidated earnings of $466 million for the first quarter of 1990, compared with 1989 first quarter earnings of $458 million.

Earnings on a per-share basis were $.91 compared with $.89 for the first three months of last year. Revenues for the first quarter of 1990 were $7.1 billion compared with $6.5 billion for the like 1989 period.

For the 12-month period ended March 31, 1990, return on average shareholders' equity was 11.8 percent compared with 15.9 percent for the

12 months ended March 31, 1989. Return on average capital employed was 10.1 percent for the twelve-month period ended March 31, 1990, versus 12.9 percent for the corresponding prior-year period.

Worldwide capital and exploration expenditures amounted to $678 million in the current quarter compared with $650 million for the first quarter of 1989. Amoco previously announced a full-year capital and exploration expenditure budget of $3.95 billion for 1990.

Domestic exploration and production operations earned $226 million in the first quarter of 1990, up sharply from the $99 million earned in the first quarter of 1989. The increase reflected higher prices, particularly for crude oil, and lower exploration expenses and depreciation, depletion and amortization costs. This improvement more than offset the impact of lower crude oil production. 1989 results also included a special charge associated with consolidation of exploration and production activities.

Foreign exploration and production activities earned $69 million compared with $104 million in the first quarter of 1989. The earnings decline resulted from lower crude oil sales, increased exploration expenses, and unfavorable currency effects, which more than offset higher crude oil prices.

Worldwide refining, marketing, and transportation operations earned $111 million during the first quarter of 1990. This compared with $114 million in the corresponding period of 1989.

Chemical operations reported earnings of $80 million for the first quarter 1990 compared with $158 million for the similar prior-year period. The decrease in earnings primarily resulted from lower olefins margins.

Other areas of corporate activity reported a loss of $20 million in the first quarter of 1990 compared with a $17 million loss in the corresponding 1989 period.

First quarter 1990 worldwide net crude oil and natural gas liquids (NGL) production averaged 789,000 barrels per day compared with 850,000 barrels per day for the corresponding 1989 period. U.S. liquids production averaged 365,000 barrels per day for the current quarter, down 13 percent from the same period in 1989, primarily reflecting normal field declines and the impact of recent property dispositions. Foreign net liquids production averaged 424,000 barrels per day in the current quarter, down slightly from the corresponding period in 1989.

Worldwide net natural gas production for the first quarter of 1990 was 3.8 billion cubic feet per day, 6 percent below the 1989 level of 4.1 billion cubic feet per day. U.S. natural gas production was 2.2 billion cubic feet per day, 7 percent below the 1989 first quarter. Foreign production

averaged 1.6 billion cubic feet per day, down 5 percent from the first quarter of 1989.

Worldwide refinery runs averaged 875,000 barrels per day in the first quarter compared with 898,000 barrels per day for the same period in 1989.
Sales of refined products, including Canadian NGL sales, totaled 1,150,000 barrels per day in 1990, down 6 percent from 1989. U.S. sales volumes in the first quarter averaged 931,000 barrels per day, down 3 percent from the first quarter of 1989. Sales of gasoline, however, increased 3 percent to 531,000 barrels per day.

PHILADELPHIA (APRIL 23) PR NEWSWIRE - Apparel Business Systems (ABS) and IBM will host a joint seminar on developments in automated data processing systems for apparel and leather goods manufacturers on Wednesday, May 2, at IBM's Santa Monica, Calif., office.

The new software developments to be discussed during the seminar are targeted toward helping users generate more profits through achieving greater cost efficiency. The seminar will run from 9 a.m. to noon and will be followed by a question and answer session. Reservations may be made by telephoning Charles Washington at IBM's Santa Monica office at (213) 447-4647, or ABS' West Coast office in Santa Ana, Calif., (818) 882-1284.

Seminar subjects will address software developments in a wide range of industry and business topics, including: order entry and management control; order allocation; component inventory and style bill-of-material; accounts receivable; accounts payable; general ledger; gross to net payroll; incentive payroll; future plant scheduling; standard manufacturing cost accounting, and EDI. A new subject for the current seminar will be material acquisition systems for imports.

Apparel Business Systems is the leading developer of specialized computer software for the apparel and leather goods industries. Based in Philadelphia, the company serves more than 500 customers worldwide with systems and services oriented to IBM equipment, specifically the IBM System/36, IBM System/38 and the IBM AS/400.

CONTACT: John Shiffert of Shaeffer and Associates, (215) 546-1660, for ABS.

#90113p6073 04/23/1990 ~PR Newswire

WESTBOROUGH, MA (APRIL 23) PR NEWSWIRE - New England Electric System (NYSE: NES) (NEES) today reported its earnings for the first quarter of 1990 of 78 cents per average share compared to 71 cents earned in the corresponding period last year on fewer average shares.

NEES earnings for the quarter ended March 31, 1990 were increased by approximately 6 cents per share due to a new seasonal rate design, which was implemented in August 1989.

Earnings for the 12 month period ended March 31, 1990 of $2.44 compared to a loss of $1.05 per average share for the corresponding period ended March 31, 1989. The loss for the 12 months ended March 1989 was produced by a previously reported write-down recorded in the second quarter of 1988.

The write-down resulted from a rate settlement by New England Power Company (NEP), NEES' wholesale generating subsidiary. This write-down amounted to $179 million after tax, which reduced earnings per average share by $3.12 for the 12 months ended March 1989.

NEP owns approximately 10 percent of the Seabrook 1 nuclear unit, which is undergoing pre-operational testing. If the unit enters commercial operation and NEP is satisfied that various other conditions have been met NEES would be able to reverse a portion of the write-down. This could increase net income by approximately $115 million after tax.

PONTIAC, MI (APRIL 23) PR NEWSWIRE - Perry Drug Stores, Inc. (NYSE: PDS) announced today that it has reached agreement to sell its A.L. Price health and beauty aids deep discount stores to a company headed by William B. "Bill" Edwards, former president of F & M Distributors, Inc.

The sale, said Jack A. Robinson, Perry chairman and chief executive officer, was in keeping with the company's strategy to concentrate on its core business - conventional drugstores - and health care in Perry's major markets in Michigan.

He said the proceeds from the sale, in addition to repaying debt, will be used to open new stores, continue Perry's Store of the 1990s renovation program and "to take advantage of opportunities for further drugstore expansion." The terms of the sale were not made public.

Robinson said, "This sale is part of our continuing strategy to maximize our assets by redeploying them where they can be most effective. This strategic move will improve the profitability of Perry."

The sale is expected to be completed by May 31, 1990. The sale of A.L. Price follows Perry's recent decision to close or sell its six stores in Wisconsin and one store in Indiana. Along with working to maximize assets, Perry is continuing with its expansion program, concentrating on Michigan.

During the 1990 fiscal year, Perry has opened two new stores in Traverse City. It recently signed leases for new Michigan stores in Houghton Lake, Grand Rapids, Utica, Detroit and two in Ann Arbor. It expects to open ten new stores in this fiscal year and 20 in fiscal 1991.

A seasoned executive in drugstore retailing, Edwards was merchandise vice president for the W.T. Grant Co. before becoming president, chief executive and chief operating officer of F & M Distributors, Inc. He also has served as president and chief operating officer of Revco D.S. He also was recently associated with a chain of deep discount stores called Xpect Discounts in the New England area.

With the divestiture of the A.L. Price stores, Perry, a New York Stock Exchange company headquartered in Pontiac, will operate 170 conventional drugstores in Michigan and 23 in Illinois. It also operates several health-care businesses under the name of ComfortCare in Michigan.

CHICAGO (APRIL 23) PR NEWSWIRE - A downturn in business has led Santa Fe Railway to make plans to lay off approximately 850 people by May 15.

"The trends we see this month, followed by a mediocre first quarter, make it essential that we bring costs in line with business levels," according to Michael R. Haverty, president of the railway. He pointed out that two of the railway's most important commodities, automobile traffic and grain traffic, were down 47 percent and 40 percent respectively so far in April. "It is the reduced volume in these important markets we serve, coupled with a $10 million increase in fuel costs during the first quarter that we are counteracting with these cost reductions," he said. Haverty said the layoffs are similar to seasonal employment reductions the company has experienced in the past, but they are deeper.

Haverty said the layoffs being planned will have no impact on the company's service capabilities, but relate to the suspension of activities that are not essential in the light of current business conditions. "We have not changed the strategic direction of the company, and hope that business conditions will improve so that many of these jobs can be restored. We had hoped that by now we would have reached a crew consistent agreement with the United Transportation Union on our eastern lines, which would have helped hold costs in line, but that has not been the case," he stated.

Major facilities involved include the railway's car shops at Topeka, Kan., where about 100 employees are affected, and the locomotive shop at San Bernardino, Calif., where about 125 people are affected. "With the current level of business we do not currently need the cars being repaired at Topeka," Haverty said, "which makes it possible to delay that activity until later. Similarly, we have 123 new locomotives being delivered this year, starting in early May, which allows us to suspend the heavy locomotive repair activities at San Bernardino until that power is needed

later."

"We are continuing our rail and tie replacement programs, as they are important to our service capabilities, but we are making reductions in our engineering forces where that is not the case," he noted. In the engineering area 70 people will be affected at the company's centralized work equipment plant at Albuquerque, N.M., and 15 at the Newton, Kan., rail plant. Approximately 200 will be affected on section gangs, but that includes a reduction of only one person on each of those gangs across the railroad, Haverty said. Another 75 will be laid off from specialty gangs.

"Our management force has not been exempted from this cutback, and about 100 will be affected. At this time we have not identified the departments and geographic locations where that will occur," he reported.

The balance of the reductions are also not identified specifically at this time, but they are not expected to have a major impact in any one community.

ATLANTA (APRIL 23) PR NEWSWIRE - Rollins Inc. (NYSE: ROL), nationwide consumer service company, reported for the first quarter ended March 31 revenues increased ten percent to a record $97,578,000 and net income increased 19 percent to a record $3,606,000. Earnings per share increased 15 percent to 15 cents compared to 13 cents.

Gary W. Rollins, company president and chief operating officer said: "Orkin's revenues, including pest control, termite and lawn care services, increased 11 percent to $84,462,000, and operating income increased 15 percent to $5,999,000. Each of the businesses improved in both revenue and operating income.

"As expected, the lawn care business experienced a seasonal operating loss, however, they are ahead of plan. Rollins Protective Services increased revenues four percent to $12,068,000 and operating income increased eight percent to $890,000. We are pleased with the first quarter results and are optimistic about the year and confident about the opportunities of all our businesses."

Rollins owns and operates Orkin Exterminating Co. Inc., the world's largest termite and pest control company, which also provides lawn care services; and Rollins Protective Services Co., of the leaders and pioneers in residential security.

HOUSTON (APRIL 23) PR NEWSWIRE - The board of directors of Howell Corp. (NYSE: HWL) today declared a regular quarterly dividend of 7 cents per share and a special dividend of 28 cents per share.

Both dividends, which total 35 cents per share of common stock, are payable on June 12, 1990, to shareholders of record on May 23, 1990. The special dividend has been granted as a result of the receipt by the company of the refund of federal income taxes and interest, totalling about $32 million, which was recently reported.

Howell Corp. is an energy industry holding company. Through wholly owned operating units, it is engaged in oil and gas exploration and production, crude oil marketing, technical fuels refining and marketing, custom chemical processing, product terminalling and common carrier bulk liquids transportation of hydrocarbons and chemicals.

BIRMINGHAM, MI (APRIL 23) PR NEWSWIRE - Kuhlman Corporation (NYSE: KUH) today announced results for the first quarter of 1990 and declared a regular quarterly cash dividend of 3 cents per share, payable July 10, 1990, to shareholders of record June 11, 1990.

Kuhlman's first-quarter earnings of $965,000, or 17 cents per share, were lower than the $1,832,000, or 33 cents per share, reported in the record first quarter a year earlier. They were, however, slightly ahead of $833,000, or 15 cents per share, in the fourth quarter of 1989. The company said that the well-publicized slowdown in automotive sales and production and reduced sales of distribution transformers, its principal product line, were the major causes of the lower earnings in the 1990 first quarter. An additional factor was the delay in shipment of several orders for large power transformers from late in the first quarter until early in the second quarter of 1990.

ORLANDO (APRIL 23) PR NEWSWIRE - Southeast Bank, N.A. has announced the

opening of its Universal Studios Florida Banking Center, located at Univeral Studios Florida in Orlando.

As the official bank of Universal Studios Florida, Southeast Bank will operate the full service branch on site at the largest film and television studio outside of Hollywood.

"Southeast's Universal Studios Florida Banking Center will provide a full range of financial services for Universal Studios Florida employees and the estimated six million guests who will visit the park annually," said Darlene Blackburn, manager of the new banking center.

Southeast Bank's newest banking location will operate with a staff of seven full time employees, according to Blackburn, but the staff will be expanded on weekends to accomodate increased traffic at Orlando's newest attraction.

Operating hours for the banking center will be 9 a.m. to 6 p.m., seven days a week. The banking center is located in the guest services area just inside the main entrance to Universal Studios Florida.

Southeast Bank will observe the banking center's grand opening on June 7 in conjunction with Universal Studios Florida's grand opening celebration.

Southeast Bank, N.A. is an affiliate of Southeast Banking Corporation, (NYSE: STB) which had total assets of $17.1 billion and total deposits of $13.2 billion as of March 31, 1990. Southeast provides retail, commercial corporate, private banking and trust, mortgage and credit card financial services at more than 225 locations throughout Florida.

Other Southeast businesses include: First National in Palm Beach, a division of Southeast Bank, N.A., providing full commercial, private banking and trust services; Southeast Bank Brokerage Service, Inc., providing discount brokerage services; Southeast Credit Insurance Company, which reinsures credit insurance policies on loans made by Southeast Bank; and Southeast Mortgage Company, one of the nation's leading mortgage banking institutions, which services a mortgage portfolio of approximately $9 billion.

CHICAGO (APRIL 23) PR NEWSWIRE - A new national energy policy requires a finely balanced set of strategies to ensure an adequate power supply for the future, Pennsylvania Power & Light Co.'s (NYSE: PPL) top executive told a conference on electric power held here today.

"We must maintain a strong balance among three very important policy areas: providing new electrical generation, increasing energy efficiency and maintaining international competitiveness," said Robert K. Campbell, PP&L's chairman, president and chief executive officer. Campbell also is incoming chairman of the Edison Electric Institute, an industry trade group.

In remarks made at the American Power Conference, a national forum on energy sponsored by the Illinois Institute of Technology, Campbell emphasized that, "A lopsided set of priorities will almost certainly have the effect of creating the conditions for a future energy crisis."

Earlier this month, the electric utility industry witnessed two historic events -- each of which could shape the nation's energy future for years to come, Campbell pointed out.

"First, the U.S. Senate passed the most costly clean air act in the nation's history, a bill that could cost Americans well over $20 billion annually," he said. "What's more, the bill was passed without considering the scientific importance and results of the half-billion-dollar National Acid Precipitation Assessment Program Report (NAPAP), which Congress itself authorized in the early 1980s and which is due out in September."

Also this month, the U.S. Department of Energy released for public comment its interim report on a national energy strategy.

"The loudest single message in that report is to increase energy efficiency," said Campbell. "Without doubt, when the final version of the national energy strategy is issued later this year, it will establish priorities that will determine the nation's energy future well into the next century."

He questioned whether these developments are moving the nation in the right direction, and he said that many of today's energy problems are the result of false starts and misdirections which the country has experienced over the last two decades.

"The question we must now ask ourselves is: Can we sustain the world's most effective electric power system under the weight of a potentially lopsided national energy strategy?

"The answer, of course, must be yes. But we must use our past as our guide for achieving a balanced energy strategy," said Campbell.

PP&L supplies electric service to a 10,000-square-mile area of 29 counties of Central Eastern Pennsylvania. Among the communities it serves are Allentown, Bethlehem, Harrisburg, Hazleton, Lancaster, Scranton,

Wilkes-Barre and Williamsport.

DALLAS (APRIL 23) PR NEWSWIRE - While national health care costs are rising at three times the rate of inflation, Dallas-based Mesa Limited Partnership says the acclaimed employee fitness program it implemented 11 years ago now saves the energy company $1.6 million annually in health care costs compared to energy industry norms.

In addition, Mesa's internal review of its "Wellness" program indicates the firm's substantial commitment to employee health and fitness activities has cut its employee absentee rate in half.

Mesa, one of the nation's largest independent oil and gas companies, has compiled its findings in a new report, "Mesa Corporate Health and Fitness Program," in an effort to encourage other businesses and industries to establish similar employee fitness programs.

"The facts are here. There is an unmistakable and significant link between employee fitness and corporate America's economic vitality," said Mesa General Partner T. Boone Pickens, an exercise enthusiast and regular participant in the company's Wellness program.

"Mesa's fitness program is clearly preventive medicine and an effective and proven remedy for skyrocketing medical claims," said Pickens. "I don't want to get old and feel bad and I don't want Mesa employees to either."

According to Pickens, the in-depth study of Mesa's "Wellness" program found that:

-- Mesa's per employee health care costs are 60 percent less than the national average ($1,121 vs. $2,750), and 68 percent lower than the energy industry average ($1,121 vs. $3,560).

-- Although America is experiencing runaway health care costs -- more than $600 billion in 1989 -- Mesa's health care costs have remained fairly stagnant.

Mesa's per employee health care cost was $1,070 in 1982, increasing to only $1,121 in 1988 after dropping as low as $850 in 1986.

By contrast, health care costs for the typical U.S. worker totaled $1,340

in 1982, ballooning to $2,750 in 1988.

-- Mesa's Wellness program has significantly improved employee productivity and morale.

As a result of Mesa's lower health care costs, the company was able to reduce the dependent premium from $25 to $20 in 1989. Mesa is a self-insured provider, offering basic 80/20 coverage free to employees with a nominal $20 premium for dependents. The annual deductible is $100 per covered member.

HOPEWELL JUNCTION, NY (APRIL 23) PR NEWSWIRE - Mark I. Ritter, chairman of Robert-Mark, Inc., announced today that the company has completed a series of restructuring moves designed to impact favorably toward restoring profitability early in the company's new fiscal year. However, as previously reported, the company expects to report a loss for the full year and fourth quarter ended Feb. 28, 1990.

The restructuring involves the combining of the company's separate real estate project divisions under the direction of Ric Katz, president of RAMS Marketing, a division of the company. This move will allow for greater control of all project sites while reducing the need for several middle management positions.

In addition, the company has completed recent cost-cutting moves, principally executive-level pay reductions, personnel reductions and administrative cuts designed to reduce operating expenses approximately $1.0 million over the new fiscal year. Ritter has also decided to forego any salary to be paid to himself until profitable operations are restored.

According to Ritter, sales and customer traffic have increased over the year's first quarter to date, and the company's inventory of saleable units remains good. Fees from commercial banking, a new division, should also favorably impact the first quarter. Ritter also commented that the company's cash position, including an additional $1.2 million in expected income tax refunds, is sufficient for working capital needs.

Overall, the company is optimistic that its plans for revenue increases and restoring profitable operations is on schedule for the new fiscal year.

#90113p6130 04/23/1990 ~PR Newswire
HIGHLAND PARK, MI (APRIL 20) PR NEWSWIRE - Chrysler Corp. (NYSE: C) today announced it is sweetening its new vehicle incentive purchase program with the lowest financing rates in the industry.

Effective Saturday, April 21, through May 31, annual percentage rate financing on featured vehicles has been slashed to 0 percent for one to 24 months, 1.9 for 25 to 36 months, 2.9 for 37 to 48 months and 4.9 percent for 49 to 60 months.

The featured vehicles include 1989 and 1990 model Chrysler LeBaron coupe and 1990 sedan, 1989-90 Plymouth Acclaim and Sundance, 1989-90 Dodge Daytona, Spirit and Shadow, 1990 Dodge Monaco and 1989-90 Eagle Premier. The 1989-90 Jeep Cherokee and Jeep Wagoneer Ltd. APR rate for one to 24 months also has been reduced to zero.

The low APR financing rates on these selected vehicles are offered as another option for buyers, who also can take advantage of attractive APR rates on a wide range of other Chrysler Corp. cars and trucks through May 31.

Cash incentives ranging from $500 to $2,500 depending on the vehicle, are available as an alternative -- not in addition to -- low rate financing.

The cash incentives apply as announced earlier under Chrysler's "Guaranteed Rebate Progam" in which customers who take delivery during the program period will receive rebate increases, if any, through the Sept. 30 end of the model year. There is no "guarantee" program for APR financing.

The new low APR rates on the featured vehicles were revised downward from previously announced rates of 2.9 percent, 6.9, 7.9 and 9.9 for the respective time periods.

#90113p6147 04/23/1990 ~PR Newswire
FRAZER, PA (APRIL 23) PR NEWSWIRE - Sorbus, Inc., the computer services subsidiary of Bell Atlantic Corp. (NYSE: BEL) announced today that it has changed its name to Bell Atlantic Business Systems Services.

"The name change reflects both the organization's accomplishments and capabilities today and its future expanded business direction," said Gene Greer, president and chief operating officer.

The newly named Bell Atlantic Business Systems Services organization provides computer maintenance, systems management and consulting services to more than 60,000 customer sites through 250 service locations in the U.S., Puerto Rico, Canada and through Bell Atlantic International subsidiaries in Western Europe.

"The changing requirements of business computer installations demand that today's successful service companies offer more than traditional hardware maintenance," said Greer.

"Business Systems Services is attuned to the needs of the marketplace, with new service capabilities in areas such as disaster recovery, software support and remote diagnostics. The name change reflects our continuing commitment to broaden our services across a wide range of technologies in the future."

Sorbus, which has more than 30 years' experience in the computer industry, became a Bell Atlantic company in 1985, operating from its current headquarters in Frazer. Today it is the world leader in IBM and DEC (A) independent computer maintenance, and also services more than 500 computer brands and more than 5,000 different makes and models of computer hardware.

The name change to Bell Atlantic Business Systems Services also follows the purchase of Control Data Corporation's third-party maintenance operations. The transaction included Control Data's third party maintenance customer base and related nationwide facilities for IBM, DEC and other major manufacturers' computer systems. Bell Atlantic completed the purchase in January.

Bell Atlantic Business Systems Services, together with its affiliated partner company, Bell Atlantic Computer Technology Services, will operate as part of Bell Atlantic's group of companies offering business systems services. Bell Atlantic Computer Technology Services is engaged in the sale and repair of computer parts, education and maintenance training programs, remote diagnostic support and other services.

Other Bell Atlantic companies also deliver and support customer- based business systems solutions by providing hardware, software, systems integration and financing throughout the U.S. and internationally.

In addition to these companies, Philadelphia-based Bell Atlantic Corp. is the parent company of New Jersey Bell, Bell of Pennsylvania, the Diamond State Telephone Co. of Delaware and the Chesapeake and Potomac Telephone companies of Maryland, Virginia, West Virginia and Washington and Bell Atlantic Mobile Systems, which provides cellular mobile telecommunications in the Mid-Atlantic states.

Bell Atlantic is one of America's 50 largest companies, with assets of

more than $26.2 billion.

Bell Atlantic's stock is traded on exchanges in New York, Tokyo, London, Frankfurt, Basel, Geneva and Zurich.

(A) DEC is a registered trademark of Digital Equipment Corp.

PITTSBURGH (APRIL 23) PR NEWSWIRE - LMV Leasing Inc. today announced two new computer services designed to assist fleet executives in the purchasing and managing of commercial vehicle fleets.

The services are: -- STATUS: The automatic, computer-to-fax machine, transmission of status reports of new vehicle orders.

-- FleetAssistant: A PC-based fleet management system now undergoing beta testing with selected customers.

Both programs are designed for fleets of 200 to 10,000 vehicles and will be available to all customers by mid-summer, according to Michael A. Saxton, LMV's vice president, commercial fleet business.

LMV's FleetAssistant will help customers develop vehicle specifications, order vehicles, inquire about the status of those orders, obtain a variety of standard and customized reports about their fleet, and analyze their fleet operations. FleetAssistant can be run on a customer's single personal computer or through a network of personal computers in different locations, Saxton said.

LMV's STATUS system, the automatic telefaxing of status reports, was introduced to some customers this spring.

"The reports are transmitted after the close of business each Friday so that every Monday morning a customer knows the status of every vehicle on order," Saxton said. "Because the reports are transmitted computer-to-fax machine, rather than between two fax machines, they are very readable."

The LMV status reports themselves have been completely revised to improve readability and to make them a more effective managment report, according to Tracy L. Tausch, director of customer sales and marketing.

LMV's status reports keep track of a customer's vehicles during the

ordering cycle, which can take six to 10 weeks, depending on manufacturer and model.

Both STATUS and FleetAssistant were developed by LMV's Information Services Department headed by Ronald A. Zink.

Zink said that a number of advanced computer programs also are being developed by LMV.

NEW YORK (APRIL 23) PR NEWSWIRE - Jindo America, Inc. named Young Jin Kim currently president of the firm's parent company Jindo Corporation of Korea, to chief executive officer of Image Inc.

A U.S.-based affiliate, Image Inc. has developed Jindo's retail presence with 39 fur stores operating under the Jindo name. Image Inc. also operates fur lease departments in several department stores.

With the acquisition of the Fur Vault stores, retail sales in the U.S. for 1990 are expected to total over $70 million.

In addition, Image Inc. acts as managing partner of Ronlee Apparel Company one of America's largest outerwear wholesalers, with annual sales in 1989 or $40 million.

Kim is one of five brothers in the founding family of the Jindo Corporation, a diversified manufacturer of fur garments and transportation equipment headquartered in Seoul. In 1989, the parent company's sales totaled $333 million; net profit after tax was $7 million.

The company also named James W. Sullivan, formerly the president of Image Inc., as special adviser to Kim.

In his new role, Sullivan will be responsible for the firm's real estate, licensing and new business development activities. Sullivan is a lawyer and the founder of Textainer, an international marine container leasing company.

Kim said, "These new appointments underscore the significance of the Fur Vault acquisition. This is the most substantial overseas investment we've been involved with to date, signifying our real commitment to and confidence in the U.S. fur market."

Both appointments were made in anticipation of completing the previously announced acquisition of the assets of the retail fur group of the Fur Vault, Inc. Jindo agreed to pay $11 million to $15 million for the unit, depending on a final asset valuation, in May.

#90113p6171 04/23/1990 ~PR Newswire

PHILADELPHIA (APRIL 23) PR NEWSWIRE - Continuing to push for an integrated approach to disability management, the CIGNA companies announced today the introduction of a new product that unites long- and short-term disability benefits in one package, expanding opportunities for rehabilitating disabled employees. CIGNA is one of the country's largest writers of disability insurance.

Integrating both short- and long-term disability benefits also will mean more effective management of disability claims, while simplifying overall plan administration for employees and employers.

In addition, the product's managed approach to all disabilities will mean prompt identification of long-term injuries and illnesses most responsive to early intervention and rehabilitation.

Traditionally, disability insurance has been split into separate short-term and long-term plans, each requiring the filing of separate claims. "Our approach means aggressive management of disability claims from the outset," says Sandole. "With our product, an injured employee must file only a single claim. That initial filing triggers our identification and intervention process."

Because of that filing process, there's also no gap in management attention when an employee transfers from short-term to long-term disability status.

Because of its expertise in health benefits, CIGNA is uniquely positioned to manage claims aggressively through its disability claims operation. Using impartial, medically accepted disability duration guides, the disability claim unit can spot cases where disabilities are lasting longer than they should. Benefits claims analysts can then intervene with patient, physician and employer, enabling them to decide how best to help the disabled employee return to work.

CIGNA's new plan also will have financial benefits.

Part of the CIGNA companies, the special benefits division is a leading

writer of disability insurance, accident and group life insurance. CIGNA special benefits division products are underwritten by Life Insurance Company of North American and other CIGNA companies.

The CIGNA companies are leading providers of insurance, health care, employee benefits and financial services to businesses and individuals worldwide.

CONTACT: Jay Devine, 215-732-4100, or Abby Sullivan Moore, 203-726-4099, both for CIGNA.

#90113p6172 04/23/1990 ~PR Newswire

HOUSTON (APRIL 23) PR NEWSWIRE - Howell Corp. (NYSE: HWL) announced today that its net earnings for the first quarter of 1990, ending Mar. 31, 1990, were $17,991,000, or $3.75 per share, on revenues of $93,572,000. The net earnings for the first quarter of 1990 were composed of: (1) earnings from continuing operations of $658,000 or 14 cents per share; and (2) an extraordinary gain of $17,333,000 or $3.61 per share.

The extraordinary item is attributable to the refund of federal income taxes and interest, totalling about $32 million, which the company recently reported. The company utilized most of the proceeds from the federal income tax refund to extinguish its bank debt. The remaining proceeds have been placed in short-term investments pending capital and federal tax deposit needs. The company is in the process of negotiating a new credit facility which will be tailored to its new financial circumstances.

For the first quarter of 1989, the company reported net earnings of $4,516,000 or 94 cents per share on revenues of $62,971,000. Those earnings were attributable to: (1) earnings from continuing operations of $724,000 or 15 cents per share; and (2) earnings from the cumulative effect of the change in accounting for income taxes of $3,792,000 or 79 cents per share.

The receipt of the tax refund is one of the most significant events in the company's history. It has dramatically improved our financial condition and will obviously enhance earnings during the remainder of 1990 due to the reduction in interest expense attributable to bank borrowing.

Howell Corp. (NYSE-HWL) is an energy industry holding company. Through wholly-owned operating units, it is engaged in oil and gas exploration and production, crude oil marketing, technical fuels refining and marketing, custom chemical processing, product terminalling and common carrier bulk liquids transportation of hydrocarbons and chemicals.

LOS ANGELES (APRIL 23) PR NEWSWIRE - Farmers Group, Inc. commented today on the decision by Sir James Goldsmith's Hoylake Investments not to renew its bid for Farmers' parent company, B.A.T. Industries, and the decision by Axa Midi to withdraw its applications to state insurance regulators to acquire Farmers Group:

"We are pleased with today's decisions, which further confirm our view that the proposals by Hoylake and Axa Midi were not in the best interest of Farmers' policyholders and would not have been approved by insurance regulators in the nine states where members of the Farmers Insurance Group of Companies are based," said Leo E. Denlea, Jr., chairman and chief executive officer of Farmers Group, Inc.

"This confirms our belief that the regulatory process works well to protect the interests of insurance policyholders," Denlea concluded.

BIRMINGHAM, AL (APRIL 23) PR NEWSWIRE - In response to allegations by American General Corporation (NYSE: AGC) with respect to the position of the staff of the New York State Insurance Department, Torchmark Corporation (NYSE: TMK) said today, "We are confident of our position that our proxy solicitation for five independent nominees for director at American General's annual meeting on May 2, 1990, does not constitute a change in control. Therefore, we are continuing with our solicitation efforts, both on behalf of the independent nominees and our shareholder resolution.

"At the same time, we have been and will continue to be in communication with the staff of the insurance department."

Torchmark emphasized that, to date, all injunctive applications brought in the various states by or at the behest of American General have been denied. Formal actions by state regulatory authorities in California and Virginia have held Torchmark's solicitation to be in compliance with the applicable laws and regulations in those states.

Added the spokesman, "We continue to believe it is wrong for American General to persist in its efforts to deprive its shareholders of the opportunity to vote on our slate. American General's public announcements concerning insurance regulatory developments are only confusing American General's shareholders, and are diverting attention from the real issues that our slate and resolution present."

#90113p6193 04/23/1990 ~PR Newswire

MIAMI (APRIL 23) PR NEWSWIRE - Revenue of Ryder System, Inc. (NYSE: R)

was higher in the first quarter of 1990 than it was in the same period last year, but earnings were lower, it was reported today by Chairman, President and Chief Executive Officer M. Anthony Burns.

Burns said sluggishness in commercial truck rental and the lowest first-quarter automobile production in a decade, heavily impacting Ryder's Automobile Carrier Division, were major factors in the quarter's earnings performance.

Revenue in the quarter, ended March 31, was $1.25 billion, compared with revenue of $1.22 billion in the first quarter of 1989. Net earnings were $7.3 million, compared with $26.2 million in last year's first quarter. Earnings per common share were $0.07, compared with $0.31.

Commenting on the quarter's results, Burns said, "When you look behind the numbers, it is clear that, while demand is still soft, the work we have been doing is bending the trends in the right direction. January and February were very difficult, as they are every year," he said. "March, however, showed improvement. We believe the March results indicate that our comparisons will be more favorable in the second and third quarters.

"We see several positive signs. In March, excluding lower gains on vehicle sales, the Vehicle Leasing & Services Division had a good month, volume was up sharply compared with the previous eight months in the Automotive Carrier Division, and operating earnings were up solidly in our primary aviation businesses throughout the quarter.

"As we move into the second quarter, we are continuing our seven-point improvement program of selectively selling businesses, reducing assets in some areas, cutting the cost of capital, reducing overheads, maintaining a lower level of capital spending, making only those acquisitions which bring good value, and emphasizing our marketing and selling activities.

Operations "In the first quarter," Burns said, "revenue from full-service truck leasing increased, and the dedicated contract carriage segment generated record revenue in March. The consumer truck rental product line showed price strengthening which continued into April, and our profitable school bus business exceeded our expectations in the quarter.

"Perhaps most importantly," he said, "overhead spending in the Vehicle Leasing & Services Division, our largest, continued to decline. Commercial truck rental, however, continued its sluggishness, reflecting a lower level of activity in the manufacturing sector of the nation's economy."

Burns added that the company has reduced the size of its commercial truck rental fleet. However, substantially lower gains on the sale of all vehicles, reflecting softness in the used truck market, contributed to the

Vehicle Leasing & Services Division's lower earnings.

While the lowest first-quarter automobile production in almost a decade plagued the Automotive Carrier Division in January and February, an upward trend in production in March indicated that automobile dealers were beginning to build up inventory for the spring selling season. Characterizing March 1990 as "one of the Automotive Carrier Division's best months in the last year," Burns noted that units shipped in March 1990 were down only 3 percent compared with a record March in 1989.

Burns noted that, in the company's aviation businesses, revenue from turbine aircraft engine overhaul increased substantially over the first quarter of 1989, and new-parts distribution also reported significant gains. He said that one aircraft from the company's aircraft leasing fleet was sold at a gain during the quarter. However, continued softness in used aircraft leasing and rotable aircraft parts sales contributed to lower earnings. In addition, year-to-year comparisons were impacted by 1989's first quarter gain on the sale of a wholly owned subsidiary.

EL MONTE, CA (APRIL 23) PR NEWSWIRE - The Vons Companies Inc. (NYSE: VON) today announced sales of $1,211.7 million for the 12-week quarter ended March 25, 1990, compared with $1,181.4 million in the comparable prior year period, a 2.6 percent increase. Income before extraordinary item for the first quarter was $8.2 million or $.21 per share compared with a loss before extraordinary item of $13.4 million or $.35 per share a year ago. Net income for the first quarter was $15.2 million or $.39 per share compared with a net loss of $13.4 million or $.35 per share a year ago. Net income for first quarter 1990 reflects a $7.0 million or $.18 per share extraordinary non-cash item for utilization of net operating loss carryforwards.

"The strong results in the first quarter reflect the substantial progress we have made in generating sales and improving operating efficiencies from the combination of the Vons and former Safeway operations," said Roger E. Stangeland, chairman and chief executive officer.

Operating cash flow (defined as operating income plus depreciation and amortization of property, amortization of goodwill and other assets and LIFO charge) in the first quarter of 1990 increased to $59.1 or $1.52 per share compared with $30.3 million of $.78 per share a year ago, a 95 percent increase. Operating cash flow in the first quarter of 1990 as a percent to sales was 4.9 percent compared with 2.6 percent a year ago.

Improvements in the first quarter of 1990 reflect the benefits from store labor scheduling systems and programs implemented during 1989, reductions in headquarters administrative staff in 1989, lower workers' compensation and general liability insurance costs as well as an overall increase in operating efficiencies. The company also benefited in the first quarter of 1990 from favorable buying activity and the company's new store and remodel programs which typically add higher gross margin service and specialty departments. Prior year 1989 first quarter results include both one-time costs of $3.4 million and Easter holiday sales, which will fall in the second quarter of 1990.

"I am particularly pleased with the results because they reflect improvement in almost every area of our business. With the enormous task of the integration behind us, we have been able to turn our full attention to improving operations and the first quarter results reflect this company-wide focus on our bottom line," Stangeland said.

First quarter 1990 to 1989 sales comparison are significantly impacted by the shift in the Easter holiday which fell in the first quarter of 1989

and will fall in the second quarter of 1990. Same store sales in the acquired stores increased 9.1 percent over the year ago quarter. Sales per selling square foot in the first quarter of 1990 in the acquired stores were $138, or $598 on an annualized basis. Excluding the acquired stores, sales increased 1.5 percent on a same store basis over first quarter 1989 sales. Sales per selling square foot, excluding the acquired stores, were $163, or $706 on an annualized basis.

Vons, headquartered in El Monte, is the largest retail supermarket chain in Southern California.

ALEXANDRIA, VA (APRIL 23) PR NEWSWIRE - Halifax Engineering, Inc. (AMEX: HX) announced today the purchase of the assets of Del Net Inc., a privately owned Beltsville, Md., computer-services company.

This follows an earlier acquisition in February when Halifax completed the assets purchase of the services business of Sidereal Corporation, a division of TransTechnology Corporation.

These two new divisions will contribute over $3 million in revenues during the current fiscal year to Halifax's computer-service business. The Sidereal Field Service Division currently has over 800 customers for its primary service of maintaining electronic messaging switches, while the Del Net Division has over 100 customers for its PC services operation. The two divisions will contribute to Halifax's growth in commercial computer and communications services, already the profit-leading area of its business, and further the expansion of its nationwide service offerings.

Halifax provides professional, technical and support services to government and industry.

#90113p6205 04/23/1990 ~PR Newswire

DALLAS (APRIL 23) PR NEWSWIRE - Lomas & Nettleton Mortgage Investors (NYSE: LOM) today announced that, in addition to a regular $500,000 quarterly provision for possible losses, it had provided an incremental $37.5 million to its aggregate reserves at March 31, 1990.

These additions bring the Trust's aggregate reserves to $50.6 million or

approximately 6.5 percent of total investments held at March 31, 1990. The total (in relation to investments) represents the strongest reserve position in the Trust's 20-year history.

The Trust also announced that the aggregate principal amount of its notes due April 30, 1990 had been reduced from $246 million at Sept. 30, 1989 to a current balance of $177.3 million and that it had accumulated more than enough cash to enable full payment of the notes on April 30, thereby avoiding the necessity of requesting an extension of any portion of the principal balance.

Jess Hay, chairman and chief executive officer of LNMI, said that the additional loss provisions were taken by the Trust in recognition of the continuing deterioration of the country's real estate markets and the liquidity available to the real estate industry and the resulting weakened condition of many of LNMI's borrowers.

"The deterioration of the country's real estate markets has accelerated in recent months, and liquidity available to the real estate industry appears to be at its lowest point since the end of World War II," said Mr. Hay. "These unpleasant realities have weakened many of LNMI's borrowers, severely constricted their access to alternative sources of financing and materially reduced the liquidity of their assets. Thus, in our judgment, the additional provisions established by the Trust on March 31, 1990 clearly are prudent and in the best long-term interests of LNMI and its shareholders."

Prior to the incremental $37.5 million provision for possible losses (which is not deductible under applicable provisions of the Internal Revenue Code), LNMI's operations produced net income of $2,486,000, or 21 cents per share, during the March quarter. After deducting the additional provision, the quarter's operations resulted in a net loss of $35,014,000, or $2.99 per share.

"After considering various alternatives, the Trustees of LNMI have determined to pay a dividend for the March quarter, but to defer consideration of further dividend payments until October 1990, following the end of the first quarter of Fiscal 1991," Mr. Hay stated.

"The practical effect of this policy decision is that the dividend which normally is paid in August will be skipped in 1990. By paying the dividend related to the March quarter, the Trust will continue in full compliance with IRS rules which require, as a condition to continuing qualification as a real estate investment trust, the distribution of at least 95 percent of LNMI's taxable income to its shareholders," he said.

#90113p6208 04/23/1990 ~PR Newswire

WEST BEND, WI (APRIL 23) PR NEWSWIRE - The Principal Preservation Insured Tax-Exempt Portfolio, advised by B.C. Ziegler and Company, was ranked number one by Lipper Analytical Services Inc. for the 12-month period ending March 31.

Lipper also ranked the Insured Tax-Exempt Portfolio number one for the month of March and number four for the first quarter of 1990. The fund was ranked among 24 national insured tax-exempt mutual funds as tracked by Lipper.

For the 12-month period ending March 31 the fund had a 10.17 percent total return based on net asset value from a portfolio of insured bonds.

According to Vern Van Vooren, B.C. Ziegler and Company senior vice president and the fund's portfolio manager, the fund's objective is to obtain the highest total return consistent with preservation of principal through investing in a diversified portfolio of municipal securities, each of which is covered by insurance which provides for the timely payment of interest and principal at maturity.

The fund is one of five in the Principal Preservation Portfolios' family of funds advised by Ziegler.

As of March 31, 1990, total return performance since the fund's inception on Sept. 30, 1986 was 26.88 percent; annualized the total return was 7.02 percent. These returns do not reflect the sales load which is a maximum of 4.5 percent; if reflected, the sales load would reduce the returns shown above.

Total return includes the reinvestment of all capital gains distributions and income dividends. Distributions and principal value will vary so fund shares, when sold, may be worth more or less than their original cost.

For more complete information, including charges and expenses, obtain a prospectus. You may obtain a copy of the prospectus from B.C. Ziegler and Company, 215 N. Main St., West Bend, Wis. Read it carefully before investing or sending money. The value of shares for a mutual fund are subject to market fluctuation. Terms of the insurance are more fully explained in the prospectus. Past returns are not a guarantee of future performance.

#90113p6225 04/23/1990 ~PR Newswire

NEW YORK (APRIL 23) PR NEWSWIRE - In a new development, The Blackstone Group and J O Hambro Magan & Co., have today announced an agreement to jointly develop and execute transatlantic mergers and acquisitions.

Blackstone, a New York-based private merchant bank founded in late 1985, has advised on over $22 billion in transactions; last year, the majority of its advisory work involved cross-border deals.

Hambro Magan, a London-based financial advisory specialist firm founded in 1988, has already advised on over $8 billion worth of transactions involving U.K. and international clients. Notable recent cross border examples where Hambro Magan has been financial adviser include Jaguar on its purchase by the Ford Motor Company and Deutsche Bank on its acquisition of Morgan Grenfell.

Peter G. Peterson, co-founder and chairman of the Blackstone Group, said, "We have been searching for some time to forge this kind of link with a leading British firm that shares our philosophy of relatively small-size to ensure senior-level client attention, top corporate access, strict confidentially and trust, attention to business as well as financial issues, and superior execution capabilities as part of long-term client relationships. Needless to say, we are most impressed with Hambro Magan and look forward to significant work together to the great benefit of our clients and each other." Peterson is former chairman of Lehman Brothers and former U.S. Secretary of Commerce.

Rupert Hambro, chairman of Hambro Magan, said that "Cross border activity has greatly intensified in recent years, especially between Europe and the United States. In particular, mergers between U.S. and U.K. companies have risen in value from $5.4 billion in 1985 to $29.8 billion in 1989. We believe that our alliance with Blackstone will be beneficial to our corporate clients that are active in the market."

"This alliance is a natural extension of our ongoing strategy to seek compatible local partners to help us with our clients cross-border activities," added Stephen A. Schwarzman, Blackstone's co-founder and president. "We have been very happy with our relationships with Nikko Securities in Japan as well as with Banque Indosuez in France. Working with these firms in the United States and in their respective markets, Blackstone has already become quite active in cross-border transactions; we expect our new relationship with Hambro Magan to enhance this business."

Blackstone has also raised over $800 million in equity capital and has access to a much larger pool of debt capital from its limited partners such as Nikko, Prudential, The GM Pension Fund, GECC, and Metropolitan

Life. So far, Blackstone has led investors in over $5 billion worth of acquisitions including the Wickes Companies, the CNW Railroad, and Transtar, the transportation businesses of USX which Blackstone owns jointly with USX.

The co-operation agreement announced today between Hambro Magan and Blackstone specifically provides for each firm to assist the other in developing and executing cross-border business between the U.S. and the U.K. It envisages a close working relationship between the two firms but does not involve any cross-shareholding arrangements.

CONTACT: Peter G. Peterson of Blackstone, 212-836-9817, or Rupert N. Hambro of Hambro Magan, 212-836-9817

#90113p6226 04/23/1990 ~PR Newswire

NEW YORK (APRIL 24) PR NEWSWIRE - British Telecom and Ungermann- Bass today announced the signing of a major development agreement to speed the introduction of Open Systems Interconnection (OSI) products in Europe.

The multi-million dollar agreement includes plans for joint development of OSI products and inclusion of T-NET(A) local area networks (LANs) under British Telecom's recently announced CONCERT(A) network management system. The new partnership follows a long-standing supply relationship between the two companies.

Under the joint development agreement, a comprehensive range of OSI products will be developed and offered initially by British Telecom as part of its T-NET LAN portfolio. British Telecom will provide customers with OSI connectivity, complying with UK GOSIP (Government OSI Profile).

In addition to the OSI software development, work has already begun at British Telecom's Martlesham research laboratories to integrate the management of its current TCP/IP-based T-NET LAN portfolio into the CONCERT network management program. In both cases, the protocol recommendations laid down by the OSI Network Management Forum are being used. The T-NET LAN portfolio will be one of the first of British Telecom's networking products and services to be brought into the CONCERT development program.

"By focusing on network management and LAN protocols within our OSI strategy, British Telecom will be able to provide customers with a clear migration path and increased inter-operability between our T-NET TCP/IP and T-NET OSI protocal LANs," said Martin Cassidy, British Telecom's LAN business manager. "The development partnership with Ungermann-Bass is seen as a key factor in ensuring that smooth migration."

Ungermann-Bass President Ralph Ungermann said that Ungermann-Bass looked at the partnership with British Telecom as an investment in OSI. "Most of our customers consider TCP/IP to be the protocol choice for today because of its multi-vendor interconnectivity and support. At the same time, they see OSI as the protocol to which they will ultimately migrate. This agreement will be a key part in our participation in OSI."

Cassidy added: "The need by European companies for open, standards- based communications systems could not be greater, especially now that the implementation of a single European market is not far away. It is vital that leading systems integrators and network suppliers, such as British Telecom and Ungermann-Bass, work together to produce tangible OSI-conformant products and services."

Ungermann-Bass, whose headquarters are in Santa Clara, Calif., is a leading international designer and manufacturer of networking hardware and software data communications systems.

British Telecommunications plc (NYSE: BTY), commonly known as British Telecom, is a leading world player in telecommunications.

ANN ARBOR, MI (APRIL 23) PR NEWSWIRE - MEDSTAT Systems, Inc. (NASDAQ: MDST) announced today record sales and earnings for the second quarter and six months ended March 31, 1990.

Revenues rose 39 percent in the quarter to $3,109,000 from $2,234,000 in the prior year's second quarter. Operating income was $463,000, up 33 percent from $349,000 in the same period a year ago. Net income was $353,000 or 13 cents per share for the quarter, up 23 percent compared to $288,000 or 11 cents per share in the second quarter of 1989.

For the six months, revenues rose 34 percent to $5,909,000 from $4,402,000 in the prior year's six months. Operating income for the first half grew 28 percent to $866,000 from $674,000. Net income was $676,000 or 25 cents per share, up 26 percent from $537,000 or 20 cents per share.

"Our second-quarter and mid-year operating results reflect significant progress in two key areas. First, we continue to grow our core business with major corporations. Since the beginning of our fiscal year in

October, we have announced 15 new service agreements, covering more than 450,000 U.S. employees and retirees," said Ernest G. Ludy, MEDSTAT chairman and chief executive.

The most recent MEDSTAT client is Ameritech, including the five Bell Operating Companies in Illinois, Indiana, Michigan, Ohio and Wisconsin.

Detroit Edison, Exxon, International Paper, Security Pacific, Borden, Inc. Eastman Kodak Company, Ford Aerospace Company, Meijer, Inc., PepsiCo, Eaton Corporation, TRW Inc., GenCorp, Owens-Corning Fiberglas Corporation and Merck & Co. have also been announced as clients since Oct. 1, 1989.

"Secondly, our newest initiative of relicensing our software systems to the health insurance industry is continuing on track," continued Ludy, "and our mid-year results are consistent with the financial targets we outlined earlier this year."

MEDSTAT Systems, Inc. is a healthcare information company serving corporations, insurance, healthcare and consulting organizations with specialized databases, software and consulting services for controlling medical costs and measuring healthcare markets.

SAN JOSE, CA (APRIL 23) PR NEWSWIRE - CXR Corporation (AMEX: CXR), returned to profitability in the third quarter ended March 31, 1990, and expects to achieve a continuation of that trend in the fourth quarter.

"During the first half of this year, we absorbed the costs related to our November 1989 merger with Digilog, Inc., and now we are beginning to see the positive impact of our streamlining efforts," Jack Gorry, president and chief executive officer, said.

For the third quarter, net income was $124,000 or 2 cents per share on sales of $8,600,000, compared to net income of $581,000 or 8 cents per share on sales of $11,300,000 for the same period last year.

For the nine months, CXR sustained a net loss of $1,216,000 or 15 cents per share, including $1,410,000 in non-recurring merger and structuring costs from the Digilog merger, compared to net income of $1,739,000 or 24 cents per share for the like period of the prior year. Nine months sales were $25,917,000 versus $30,119,000 for the initial nine months of fiscal 1989.

"The sales decline was primarily the result of a softening in demand for protocol analyzers and discontinuation of several older products. Telecommunications test equipment sales remained comparable to last year's levels and our French subsidiary continues to show strong growth with sales gains of 25 percent for the third quarter and 22 percent for the year to date. We believe newly introduced products in all categories will help boost future sales and enhance profit margins, impacted this year by the shift in product mix," Gorry explained.

CXR through its CXR Telcom, Digilog and CXR SA subsidiaries, is a worldwide supplier of systems, instruments and modems for the data and telecommunications markets.

WASHINGTON (APRIL 23) PR NEWSWIRE - Mississippi Savings Bank, Batesville, Miss., today was served with a temporary cease and desist order and an accompanying notice of charges and hearing by the Office of Thrift Supervision (OTS).

Among other action, the order requires the thrift to cease alleged violations of the loan-to-one-borrower regulation. Since August 1989 Mississippi Savings Bank has extended excessive amounts of credit to a corporation dealing in extremely high-risk used car loans, putting it in violation of the regulation, according to the charges.

In addition, because the thrift fails to meet its capital requirement under the Financial Institution Reform, Recovery, and Enforcement Act of 1989 (FIRREA), it is classified as a troubled institution. As such, it cannot accept brokered deposits without Federal Deposit Insurance Corporation (FDIC) permission, which has been denied. OTS contends that, at year-end 1989, Mississippi Savings held brokered deposits of $129 million, amounting to approximately 75 percent of its total deposits.

The thrift was told to cease funding its employee stock ownership and retirement programs, to stop issuing bonuses and dividends, to restrict salaries and to refrain from entering into any employment contracts. The order also requires the institution to stop making any loans other than secured 1-4 family residential loans up to $250,000, to cease accepting or rolling over brokered funds, and to cease selling or dissipating assets.

The grounds for the order allege that the thrift is being operated in an unsafe and unsound manner, does not meet its capital requirements, has not filed an accepted capital plan, has exceeded its commercial loans-to-one-borrower limitation, and is making excessive executive compensation and dividend payments.

Mississippi Savings Bank, with assets of $177 million, has 20 days to file an answer to the notice with OTS, after which a hearing date will be set before an administrative law judge.

MILWAUKEE (APRIL 23) PR NEWSWIRE - Mr. Ben Barkin, organizer of Milwaukee's Great Circus Parade, today announced at a press conference at the War Memorial Center that Anheuser-Busch Inc. (NYSE: BUD) will donate $100,000 on behalf of the Great Circus Parade.

The parade will be held Sunday, July 15, in downtown Milwaukee. This year marks the sixth consecutive year that Anheuser-Busch has provided financial support for Wisconsin's national treasure.

"We are truly grateful for Anheuser-Busch's continuing commitment in bringing this colorful and unique bit of Americana to the people of Wisconsin," said Barkin.

"The Great Circus Parade is a great community event, and we're extremely happy to once again be part of the festivities," said Gregory Kubitz, division manager for Anheuser-Busch Inc.

Also part of Anheuser-Busch's Great Circus Parade contribution will be a return visit of the world-famous Budweiser Clydesdales. The Clydesdales make over 300 appearances annually throughout the country, and have made the Great Circus Parade an annual stop.

FULLERTON, CA (APRIL 23) PR NEWSWIRE - Wynn Oil Company has announced a restructuring of the company's United States-based marketing and sales management effective immediately. The move consolidates into a single marketing division the sales and marketing personnel who previously were organized into specialized market segments, including X-TEND Professional Service Products, Industrial Products, Consumer Products and Export Products.

The new Wynn's Marketing Division is headed by James R. Grebe, vice president of Marketing and Sales, who reports to Wynn Oil Company's president and chief executive officer, Eradio T. Jiminez.

Key management personnel reporting to Grebe include Richard W. Smith (in the newly created position of director of distributor Development and Field Support for all company product lines), James G. Wilson (director of Export), and John L. Scott (director of Sales, U.S., all product categories). Donald J. DiCostanzo, manager of Business Development, who will continue to be responsible for developing National Account business, and Gerald Miles, who has rejoined Wynn Oil Company as National Sales manager, Professional Products, will be reporting to Scott.

According to company President Jimenez, the restructuring provides a unified approach to planning and management of the United States marketing and sales functions. The restructuring also expands the pool of talent and resources available to individual distributors and customers which will improve customer response times and overall service in the areas of product promotion and sales support. Providing unparalleled customer service is a key element of the company's marketing strategy.

This strategic move coincides with the relocation of the company's corporate offices from Fullerton to a new building located at 1050 West Fifth Street, Azusa, Calif., 91702, 818-334-0231. The new corporate

office is adjacent to the company's California manufacturing operations. "This move will improve our efficiency and productivity by consolidating U.S. personnel into one facility," said Jimenez. "These two strategic changes should help strengthen our competitive position and continue improving our results of operations," said Jiminez."

#90113p6282 04/23/1990 ~PR Newswire

DALLAS (APRIL 23) PR NEWSWIRE - Rexene Corp. (NYSE: RXN) today announced that its net income for the first quarter of 1990 was $13.2 million, or 42 cents per share, compared to net income of $23.4 million, or 74 cents per share, for the like period in 1989. Net income for the first quarter of 1990 includes an extraordinary gain of $12.9 million (or 41 cents per share) resulting from the company's open market repurchases of $84 million in principal amount of its Senior Increasing Rate Notes. Net income was also negatively affected by a $13.5 million increase in interest expense, pretax, due to the company's issuance of Increasing Rate Notes in 1989.

Sales for the first quarter decreased by $43.5 million, or 25 percent, to $130.2 million compared to $173.7 million for the first quarter of 1989. (First quarter 1990 results include only six weeks of sales and income attributable to the Bayport manufacturing facility, which was sold in Feb. 1990.)

Operating income of $21.6 million for the first quarter of 1990, while down from the first quarter 1989 level of $45.3 million, was higher than the fourth quarter 1989 amount of $19.8 million. Operating income for the first quarter 1990 was lower than the like period last year, principally due to lower selling prices.

Rexene Corp., through its principal operating subsidiary, Rexene Products Co., manufactures thermoplastic resins and petrochemical products including polyethylene and polypropylene resins, styrene and plastic film. Rexene is headquartered in Dallas, with manufacturing facilities in Texas California, Wisconsin and Delaware.

(APRIL 23) UPI - Secretary of State Baker says the United States is ''appreciative and grateful'' for Syrian and Iranian efforts in Sunday's release of a U-S hostage in Lebanon. But Baker says he has- as he puts it- ''NO way of knowing'' if any more of the seven Americans still held

in Lebanon will be released soon.

Robert Polhill was reunited with his wife in Syria following his release by Moslem extremists who held him captive 39 months in Lebanon. The college accounting professor declared ''it's a great pleasure to be free again'' but also expressed concern about the fate of two colleagues kidnapped along with him on January 24th, 1987.

Earth Day was marked in various ways Sunday by Millions of people across the United States and around the globe. In Dallas, a 12-foot-high replica of the Statue of Liberty was unveiled by environmental activists. The statue consists of trash found on a beach in the Gulf of Mexico.

Canadian military officials say an air force jet fighter crashed Sunday off the coast of Vancouver Island. The pilot is missing and feared dead. The crash came five days after two Canadian jets collided over West Germany, killing one pilot and showering debris down on a city.

Police in New York are investigating the killing of a Bronx taxi driver found shot dead in his cab early Sunday. The death brings to seven the number of cabbies slain during the past six weeks. Mayor David Dinkins says the slayings have turned from ''a series of personal tragedies into a public crisis.''

A campaign official says Texas Republican gubernatorial nominee Clayton Williams displayed his honesty by admitting he paid prostitutes for sex as a young man. Williams is quoted as saying patronizing prostitutes is- his words here- ''part of growing up in west Texas.''

(APRIL 23) UPI - Black Americans are NOT just the victims of discrimination, they are also more likely than whites to be the victims of violent crime. A survey released by the Justice Department Sunday found the murder rate for blacks is six times higher than it is for whites. And, the study found that during violent crimes, blacks are somewhat more likely than whites to be physically attacked.

Former light-heavyweight boxer Eddie Cotton is in critical but stable condition after undergoing a liver transplant in Seattle. Hospital officials say the 63-year-old Cotton received a new liver during an 11-hour operation at the University of Washington Medical Center. Cotton was once known as ''the greatest uncrowned light-heavyweight in the world.''

#90113u0357 04/23/1990 ~United Press International

(APRIL 23) UPI - All the Houston Rockets were looking for Sunday was a last second shot at making the playoffs.

Golden State Warrior rookie Tim Hardaway gave it to them when he hit a layup with 3.3 seconds left to defeat the Seattle SuperSonics, who needed a victory to assure themselves of a playoff berth and edge Houston out by one game, even if the Rockets won.

''When I heard Seattle lost, it made me want to play right then,'' said Houston's Vernon Maxwell. ''There was a lot of talk in the lockeroom. We knew we had another chance.''

The Rockets went out and pounded out a 100-88 victory over the Utah Jazz in Houston to earn the final playoff spot in the Western Conference and a first-round matchup with the Los Angeles Lakers.

Had the Sonics beaten lottery-bound Golden State, even a Rocket victory would have left Houston a game back. But Hardaway's shot beat them 124-122 and when Houston won, the two teams were tied with 41 victories apiece. Houston made it into the playoffs on a tie breaker.

Seattle coach Bernie Bickerstaff offered no excuses for the loss.

''It wasn't what we didn't do as a basketball team,'' he said. ''I think they played very well. We had a tough time containing Hardaway.''

The rookie guard scored 28 points, and the Warriors were able to force the Sonics to play an uptempo game.

The Rockets were floundering at midseason, but played tough defense down the stretch.

''You have to give our guys credit the last couple of months for digging in,'' coach Don Chaney said. ''Now we can sort of wipe the slate clean and start anew. Hopefully as a group we can move on.''

The Rockets limited the Jazz to five field goals in the second period and six in the third. Utah's 88 points was a season low.

''They did a good job of hammering us and keeping us on the perimeter,'' Utah coach Jerry Sloan said. ''We couldn't get the ball inside, and when we don't hit the outside shots we struggle.''

Karl Malone, who was held to 20 points - 11 below his season average, said the Rockets could be deadly in the post season.

''If those guys had played all year like they did tonight, they wouldn't have been in this situation,'' Malone said.

Akeem Olajuwon's 28 points and 12 rebounds led the Rockets, and Maxwell, a starter in Houston's last 10 games, added 27.

-- AROUND THE NBA --

Elsewhere, San Antonio topped Phoenix 108-93; Cleveland housed New York 115-99; Indiana topped Washington 127-117; Boston pounded Philadelphia 118-98; Denver downed Minnesota 115-108 and Detroit bounced Chicago 111-106.

Spurs 108, Suns 93

At San Antonio, Terry Cummings scored 27 Points and added 13 rebounds and rookie David Robinson collected 23 points and 18 boards to give the Spurs the Midwest Division Championship. Willie Anderson contributed 20 points for the Spurs, who earned their first division title since 1982-83. The Spurs will meet Denver in the first round of the playoffs. Tom Chambers led Phoenix with 26 points and 17 rebounds. The Suns will play Utah in the first round.

Cavaliers 115, Knicks 99

At Richfield, Ohio, Brad Daugherty scored 26 points to lead Cavaliers. Cleveland won 17 of their last 23 games and will open the playoffs against Philadelphia. John Williams had 20 points and 10 rebounds and Mark Price added 18 for the Cavaliers. Patrick Ewing led New York with 23 points. The Knicks first-round oppponent will be Boston.

Pacers 127, Bullets 117

At Landover, Md., Detlef Schrempf scored 25 points and six Pacers scored in double figures. Indiana, which made the playoffs for only the second time in franchise history, will meet the defending champion Detroit Pistons in the best-of-five opening round. Bernard King led the Bullets with 39 points. Washington finished the year, 31-51, their worst record in 20 years.

Celtics 118, Sixers 98

At Philadelphia, Kevin McHale scored 22 points and Robert Parish added 18 to lead the rout. The Celtics played without Larry Bird and Dennis Johnson and the Sixers were without Charles Barkley, who served his one-game suspension for his fight last week with Detroit's Bill Laimbeer. Hersey Hawkins led Philadelphia with 24 points.

Nuggets 115, Timberwolves 108

At Denver, Michael Adams scored a season-high 32 points for the Nuggets, who will meet San Antonio in the first round. Alex English added 23 and Blair Rasmussen had 18 and 12 rebounds. Sam Mitchell led the Timberwolves with 27 points. Minnesota finished its first season 22-60.

Pistons 111, Bulls 106

At Auburn Hills, Mich., Bill Laimbeer sunk a baseline jumper and two free throws in the final 25 seconds gave the Pistons the win. Detroit finished the regular season 59-23 and will meet Indiana to begin their title defense. Isiah Thomas led Detroit with 18 points, Joe Dumars added 17. Michael Jordan led the Bulls, who will play Milwaukee in the first round, with 23 points.

BRATISLAVA, Czechoslovakia (APRIL 23) UPI - Pope John Paul II said he hoped Europeans would unite for ''true peace in freedom and justice'' and announced he will convene a special assembly of European bishops to discuss changes sweeping the continent.

Also, John Paul has accepted an invitation from Cuban leader Fidel Castro to visit communist Cuba in early December, Vatican spokesman Joachim Navarro said Sunday during a papal flight from Prague. The pontiff initially was invited to the Caribbean island nation by Cuban bishops last year, Navarro said.

The Polish pope - ending his 32 1/2-hour visit, his first to Eastern Europe since the toppling of its communist leaderships - said Sunday the many nations and citizens that make up Europe share a 2,000-year-old Christian heritage.

The pope made the remarks following a mass attended by more than 1 million people in the capital of Slovakia, which is overwhelmingly Catholic. It was a far larger gathering than at his mass earlier in the day in Moravia, or on Saturday in Prague.

After two world wars and four decades ''during which an erroneous ideology forced them into separate and hostile blocs,'' the nations of Europe seek agreement and understanding, John Paul said.

''It is my hope that, overcoming all difficulties, the peoples of Europe will unite their efforts in order to strengthen mutual solidarity, effective cooperation, and true peace in freedom and justice,'' he said before boarding his plane for Rome.

After a mass earlier in Velehrad, one of Czechoslovakia's holiest shrines, the pope announced he would convene a special meeting of European bishops to give them ''the opportunity to reflect more attentively on the importance of this historic moment for Europe and the church.''

The pope stressed repeatedly during his visit to Czechoslovakia that the political and economic changes under way must be accompanied by moral and spiritual renewal.

Communist Prime Minister Marian Calfa, who leads a coalition government dominated by non-communists, said the pope's visit has encouraged the nation as it moves toward democracy with the first free elections in four decades scheduled June 8.

''Your visit has addressed all the positive in us, despite the different opinions we may have,'' Calfa said.

In Velehrad, the pope gave a private audience to Polish Prime Minister Tadeusz Mazowiecki, who had flown in from Warsaw for the mass.

The pope was greeted in Bratislava by Alexander Dubcek, the communist hero of the failed ''Prague Spring'' of political and economic reforms that were crushed by the Warsaw Pact invasion in 1968.

Dubcek, a Slovak now president of the Federal Assembly, was banished to his native Bratislava for two decades. But he rose to prominence again during the November revolution and holds the figurehead position in Parliament as part of a bargain that gave playwright Vaclav Havel the presidency.

During his homily, the pope praised the courage of those who remained faithful to the church during four decades of repression, including priests who were jailed, religious orders that were banned, parents forbidden to teach their children Christian values, and children ''trained in falsehood, the first example of which was the denial of God.''

Although some estimates suggest nearly half of Czechoslovakia's 15.5 million citizens are Catholic, a survey released Friday showed only 30 percent of those polled believed in God.

SYDNEY, Australia (APRIL 23) UPI - Floods have swept more than 1 million square miles in Outback Queensland, New South Wales and Victoria, killing at least four people and forcing thousands from their homes, officials said Monday.

The record floods have been described by Queensland rescue authorities as the ''worst floods in white man's history'' in Australia.

In the sheep and cattle town of Charleville, about 480 miles northwest of Brisbane, more than 2,000 people were huddled in a tent city at the local airstrip on one of the few pieces of land still above water. There is only one toilet at the airport.

One person every 15 minutes was falling ill Monday with gastroenteritis,

and rescue officials feared a major outbreak of the disease in the crowded conditions.

''We've had an outbreak of gastroenteritis and we are isolating sick people and urging others to adopt proper hygiene,'' Lt. Col Bill Molan, head of the Army's rescue team, said Monday.

Emergency Service spokesmen in Queensland and New South Wales Monday said they expect the floods, which have killed at least four people since Sunday, could worsen.

Queensland Premier Wayne Goss flew to Charleville Monday and described the scene around the town as one of total devastation.

Airdrops of food and other critical supplies continued throughout Monday to thousands of isolated people and animals.

At least 32,000 sheep died in the floods and another 150,000 were in imminent danger, said a spokesman for the Department of Agriculture.

State Emergency Services officials estimated that up to one-third of Queensland was under water in the state's worst floods, caused by unprecedented and unseasonal rain.

Military planes and helicopters were on full duty in New South Wales and Queensland, rescuing from rooftops, dropping supplies and ferrying volunteer workers to the worst trouble spots.

In Victoria, hundreds of people were evacuated in the worst floods to hit the fertile Gippsland cattle area since records have been kept.

SEOUL, South Korea (APRIL 23) UPI - Four South Koreans will be allowed to visit North Korea to see relatives, marking the first time since the Korean War that permission was granted for family reunions, a government spokesman said.

The government Unification Board approved an application by Han Pil-sung, 56, and his wife seeking permission for a visit to the North for a family reunion, a spokesman for the board said.

Similar applications by Kim Hyon-yung, a 57-year-old man, and Chang Ki-bok an 81-year-old woman, also were granted, the spokesman said.

The four were the first since the Korean War to receive official permission to visit the North for family reunions.

Han, a dairy farmer living near Seoul, came to the South during the 1950-53 Korean War. His mother and sisters live in North Korea.

In March, Han had a reunion with a younger sister, Pil-hwa, in Sapporo, Japan. Pil-hwa, once an Asian speedskating star, came to Sapporo as an official of the North Korean team to the Winter Asian Games.

After returning home, Han sent a letter to Pil-hwa through the Red Cross, asking her to escort their mother to the South or send an authorized invitation to enable him to visit the North. Last week, an invitation from Pil-hwa arrived.

The North Korean Red Cross has assured Han that if he and his family members visit the North for a reunion it will guarantee their safety and provide necessary conveniences.

The spokesman said Kim and Chang, also separated from their families early in the 1950s, have received similar invitations from their relatives in North Korea.

#90113u0480 04/23/1990 ~United Press International

(APRIL 23) UPI - Thunderstorms raced across the nation's midsection early Monday, dumping heavy rain across the southern Plains and the South, while skies cleared in most of the Midwest and New England.

The National Weather Service reported that thunderstorms rumbling through parts of southeastern New Mexico, western Texas and Oklahoma gained strength, and two families were evacuated from Oklahoma's Roger Mills County. However, the county sheriff's department said flood waters were receding.

Earlier, more than 8 1/2 inches of rain was recorded in Cheyenne, Okla., between 1 p.m. and 9 p.m. Sunday, and a man died after he was struck by lightning while fishing on a farm pond in central Oklahoma.

Unsettled weather in the South left showers over Alabama and north Florida while Georgia and Mississippi were clearing and the Carolinas were fair.

There were mostly clear springtime skies overnight in the mid-Atlantic region. It was clear overnight in Maryland and West Virginia, with lows in the 30s and mid 40s.

Northwestern Pennysylvania saw partly cloudy skies but it was clear over the remaining western portion of the state. Lows were in the upper 30s to mid 40s. The skies cleared over eastern Pennsylvania around midnight and

the lows were in the mid to upper 40s.

Delaware and southern New Jersey saw clear skies and temperatures in the 40s and lower 50s.

In New England, clear skies and warm temperatures spanned the region, with some rain in northern Maine and dryer conditions elsewhere. In Boston, it was 49 and clear, while Concord, N.H. was 39 under clear skies.

Heavy thunderstorms rained on South Dakota along the Missouri River, and in North Dakota skies were cloudy but the weather was warm. Fargo, N.D., reported a balmy 74 degrees Monday morning.

Heavy thundershowers, capable of producing hail and gusty winds, moved through an area 80 miles southwest of Sioux Falls, S.D.

Skies were clear to variably cloudy through most of the Midwest.

In the far West, the light rain that dampened Earth Day was still a drizzle. Sacramento broke a precipitation record set in 1917 by recording .40 of an inch of rain. As much as an inch fell in some northern California locations.

Partly cloudy skies were the rule in Southern California, with highs in the upper 60s along the coast and the low to mid 70s in the valleys. Los Angeles recorded 71 degrees while it was 68 in San Diego. Death Valley rose to 94.

Wet weather returned to Oregon, along with blustery winds in some areas. The cooler, wet weather pattern was expected to persist through the week due to a westerly air flow over the eastern Pacific.

#90113u0528 04/23/1990 ~United Press International

NEW YORK (APRIL 23) UPI - Two whites convicted of manslaughter in the 1986 Howard Beach racial attack have been ordered to surrender to authorities Monday to begin jail terms after their appeals to the state's highest court were rejected.

Scott Kern and Jason Ladone were scheduled to surrender Monday in state Supreme Court in Queens, authorities said.

In the Dec. 20, 1986 attack, a gang of 12 white youths chased and beat three black men whose car had broken down in the predominantly white Howard Beach section of Queens.

The attack turned into a foot chase that ended in the death of Michael Griffith, 23, who was struck and killed by an automobile.

Three of the attackers, Kern, Ladone and Jon Lester, were convicted of second-degree manslaughter and first-degree assault.

The case focused nationwide attention on racial tensions in New York and sparked a series of protests demanding racial justice.

Kern and Ladone had appealed their convictions all the way to the Court of Appeals, the state's highest court, but the verdict was upheld Mar. 29 in a unanimous decision.

Ladone, who was 16 at the time of the attack, has been sentenced to a maximum of 15 years in prison. Kern, who was 18, has been sentenced to up to 19 years.

Lester, identified in court papers as the instigator of the attack, is in prison, serving a sentence of up to 30 years.

#90113u0531 04/23/1990 ~United Press International

MANILA, Philippines (APRIL 23) UPI - Government offices and some 300 private companies went on a forced holiday Monday at the start of a

four-day work week program to conserve energy in the capital, which has been hit by the worst power shortage in two decades.

The four-day work week will be in effect for five weeks and was designed by businessmen who objected to having periodic blackouts throughout the week.

By taking a holiday on Mondays, the offices were assured by the National Power Corporation of uninterrupted power supply for the rest of the week.

Although government offices and 309 private buildings are covered by the program, activities in most commercial establishments, including five-star hotels, grounded to a halt as four-hour power shutdowns took effect in the midst of a prolonged dry spell.

Filipinos left without air conditioners or electric fans grumbled about the sweltering heat and President Corazon Aquino was criticized for failing to plan and anticipate power shortages.

Aquino mothballed the 620-megawatt Westinghouse nuclear plant on Bataan province across Manila Bay after she came to power in 1986 for safety reasons. Officials said it would cost several billion dollars to meet safety requirements and start operations at the plant, which has never been used.

Power officials said they made recommendations on how to compensate for the closure of the $2.1 billion nuclear plant, but Aquino did not act on them.

Observers fear the power shortages - the worst since the energy crisis in the 1970s - will affect the nation's economic performance this year and scare away foreign investors.

The Center for Research and Communications, a private think tank, predicted a 3.5 growth this year, down from the official target of 6.5 percent.

To deal with the problem, Aquino is seeking an extension of the emergency powers she requested from Congress to deal with the economic impact of the December coup attempt launched by rebellious soldiers who accused her of inefficiency and corruption. The emergency powers act expires on June 8.

''The people need electric power much more than the President needs additional emergency powers. They are convinced that giving her what she wants will not give them what they need,'' said opposition columnist Francisco Tatad.

''More and more people are saying that what the president needs is not

additional emergency powers, but an emergency exit,'' said Tatad.

#90113u0650 04/23/1990 ~United Press International

(APRIL 23) UPI - A freed American hostage is in West Germany, preparing for his return to the United States... Millions around the globe celebrate Earth Day's 20th anniversary... United Press International reports the latest developments.

Doctors are checking over a thin but otherwise healthy-looking Robert Polhill at an American military hospital in West Germany.

The freed hostage arrived at the hospital with his wife today. In addition to receiving a physical exam, Polhill will have a reunion with other members of his family.

He's the first American to be freed by Moslem extremists in Lebanon in more than three years. The Islamic Jihad released him yesterday.

Polhill arrived at the Rhein Main Air Base near Wiesbaden this morning aboard an Air Force Starlifter aircraft. He was helped down the plane's steps by military personnel. He held a football that apparently had been given to him by members of the crew.

Polhill waved to applauding onlookers before boarding a helicopter that took him about 20 miles to the Lindsey U-S Air Station Hospital.

At Lindsey, he climbed out of the helicopter and again was met with cheers and applause from the waiting crowd. He stopped in front of the crowd and held the football aloft as if to pass it.

After he was released in Syria yesterday, Polhill said he was a happy man- except for the fact two other American University professors were NOT freed. Polhill said he was NOT mistreated. And he says Jesse Turner and Alann Steen are well.

President Bush welcomed the release, but tempered it with a call for the ''immediate and unconditional release'' of seven other American hostages still being held in Lebanon.

White House news secretary Marlin Fitzwater said the administration does NOT know what prompted Polhill's release. Fitzwater echoed the president's long-held policy... saying there were NO deals NOR negotiations with the hostage takers.

#90113u0660 04/23/1990 ~United Press International
(APRIL 23) UPI - Initial indications are that yesterday's 20th anniversary celebration of Earth Day succeeded in raising the world's consciousness about environmental issues.

But whether the global event alters humankind's treatment of the ecosystem remains to be determined.

This was the emphasis of comments made in Washington by actor Tom Cruise.

Cruise delivered an impassioned speech to more than one-half-Million people gathered in the nation's capital, telling them that people have to change their behavior if they hope to preserve global resources.

Other cities throughout the United States staged teach-ins and concerts that attracted hundreds of thousands of participants, including 750-thousand who gathered in New York's Central Park.

Around the world, people came together to express their concern for the environment and hope that it is NOT too late to preserve fragile resources for future generations.

Despite political pressures, Lithuanians planted trees and held a bike parade in the capital.

Peruvian newspapers announced formation of a new group designed to heighten the average Peruvian's knowledge about working to preserve the planet. And in Namibia, the world's newest country, the government told youths that they must act as environmental watchdogs.

Environmental watchdogs in Alaska were treated with scorn by oil giant Exxon for trying to clean up their backyard.

Alaskans from Valdez, Whittier, Cordova and elsewhere used Earth Day as a starting point for local efforts to clean the mess left behind by last year's giant oil spill.

But their efforts were criticized by Exxon, which asked the Coast Guard to prevent the clean up.

#90113u0666 04/23/1990 ~United Press International
(APRIL 23) UPI - All systems are go for tomorrow's scheduled launch of the shuttle Discovery. Air Force meteorologists say acceptable weather conditions are the only possible obstacle to Discovery's second lift-off attempt.

NASA says it's keeping a close eye on a low pressure system that could bring rain and fog into the Cape Canaveral launch site tonight or tomorrow morning.

But forecasters predict a 70-percent chance that Discovery will take off on time tomorrow.

Discovery's mission is to deploy the Hubble Space Telescope. The revolutionary one-and-a-half-BILLION-dollar telescope is the most expensive satellite ever built.

The 24-thousandpound telescope is expected to open a clear window on the universe, allowing astronomers to peer into the earliest segments of the cosmos.

NO nation has offered to send supplies to Lithuania to replace the oil and gas Moscow cut off because of Lithuania's declaration of independence. But neighboring Estonia says it will do what it can.

Estonia's premier says his tiny Baltic republic will- in his words- ''do what we are able'' to help Lithuanians cope with the Soviet embargo.

The Estonian leader says his republic has only limited ability to help Lithuania, but still will lend a hand.

In a telegram sent to Moscow yesterday, Lithuania said its factories will be able to fulfill contracts with the Soviet Union for only a few more days because of a lack of natural resources and fuel.

In the third Baltic republic of Latvia, a largely Russian bloc of deputies formed a pro-union group called ''Soyuz.'' They will try to prevent Latvia's Parliament from declaring independence when it convenes May 3rd.

Latvia's population is 49 percent non-Latvian, with the majority ethnic Russians. As a result, the Soyuz group will be more powerful than the similar but smaller anti-independence groups in Lithuania and Estonia.

-30- 2077

#90113u0672 04/23/1990 ~United Press International

(APRIL 23) UPI - Election officials in the Yugoslavian states of Croatia and Slovenia say they should have preliminary tallies today of the country's first free vote.

The final count could determine the makeup of the federation of Yugoslavia. The Slovenian election pits a liberal communist who favors a loose affiliation within the Yugoslavian confederation against an opposition candidate who favors an independent Slovenia.

The two candidates met earlier this month in an inconclusive first round vote. The communist candidate was favored in the first round of balloting by 44 percent of those voting.

The Slovenian reformist Communist Party also fared better than all other parties in the first round, garnering 17-point-three percent of the vote. But a coalition of democratic parties formed an alliance that gave them more than 50 percent of the vote.

Croatian officials say more than three-point-five-Million votes were cast to choose 365 deputies for the state's three-house parliament.

Nigerian President Ibrahim Babangida says he is in full control despite a violent attempt to oust him.

Residents of Lagos report gunfire and explosions have stopped and the fighting is over. Christian soldiers claiming their people suffered discrimination under the Moslem-dominated government tried to overthrow Babangida.

Babangida told reporters in a brief news conference in Lagos yesterday that the army was rounding up the remaining rebels. He says their leaders will be executed- the fate that befell the ringleaders of an attempted coup in 1985 just months after Babangida himself seized control in a coup.

Nigeria is Africa's largest and most populous nation. More than half of Nigeria's 115-Million people are Moslem... including the president.

Nigeria's population is booming at a rate of three percent a year. Most anti-government sentiment in caused by economic hardship rooted in longstanding communal and tribal animosities.

#90113u0820 04/23/1990 ~United Press International
(APRIL 23) UPI - Prices on the Tokyo Stock Exchange closed lower Monday in dull trading.

The blue-chip Nikkei Average of 225 selected issues, which lost 109.97 points Friday, fell 156.37 points or 0.52 percent to 29,679.07.

The broader-based Tokyo Stock Exchange Index of all listed major shares slid 12.96 points to 2,201.20.

An estimated 330 million shares changed hands, down from the million shares Friday.

Declines outpaced advances 583 to 357, while 169 issues were unchanged.

Market watchers said selling dominated trading as investors were worried about rising interest rates in the United States.

Elsewhere in Asia, prices closed lower on the Hong Kong Stock Exchange in trading marked by the absence of overseas traders and spurts of profit taking.

The Hang Seng Index, which slipped 0.37 points Friday, lost 10.44 points to 3,056.86. Utilities fell 34.55 points, financials lost 6.14, industrials added 2.06 and properties closed down 18.70 points.

Turnover amounted to 1.32 billion shares, compared with 1.55 billion shares Friday.

Prices on the Singapore Stock Exchange slid in light trading as the decline in Tokyo left investors bearish in the absence of fresh market news.

The key Straits Times Industrial Index, fell 8.46 points Friday, lost 15.95 points to 1,504.61. The narrower All Singapore Index fell 4.33 points to 413.34.

Turnover amounted to 36.28 million shares, compared with 35.09 million shares Friday.

In Australia, prices drifted lower in light trading on the Sydney Sharemarket.

The key All Ordinaries Index, which eased 3.0 points Friday, fell 8.9 points to 1,483.4. The closely watched Gold Index, which lost 4.2 points Friday, fell another 7.1 points to 1,536.0.

Turnover amounted to 57.7 million shares, compared with 86.2 million shares Friday.

#90113u0824 04/23/1990 ~United Press International

JERUSALEM (APRIL 23) UPI - Holy sites in Jerusalem and Bethlehem,

including the Church of the Holy Sepulchre, will close Friday to protest the Jewish takeover of a building claimed by the Greek Orthodox Church, Christian leaders announced Monday.

Church officials said it was the first time in modern history their leaders had unanimously decided to protest by closing the holy sites, which draw tens of thousands of tourists and pilgrims yearly.

The church leaders indicated the Friday closure might continue indefinitely but said they would review their decision depending on legal attempts to evict the Jewish residents of St. John's Hospice.

Greek Orthodox Patriarch Diodoros I, who maintains his church owns the 72-room building, said Christians in Jerusalem wanted to live in peace ''enjoying our privileges and rights'' and demanding respect of the status quo.

The 150 Jews who moved into the building four days before Easter Sunday were reportedly the first Jews to live in the Christian Quarter since Israel captured the Old City from Jordan in 1967.

The church leaders demanded Israeli authorities immediately remove the Jewish residents and ''secure the property for its legitimate owners, the Greek Orthodox patriarchate.'' Black flags flew over the Church of the Holy Sepulchre and the Greek Orthodox patriarchate.

In their statement, 10 Christian leaders in Jerusalem, including the Greek Orthodox, Armenian and Latin patriarchs, said the presence of the Jewish residents and ''this act of armed settlement seriously jeopardizes'' the centuries-old status and character of the Old City's Armenian, Moslem and Christian quarters.

''This action further endangers the survival of all Christian communities in the Holy City,'' the statement said. ''We, the heads of Jerusalem's Christian churches and communities, unreservedly condemn the actions of the settlers. We deplore the open support and encouragement it has received from Israeli government quarters.''

On Sunday, the Construction and Housing Ministry acknowledged it contributed $1.8 million toward purchasing the sublease of the disputed building, around the corner from Church of the Holy Sepulchre, one of the holiest Christian sites.

The church leaders said the violence stemming from the Jewish presence threatened the ''freedom of access to the Holy Sepulchre and freedom of worship.'' Several demonstrations have erupted outside the building with tear gas fired during at least one protest led by the Greek Orthodox Patriarch.

The entrance of the Jewish settlers into the Christian Quarter building sparked a series of court cases over church demands to evict the new residents and questions about the ownership of the building. Israel's High Court has scheduled a hearing Thursday on the eviction issue.

To protest the Jewish presence in the building, the church leaders decided to close the Christian holy places in Jerusalem, Nazareth, Bethlehem and elsewhere in the holy land at 9 a.m. Friday.

Although the statement said the holy sites would ''not reopen until the following day,'' church officials said the closure could continue beyond that.

The churches also said all church bells would toll every hour Friday morning and Sunday would be a special day of prayer on behalf of the Christian community in Jerusalem.

Rabbi Benny Elon, a Jewish resident in the Christian Quarter building, said he was sorry the matter had developed into a religious issue and questioned whether it was proper for the churches to close their holy sites.

''Did God say, 'OK,' that no one will pray on this day? Maybe they (Christian worshipers) can go to the Western Wall,'' Elon said, referring to Judaism's holiest site.

Also Monday, two Palestinian youths died of wounds suffered a day earlier in clashes with Israeli soldiers. Since the start of the 28-month-old Palestinian uprising, at least 652 Palestinians have been killed by Israeli soldiers or civilians.

#90113u0825 04/23/1990 ~United Press International

WINSTON-SALEM, NC (APRIL 23) UPI - R.J. Reynolds Tobacco Co. is attempting to resurrect Premier, the controversial low-smoke cigarette pulled from test markets last year, it was reported Monday.

The cigarette, which the company spent $240 million to produce, was removed from retail shelves in test markets in Arizona and Missouri in March 1989 because of low sales. Consumers said the cigarette had a bad taste and smell and was difficult to light.

"Since Premier's removal from test market in March 1989, we have continued to investigate ways to improve the product's taste and aroma," James Johnston, RJR's chief executive and president, told The Winston-Salem Journal.

"We do not know whether our efforts will prove successful, and we will not bring a similar product to market until we are convinced that those problems have been addressed to the satisfaction of smokers," Johnston said. "Because its future is uncertain, I cannot speculate on Premier's future impact on RJR Tobacco," Johnston said.

The company, and the tobacco industry, had hoped Premier would reverse trends among Americans, especially white males, to quit smoking. The cigarette was meant to revolutionize smoking through the use of a carbon heat source, an aluminum capsule filled with tobacco and flavor pellets surrounded by tobacco, tobacco paper and a filter.

When lit, the heat source warmed the other elements and activated the components. Company advertising said the result was a smoke composed almost completely of water and glucerol with greatly reduced amounts of tar, but about the same amount of nicotine as in a traditional cigarette.

#90113u0848 04/23/1990 ~United Press International

(APRIL 23) UPI - The son of newly freed hostage Robert Polhill says his 55-year-old father looks better than he had imagined he would after 39 months in captivity. Polhill arrived this morning at the Rhein Air Force Base in Wiesbaden, West Germany, where he'll undergo a medical examination and talk with U-S government officials. Polhill's wife says her husband told her that he's optimistic his fellow two hostages will be released.

A Chinese delegation headed by Prime Minister Li Peng arrived today in Moscow on a four-day official visit. Li's arrival marks the highest-ranking visit to the Soviet Union by a Chinese leader since the two communist giants split in the 1960's. Political observers expect the two sides to sign an agreement to reduce troop presence along their 41-hundredmile border.

Organizers say the massive involvement around the globe to mark the 20th anniversary of Earth Day indicates that the 1990's will be the so-called ''green decade.'' Millions of people on all seven continents took part in the day's environmental consciousness-raising activities. In Dallas, a bucket brigade toted water out of the polluted Trinity River and brought it to city hall where they stirred it into what they called a batch of ''toxic soup.''

Officials at the Detroit Zoo say a 20-year-old chimpanzee drowned yesterday after she jumped over a protective fence into a five-foot-deep moat around a newly opened outdoor habitat. Zoo officials say the chimp may have leaped the fence after seeing a familiar face in the crowd or catching a glimpse of something she wanted. The zoo does NOT have a rescue

plan for drowning chimps since an agitated chimp could seriously injure a would-be rescuer.

#90113u0858 04/23/1990 ~United Press International

(APRIL 23) UPI - Nearly four-thousand people took part in what organizers called a ''march of the living'' at two Nazi death camps where many of the six-Million Jews who were killed during World War Two were put to death. Participants from 37 countries made a pilgrimage yesterday between the Auschwitz and Birkenau camps. Nobel peace laureate Elie Wiesel told those who gathered that NOT even the Holocaust wiped out anti-semitism.

Family members say civil rights leader Ralph Abernathy will be taken to his final resting place today in Atlanta by a mule-drawn wagon. Abernathy's niece says the humble transport is designed to reflect Abernathy's tireless efforts on behalf of the impoverished in the United States. Abernathy died April 17th of cardiac arrest. A spokesman for the Lincoln Memorial Park Cemetery says Abernathy's headstone will read ''I tried.''

The Justice Department has released figures that indicate blacks in America are more prone to be the victims of serious, violent crime than are their white counterparts. Data compiled between 1979 and '86 reveals blacks were nearly six times more likely than whites to be homicide victims. Blacks are also nearly three times more likely to be robbed than are whites.

This year's Jane's Military Communications yearbook warns Western nations NOT to let down their guard. Despite rapid changes throughout the Eastern bloc, Jane's says the region's political structure remains unpredictable and requires Western armed forces to resist the urge to slash military intelligence budgets. Jane's also recommends the West to improve military communications budgets.

HOUSTON (APRIL 23) UPI - Domestic drilling continued its slide for the fourth week while offshore drilling stayed on the upswing, industry monitors said.

Baker Hughes said Sunday 932 rotary rigs were working in the United States last week, compared with 934 the week before and 767 the same week a year ago.

Offshore Data Services said drilling activity in the Gulf of Mexico continued to improve. One more rig went to work in the Gulf last week, and

another semisubmersible moved out of the area for Southeast Asia.

Offshore Data also reported several floating rigs have the Gulf in recent weeks, and the latest change pushed the utilization rate in the Gulf up to 70.9 percent with 151 rigs working out of a fleet of 213. Utilization in European waters remained steady at 89.4 percent with 118 rigs working out of a fleet of 132.

One rig was retired from the world fleet and, with the additional rig working in the Gulf, boosted the utilization rate worldwide to 81 percent with 541 rigs working out of a fleet of 668.

There were 340 rotary rigs working in Texas last week, compared with 334 the week before and 232 the same week a year ago. Other rigs counts included: Louisiana, 142 last week, 145 the previous week, and 137 the same week a year ago; New Mexico, 48 last week, 48 the previous week, and 36 the same week a year ago; Oklahoma, 126 last week, 120 the previous week, and 138 the same week a year ago; and Canada, 50 last week, 62 the previous week, and 63 the same week a year ago.

TOKYO (APRIL 23) UPI - Japan's Ministry of Finance indicated Monday it would soon approve the Chicago Mercantile Exchange's proposal to introduce its new global electronic trading system in Japan.

"We are still studying technical and legal aspects of the proposal, but I don't think it will take time to make a decision because there seem to be no major problems," said a spokesman for the ministry.

"Japanese institutions seem to be neutral. Their response was neither positive nor passive," said the official, who declined to be named. The official said a careful study must be made in order to protect investors "because it is the first cross-border system in Japan."

The new trading system, known as Globex, was developed by the CME and Reuters Holdings PLC for trading mainly in financial futures and futures options. Leo Melamed, chairman of the Chicago Mercantile Exchange, told a news conference in Tokyo Monday the system, which requires "very complicated mechanism" is currently under testing.

He said the CME plans to launch a network linking Chicago, New York and London in the initial stage. The network will be expanded to cover other major financial markets such as Tokyo and Hong Kong in the future.

"We are moving toward the operation quite expeditiously," Melamed said, adding, "We wait for a clear signal from the Ministry of Finance." He said 260 terminals have already been ordered in order to launch the service toward the end of this year. Melamed and other executives of the CME were in Tokyo to attend a symposium organized by the exchange in Tokyo Tuesday.

#90113u1012 04/23/1990 ~United Press International

BUCHAREST, ROMANIA (APRIL 23) UPI - Hundreds of police confronted demonstrators blocking traffic Monday in a protest charging Romania's ruling National Salvation Front is run by remnants of the communist regime of dictator Nicolae Ceausescu.

Elsewhere, eight anti-communist activists arrived in Bucharest at the end of a 370-mile long trek from Timisoara, their hometown and cradle of the revolution that toppled Ceausescu and resulted in his execution Christmas Day.

Along the route they said they collected 2 million signatures in a petition demanding a national referendum on whether to dismantle the foundations of power of the communist party and Ceausescu's secret police, the securitate.

The interim government has refused to accept the demands. Political activity has been mounting in Romania in advance of national elections scheduled for May 20.

Although no authoritative opinion polls have been conducted, most observers believe Romania will retain a predominantly communist government in the voting, mostly because the opposition is divided.

The anti-government activity began Sunday evening, when several hundred protesters erected metal barricades to seal off the city's University Square.

Hundreds of officers with shields and batons moved in and tore down some of the obstacles before stationing themselves at all entry points leading into the square.

The protesters holding the square tied up ribbons in the national red, yellow and blue colors and maintained a vigil on the site, where hundreds of candles burn in memory of those slain during the revolution.

The activists from across the opposition spectrum brandished slogans, one reading ''Don't worry Ceausescu, (interim president Ion) Iliescu is a commmunist.''

Tension mounted when police reinforcements arrived, inspiring the activists to hammer on the metal barricades and chant slogans against the police. However, the standoff eased and the crowd started singing hymns as they pressed on with their protest.

''We are all here as independent people, not party representatives,'' said participant Robert Botoganu. ''All we can do to get rid of communism is to have a second revolution. We are talking not about party politics, but about freedom here.''

By noon Monday, the protest had dwindled to fewer than 100 people standing in the rain. Officials said one person was arrested on unspecified charges.

About 2,000 members of the centrist Peasant Party and members of other parties greeted in Bucharest's leafy Air Force Square the eight protesters who walked to the capital from Timisoara.

The eight included a painter, a factory worker, an electrician, a printer, a carpenter, a school pupil, a mechanic and a student.

They claimed the state-run media had distorted their aims, misinterpreting it as a call for regional autonomy of the western province of Banat.

''In some places (people) gave us a bottle of wine and bread. In others they threw rocks,'' said electrical engineering student Nicolae Constantin 33, unkempt after his journey.

''Generally we are a bit idealistic,'' said Constantin, who took part in the first uprising against Ceausescu on Dec. 16. ''We know eight people won't change much, but I believe in the value of the symbol.''

#90113u1021 04/23/1990 ~United Press International

WASHINGTON (APRIL 23) UPI - The Supreme Court Monday stepped into a domestic dispute involving a woman who allegedly shot her husband because

he took away her beer.

The court will hear arguments next year in the case brought by the government seeking review of a ruling by the 9th U.S. Circuit Court of Appeals that threw out the conviction of Darlina France.

The case stems from a Dec. 20, 1986, argument when France became upset with her third husband, Neil, when he knocked over a Christmas tree during an argument in their house on a military base in Hawaii.

According to the government, Neil went out and when he returned he found his wife drinking beer with friends. He became upset and took her beer and moved it to the yard.

After a fight, he left the house, but Darlina followed and shot him in the shoulder.

When a military policeman arrived, she allegedly told him, ''He threw the Christmas tree down and that made me mad, but he took my beer and that was the last straw.''

At trial, Neil testified on her behalf and said the shooting was accidental and that they had reconciled and they loved each other. He also asked the government not to prosecute his wife.

Darlina was convicted and sentenced to five years in prison. However, the appeals court overturned her conviction because jury selection was conducted by a magistrate, not a judge.

The government, noting that France's attorney had not objected to the magistrate conducting jury selection, sought Supreme Court review.

WASHINGTON (APRIL 23) UPI - The Supreme Court let stand Monday a ruling that the city of St. George, Utah, violated the First Amendment ban on entangling church and state when it gave free electricity to the local Mormon Temple.

The court refused to hear the case brought by the city seeking review of a ruling by the 10th U.S. Circuit Court of Appeals.

The court's action means a portion of the the case will now go to trial. The appeals court had found the city, which operates its own electrical system, had violated the First Amendment when it subsidized the utility

bills, but sent the case back for further hearings on whether the use of the temple on the city's logo also violated the Constitution.

In 1942, the city of some 11,000 began subsidizing the late-night illumination of the temple at city expense and the cost ran from about $130 to $180 per month. The city's logo with a sketch of the local Mormon Temple has been in use since 1977.

Phillip Foremaster, a local resident, and the Washington County Ministerial Alliance, a group representing non-Mormon churches, including Roman Catholics and Baptists, opposed the subsidy and the use of the logo and eventually brought suit to stop the practices.

The city claimed it paid for the nighttime lighting to pro- mote the temple as a tourist attraction and the temple was just one of many prominent characteristics of the St. George area on the logo.

Foremaster's suit was filed in October 1985 and the ministers filed a separate action in November 1986. On the day the ministers filed suit, the city stopped the subsidy but con- tinued use of the logo.

The district court eventually dismissed the suits on various legal grounds. While the minis- ters decided against appeal, Foremaster continued the suit and the appeals court reversed.

The court found St. George had violated the Constitution by subsidizing a religion and barred the practice. The court, however, decided that further hearings were needed to decide the effect of the temple on the city logo and sent that portion of the case back to lower court for trial.

The city, seeking high court review, said the appeals court ruling ''directly impairs the government's freedom to sup- port and preserve historic religious landmarks for aesthet- ic and other, purely secular reasons.''

89-1197 City of St. George, Utah, vs. Phillip L. Foremaster

#90113u1076 04/23/1990 ~United Press International

BELGRADE, YUGOSLAVIA (APRIL 23) UPI - A veteran Communist Party official trounced Slovenia's opposition leader to win the state presidency, while nationalists took the lead in Croatia, according to initial election results released Monday.

In the Croatian capital of Zagreb, election officials said incomplete results from the state's first free elections in 50 years showed the opposition Croatian Democratic Community had a slight advantage over the

ruling Communist party.

The Croatian Democrats, together with the opposition Coalition of National Consent, advocate an independent state within a Yugoslav confederation or even outside Yugoslavia.

The two opposition parties are led by former Communist officials who were accused of Croatian nationalism and forced by former President Josip Broz Tito to step down some 20 years ago.

About 3.5 million voters in Croatia, Yugoslavia's second biggest state, voted Sunday to choose 365 deputies for the three-house Croatian parliament out of 1,706 candidates. Monday, about 1.6 million workers voted to elect 162 deputies for the Croatian parliament's House of Laborers.

Croatia is to stage its second round of elections in two weeks.

In the northwestern state of Slovenia, where an opposition coalition is likely to replace a communist government, 1.5 million citizens went to a second round of polls Sunday to choose between a communist and an opposition candidate for Slovenian president.

Veteran Communist Party leader Milan Kucan, 49, was elected state president over Joze Pucnik, 58, in the second round of balloting. Preliminary official results showed Kucan won 58.36 percent and Pucnik 41.64 percent.

Kucan is in favor of an autonomous Slovenian state within a Yugoslav loose federation, or confederation, while Pucnik advocates an independent Slovenia outside Yugoslavia.

Kucan, who has been president of the Slovenian Communist Party for the past three years, told reporters Monday in the state capital of Ljubljana the elections reaffirmed the wish of the people to ''build democratic and peaceful relations with other nations.''

The ruling Communist Party in Slovenia's first round of elections two weeks ago garnered enough votes to emerge as the largest single party but lost to the Demos United opposition bloc. The new deputies will decide whether they back Kucan or the opposition's position on the state's future.

In January, when the Yugoslavian Communist Party abolished its 45-year-old monopoly on power in the country of 23 million, the party disbanded in disagreement between reformists and Serbian-led traditionalists.

#90113u1082 04/23/1990 ~United Press International
TOKYO (APRIL 23) UPI - Three new companies will participate in the construction of a telecommunications cable linking Japan, Hong Kong and South Korea, raising to 29 the number of partners, the Japanese partner said Monday.

The Japanese international telecom company KDD said the new participants are Data Communications Corp. of South Korea, Philippine Long Distance Telephone Co. and PT Indonesia Satellite Corp.

With the participation of the three companies, a total of 29 communications carriers from 13 countries will join the $190 million project, the company said.

The project calls for laying a 7,560-circuit cable linking Japan, Hong Kong and South Korea. Some 85 percent of the design capacity, or 6,474 circuits, will be in use starting in late May, the company said.

It said 26 communications companies signed a tentative agreement to participate in the project. A new agreement will be signed in Tucson, Ariz., Monday, the company said.

-30- 1165
#90113u1100 04/23/1990 ~United Press International
HARRISBURG, PA (APRIL 23) UPI - The FBI is investigating two weekend shootings in central Pennsylvania involving buses belonging to the strikebound Greyhound bus line, authorities said Monday.

No one was hurt in either shooting.

More than 6,000 drivers and thousands of other employees went on strike on Mar. 2 against Greyhound, the only nationwide intercity bus line. Since then, the company has accused union members of responsibility for numerous incidents of violence, including shootings.

The company began hiring replacements when the strike began and has said it will not return to the negotiating table until one week after the violence has stopped.

The first incident occurred Saturday between 5:50 p.m. and 6:45 p.m. on Route 322 east of Lewistown, state police who are assisting in the investigation said.

The bullet struck the left side of the bus above the baggage door, state police said. The bus was traveling from Altoona to Philadelphia and was carrying two passengers.

State police said the bullet was found by Greyhound security personnel after the bus arrived in Harrisburg.

The second incident occurred on Interstate 81 in Susquehanna Township early Sunday morning, state police said.

A Greyhound spokesman said the bus, carrying 36 passengers, was bound from Pittsburgh to New York. The bullet struck the right side of the bus.

#90113u1102 04/23/1990 ~United Press International

TOKYO (APRIL 23) UPI - Japan made the final decision Monday to extradite a Chinese hijacker who said he commandeered a passenger jet to escape political persecution for his role in last June's pro-democracy demonstrations in Tiananmen Square.

Justice Minister Shin Hasegawa ordered prosecutors to turn Zhang Zhenhai, 36, over to Chinese authorities by May 23 to stand trial for hijacking an Air China Boeing 747 with 233 people aboard on Dec. 16.

Human rights activists protested the decision, saying Zhang is sure to be tortured and possibly executed in China for his prominent role in the Tiananmen Square demonstrations.

Zhang's attorneys said they have appealed to Canada to grant Zhang political asylum. Officials at the Canadian Embassy in Tokyo would not comment on the case.

The Japanese government has said since the day of the hijacking that it will not tolerate air piracy under any circumstances because doing so would only encourage more hijacking.

Hasegawa added assurances from Chinese authorities that Zhang will not be executed or tortured and will be tried only for the hijacking were a factor in his decision to send him back.

Zhang, his wife and 10-year-old son hijacked the Air China jet on the Beijing-to-Shanghai leg of a flight bound for New York, threatening to blow it up. The plane landed safely at the Fukuoka Airport in southwestern Japan. No one was hurt and it was later found the hijackers had no explosives or weapons.

The hijacking ended when Zhang was shoved from an open exit to the tarmac by a crew member. Zhang broke his pelvis and both legs and was hospitalized, while his wife and son were returned to China on the hijacked jet.

The Tokyo High Court rejected Zhang's request for political asylum Friday, clearing the way for his extradition.

The court's ruling cannot be appealed, but Zhang's attorneys said they will ask the Supreme Court to overturn it on the grounds that it violates basic human rights.

''Our experience teaches us that Zhang is certain to face execution or inhumane punishment at the hands of the Chinese government,'' said Sinzo Awano, secretary general of Amnesty International Japan.

Zhang testified from a wheelchair last month and early this month and showed scars which he said were the result of torture inflicted on him for previous political action.

Zhang told the court he led a group of laborers in the pro-democracy demonstrations in May and June and fought with Chinese troops when they entered Tiananmen Square June 3-4. At least hundreds of people died during the crackdown.

Zhang said he feared for his life and resorted to hijacking after several attempts to escape China overland failed.

Zhang supporters said his extradition was motivated by Japanese business interests in China and the government's reluctance to offend China.

Japan has been mild in its criticism of China's crackdown on the demonstrations while Japanese business maintain close ties with Beijing.

''The world has once again been shown that Japan places economics above democracy in its dealings with other nations,'' said Mitsuyuki Kagami, a Chinese expert at the private Asian Economic Institute.

#90113u1105 04/23/1990 ~United Press International

(APRIL 23) UPI - The U-S Air Force has released a statement saying freed American hostage Robert Polhill ''appears to be in relatively good shape'' following 39 months of captivity in Lebanon. Polhill is undergoing a relaxed conversation and physical at the Rhein-Main U-S Air Force Base in Wiesbaden, West Germany, where he arrived earlier today.

The White House offered little insight into the behind-the-scenes work that went into Polhill's release. President Bush and other administration officials were unable to confirm claims that Syrian and Iranian efforts resulted in the first hostage release in three-and-a-half years. Bush says the United States will NOT be satisfied until all U-S hostages are freed.

Civil rights leader Ralph Abernathy will be laid to rest today in Atlanta. Abernathy, who served as the confidant to Martin Luther King junior during the 1960's, came under fire before his death for a biographical account of King that alleged marital infidelity by King. Yesterday, however, Abernathy was again accorded praise from many voices within the civil rights movement.

A nutrition researcher at Montana State University says it appears as if a diet high in barley lowers a person's blood cholesterol. Rosemary Newman says the decreased cholesterol level most likely stems from barley containing large amounts of beta-glucans. Beta-glucans enter the human intestine and seem to stop the body's absorption of cholesterol fats.

Australian officials estimate flood waters have swept over more than one-Million square miles in the states of Queensland, New South Wales and Victoria. Unseasonal rains caused the sudden high waters, which have killed at least four people and thousands of livestock. Officials say a new case of gastroenteritis is developing every 15 minutes.

New York officials say police will pose as undercover cabbies in an attempt to stop the killing of livery drivers. Seven livery drivers have been shot and killed in the course of the past seven weeks, four of them apparently by the same small caliber handgun. The latest killing occurred during the weekend.

#90113u1111 04/23/1990 ~United Press International

NEW YORK (APRIL 23) UPI - The Blackstone Group, an investment firm specializing in mergers and acquisitions, said Monday it is linking with J.O. Hambro Magan & Co. of London to develop and execute deals in the United Kingdom.

The arrangement will give Blackstone, which has had a hand in the three largest Japanese acquisitions of U.S. concerns, a presence in the burgeoning mergers market in Britain.

Blackstone and Hambro Magan, which was founded in 1988 and served as an adviser to the Ford Motor Co. when it purchased Jaguar last year, said the agreement calls for each firm to assist the other in developing and executing cross-border business between the United States and the United Kingdom. The relationship will not involve cross-shareholding arrangements the firms said.

Blackstone served as an adviser in Sony Corp.'s acquisitions of Columbia Pictures and CBS Records as well as Bridgestone's merger with Firestone. The firm said the majority of its work last year involved cross-border deals.

"We have been searching for some time to forge this kind of link with a leading British firm," said Peter G. Peterson, Blackstone's co-founder and chairman.

#90113u1113 04/23/1990 ~United Press International

WASHINGTON (APRIL 23) UPI - The National Organization for Women said Monday it would follow a two-fold strategy to keep abortion clinics open during a weekend mass anti-abortion rally expected to attract tens of thousands of protesters.

NOW Vice President Patricia Ireland said supporters of legal abortion would use legal injunctions currently in force against the anti-abortion group Operation Rescue to stop the anticipated efforts to blockade and shut down clinics in Washington and its Maryland and Virginia suburbs.

In addition, she said, volunteers would be at the target clinics, attempting to secure access to the buildings.

''They have every right to picket or say what they believe,'' NOW President Molly Yard told a news conference. ''But they have no right to shut down a legal business.''

National Right to Life, the nation's largest anti-abortion organization, has called for a massive demonstration on Saturday. NRL hopes to attract as many as 500,000 people to the rally.

Leaders of NRL, however, claiming they are the mainstream of the anti-abortion movement, insist they are sponsoring a ''celebration of life'' and are not seeking a confrontation.

Vice President Dan Quayle and Roman Catholic Cardinal John O'Connor of New York are to be among the featured speakers.

But supporters of legal abortion note that the independent Operation Rescue, which specializes in tactics aimed at physically shutting down clinics, are planning events to coincide with the right-to-life rally featuring the movement's charismatic founder, Randall Terry.

In the past, Terry and his followers have repeatedly defied court orders prohibiting them from the clinic blockades. He has said he has no philosophical or theological objection to the use of force.

''There has been an increase of the visible violence on their part,'' said Kim Gandy, head of NOW's Project Stand Up for Women. ''That is a change from their previous strategy (of nonviolent sit-ins).''

She cited incidents at an Operation Rescue incident in Los Angeles earlier this month where anti-abortion rescuers ''formed flying wedges'' to break the lines of clinic defenders and numerous physical assualts on defenders.

The Washington area injunctions against Operation Rescue stem from November 1989, when the movement sought to shut down area clinics during a rally of abortion rights supporters.

NOW will ask to have the injunctions enforced and seek contempt of court action if the clinic blockades are attempted, Ireland said.

NEW YORK (APRIL 23) UPI - Latest metal market prices as quoted Monday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 70.00-71.00 c-lb.

Antimony, domestic, refined in alloy, $1.25-$1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 130.50 c-lb.

Lead, common, U.S. primary producers 50.00 c-lb.; U.S. non-primary (secondary) producers 54.00-60.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $280.00-$290.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.25-$4.40 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $128.00-130.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $483.00-$484.00; dealer-approx., $478.00-$489.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $103.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $105.83 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 309.50 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and

imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 83.00-83.75 c-lb.

TOKYO (APRIL 23) UPI - Japanese trading company Mitsui and Co. will purchase nine McDonnell-Douglas aircraft to launch a lease service in Asia and other parts of the world, the economic journal Nihon Keizai Shimbun reported.

The paper said Sunday the purchase will include five DC9-92 used aircraft and four advanced MD-11 models, worth a total of some $700 million. Two MD-11s will be delivered each in 1990 and 1992, it said.

The government-financed Export-Import Bank has agreed to provide $250 million in a ten-year loan to help finance the deal, the paper said. Mitsui plans to increase its fleet to about 20 aicraft in the near future to expand its leasing business in Asia, the United States and Europe, the paper said.

#90113u1149 04/23/1990 ~United Press International

NEW YORK (APRIL 23) UPI - Exxon Corp., the nation's largest oil company, reported Monday its highest quarterly earnings in four years thanks in part to higher world crude prices.

It reported 1990 first-quarter earnings of $1.28 billion, or $1.01 a share compared with $1.27 billion, or 99 cents a share, in the same period in 1989. Revenues were $26.7 billion, compared with $22.2 billion in 1989's first quarter, the company said in a statement.

A company spokesman said the 1990 first-quarter earnings were Exxon's highest quarterly earnings in four years. In the statement, Exxon chairman Lawrence Rawl said the increase was due in part to higher world prices for crude oil, which raised the earnings of its oil and exploration unit.

#90113u1194 04/23/1990 ~United Press International

MOSCOW (APRIL 23) UPI - Chinese Premier Li Peng held talks with Soviet Prime Minister Nikolai Ryzhkov Monday to begin a four-day official visit, the highest-level Chinese trip to Moscow since a split between the two Communist nations in the 1960s.

''There are good prospects for the development of relations between the two neighboring socialist states,'' Li said in his arrival statement.

Li's trip to the Soviet Union is the first by a Chinese prime minister since the late Premier Chou En-Lai visited the country in 1964.

Sino-Soviet relations, soured by a 30-year rift over ideological and territorial issues, were normalized during Soviet President Mikhail Gorbachev's trip to Beijing last May in the midst of China's pro-democracy uprising.

The two countries still have serious ideological differences. China has privately criticized Gorbachev's reforms, charging the Soviet leader has betrayed socialism.

Publicly, however, Beijing's stance is diplomatic and neutral, frequently alluding to the vast changes sweeping the Soviet Union and East bloc nations as a ''complicated international situation.''

''Of course, conditions in China and the Soviet Union are different and it is only natural that their views on some issues are not completely identical,'' said the Beijing Review, an English-language weekly that reflects views of Chinese leaders.

Li was scheduled to meet with Gorbachev during his visit to discuss a variety of issues, but the two sides were not likely to dwell on their differences. Officials said they do expect to sign an agreement to reduce troops along their 4,175 mile border.

''We are confident that improvement of Sino-Soviet relations not only meets the basic interests of the peoples of the two countries but also promotes the cause of peace and development in Asia and throughout the world,'' Li said on arrival.

The Soviet government, in a statement released by the official Tass news agency, expressed hope the visit would ''help deepen relations of friendship and good-neighborliness ... strengthen trust and mutual understanding and develop cooperation in solving vital international issues.

Li, who studied in the Soviet Union and speaks Russian, was accompanied by a delegation that included his wife, Zhu Lin, Foreign Minister Qian Qichen State Council spokesman Yuan Mu and Gen. Xu Xin, deputy chief of staff of the People's Liberation Army, China's state-run Xinhua news agency said.

Another member of Li's entourage is Tomur Dewamat, chairman of China's westernmost Xinjiang province. The remote, Moslem-inhabited region

bordering the Soviet Union's Asian republics has been recently torn by ethnic unrest that an official report said left 22 dead.

China, fearing an infusion of Islamic fundamentalism from the Soviet republics and neighboring Pakistan and Afghanistan, has since tightened travel along the Xinjiang border.

NEW YORK (APRIL 23) UPI - Fallen junk bond wizard Michael Milken is scheduled to appear in federal court Tuesday for proceedings in which he is widely expected to plead guilty to six felony counts of securities law violations. The U.S. Attorney's office said Monday that Milken will appear for a proceeding before U.S. District Judge Kimba Wood.

Sources close to Milken said Friday that the former head of the junk bond department for defunct Drexel Burnham Lambert Inc. agreed to plead guilty to six felony charges and pay $600 million in penalties. Milken was indicted on 98 counts of racketeering and fraud in March 1989.

WASHINGTON (APRIL 23) UPI - The Supreme Court Monday stepped into a dispute involving the merger of First American Bankshares Inc. and the First American Bank of Virginia that could lead to damages of $13 million.

The court will hear arguments next term in the case brought by the bank seeking review of a ruling by the 4th U.S. Circuit Court of Appeals.

At issue in the case is what requirements does the Securities and Exchange Act set for companies to disclose information in proxy statements to shareholders in such merger situations.

Doris Sandberg, a shareholder who believed the company's price of $42 per share was too low, alleged that the proxy sent out omitted and misstated material facts. A jury agreed and set the price at $60 and Sandberg was awarded nearly $44,000 for her shares.

The appeals court, while affirming the decision, went further and certified a class of shareholders - a move the bank argues ''might now be transformed on remand into a judgment in excess of $13 million.''

89-1448 Virginia Bankshares Inc. et al. vs Doris I. Sandberg, et al.

#90113u1227 04/23/1990 ~United Press International

LONDON (APRIL 23) UPI - More than 100 rioting prisoners surrendered Monday after occupying a medium-security prison for 18 hours and engaging officers in fierce clashes that left seven people wounded, officials said.

The uprising at Pucklechurch prison near Bristol, 120 miles west of London came on the 23rd day of the occupation of Strangeways prison in Manchester, where seven hardcore inmates are resisting all surrender pleas.

That rebellion began against overcrowding and squalid conditions, and has inspired disturbances in 10 other priosns. The government has been criticized for the state of the prison system in Britain, which recently topped Turkey for having the highest per capita penal population in Europe.

Officials at the Home Office, which oversees the nation's 125 penal institutions, said some Pucklechurch inmates overpowered a guard on Sunday evening and took his keys to gain access to other areas of the facility, which mostly houses youths awaiting trial.

The action exploded into a full-fledged riot, with inmates rampaging through the medium-security prison, smashing furniture and setting alight entire buildings.

Guards - confronted by attackers armed with chisels, pickaxes and knives - retreated to the barbed wire fence and fended off barrages of rocks and other missiles frnm,more than 100 inmates stationed on the roof.

The guards regrouped and assaulted the rioters at about 6 a.m., using batons, water cannons and hand-to-hand fighting to regain control of most of the jail.

Some prisoners gave up, and at 1 p.m. a mass surrender took place, with about 80 remaining inmates descending from the roof of a occupied one-story wing to be taken back into custody by awaiting guards.

Officials said five guards and two prisoners were wounded.

They said one of the officers was hospitalized with facial wounds, and the two inmates had head injuries, apparently from being hit by objects hurled by other rioters.

At Strangeways, guards tried to enter one wing of the badly damaged Victorian-era jail, but were apparently repulsed by inmates, who showed to television cameras a message reading: ''F wing not taken.''

Officials estimate repair costs will exceed $164 million, but they say using force to capture the seven would inevitably involve casualties among any advancing guards, scores of whom have already been injured.

All lower floors have been blocked by mountains of debris, some up to 40-feet-high and inflammable. The seven inmates are armed with spears and can drop iron fixtures onto anyone trying to reach the upper floors, to which they have destroyed all access by smashing away spiral staircases, officials say.

The last surrender took place seven days ago, and the rioters have mocked authorities for trying to dislodge them with jets of water, sirens, swooping helicopters and loud music.

Strangeways Governor Brendan O'Friel said he may reconsider his tactics.

''I have no doubt that if we don't get some results soon there will be some shift of the policy,'' said the governor, who would not articulate what the authorities may try to do to break the siege.

(APRIL 23) UPI - Military doctors find former hostage Robert Polhill malnourished, mildly dehydrated and weary after being held captive in Lebanon. An Air Force spokesman says tests are being run to determine the status of Polhill's diabetes. His mother said during his 39 months of captivity he needed daily doses of insulin. While undergoing the medical check-up today at a military hospital near Wiesbaden, West Germany, Polhill also is telling State Department officials about his time as a hostage.

Environmental activists are trying to keep Wall Street from conducting its usual Monday business. Protesters blocked rush-hour traffic in the Wall Street area. They say they are protesting against companies they say are ''responsible for ecological devastation.'' Police have made some arrests... but the number in custody is NOT yet available. Today's protest on Wall Street is a follow-up to yesterday's Earth Day activities.

The Seabrook nuclear plant in New Hamsphire is about to start producing electricity for its customers. Technicians are making final adjustments to a turbine. The final testing should take several days... after which power will be increased to about 10 percent of full capacity. On Wednesday, emergency sirens will be tested. They should be heard in a 10-mile radius of the plant.

About 50 people commemorated Earth Day by holding a vigil at the Seabrook nuclear plant. One organizer says the demonstrators simply wanted to remind the public that the plant is a major polluter. But Seabrook officials argue that nuclear power is one of the cleanest forms of energy.

Consumer advocate Ralph Nader says people should NOT be fooled by corporate ''greenwash.'' Nader told an Earth Day gathering corporate publicity about Earth Day is NOT a demonstration of real effort to reduce pollution. In a speech in Raleigh, North Carolina, Nader also told people to find out more about their nuclear power plants.

-30- 2113
#90113u1237 04/23/1990 ~United Press International
(APRIL 23) UPI - A Nuclear Regulatory Commission inspector and his family are in protective custody. Ken Jenison is the N-R-C's chief inspector at the troubled Sequoyah Nuclear Plant in Tennessee. Fire blamed on arson destroyed their home Thursday. Before the blaze, Jenison received four

threatening phone calls. NO one was hurt in the fire.

200 people are away from their homes in Craigsville, Pennsylvania, today because of a train derailment. Thousands of gallons of a caustic chemical and crude oil are spilling into an Allegheny River tributary from the derailment site, where a freight car containing oil is still on fire. A cloud of smoke and chemical fumes hangs over Craigsville, about 45 miles north of Pittsburgh.

Connecticut's first collection center for hazardous household waste won't open until late May. But environmentally conscious citizens are impatient. They are already hauling things to the site near New Haven. A spokesman for the hazardous waste facility asks people to stay enthused... but hold onto their things until after the center opens.

General Motors officials say they have corrected a situation in which G-M unintentionally mis-led the government. G-M blames its dealers, saying they wrongly reported more than 63-thousand recalled cars and trucks were repaired. Documents filed with the National Highway Transportation Safety Administration and the E-P-A indicate that G-M dealers submitted phony claims for repairs never made.

#90113u1244 04/23/1990 ~United Press International

WASHINGTON (APRIL 23) UPI - The administration looked for clues of Iranian intentions Monday in the release of Robert Polhill, uncertain whether it was a signal from Tehran that could mean freedom for other American hostages in Lebanon.

Polhill's release Sunday by the pro-Iranian Islamic Jihad for the Liberation of Palestine raised the hopes of other hostage families as U.S. officials professed to have few details of the circumstances that secured his freedom.

While the administration was quick to thank Syria for serving as mediator and facilitator, Iran's role remained a mystery. However, said White House press secretary Marlin Fitzwater, ''We continue to keep the pressure on for the release of all hostages.''

''We do not know what was the specific motivation for the release,'' he said. ''We have always believed that Iran has control or at least influence over the hostage-holders. If Iran has been supportive of Mr. Polhill's release, we appreciate that.''

Polhill was undergoing medical examinations and debriefing in West Germany after being freed Sunday from 39 months of captivity in Lebanon.

Tehran radio said Monday that additional hostages may be freed, but appeared to link that prospect to the return - among others - of Sheikh Abdur Karim Obeid, the Lebanese Shiite cleric abducted last year by Israeli commandos.

A Shiite extremist group later claimed to have executed an American hostage, Lt. Col. William Higgins, in retaliation for the abduction.

The sentitivity of the Obeid affair, bearing on the hostage crisis and U.S.- Israeli relations, was evident as Fitzwater fended off repeated questions by saying only that ''our policy is that we seek the release of all hostages.''

''We have goodwill to those who facilitated the release of Mr. Polhill and the others,'' he said. ''We are not going to trade for our hostages, however, or make deals. Our policy of not making deals, we believe, is a sound one.''

In rejecting negotiations, Fitzwater was careful to not preclude discussion. We've always been willing to talk to the Iranians, anytime,'' he said. ''They've never been willing to talk to us.''

On the day he was inaugurated 15 months ago, Bush offered Iran a chance to improve its standing with the West and the international community by helping to free the Americans in Lebanon. ''Goodwill,'' he said simply, ''begets goodwill.''

But in the bittersweet aftermath of seeing Polhill freed, the first American to be so released in 3 1/2 years, Bush indicated Sunday that Iran had not crossed the threshold implicit in his earlier offer.

''This is a mission uncompleted,'' he said. ''There are other Americans held against their will.''

The agony of the hostages, which haunted President Ronald Reagan, continues to bedevil Bush, despite hopes raised by the first release of an American since David Jacobsen became the last of three hostages ransomed in the Iran arms deal.

In fact, Bush and other officials had little direct insight into the shadowy dealings that won Polhill's freedom. They were willing to give credit where due but unable to confirm claims the release was the result of Syrian and Iranian mediation.

The lack of hard intelligence, a past frustration in efforts to break the hostage stalemate, also prevented them from predicting the next step in

the long-running drama.

''As the president said, we want the release of all the hostages,'' Fitzwater said, ''and that would open the door to better relations with Iran. But it's impossible to put a timetable or a specific point on that.''

Undersecretary of State Robert Kimmitt said Monday on Cable News Network that the United States would ''keep open lines of communication both to Syria and others who have influence over the hostage-holders.''

''We're speaking directly with the Syrians. We have indirect means of communication with the Iranians. We'll keep those lines of communication open,'' he said.

Kimmitt also said Polhill, 55, had given U.S. officials information to be relayed to the relatives of hostages, Jesse Turner, 42, and Alann Steen, 51. All three were abducted Jan. 24, 1987, while working at the U.S.-affiliated Beirut University College.

-30- 4476

#90113u1281 04/23/1990 ~United Press International

WIESBADEN, West Germany (APRIL 23) UPI - American Robert Polhill, alert but malnourished and dehydrated after 39 months as a hostage in Lebanon, arrived Monday in West Germany for medical checks and a debriefing by U.S. officials.

Iran said Monday that Polhill's release may be a prelude to the release of other Western hostages held in Lebanon but U.S. officials insisted they were not negotiating with Tehran.

''With the release of this hostage, it is possible that steps will be taken for the release of other Western hostasges,'' Tehran radio said in a commentary monitored in Athens.

The Islamic Jihad for the Liberation of Palestine, the pro-Iranian Moslem fundamentalist group that abducted three American professors from a Beirut college three years ago, turned Polhill over to Syrian intelligence officers in west Beirut Sunday after weeks of efforts by the Syrian government.

Polhill was driven to Damascus, Syria, for a reunion with his Lebanese wife, Ferial, then flown on a U.S. Air Force C-141 transport to Wiesbaden, West Germany for checks at a U.S. military hospital.

Shortly before 8 a.m. Monday, Polhill, 55, and his wife arrived at the Rhein Main Air Base near Wiesbaden. Clutching a football given to him by members of the crew of the aircraft, he was helped down the plane's steps

by military personnel.

''He says he has not seen the sun for three years,'' said Capt. Pat Grazziano, one of the members of the Aeromedical Evacuation Squadron which flew the 55-year-old professor from Damascus to the U.S. aire base in West Germany.

''He had energy. He was pretty pale but he was alert,'' said Capt. Sharon Artenbright, who was also on the flight to West Germany. ''He perked up in six hours.''

Polhill, wearing a suit and tie underneath a military jacket, waved to applauding onlookers before boarding a helicopter that took him to nearby Lindsey U.S. Air Station Hospital for medical examinations and a reunion with other family members.

At Lindsey, Polhill got out of the helicopter and faked a pass with the football at the cheering crowd.

''Although he appears to be in relatively good shape, he is malnourished and mildly dehydrated,'' a U.S. Air Force spokesman said in a statement at the Lindsey medical center. ''He is alert, stable, ambulatory and somewhat tired.''

The spokesman said Polhill ''has just finished a breakfast consisting of half a grapefruit, scrambled eggs, bacon, English muffins, milk and coffee.''

A military official who asked not to be named said U.S. officials would start debriefing the freed hostage ''when Polhill is up to it and the doctors say he is ready.''

''The intention is to gather information on the conditions he was held under,'' the official said. As far as possible, we also want to find out information about other hostages.''

The Air Force spokesman said further medical tests were being conducted to evaluate his diabetes condition, and said it appeared unlikely Polhill would make any public comments Monday.

He said Polhill's Lebanese-born wife, Ferial, ''appeared to be relaxed and relieved and remains with her husband in the hospital.''

Polhill's son, Stephen, 26, said Sunday he will tell his father about the New York Giants' victory in the Super Bowl played Jan. 25, 1987, the day after Polhill was captured. ''He was a rabid Giants fan,'' said the son, who lives with his 23-year-old brother, Brian, in the New York City borough of Queens.

The U.S. official categorically denied the United States had paid any ransom for Polhill's release and said he had no indication that Syria or Iran had made any payments either to the hostage-takers.

''The United States certainly has not made any payment,'' he said.

The official said he had no information to confirm speculation that a second U.S. hostage will be released soon.

Robert Kimmit, undersecretary of state for political affairs, told the Cable News Network Monday Washington would continue working with Syria towards the release of seven Americans and other Western hostages seized in Lebanon.

''We're going to keep open lines of communication both to Syrian and others who have influence over the hostage-holders, hoping it will move from this joyous occasion to the immediate unconditional release of all remaining hostages,'' Kimmit said.

The Iranian state radio also condemned what it described as propaganda in the Western media that Iran made secret deals for the release of hostages, saying such reports could ''be reason for delays in releasing the remaining hostages.''

A handmade sign above the entrance to the hospital read: ''Welcome home. Pray for the others.''

Andy Jillions, a U.S. Air Force pilot on board the C-141 that took the American educator out of Syria, told reporters, ''(Polhill) said he hadn't seen the sun in about 39 months and as the sun came up over the horizon over our right wing, he was just really happy to be among friends.''

Kimmit said Polhill ''did have some information'' about other American hostages. ''That has been passed along to the families of the other hostages involved,'' he said.

#90113u1299 04/23/1990 ~United Press International

WASHINGTON (APRIL 23) UPI - The vice president's wife, Marilyn Quayle, told a House panel Monday she backs an ''all-out war'' against breast and cervical cancer, but she did not endorse a $50 million plan to provide screening for low-income women.

A health subcommittee heard from Quayle and cancer experts on legislation to establish grants to states for preventive screening and referral services for low-income women. For fiscal year 1991, the bill calls for

$50 million for seven state demonstration projects.

Jeffrey Koplan of the Centers for Disease Control said an estimated 142,000 new cases of breast cancer are expected to be diagnosed in 1990, with about 43,000 deaths. An estimated 12,000 women will be diagnosed with cervical cancer this year, with about 6,000 deaths, he said.

Quayle, in her first congressional testimony as the vice president's wife, said the nation must ''declare an all-out war against the tragedy of breast cancer.

''During the war in Vietnam, we lost nearly 57,000 American soldiers. That was too many. During the same period, over 330,000 women died of breast cancer.''

Quayle, who choked back tears as she recalled that mother died of breast cancer at age 56, continued, ''This year, over 40,000 lives will be lost to breast cancer alone. So many lives needlessly sacrificed because they didn't get or couldn't afford an early mammogram.''

She urged husbands, fathers, boyfriends and children to encourage women to get mammograms and Pap smears, which can detect cervical cancer.

The legislation, co-sponsored by subcommittee Chairman Rep. Henry Waxman, D-Calif., and ranking Republican member Rep. Edward Madigan of Illinois, would require states to contribute $1 for every $3 of federal funds.

''We don't have administration support for this bill year. We don't have their opposition,'' Madigan told Quayle, adding he hopes she can use her influence to gain administration approval. She did not respond.

Rep. Barbara Vucanovich, R-Nev., who said early detection of her breast cancer ''allowed me to go on to live an active and satisfying life,'' said her legislative priority is making mammography available and affordable and called Waxman's bill a ''first step.''

Peter Greenwald of the National Cancer Institute said breast cancer incidence is higher among white women, but the death rate is higher among black women because the disease often discovered later. Hispanic women suffer from disproportionately high deaths from cervical cancer, he said.

Harold Freeman of the Harlem Hospital Center in New York, said, ''Women of low socioeconomic status - white, black, Hispanic and other ethnic groups - are the least likely to know about the benefits of mammography and Pap tests or to be able to afford the procedures.''

Quayle said low-income women, unfortunately, are often the most reluctant to be screened.

''They are afraid what they might discover, afraid they might have to quit work,'' she said. ''They may not be more susceptible to the disease, but they are definitely susceptible to fear. No one should be afraid of cancer.''

PORTO RONCO, Switzerland (APRIL 23) UPI - Actress Paulette Goddard, the Hollywood star made famous by Charlie Chaplin in the 1930s, died at her home Monday, the local town hall announced. She was 78.

The brief statement said the actress, who was born in the state of New York June 3, 1911, died of natural causes.

It said she was alone in her house in Porto Ronco, a small resort on the Swiss shore of Lake Maggiore and just south of the city of Locarno.

Goddard was a beautiful brunette film star of the 1930s and 1940s who once was known as the ''queen of the bathtub scenes.''

She was long regarded as one of Hollywood's richest and sexiest women.

Her four husbands included comic great Charles Chaplin, actor Burgess Meredith and famed novelist Erich Maria Remarque, author of ''All Quiet on the Western Front.''

She refused to discuss her private affairs and never admitted her 1936 marriage to Chaplin until she divorced him six years later.

The epitome of glamor on screen, she was as noted off screen for her business acumen.

She was born Marion Goddard Levee on June 3, 1911, at Great Neck, N.Y., the daughter of Joseph and Alice Levee.

In 1940, Levee sued his screen star daughter, complaining the $300 a month support she gave him was inadequate. In his suit, he claimed she had $5,000 a week to spend on ''whims.''

When she was 14, Miss Goddard met the late Florenz Ziegfeld and she made her first stage appearance in his production of ''Rio Rita.'' Her role consisted only of sitting on a prop moon and smiling at the audience but her faithful and silent sitting earned her a few speaking lines in Ziegfeld's next show.

While in her teens, she married Edgar James, a lumberman from Asheville, N.C., but divorced him a year later.

She then went to Hollywood where she worked in Hal Roach short subjects. She played small roles and appeared in the chorus of Eddie Cantor's ''Kid from Spain.''

Her romance with Chaplin began in 1933 and he starred her in his classic movie, ''Modern Times,'' in 1936. The role launched her toward stardom.

She and Chaplin were married in Canton, China, while on a world cruise in 1936. When she divorced him in Jaurez, Mexico, in 1942, the suit said they separated in February, 1940.

She married Meredith, then a captain in the Army Air Corps, on May 21, 1944, and the marriage ended in a Mexican divorce five years later.

Meanwhile, she appeared in many films, starring in Cecil B. De Mille's ''Northwest Mounted Police,'' in which she played a tempestuous half-breed siren, and in his ''Unconquered,'' in which she bathed in a barrel.

She also starred in ''The Women,'' ''Hold Back the Dawn,'' ''Reap the Wild Wind,'' ''Star Spangled Rhythm,'' ''So Proudly We Hail,'' ''Kitty,'' ''Duffy's Tavern,'' ''Diary of a Chambermaid'' and ''Suddenly It's

Spring.''

Following her marriage to Remarque at Branford, Conn., on Feb. 25, 1958, she worked only rarely in a movie or television show.

The couple took up residence in Locarno, Switzerland, and she said, ''My time now revolves around my husband. That is what a marriage means to me.''

After his death in 1970, she spent much of her time between Switzerland and her New York apartment.

She directed the publishing of Remarque's last book, ''Shadows in Paradise '' in 1972 and also played the part of a faded film star in ''The Snoop Sisters,'' a two-hour television movie that same year.

SYDNEY, Australia (APRIL 23) UPI - A senior federal judge from North Carolina came under a blistering attack Monday after saying AIDS victims who knowingly spread the disease should be exiled to Australia.

Robert Potter, chief judge for the federal courts in North Carolina's western district, was criticized by Australian groups set up to combat the deadly AIDS virus and by callers to radio talks shows, some of whom described the judge's remarks to students at a Belmont, N.C., college as ''frightening.''

Potter, nicknamed ''Maximum Bob'' for his tough sentences, told students at Belmont Abbey College Thursday that airplanes carrying drugs from Colombia should be shot down and AIDS patients should be sent to Australia.

North Carolina AIDS activists protested, prompting Potter to amend his position Saturday, saying only people who knowingly spread AIDS should be exiled to Australia. He said his comments were exaggerations intended to illustrate for students that there are some problems that cannot be solved by the courts.

Sydney's afternoon tabloid, the Daily Mirror, spread the judge's comments across the front page, followed by a hard-hitting editorial and a six-column cartoon showing the judge with a large foot in his mouth.

The editorial was entitled, ''Ugly Idea from Ugly American.''

''An American district court judge has come up with what must be one of the most ill-judged and stupid ideas of all time,'' the Mirror said in the editorial. ''He has suggested, apparently in all seriousness, that American AIDS victims should be shipped to Australia.

''We have news for the myopic, insensitive, narrow-minded and loose-lipped Judge Potter.

''Australians have every sympathy with American AIDS victims and their

families. But they - like most sensible Americans - also realize you cannot solve a problem by sweeping it under someone else's carpet.

''Fortunately, the judge is highly unlikely to be taken seriously by his fellow countrymen. Except, perhaps, for a small minority of red-necked political illiterates, like himself.''

The cartoon was captioned with the letters AIDS, ''American Idiot Disregarding Sensitivity.''

Sydney radio talk programs were deluged by irate callers complaining about the judge's remarks, which were published over the weekend in Australian newspapers.

Potter is best known for presiding over the controversial fraud and conspiracy trial of television evangelist Jim Bakker in Charlotte. A jury convicted Bakker of the 24 charges he faced, and Potter sentenced Bakker to 45 years in prison.

Bakker was convicted of using donations to his PTL ministry to maintain a lavish lifestyle.

GDANSK, Poland (APRIL 23) UPI - Solidarity should join the government in trying to stimulate Poland's ailing economy, Deputy Prime Minister Leszek Bacerowicz said Monday in defending economic measures he said have cut inflation while triggering recession and unemployment.

Balcerowicz, an economist and Solidarity member who is also finance minister, flew to Gdansk to report on the state of the economy and respond to Solidarity delegates attending the union's second congress.

He defended his policy as the means to salvage an economy devastated by communism and urged Solidarity to follow the example of unions in Austria, Finland or Sweden that not only protect workers' interests, but cooperate with their governments to contribute to economic growth.

Balcerowicz said inflation, running at an annual rate of 200 percent over the past 12 months, peaked at 60 percent a month in January, but now is 5 percent a month ''and could be still lower in May.''

But some Solidarity delegates criticized the austerity program implemented in January, which included wage freeze and price hikes as much as 140 percent forcommodities and food.

Balcerowicz's plan disgruntled the people, particularly retirees whose

pensions dwindled and those who lost their jobs, a delegate said.

The latest statistics show unemployment grew from zero in January to 318,000 in April and may reach more than 1 million soon.

Balcerowicz said implementation of the measures coupled with the introduction of free-market economy modeled on the capitalist system had produced favorable results.

He cited the availability of more goods in shops but admitted many plants have cut production because goods are ''hard to sell'' because of high prices.

Balcerowicz also boasted of making Poland the first East Bloc country to have a domestic currency now convertible into foreign currencies at banks and private exchange houses.

Balscerowicz justified unemployment as ''the cost of unavoidable phenomenon in the process of putting the the economy on a new track.''

''Some improvement may take place in the second half of the year following the adoption of the new economic system by more enterprises,'' he said.

Balcerowicz said the process of privatizing plants is slow and those that are state owned employ too many people and are inefficient.

Poland's present law allows foreign capital in joint ventures, but foreign investors are not permitted to buy shares. Bonds and shares in companies to be privatized are being offered to workers or individuals in schemes where half of the capital remains in state hands.

The Gdansk Shipyard, once called Lenin Shipyard and the birthplace of Solidarity, is the first joint enterprise with state, workers and foreign capital shares. Smaller business, like houses or hotels that were nationalized under four decades of communist rule, are being offered back to former owners or their families.

PORTLAND, Ore. (APRIL 23) UPI - PacifiCorp has offered early retirement to about 640 non-union employees of its two electric utilities to speed the implementation of efficiency measures, the company announced Monday.

The move resulted from productivity and organizational studies of PacifiCorp's electric utility divisions, Pacific Power & Light and Utah Power & Light, which combined operations in January of last year, officials said.

Dave Bolender, president of PacifiCorp's electric operations, said the voluntary retirement program is being offered as part of an accelerated program to consolidate staff departments and functions within the two divisions.

''This stepped-up integration will result in a significant number of positions and employees being displaced within a relatively short period of time,'' Bolender said.

''We believe the most positive way of dealing with this, yet meet our commitment to avoid merger-related layoffs, is to try to open up remaining positions via an 'early out' program,'' he said.

The package is being offered to all non-union employees with at least 5 years of service with the company and who will be age 50 or older by the end of the year. The employees will be given until July 2 to make their decisions, Bolender said.

Union employees are not eligible for the program, which provides eligible workers with a series of retirement incentives. They include benefits based on adding five years to an employee's length of service and no reduction of benefits due to age.

Bolender estimated that about 450 eligible workers, or 70 percent of the total, will volunteer to take the early retirement package, which also includes additional monthly benefits to bridge the gap between retirement and age 62, when they become eligible for Social Security benefits.

WASHINGTON (APRIL 23) UPI - The Supreme Court refused Monday to disturb an Oregon court ruling that ordered a trial in a case involving a man's attempts to assert parental rights for a child born as a result of artificial insemination.

The court refused to hear the case brought by Linden Crouch, who gave birth to a daughter in 1986, seeking review of a ruling by an Oregon appeals court that ordered a trial in the dispute.

The case stems from the artificial insemination of Crouch with the semen of Kevin McIntyre. Crouch performed the procedure herself.

McIntyre, a resident of California, had been friends with Crouch for over 13 years. McIntyre, who is unmarried, had been seeking to adopt a child since 1980 or to have a child through a surrogate. According to McIntyre, Crouch, who was also unmarried, agreed to be the mother of his child and

that they would share parental duties.

However, according to McIntyre, during the pregnancy the deal eventually soured and Crouch refused to let McIntyre have any contact with the child.

McIntyre brought suit, but an Oregon court, citing Oregon's artificial insemination law, ruled for Crouch without holding a trial.

The law is intended to protect both the woman and the donor and extinguishes any parental rights or obligations of the donor. The law also requires any such procedures to be done by a doctor.

Nonetheless, the appeals court found the act applied to the case and said it barred McIntyre from rights and responsibilities of fatherhood. However the court said McIntyre's federal due process rights may have been violated if the two did indeed have an agreement that they should share parental rights and responsibilities.

The court sent the case back to Jackson County Circuit Court for trial on that question.

Seeking high court review, the woman noted that at least 25 states have enacted laws dealing with artificial insemination.

''The Oregon Court of Appeals' opinion calls into question the legal relationships among donor, fathers and children conceived by artificial insemination in Oregon, and if followed elsewhere, concerning the 20,000 plus children born in the United States as a result of artificial insemination each year.''

Her lawyers, quoting a lower court judge's dissent, added that there is ''no difference for purposes of due process analysis, between (McIntyre) and the other artificial insemination donors who the lead opinion seeks to distinguish, except that (McIntyre) is the only donor of semen who has sought to be recognized as a father so far.''

Arguing against review, McIntyre said the case is unique and not likely to recur. They also said the case, which has been ordered to trial, is not ripe for review.

ST. PAUL, MN (APRIL 23) UPI - A company was overwhelmed with recyclers when it offered an Earth Day special of 50 cents a pound for aluminum cans.

Cars were reported to be backed up 2 miles at one point Sunday as people waited to take advantage of Great Western Iron and Metal Co.'s premium rate, offered as part of the worldwide celebration of the 20th anniversary of the first Earth Day. Police were called in to control traffic.

The special price was about 10 cents a pound above the going rate for aluminum cans.

''We waited 3 1/2 hours to sell our 145 pounds,'' Dave Soderholm of Champlin, Minn., said. ''But it was a good deal. The kids got $72.50 out of it.''

The volume was so great that some of those who brought cans in for recycling were given rain checks. Great Western owner Mike Silverman said business was so brisk he did not yet have an estimate of the total amount recycled.

#90113u1428 04/23/1990 ~United Press International

MOSCOW (APRIL 23) UPI - The Soviet Union agreed Monday that future trade with Hungary will be based on world prices and hard currency, the first pact of its kind with a former East bloc partner.

Previously, trade with countries in the Warsaw Pact was primarily based on barter within the Soviet-dominated Council for Mutual Economic Assistance, but as Eastern European countries began moving toward democracy and market economies, they have started demanding changes in trading conditions.

About a month ago, Hungary said it was stopping exports to the Soviet Union because of what it claimed was a $1.3 billion debt, which it insisted be paid in dollars or a product, such as automobiles, that could be sold for convertible currency.

Under an agreement announced Monday by the official Soviet news agency Tass, all trade next year between the two countries will be based on world market prices and hard currency.

Tass, noting the agreement was reached after ''some tough bargaining,'' said the move ''will end a period of relative calm for Hungarian producers and rob them of guaranteed orders provided through inter-governmental agreements.''

The news agency said Hungary will face plant closings and unemployment because of its insistence on the new agreement.

Hungary was so fed up with the previous arrangement that it reduced production last month at the Ikarus bus-making company rather than

continue exports to the Soviet Union while waiting for the Soviets to pay their debt.

The bulk of Soviet exports to Hungary consists of oil and other raw materials, while Hungary sends primarily finished manufactured goods to the Soviet Union.

The new agreement, Tass said, will mean estimated Hungarian exports to the Soviet Union of $5.9 billion. Soviet exports to Hungary were forecast by Tass at $6.2 billion.

#90113u1432 04/23/1990 ~United Press International

WORCESTER, Mass. (APRIL 23) UPI - Almost a quarter of the members of Congress, citing national security, petitioned President George Bush to investigate the hostile takeover bid for Norton Co. by a British conglomerate, Rep. Joseph D. Early's office said Monday.

The 120 senators and representatives from both parties urged the president to investigate the $75-a-share, $1.64-billion bid for the maker of ceramics and industrial products because there are ''critical national security and international competitiveness considerations that require a thorough and careful review.''

The Democrat, whose district includes Worcester where Norton has its headquarters and is the city's largest employer, organized the petition drive.

The members of Congress said Norton ''sits on the border of a whole new frontier of technology. We will realize the potential of these technologies if, and only if, Norton's commitment to research and development remains unhampered by the budget cutting and fragmentation which all too often occurs in the wake of hostile and expensive takeover activities.''

The letter said ''Norton is at the leading edge in the development of technology critical to the future of U.S. weaponry and advanced electronics'' and said the products it supplies to the Defense Department include missile domes, advanced ceramic high technology bearings and ceramic aircraft engine parts.

''We might add that Norton has achieved its success the way that study after study has urged American business to behave - it has invested for the long run,'' it said. ''And now, just when the enlightened management and the dedicated employees of Norton are beginning to gain recognition in the marketplace and to realize the benefits of their investment and sacrifice, a foreign company comes along and attempts a hostile takeover.''

#90113u1464 04/23/1990 ~United Press International

LONDON (APRIL 23) UPI - Stock prices ended sharply lower in light trading on the London International stock exchange Monday dragged down in part by a disappointing report on Britain's money supply.

The blue-chip Financial Times 100-stock index, which added 2.4 points Friday but lost 35.0 points overall last week, fell 27.9 points to 2,159.2. The narrower top 30 industrial average lost 19.9 points to 1,692.7.

Volume amounted to around 382 million shares, compared with 410 million shares Friday.

On the economic front, the Bank of England reported Britain's narrow money supply M-O rose a provisionally estimated 6.3 percent in March from a year earlier on a seasonally adjusted basis.

M-4 lending, a measure of bank and building society lending to the private sector, climbed a seasonally adjusted $15.09 billion in March.

Market forecasters were expecting the Bank of England to report M-O to rise 6.6 percent and M-4 to rise only an estimated $12.3 billion for the latest month.

Analysts also said the market was worried about the implications for German inflation after news that West Germany decided to convert East German wages and pensions at a rate of one strong West German mark for one weak East German mark when the German monetary, economic and social union goes into effect July 1.

On the corporate news front, Globe Investments Trust PLC formally rejected a $1.65 billion hostile takeover bid by British Coal Corp's pension funds.

Globe, Britain's largest investment trust, said the $3.06 a share bid was ''wholly inadequate,'' and slid 3 cents to $2.99 on the news.

In a weak banking sector, Barclays Bank tumbled 27 cents to $8.31 and National Westminister lost 27 cents to $4.97 on the poor money supply report.

Aqascutum bucked the downward trend, rocketing $3.35 to $8.78 following a deal to sell off a majority of the company for $1.18 billion to the Japanese company Renown.

Eurotunnel 19 cents to $$9.36 following news that half the Channel tunnel beneath the English Channel is now drilled and lined.

Fears of competition for its drug Zantac depressed Glaxo, which eased 24 cents to $12.32.

Elsewhere in Europe, prices on the Frankfurt Stock Exchange ended sharply lower in moderate trading.

The closely watched German Stock Index, which gained 5.46 points Friday, fell 2.5 percent or 46.83 points to 1,837.50.

Traders said stocks fell across the board amid concerns over West Germany converting more East German marks into deutsche marks at the favorable 1-to-1 exchange rate.

Market watchers also noted a fall in bond market prices and prospects for higher interest rates contibuted to the sell-off.

#90113u1493 04/23/1990 ~United Press International

KHARTOUM, Sudan (APRIL 23) UPI - Military leader Gen. Omer el-Bashir said loyalist troops foiled an attempt to overthrow the government Monday, striking before the plotters could make their move and crushing the coup

bid ''in its cradle.''

It was the second time in four weeks the 15-man Revolutionary Command Council, the military junta that seized power in June 1989, claimed to have defeated an attempted coup. On March 28, the official Sudan News Agency announced a series of arrests connected to an attempted overthrow.

The latest coup plot was planned by junior officers loyal to two retired generals who served during the government of Prime Minister Sadiq al-Madhi who was overthrown in June by el-Bashir and his military junta.

Loyalist troops moved against the coup plotters at midnight and had crushed the rebellion before daybreak Monday. News of the attempted coup first began to filter out at about 4 a.m., when authorities sealed off the airport, closed the bridges across the Blue and White Nile rivers and cut all phone lines.

The government also placed a heavy guard around the official television and and radio stations during the crisis. By daybreak, the capital had returned to normal, with the presence of soldiers in the streets no heavier than usual.

The Egyptian news agency MENA said there were unconfirmed reports of an exchange of gunfire at the airport and the general command headquarters during the coup attempt.

El-Bashir made an appearance on national television after the mopping up operations were completed to reassure residents that those responsible ''were all arrested and the attempt crushed in its cradle.'' But he urged citizens ''to be on the lookout for enemies of the people, nation and peace.''

The Islamic fundamentalist leader congratulated the army for its ''utmost efficiency'' in defusing the insurrection.

He claimed the plotters were ''in alliance with the rebels'' of the Sudanese People's Liberation Army, a predominantly Christian group that has waged a seven-year civil war against the Moslem-led central government.

Official government spokesman Mohamed Khogali Salihein said two retired army officers, Maj. Gen. Abdul Gadir al Kadaru and Brig. Mohamed Osman Karrar, had been behind the coup attempt.

Al-Kadaru had been a leader of the artillery corps under the previous governemnt and Karrar was a pilot and provincial military chief in the al-Madhi government.

Salihein said the attempted overthrow was ''an extension'' of the March

uprising. The highest-ranking detainee in the March coup attempt was a former security adviser to deposed al-Mahdi.

Salihein said the officers who took part in planning the coup attempt Monday had been detained and were being interrogated. He said only a few military units in the capital were involved in the coup attempt, but a number of retired soldiers also participated.

Quoting a military source, the official Sudanese news agency linked the first coup attept to a strike by medical doctors in Khartoum. The allegations led to a government crackdown on trade unionists, lawyers and professionals thought to hold liberal views.

The source said those arrested after the initial coup had signed a ''national charter'' dedicated to the overthrow of the 15-man ruling Revolutionary Command Council.

Under El-Bashir, a paratroop commander whose family name means the bearer of good news in Arabic, Sudan has been criticized by international organizations for its record on human rights.

WARSAW, Poland (APRIL 23) UPI - Prime Minister Tadeusz Mazowiecki Monday set up a special three-member team to investigate an apartment fire that killed the wife of a Solidarity reporter Sunday.

The journalist, Jerzy Jachowicz, is known for having written about the techniques of the secret police, known for their harsh measures under the ousted communist regime and recently disbanded by Polish Parliament.

At 5 a.m. Sunday, he, his wife Maria and their 15-year-old daughter Catherine were awakened by a fire at their apartment door.

''The flames of the fire were in the middle of the door,'' next-door neighbor Teresa Kondratowicz told the Solidarity newspaper Gazeta Wyborcza.

The fire engulfed the apartment and Maria jumped with her daughter from the second floor. She was severely injured and died a few hours later. Her daughter suffered a concussion and broken bones.

Jachowicz climbed down safely.

A Solidarity source said police have detected traces of gasoline vapors in the door, and neighbors said they had once seen a notice written in red paint on the door saying, ''You will die.''

Mariusz Wroblewski, the prosecutor in the town of Pruszkow where the family lived, said the fire could have been caused by a faulty electrical system, but did not discount the possibility it was set ''with premeditation.''

On Monday, Mazowiecki ordered the Deputy Interior Minister Krzysztof Kozlowski, and two deputy justice ministers, Aleksander Herzog and Adam Strzembosz, to investigate as a special commission, government spokesmen said.

More than 100 people, mostly Solidarity activists or sympathizers, died in mysterious circumstances following the imposition of martial law in 1981 but the investigation of their cases was dropped because of a lack of evidence.

Among them were Rural Solidarity leader Piotr Bartoszcze in 1983 and two pro-Solidarity priests in 1989.

Delegates to a Solidarity Congress in Gdansk, many of whom were persecuted and jailed by police or whose colleagues died in mysterious circumstances, drafted Sunday a resolution condemning ''a terrorist act'' after learning of Maria Jachowicz's death.

Her death dominated private conversations in Warsaw amid speculation the communist secret police might have been retaliating against her husband.

EAST BERLIN (APRIL 23) UPI - Neo-Nazi skinheads went on a rampage on an East German express train, beating passengers with truncheons and terrorizing a Vietnamese man who tried to climb out a window to escape their fury, an East German newspaper reported Monday.

The incident, which happened Sunday morning, came just two days after skinheads rioted in the heart of the East Berlin business district on the anniversary of Adolf Hitler's birthday.

The outbreak of skinhead violence prompted Interior Minister Peter-Michael Diestel to call a news conference Monday to pledge tougher measures to battle right- and left-wing radicals.

''We need a self-confident police force which can carry out its duties in the interest of our citizens and a free society,'' he said.

The East German newspaper Thueringer Allgemeine called the train incident ''brown terror'' in a reference the fear spread by Hitler's Nazi storm-troopers, who wore brown shirts. The newspaper said the skinheads beat passengers on the train with truncheons and chased a Vietnamese man through the train.

''In blind terror the Vietnamese victim tried to climb out of the moving tain,'' the paper said. ''Two young women teachers and other passengers finally positioned themselves between the skinheads and the Vietnamese man and were able to prevent futher attacks.''

Neo-Nazi unrest erupted Friday night when soccer hooligans and neo-Nazis rioted on East Berlin's famous Alexanderplatz and in the troubled West Berlin district of Kreuzberg. Stores were looted and dozens of police and demostrators were injured, many of them seriously.

The incident came on the anniversary of Hitler's birth 101 years ago.

Following the incidents over the weekend, the East German police force was accused of being unprepared to deal with the violence and lacking initiative to confront the extremist violence.

''We are extremely disappointed in our men in blue,'' said the Thueringer Allgemeine.

Konrad Weiss, a leader of the Democracy Now political party, also warned over the weekend that there was a potential threat of right wing extremism in East Germany.

''Among the youth of the GDR there is a potential for radical right-wing politics and a growing hostility toward foreigners,'' he said.

#90113u1641 04/23/1990 ~United Press International

WASHINGTON (APRIL 23) UPI - The State Department said Monday that a Jewish takeover of a building in East Jerusalem was ''insensitive and provocative'' and the Israeli government's financial support of the action is ''deeply disturbing.''

State Department spokeswoman Margaret Tutwiler raised the possibility that

the incident may cause a change in the present system of aid to Israel in which $3 billion in U.S. assistance is handed over every year without any review or audit of how it is spent.

Tutwiler was referring to the Israeli Ministry of Housing's admission last week that it had provided about 40 percent of the funding - $1.8 million - for the lease of a large building near the Church of the Holy Sepulchre in Jerusalem's Old City.

The takeover by Jewish settlers was protested by Christian sects and an Israeli court has ruled that it is illegal, but that verdict is under appeal.

Tutwiler said, ''The takeover of the St. John's Hospice in the Chrisitan quarter of Jersualem was an insensitve and provocative action. We are pleased that the Israeli courts have ordered the settlers evicted.''

She added that the admission by the Israeli Housing Ministry ''is deeply disturbing. We are taking this issue up with the government of Israel.''

U.S. ambassador to Israel William Brown has been instructed to take up the matter with ''the highest levels'' of the Israeli government, Tutwiler said.

The U.S. Congress is now considering a $400 million loan guarantee to build housing for the new wave of Soviet immigrants, but Secretary of State James Baker said the Bush administration will oppose it unless the Israeli government gives assurances that none of the money would be used to support settlements in occupied territory.

Jerusalem was occupied by Israel in 1967 and later annexed by the Israeli government together with a large parcel of surrounding lands. The U.S. government does not recognize the annexation.

Tutwiler said the United States is now reviewing the financial situation. Currently, Washington accepts Israeli assurances about how the U.S. aid money - $1.2 billion in grant economic aid annually and $1.8 billion in military assistance - is turned over.

She said the current system ''is one that we have been satisfied with,'' and added that ''I have no new policy to announce today.''

But Tutwiler went on to say that ''if our government decides to review that system, that's a decision for the president and the secretary of state.''

''To my knowledge,'' Tutwiler said, the U.S. accounting system had not revealed that the Israeli government was spending money to support the

project in East Jerusalem.

(APRIL 23) UPI - Freed U-S Hostage Robert Polhill chatted and read magazines on a flight to West Germany aboard a U-S Air Force jet. Crew members say Polhill indicated he had NOT seen the sun for three years while he was held by kidnappers in Lebanon. Polhill was freed yesterday after 39 months in captivity.

A Soviet official in Moscow confirms that a two-year freeze on Lithuanian independence was proposed as a basis for talks with the secession-bent Baltic state. President Gorbachev's chief spokesman told reporters today that Lithuania may either rescind its independence laws or freeze them. There is NO official response from Lithuanian officials.

East Germany got its way in monetary rate talks with West Germany's leaders. Bonn officials agreed to convert East German pay at a rate of one strong West German mark for one weak East German mark when the German monetary rates and economic union takes effect July 1st.

The F-B-I is investigating two weekend shooting incidents involving Greyhound buses in Pennsylvania. State police say a bullet hit the left side of a bus traveling from Altoona to Philadelphia on Saturday. A bus traveling from Pittsburgh to New York was hit by a bullet yesterday. NO injuries were reported in either shooting.

Funeral services will be held today in Atlanta for civil rights leader Ralph Abernathy, who died Tuesday of a heart attack at age 64. Abernathy will be carried to his burial place in a mule-drawn wagon, symbolizing humility and his struggles to help the nation's poor. Abernathy's closest friend during the civil rights movement of the 1950's and 1960's was the late Martin Luther King Junior.

WASHINGTON (APRIL 23) UPI - The Supreme Court sent back to lower court Monday a case involving a Minnesota law that required the Amish to display slow-moving vehicle signs on their horse-drawn buggies.

The justices threw out a lower court ruling that found the law violated the First Amendment of the Constitution. The court, with Justices John Paul Stevens and Sandra Day O'Connor dissenting, then sent the case back to state courts to be reconsidered in light of a ruling last week involving freedom of religion.

In that case, from Oregon, the court ruled that the First Amendment guarantee of free- dom of religion does not protect those who use drugs as part of religious ceremonies.

Justice Antonin Scalia wrote for a 6-3 majority that ''it may fairly be said that leaving accommodation to the political process will place at a relative disadvantage those religious practices that are not widely engaged in; but that unavoida- ble consequence of democratic government must be preferred to a system in which each conscience is a law unto itself, or in which judges weigh the social importance of all laws against the centrality of all religious beliefs.''

The Amish case emerged in 1988 when 14 members of the Old Order Amish religion were ticketed for failing to display or improperly displaying slow- moving vehicle signs on the backs of their black buggies, which they drove on state highways in Fillmore County.

The state Supreme Court dismissed the misdemeanor charges, finding that the Minnesota law requiring the signs - either fluorescent orange or black and white reflective triangles - violated the members' constitutional rights to free exercise of religion.

The lower court suggested the state could require a ''less restrictive alternative,'' such as silver reflective tape and traditional red lanterns hung from the buggies.

The Amish regard the trian- gular signs as ''worldly sym- bols'' that show conformity to the dictates of secular law, not God.

Minnesota contended its law is constitutional and that any infringement of the Amish order's right to religious freedom is outweighed by the state's safety concerns for the Amish and fellow travelers on Minnesota highways.

Minnesota, in arguing for high court review, said the Supreme Court previously has held that state laws cannot ''advance or inhibit'' religion.

''The Minnesota Supreme Court impermissibly advances religion by allowing the Amish special rights, which individu- als outside that religious group cannot enjoy,'' lawyers for the state wrote in court briefs.

Lawyers for the Amish argued against high court review. The Minnesota Civil Liberties Union filed a friend- of-the-court brief arguing for review.

89-804 State of Minnesota vs. Eli A. Hershberger, et al.

#90113u1708 04/23/1990 ~United Press International

NEW YORK (APRIL 23) UPI - A former Philippine banker testified Monday he had to write personal checks for $28,000 to pay the bills for President Ferdinand Marcos and his entourage at the funeral of South Korean leader Park Chung-Hee in 1976.

Jaime Laya, former governor of Central Bank of the Philippines, testified in U.S. District Court that he was asked to cover the hotel, flower and car rental bills, but did not have enough money in his account.

He said he wrote three checks totaling $28,000 after reassuring officials they would be made good by the Philippine National Bank.

On Apr. 9, Oscar Carino, a former vice president with the Philippine National Bank in New York, testified that he was ordered by Imelda Marcos to personally deliver $100,000 in cash to her in Seoul at the funeral of Park, killed by an assassin.

Carino said he saw Mrs. Marcos hand $14,000 of the cash he delivered to generals' wives to cover expenses.

Monday, Laya was asked if he knew about the $100,000 in cash.

''No,'' he replied.

Mrs. Marcos, 60, is on trial on charges of racketeering, conspiracy, fraud and obstruction of justice.

She is accused of plotting with her late husband to divert more than $200 million stolen from the Philippine treasury into real estate and art investments in Manhattan and around the world.

In testimony last week, a French court translator identified statements in which Saudi financier Adnan Khashoggi told how he purchased 38 ''master paintings'' from a cash-strapped Imelda Marcos in 1985 and 1986 for $6.5 million.

The translator, Ferdinand Dezacharia, Friday described two 1987 depositions taken from Khashoggi in connection with the U.S. probe into the ''Marcos millions'' that were allegedly plundered from the Philippines.

''At that time, Mrs. Marcos needed money and suggested giving me the paintings in question as collateral for the amount of money I would lend her,'' Khashoggi said in the depositions, according to the translator.

Khashoggi, Mrs. Marcos's co-defendant, faces obstruction of justice and fraud charges for allegedly helping the Marcoses in their transactions.

Khashoggi was called before the French judiciary in 1987 to give depositions on U.S. charges of receiving assets that he knew had been ''either stolen, misappropriated or illegally obtained.'' His actions were allegedly in violation of a U.S. court order blocking the movement of Marcos possessions.

Khashoggi testified from his home at Cannes that he instructed a ''representative in Geneva'' to deliver a ''check in the amount of $5.8 million'' and later hand-delivered her ''$700,000 in cash'' to the Marcoses.

The interpreter said Khashoggi testified he made the payment by bearer check and cash because the Marcoses ''were experiencing some difficulties and could not collect money by check or by transfer.''

Khashoggi said he did not have the paintings appraised before buying them because the Marcoses were friends and he trusted them.

#90113u1713 04/23/1990 ~United Press International

(APRIL 23) UPI - Police confronted demonstrators blocking traffic in Bucharest as protesters accused Romania's ruling National Salvation Front of being run by remnants of the communist regime of dictator Nicolae Ceausescu . Political activity has been mounting in Romania in advance of national elections scheduled for May 20th.

Riot police in New York City today arrested more than 155 protesters during a demonstration by environmental activists who tried to shut down Wall Street. Authorities say hundreds of protesters, shouting ''dirty money!'' and ''Earth Day every day,'' attempted to block entrances to the New York and American stock exchanges.

Police in riot gear cordoned off approaches to the two markets at Broad and Wall Streets and Trinity Place in lower Manhattan... and the markets opened on time. But the demonstrators caused massive traffic jams. Organizers of the protest say the objective was to punish companies they say are ''responsible for ecological devastation.''

In Memphis, prosecutors today get a last chance to argue their case in the fraud and influence peddling trial of Tennessee's only black congressman. Eight-term Representative Harold Ford accused prosecutors of having a racist vendetta against him. Jury deliberations in the case could begin as early as this afternoon.

A New York judge will hear arguments today on whether aging hotel magnate Harry Helmsley, the husband of convicted tax cheat Leona Helmsley, is physically able to stand trial with her on state tax charges. 81-year-old

Harry Helmsley was ruled mentally incompetent to stand trial in a federal tax case last fall in which his wife was convicted.

#90113u1737 04/23/1990 ~United Press International

BOGOTA, Colombia (APRIL 23) UPI - Gunmen in an area known for death squad violence killed nine people and a policeman was murdered in Medellin, the cocaine capital where dozens of policemen have been shot to death this year, police said Monday.

Also Monday, the newspaper El Espectador reported that the government has approved the extradition of three cocaine traffickers under indictment in the United States.

Police said gunmen entered a cabin near the town of San Carlos, 280 miles north of Bogota Saturday and killed seven people, wounded another and kidnapped a woman. The state of Cordoba, where the murders took place, has been the been the site of frequent death squad murders of leftist leaders and suspected leftist sympathizers.

Police also said that Alvaro Vasquez Montoya, a 26-year-old police officer was murdered late Saturday in Medellin, the headquarters of the world's largest and most violent cocaine-smuggling cartel, 160 miles northwest of Bogota.

At least 50 officers have been killed this year in Medellin, most by hitmen at the service of the Medellin Cartel.

A group calling itself The Extraditables, the bloody enforcers of the Medellin Cartel who oppose the extradition of Colombians to stand trial on drug charges in the United States, have offered to pay $4,210 for each policeman murdered in Medellin. At least 41 have been killed in the month of April alone.

El Espectador reported that the National Hard Drugs Council has approved the extradition of three Colombians indicted on drug trafficking charges in the United States.

They are Carlos Humberto Gomez Zapata, Rafael Juliao Fernandez and Luis Cabarcas Acosta, the paper said.

It did not detail the charges against the three in the United States. The U.S. Embassy does not respond to inquiries about extraditions and a spokesman for the Colombian Justice Ministry said he could not immediately confirm the report.

Juliao Fernandez and Cabarcas Acosta were in police custody but Gomez

Zapata fled a hospital in Barranquilla after bribing a soldier who was guarding him, officials said. The cases now enter a waiting period in which appeals are heard.

Fifteen accused drug traffickers have been extradited to the United States since President Vigilio Barco reinstated a policy of extraditing drug criminals in September of last year. There are now five people currently in custody awaiting extradition and another eight whose extradition has yet to be approved.

#90113u1742 04/23/1990 ~United Press International

NEW YORK (APRIL 23) UPI - Film star Greta Garbo left a will disposing of her reportedly multimillion-dollar estate and named her niece, her closest surviving relative, as sole beneficiary, it was announced Monday.

Theodore Kurz, attorney in charge of Garbo's estate, said ''contrary to certain reports in the press, Miss Garbo left a last will and testament which will be probated in New York City.

''Miss Garbo's will names her niece, Gray Reisfield, as sole executor and sole beneficiary.''

Reisfield, wife of a New Jersey gynecologist and said to be a resident of Passaic, N.J., is the daughter of Garbo's late brother, who followed her to Hollywood from their native Sweden in the 1920s when she was becoming a star of silent films. Kurz described the niece as Garbo's ''friend and confidant.''

Kurz said no funeral service has been held for the movie star, who died Apr. 14 at the age of 84, and that final arrangements were incomplete. Garbo's body was cremated the day after her death.

Garbo retired in 1941 after making 27 films in Hollywood and moved to New York, but she was known to have important real estate holdings in the film capital as well as homes in New York and Europe, and a valuable art collection. Her New York duplex apartment overlooking the East River was estimated by real estate experts to be worth $4 to $5 million.

#90113u1759 04/23/1990 ~United Press International

BONN, West Germany (APRIL 23) UPI - West Germany bowed Monday to East German demands and agreed to convert East German wages at a rate of one strong West German mark for one weak East German mark when the German monetary and economic union takes effect July 1.

Personal savings up to the amount of $2,367 also will be converted at the one-to-one rate, West German government spokesman Dieter Vogel said. Pensions will be tied to wages and paid on the same basis as they are in West Germany.

However, the debts of East German industry will be calculated at a two-to-one rate.

The decision came at a two-day meeting in Bonn between Chancellor Helmut Kohl with government leaders, officials of the parties in his center-right coalition and representatives of the Bundesbank, the West German central bank.

Meetings were scheduled for Tuesday between Kohl and his East German counterpart, Lothar de Maziere, as well as the foreign ministers of the two Germanys.

The proposal softened the terms favored by the Bundesbank, which had recommended that wages, pensions and most East German assets and liabilities - except small savings accounts - in general be exchanged at the rate of one West mark for two East marks.

Vogel told reporters the Bundesbank accepted the government's proposal and no dispute took place. He said the proposal was motivated by the needs of the ''economic and social development in both parts of Germany and the stability of the German mark.''

The East German government in a statement released in East Berlin by the official ADN news agency called the plan ''an interesting negotiating offer.''

''The government of the German Democratic Republic considers the Bonn proposal of a conversion rate of one-to-one an important step to end the unfortunate discussion on this controversial matter,'' it said.

The statement also said the proposal was along the lines advocated last week by the East German prime minister in his state of the nation address to Parliament in which he demanded a general one-to-one rate.

While the West German proposal was accepted by the East German government as an acceptable starting point for negotiations, some officials were highly critical of the offer.

Wolfgang Ullmann, a vice president of the East German Parliament and a leader of the Democracy Now movement, said the West German offer failed to consider a large portion of what East Germans had saved. He said it also violated the East German coalition agreement and government statements on the issue.

Helga Mausch, the leader of the powerful East German FDGB trade union, said the proposal was an acceptable place to begin negotiations, but she said East Germans would need additional breaks to offset the loss of subsidies and the introduction of price reforms.

She also said East German's should be allowed to exchange all their savings at a one-to-one rate in a stage-by-stage process.

Some East Germans had maintained the original Bundesbank proposal broke promises made by Kohl in speeches in East Germany in support of de Maiziere's Christian Democrats during the East German election campaign and would make East German workers second class citizens in a unified Germany.

The ADN news agency said Kohl and de Maiziere in a telephone conversation decided to meet Tuesday. It said they would discuss the treaty on the planned monetary and social union in general terms, but leave details for talks by experts. They also will discuss ''future close cooperation,'' ADN reported.

It will be their first meeting since de Maiziere, like Kohl a Christian Democrat, took office April 11.

East German spokesman Matthias Gehler said de Maiziere conferred Monday evening in East Berlin with West German Interior Minister Wolfgang Schaeuble to prepare for the planned meeting with Kohl.

The West German Foreign Ministry announced that Foreign Minister Hans-Dietrich Genscher also was scheduled to meet in Bonn Tuesday with his East German counterpart, Markus Meckel, to discuss ''aspects of German unity.''

The Bonn decision was made in preparation for talks on the East-West German monetary and economic union scheduled to go into effect July 1.

Early this month, about 100,000 East Germans demonstrated in East Berlin and other cities for a one-to-one conversion rate, carrying placards reading, ''2 to 1 is an insult.''

The Bundesbank had feared a general one-to-one rate would pose the danger of inflation. It also believed a one-to-one conversion rate for wages would make East German industry even more non-competitive in world markets.

CHICAGO (APRIL 23) UPI - The rally in soybeans that began last week continued Monday on the Chicago Board of Trade.

Soybeans were higher across the board at the close while grain futures were mixed but mostly lower.

Traders reported several contract highs in new-crop soybeans including January at $6.44 1/2 per bushel and March at $6.55. Nearby July beans, which is the most actively traded contract, closed at $6.20 1/2, up a penny on the day.

In addition to follow-through buying, soybeans had underlying support from the rain-delayed harvest in South America and steady prices on European markets.

Soybean oil futures rallied to their highest levels in nearly a year, then gave up some of the gains to profit-taking during the final minutes.

Field work is expected to pick up this week because of favorable weather conditions across much of the Grain Belt.

The activity in the grains was choppy and prices moved in narrow ranges. Traders were on both sides of the grain market.

On the export front, Mexico and South Korea bought around 350,000 tons of corn, and late Friday the USDA announced the sale of 200,000 tons to unknown destinations.

At the close, corn was up 3/4 to off 1, soybeans up 1 to 3 1/2, wheat off 1/2 to 3 1/2 and oats up 1/4 to 2 cents.

#90113u1780 04/23/1990 ~United Press International

NEW YORK (APRIL 23) UPI - Billionaire Metromedia chairman John Kluge, reputed to be America's richest man, and his third wife have reached an amicable decision to divorce, it was announced Monday.

Peter Sherman, attorney for Mrs. Patricia Sherman, said the couple has ''resolved all matters amicably and wish each other well.''

''They announce their decision to end their marriage because of irreconcilable differences,'' said Sherman of the Washington, D.C., law firm of Sherman, Meehan and Curtin. ''They will work together to promote the best interests of their son, John Kluge II, who will reside with his mother.''

The announcement came little more than two months after real estate billionaire Donald Trump walked out on his wife Ivana, a separation which has resulted in recriminations on both sides and an attempt by Mrs. Trump to void a pre-nuptial agreement which would give her about $25 million.

Sherman refused to coment on published reports that Mrs. Kluge also signed a pre-marital agreement and would receive income from $1 billion a year.

Kluge was at his apartment in New York but was not available for comment.

The 75-year-old tycoon and his 41-year-old wife were married at St. Patrick's Cathedral in 1981 after Kluge converted to the Roman Catholic faith. He had been married and divorced twice before while she had one previous marriage.

According to the Forbes ''400'' list of the richest Americans in 1989, the German-born Kluge was No. 1 with a net worth of $5.2 billion derived from radio, television, entertainment, and industrial holdings.

The mother and son will live at Albemarle House, a 45-room estate built by the Kluges on 10,000 acres near Charlottesville, Va., according to Sherman. Kluge will live in a smaller house, Morven, on the same estate.

Mrs. Kluge, a British beauty of Iraqi ancestry, was formerly married to the publisher of Knave, a British girlie magazine, which carried nude pictures of her in the late 1960s.

This aspect of her modelling career was unknown in the United States until it was announced in 1985 that Mrs. Kluge would chair a benefit in Palm Beach, Fla., attended by the Prince and Princess of Wales. After the pictures were re-published in British tabloids, she resigned her charity post and left Palm Beach.

The Kluges adopted their son and it was reported recently that they were considering adopting a second child. Kluge has two children by his previous marriages.

CHICAGO (APRIL 23) UPI - Hundreds of demonstrators rallied outside the

headquarters of Prudential Insurance Co. of America and the American Medical Association Monday, scuffling with police and protesting the way the insurance industry, doctors and local governments treat AIDS victims.

Police said 150 protesters were arrested.

The arrests followed a weekend of protests in front of Cook County Hospital, where 30 people spent Saturday and Sunday in tents to try to draw attention to the deadly disease.

Before marching to the building housing the American Medical Association, as many as 700 demonstrators gathered outside the Prudential Building, regional headquarters of Prudential Insurance Company of America.

The protesters chanted ''Health care is a right, not just for the straight and white,'' ''The rock is a crock,'' ''Prudential care is no care'' and ''We die, they do nothing.''

The protesters scuffled with police as they made their way north while officers tried to keep demonstrators on the sidewalk and out of the street.

Many of the demonstrators were members of the AIDS Coalition to Unleash Power, a group known as ACT-UP that has accused insurance companies of ''red lining'' AIDS victims.

''We want national public health care, regardless of how much you make,'' said Veronica Drake, who accused Prudential of demanding higher premiums from - or denying coverage to - those living in neighborhoods with large gay populations.

Prudential issued a statement saying it sympathizes with all groups affected by AIDS but said the demonstration was ''misdirected.''

''The company has been a leader in dealing with AIDS-related illnesses in both its Prudential Foundation grant programs and in the conduct of its own businesses,'' the company said.

Money needs to be transferred from other budgets into health care, said Debbie Gould, spokeswoman for ACT-UP.

''Health care delivery in this country is in total crisis, particularly for people with AIDS,'' Gould said. ''We're not competing with cancer activists (for money). The competition is with the defense budget.''

#90113u1791 04/23/1990 ~United Press International

WASHINGTON (APRIL 23) UPI - More consumers took out traditional second

mortgage loans than home-equity lines of credit in 1989, the Consumer Bankers Association said Monday.

According to the association's 1990 Home Equity and Mortgage Lending Study larger banks and thrifts approved an average 1,280 new home-equity open-end lines in 1989, compared to 1,892 closed-end loans, as second mortgages are called by banks.

The average approved new line in 1989 was $33,305. The average second mortgage loan was $24,463. Lenders extended average new open-end credit of $46.6 million in 1989, compared to $45.6 million of new closed-end credit. The association said that the percent of lenders charging fees for various loan-processing activities increased in 1989 over 1988.

During 1989, 65 percent of lender charged appraisal fees averaging $155, and 64 percent charged recording fees, averaging $23. Title insurance was charged by 40 percent, and annual fees were charged by 37 percent.

According to the report, 29 percent of lenders allowed open-end borrowers to convert their lines from a variable interest rate to a fixed rate, and 38 percent allowed second mortgage borrowers to make interest-only payments.

#90113u1808 04/23/1990 ~United Press International

CHICAGO (APRIL 23) UPI - Merger and acquisition activity declined in the first quarter of 1990, due largely to the collapse of the junk bond market, but the number of foreign bidders for U.S. firms increased, W.T. Grimm reported Monday. "Buyers have become more cautious, rethinking and recalculating the risk of highly leveraged deals," said W.T. Grimm Vice President Barbara Best.

The report showed the number of mergers and acquisitions announced during the quarter dropped to 597, down 13 percent compared with 685 in the first quarter of 1989.

The total value of mergers and acquisitions announced during the quarter was down 38 percent, to $34.3 billion compared with $55 billion in the year-ago quarter.

The average price of deals announced during the quarter fell 31 percent to $128.5 million, compared with $187.4 million in the 1989 period. The median also fell 31 percent - to $21 million compared with $30.5 million.

W.T. Grimm research director Beth Rosecrans attributed the decline in merger and acquisition activity to the collapse of the junk bond market in 1989, which has made it difficult to finance highly leveraged buyouts.

"Consequently, the total value of the ten largest deals announced in the 1990 first quarter was only $15.7 billion, which was less than the value of the largest transaction announced in 1989 - the $16.1 billion statutory merger of Smithkline Beckman Corp. and Beecham Group PLC," she said.

The biggest transaction announced in the first quarter of this year was the $4.4 billion employee buyout bid for UAL Corp., parent of United Airlines. The pending buyout, if completed, would make UAL the biggest employee-owned company in the world.

But Roescrans said the UAL bid is indicative of the weakening of the merger-and-acquisiton market. The new bid is 32 percent below last year's failed $6.5 billion bid for UAL, which collapsed Oct. 13 for lack of financing. And it is 62 percent lower than the biggest deal announced last year - the $11.7 billion Time Inc. bid for Warner Communications.

One thing, however, was atypical about the UAL bid. British Airways was a participant in the failed filed $6.5 bid for UAL last year. There was no

foreign participant in the new bid.

But the W.T. Grimm survey showed increased foreign interest in U.S. firms. The number of foreign corporations bidding for American companies increased 31 percent - to 93 compared with 71 in last year's first quarter. More than half of the foreign bids came from corporations in the United Kingdom, Japan, France, and Canada.

Companies in the United Kingdom were involved in the most deals - announcing 24 potential purchases in the first quarter, up 33 percent compared with 18 in the year ago period.

Japanese firms announced 15 proposed acquisitions - up 36 percent compared with 11 in last year's first quarter. Proposed mergers and acquisitions of American companies by French firms increased more than 266 percent, to 11 compared with three in the initial quarter of 1989.

Canada remained one of the most bullish foreign investers in U.S. companies, with 12 deals announced by Canadian firms, but the number was down 20 percent compared with 15 a year ago.

W.T. Grimm & Co., headquartered in suburban Schaumburg, is a unit of Merrill Lynch Business Brokerage and Valuation and has specialized in the purchase, sale and merger of companies for more than 36 years.

It publishes the Mergerstat Review, and its merger data bank is one of the oldest and most extensive in the world, containing records of some 80,000 transactions dating back to 1963.

#90113u1819 04/23/1990 ~United Press International

WASHINGTON (APRIL 23) UPI - President Bush, declaring that he wants to get ''the biggest bang for the federal buck,'' pledged Monday that ''government must keep pace and will keep pace'' with accelerating basic scientific research.

In an address to the annual meeting of the National Academy of Sciences, established by Abraham Lincoln in 1863, Bush urged the nation's scientists to promote congressional support for the super collider and the space agency budget.

He said on the vote coming up this week on the super collider will determine whether the the United States will remain ''on the leading edge of advancing human knowledge and pushing the limits of space exploration.''

He also noted that the space shuttle that will lift off Tuesday morning will carry the Hubble Telescope, which he called ''the most sophisticated

celestial object that mankind has ever built ... with the power to see to the ends of the universe and back to the birth of time.''

''Because the pace of science accelerates, I believe that government must keep pace - and will keep pace,'' he said.

''We want to advance America's tradition of innovation - and we intend to get the biggest bang for the federal buck,''Bush said.

He explained that the administration has taken steps to reinvigorate the Federal Coordinating Council for Science, Engineering and Technology to assure that federal investments in research and development are closely integrated across agency boundaries.

In addition, he said the administration has created an Interagency Working Group that will closely link science and technology considerations with the domestic policy making councils in the White House.

Bush said he wanted to reaffirm two other priorities that included the goal to make American students first in the world in science and math achievement by the end of the century and to convince more women and minorities to study science.

He asked industrial and business communities to create new alliances for education, mobilizing more of the nation's technical resources ''for the sake of the future.''

#90113u1839 04/23/1990 ~United Press International

NICOSIA (APRIL 23) UPI - Algeria's national oil company has signed an agreement with U.S. and French firms to build a liquid helium and nitrogen plant, an oil industry newsletter said Friday.

The Nicosia, Cyprus-based Middle East Economic Survey (MEES) said Algeria's national oil company Sonatrach, the U.S. company Air Products and Chemicals Inc., Allentown, Pa. and France's L'Aire Liquide S.A., signed a joint-venture agreement April 16.

The new plant, to be called Helios, is to be constructed at Bethioua, West Algeria, and will have an annual production capacity of 16 million cubic meters of helium and 33,000 tons of liquid and gaseous nitrogen. The report did not say when construction would begin. MEES said all the helium produced would be exported.

#90113u1845 04/23/1990 ~United Press International

PARIS (APRIL 23) UPI - Romanian television vowed Monday to legally pursue those responsible for selling the unexpurgated videotape of the trial and execution of dictator Nikolai Ceausescu and his wife, Elena, to a French television station.

''We are going to find the source of this leak and its authors, Romanians or foreigners, will be pursued,'' Razvan Theodorescu, president of Romanian Free Television, said in an interview with Le Monde newspaper.

Theodorescu said he did not blame the French channel TF1 because it had been ''duped'' by whoever provided the film, which was aired in France Sunday evening.

The video showed Ceausescu going to his death on Christmas Day, weeping with his hands bound behind his back and his wife, Elena, yelling terrified at his side.

Romanian television also showed a video of the trial and execution Sunday night but it was censored to remove some of the more harrowing scenes such as the binding of Elena Ceasescu's hands behind her back.

Theodorescu said the tape TF1 obtained had not been obtained from Romanian television. ''It (the TF1 tape) was obtained before, when the tape still was at the prime minister's office.''

He said he first had seen his video material April 17 and decided to air it Sunday ''exactly four months after the start of the revolution.'' The Bucharest government agreed ''even if it was not very sure.''

''It was the first suitable moment after the revolution to release a document that still is of this epoch.''

Cuts were made in the video aired in Bucharest because certain scenes were ''uninteresting'' while others were of poor quality, Theodorescu said. A scene of the burial of the dictator and his wife was cut because it included a shot of a neighboring grave bearing a cross that could have led to identification of the burial site, he said.

Some Romanian sources say the two were buried at the military cemetery of Ghencea, in the southwestern outskirts of Bucharest. The judge who headed the tribunal thar sentenced the couple to death, Gen. Georgica Popa, was buried there after he committed suicide March 1.

The head of TF1 for his part denied claims that his station had purchased a pirated version of the gruesome film.

''We were able to obtain this cassette because we had very close relations with Romania after the events there,'' said TF1 President Patrick Le Lay.

''We were offered the unedited cassette of the trial and we did not pirate anyone.''

TF1 paid $8,700 for the 90-minute cassette and world rights to the grisly scenes, a price that was ''not expensive,'' said Le Lay. Etienne Mougeotte deputy president of TF1 said that the document was ''priceless.''

The film showed a 10-man tribunal, most of them senior military officers, trying and sentencing the Communist tyrant. The tribunal included Deputy Prime Minister Gelu Voican and a philosophy lecturer called Magurien, who TF1 said was a Securitate secret police colonel who subsequently became a senior aide to President Ion Iliescu.

#90113u1865 04/23/1990 ~United Press International

ROME (APRIL 23) UPI - Italy and the Soviet Union signed an agreement Monday to collaborate in efforts to curb organized crime and drug trafficking.

The accord, signed by Interior Minister Antonio Gava and his Soviet counterpart Vadim Bakatin, was part of a series of cooperation agreements proposed during Soviet President Mikhail Gorbachev's visit to Italy last year.

Bakatin told reporters links between organized crime gangs in Italy and the Soviet Union already exist, with the Soviet gangs more interested in obtaining arms than in drug trafficking.

He said drug trafficking accounts for only around 1 percent of Soviet crime, but economic crime is developing fast.

Under the Italian-Soviet accord, a committee will be formed headed by Gava and Bakatin and composed of police officials and other experts in organized crime activities.

Measures planned include stepped-up police surveillance at airports, seaports and railroad stations and tighter economic controls aimed at uncovering illegal financial transactions and the ''laundering'' of profits from organized crime.

The Soviet minister said Moscow hoped to benefit from the prestige and experience of Italian police in combatting terrorism and drug trafficking and is particularly interested in the action of the Italian Finance Police who man the frontier posts and investigate suspect bank accounts and financial deals.

#90113u1890 04/23/1990 ~United Press International

DUGIT, Israeli-occupied Gaza Strip (APRIL 23) UPI - Five pre-fabricated houses were erected at the newest Israeli settlement in the Gaza Strip Monday as tension mounted over efforts by the transitional government to strengthen the Jewish presence in Arab areas.

Elsewhere in the Gaza Strip, Israeli soldiers shot and wounded nine Arabs, including a 60-year-old woman, during clashes, Palestinian sources said. Also, two Palestinians - one from Gaza and one from the West Bank - died in hospitals from wounds they received Sunday during clashes with the army.

As builders put the ready-made houses into place, bulldozers continued to level land for the settlement of Dugit, the third Israeli community built in Gaza Strip under the 1988 coalition agreement between the Labor and Likud parties.

Zvi Handel, head of the Gaza Council, said 250 Jewish families would live on the 40 acres of land. The settlement, which is opposed by Palestinians, is less than a half-mile from the U.N.-run Jabalia refugee camp.

About 100 yards from the edge of the new settlement is the simple house of an Arab family. Asked about the new neighbors, one Arab said, ''If they want to settle here, they must be quiet and not annoy us.''

An Israeli flag was put atop one of the new houses. Handel said he hoped the new families would occupy the houses by Israel's Independence Day on April 30.

He said he hoped the Jewish settlers could support themselves by fishing and tourism. Despite long stretches of undeveloped beaches, tourists avoid the Gaza Strip because of its poverty and the daily violent clashes between soldiers and young Palestinians.

The founding of Dugit comes amid increasing tension over Israeli efforts to expand settlements in Arab areas during the transitional government of right-wing Prime Minister Yitzhak Shamir. On Sunday, the Housing Ministry admitted government funds had been used to buy the lease of a house owned by the Greek Orthodox Church in Jerusalem's Christian Quarter.

Last week, a government official close to Shamir asked the Justice Department to prepare the necessary legal work to expand two Jewish settlements in the West Bank cities of Nablus and Hebron.

Members of the Israeli Peace Now movement gathered at the Erez Checkpoint to the Gaza Strip to protest the new settlement Monday. Under the 1988 agreement, three settlements would be constructed in the Gaza Strip and five in the West Bank.

In the Gaza Strip Monday, residents were angered by reports that a two-day general strike called by the underground leadership of the Palestinian uprising was not being observed in the West Bank.

For the first time since the start of the 28-month-old uprising, activists in three West Bank towns ordered merchants to stay open on Sunday, the first strike day.

Bowing to public demand, the local leadership in East Jerusalem rescinded Monday's strike call to allow Moslems to shop for this week's Id al-Fitr holiday, which marks the end of Ramadan, the Moslem holy month of fasting.

Many Gaza residents were angry that they had observed the two-day strike, in addition to a strike Friday called by the fundamentalist Islamic Resistance Movement.

On Saturday, the army closed off Omar Al Muktar Street, Gaza City's main commercial thoroughfare, and the adjacent vegetable market, leaving Tuesday as the only day for holiday shopping.

#90113u1896 04/23/1990 ~United Press International
WASHINGTON (APRIL 23) UPI - Yields for 13-week and 26-week T-bills increased Monday at the government's weekly auction.

The Treasury Department auctioned $8.2 billion of 13-week bills at an average discount of 7.78 percent, up from 7.71 percent at last week's auction and the highest since April 9, when the auction yielded 7.80 percent.

The government also sold $8.2 billion of 26-week bills at an average discount of 7.91 percent, up from 7.75 percent last week and the lowest rate since March 19, when the rate stood at 7.92 percent. The discount rate understates the actual yield to investors.

The investment, or coupon-equivalent, rate was 8.05 percent on the 13-week bills at an average price of $9,803.30 per $10,000 face value. The investment rate on the 26-week bill was 8.35 percent at an average of $9,600.10 per $10,000.

#90113u1911 04/23/1990 ~United Press International
(APRIL 23) UPI - American hostage Robert Polhill is free and receiving medical attention at a hospital in Wiesbaden, West Germany. Iran said today that Polhill's release may be a prelude to the release of other Western hostages held in Lebanon... but U-S officials insist they are NOT negotiating with Iran. Tehran radio says- ''it is possible that steps will be taken for the release of other Western hostasges.''

The Soviet Union may be softening its stance on Lithuania by proposing that the Baltic state freeze independence laws for two years in return for Kremlin talks. So far, there's NO official Lithuanian response. A Soviet government spokesman says that if Lithuania wants the independence laws ''to stand for history, then that is O-K.''

In Washington, the White House today welcomed the news from the Soviet Union that Lithuania can keep its independence laws during talks with Moscow. Spokesman Marlin Fitzwater says it appears to be a sign of flexibility that may ease the crisis in the Baltic republic. President Bush talks with congressional leaders tomorrow on possible counter-measures against Moscow if it continues to crack down on Lithuania.

The Supreme Court stepped into a domestic quarrel over beer to decide a jury selection dispute. The court will hear legal arguments next year in the case of a woman convicted in 1986 of shooting her husband in the shoulder after he knocked over a Christmas tree and took away her beer.

The government is appealing a lower court ruling that overturned the conviction.

NEW YORK (APRIL 23) UPI - Santitation crews scooped up 154.3 tons of litter left by Earth Day celebrants in Central Park by midday Monday and were still cleaning up after what the city parks commissioner called a ''fabulous event.''

Altogether, an estimated 1 million participants in the Sunday observance in various parts of the city left more than 165 tons of trash behind them, according to police, sanitation and parks department spokesmen.

''It's massive,'' said Skip Garrett of the Parks Department. ''Our cleanup force has taken 150 tons of trash and 4.3 tons of material left in recycling receptacles from Central Park this morning and there's still a hell of a lot of cleaning up to do.''

Garrett said the five-hour combined rally and pop music concert on the mall's Great Lawn drew 750,000 people, the largest crowd since a July 4 concert by the New York Philharmonic attracted 800,000 to the same area in 1986.

No figure for the amount of trash left by the Philharmonic audience was available, but Parks Commisioner Betsy Gotbaum had nothing but praise for the Earth Day crowd

''They picked up after themselves,'' she commented. ''They are to be congratulated. In conclusion, it was a fabulous event.''

Garrett said debris spilled over from the vast green into neighboring wooded areas and even found its way into trees, which some celebrants climbed to get a better view of the festivities. He said 50 park sanitation men worked throughout the night and 20 were assigned to the project on Monday.

''There is some overtime involved,'' he said. ''I don't know just how much at this point.''

Another Earth Day observance, an all-day street fair for environmental organizations and food vendors on Sixth Avenue, resulted in 8 tons of refuse left along the 17-block venue and in litter baskets, according to Vito Turso, spokesman for the sanitation department.

''These people didn't leave as much behind as people who attend food fairs do,'' Turso said. ''It was an environmentally sensitive crowd.''

Turso said 7.7 additional tons of recyclables were collected from special stations set up Sudnay in Central Park, Queens and Brooklyn, including 4 tons of metal and glass and 3.7 tons of paper.

(APRIL 23) UPI - In Atlanta, a steady stream of mourners is filing past the coffin of civil rights leader Ralph abernathy at the Baptist Church where he preached for 29 years. Abernathy was eulogized yesterday as a man whose gentle spirit was NEVER broken by the physicial and mental attacks he suffered in the civil rights struggle. Abernathy died Tuesday of a heart attack. He was 64.

The space shuttle Discovery has been cleared for tomorrow's blastoff on a critical flight to launch the Hubble Space Telescope. A NASA spokesman says space agency managers this morning held a traditional launch-minus-one-day review at the Kennedy Space Center and declared the orbiter and its costly payload fit for flight. Acceptable weather is predicted for liftoff time.

Preliminary results are coming in from Yugoslavia, where free elections were held yesterday for the first time in 50 years. Initial returns show a that veteran communist party leader beat Slovenia's opposition leader to win the state presidency. Election officials say early results indicate that the opposition Democratic Community had an edge over the ruling Communist party.

#90113u1931 04/23/1990 ~United Press International

RALEIGH, N.C. (APRIL 23) UPI - Les Robinson, who guided East Tennessee State to the NCAA Tournament the past two seasons, Monday was named head coach of the troubled North Carolina State basketball program, succeeding ousted Jim Valvano.

''This is a very big day, one of the biggest days of my life,'' said Robinson, 47, in a news conference at Reynolds Coliseum, where the 1965 N.C. State graduate once played.

''I'm aware it's going to be a tough job. It's going to be a very tough job, but it's a great job. There's no position in America that I'd rather have than this,'' said Robinson. ''I'm going to be here till they run me off.''

Robinson had been the top candidate for the Wolfpack job since Valvano's departure was apparent two months ago. University trustees voted to fire

Valvano citing poor academic performances of his players.

Robinson, who arrived in Raleigh Sunday and met with the team, said he will stress academics in the basketball program.

''It's almost as if school and books became negative,'' said Robinson. ''It can mesh and go together. It can be a happy relationship.''

Robinson also acknowledged that the Wolfpack program will need to heal following investigations, NCAA penalties and the firing of Valvano.

''I understand (the players) lost a man they love very much,'' said Robinson. ''They've been through a lot. What I admire about them is what I'm going to demand, loyalty.''

Robinson's hiring completes N.C. State's athletic hierachy. Connecticut athletic director Todd Turner was appointed last week as Wolfpack athletic director, effective July 1.

Robinson, who also served as athletic director at East Tennessee, compiled an 83-67 record for the Buccaneers over the past five seasons. east Tennesse was 27-7 this past season, including a 92-82 victory at N.C. State in December.

Robinson, 47, who grew up in St. Albans, W.Va., coached The Citadel from 1975-85 where he racked up a 132-162 record.

East Tennessee, under his direction, was 27-7 last season, losing to Georgia Tech in the first round of the NCAA tournament.

Valvano was fired April 7 in a more than $600,000 buy out of his five-year contract with the Wolfpack. The university paid the 10-year coach $238,000 to leave and the Wolfpack Club, a booster group, paid the balance.

#90113u1961 04/23/1990 ~United Press International

WASHINGTON (APRIL 23) UPI - Ronald Roskens, a former educator, was sworn in Monday as the new administrator of the U.S. Agency for International Development, supervising $6 billion in annual economic assistance.

Roskens, a former president of the University of Nebraska, replaces Alan Woods, who died last year of cancer.

At a ceremony for Roskens, Secretary of State James Baker said the administration wants AID to adapt to the changing conditions of the 1990s by spending more effort on the encouragement of democratic institutions.

''We must help consolidate the worldwide trend toward democracy,'' said Baker. As examples of the new tasks for AID, he listed voter registration, poll-monitoring and election observer teams.

Baker said the administration also wants AID to foster strong free-market economies and to take a more active role in transnational threats - envirionmental degradation, drug trafficking and terrorism.

After being sworn in, Roskens said, ''We must advance as an institution to keep pace with the times.''

''If we are to embody the hope of global peace and prosperity, then we must envision economic, political and social support commensurate with the explosion of this new dawn of democracy.''

But, he said, despite the dramatic changes in the world, ''There remains one cruel constant: the specter of poverty.''

The agency was in the process of re-examining its goals and techniques when Woods died. In his final reports to the president and Congress, Woods concluded that AID was not able to make a universal dent on poverty through traditional aid-giving techniques, and that fostering free market economies was probably a more useful path than simply alleviating misery

by handing out money to the world's neediest nations.

Baker is also pledged to break the hold that Congress holds over the distribution of economic assistance - the so-called earmarks that are made part of the Foreign Aid Act and which specify exactly how much money will go to favored recipients, such as Israel and Turkey.

#90113u1990 04/23/1990 ~United Press International

WASHINGTON (APRIL 23) UPI - Government officials and air freight executives from Kentucky and Ohio testified before an administrative law judge Monday seeking rights to a new air cargo route between the United States and Japan.

The coveted route, which means increased jobs and revenue, will be awarded to either Emery Air Freight Corp., which operates its hub in Dayton, Ohio, or United Parcel Service of America Inc., which bases its hub in Louisville, Ky. The location of the route is considered key to attracting Japanese investment and businesses to either state.

Kentucky is home to 61 Japanese companies, including Toyota Motor Corp., which operates a compact car assembly plant in Georgetown. Ohio has attracted about 180 Japanese companies, including Honda Motor Co., which operates an assembly plant in Marysville.

"This would be important to companies like Honda that have made major investments in Ohio," said Ohio Lt. Gov. Paul Leonard. "We think its a natural. The state of Ohio has been very aggressive in the international marketplace," Leonard added. "There is a special bond between Ohio and Japan."

"This route will mean many more jobs and greater investment. That's what we're looking for," countered Kentucky Gov. Wallace Wilkinson. United Parcel presently employs about 7,000 workers at its Louisville hub. Emery's hub employs about 2,000 workers.

A spokesman for the Department of Transportation said the route will not be awarded until the fall. Administrative Law Judge Burton Kolko, who heard testimony Monday, is not expected to issue an opinion until June.

Kolko heard testimony from a variety of witnesses, including Wilkinson, Leonard, Sen. Mitch McConnell, R-Ky., Dayton Mayor Richard Dixon, and executives from both Emery and UPS.

The new route became available as part of last November's U.S.-Japan bilateral aviation agreement to expand air services between the two nations. Two U.S. airlines, Federal Express and Northwest, now offer all-cargo service between the United States and Japan, operating 40 cargo flights weekly.

#90113u1992 04/23/1990 ~United Press International

KATMANDU, Nepal (APRIL 23) UPI - Chaotic street battles pitting supporters of Nepal's ousted hard-line regime against police and bands of vigilantes left at least 18 people dead Monday and prompted orders for army troops to kill violators of an all-night curfew.

Prime Minister Krishna Prashad Bhattarai and King Birendra discussed the deteriorating situation Monday evening, but their talks were inconclusive, government sources said.

The prime minister issued a statement affirming he was in control. ''Both the king and people have faith in the interim government,'' he said.

Bhattarai made an apparent reference to gangs of thugs reportedly loyal to the previous government, but suggested he supported the response of groups of vigilantes who support the new pro-democracy government.

''The reactionaries are rearing their heads,'' he said. ''People have demonstrated their vigilance against such elements.''

Bhattarai was installed as head of Nepal's first multi-party government in 29 years last week following six weeks of demonstrations led by his opposition Nepali Congress Party. The pressure resulted in the legalization of political parties and abandonment of Nepal's so-called panchayat system of local and national councils, which were controlled by the Harvard-educated king.

Despite the sweeping political changes, strikes and street violence have plagued the capital, Katmandu.

State-owned Radio Nepal Monday announced a citywide 8 p.m.-to-6 a.m. curfew.

''Anybody defying the orders will be shot,'' warned a radio broadcast on the orders given by authorities for the Nepalese army to shoot to kill anyone who violates the curfew.

Several Katmandu citizens reported receiving telephone threats that the municipal water supply would be poisoned. United Press International received similar threatening calls.

Hotels were asked to inform tourists not to go outside during the curfew. Bus operators were told not to go out on long routes.

Unusually tight security was in placw around the presidential palace late

Monday with at least 10 soldiers wearing camouflage uniforms and carrying semiautomatic rifles emerging from the palace to guard the building. All approaches to the palace were blocked.

''The curfew will be an inconvenience to the people but it will increase the sense of security,'' Bhattarai said.

Angry demonstrators, charging that lawlessness in Katmandu was part of a plot by followers of the panchayat system to cast the new pro-democracy government in a bad light, marched to the center of the capital, where witnesses and hospital officials said police opened fire.

Some of the demonstrators entered a district police office shouting anti-police slogans and officers rushed to rooftops, throwing stones at them, witnesses said. The protesters also set ablaze the office of the chief administrator of Katmandu.

At least nine people were killed in police gunfire and 22 shot and wounded in several sections of the city, some of them outside district police headquarters, hospitals and residents said.

''We were demonstrating in front of the secretariat. Suddenly, police charged from behind beating us,'' said Jhalan Shrestha, one of the wounded being treated at Bir Hospital.

Five people were killed in unrest in Kalankisthan in the southwest part of the city, residents reported.

The unrest apparently was triggered by alleged robbery attempts.

Four men in uniform were beaten and killed by vigilantes in Teku after they reportedly were discovered trying to rob houses about 3 a.m., witnesses reported. Another man was beaten severely and paraded through the streets, his uniform in tatters, they said.

The bodies of the four men beaten to death were left in the steet, residents of Teku said, and three police vehicles were burned by an angry crowd that gathered in the predawn darkness.

Vigilante groups armed with sticks and other crude weapons have been standing guard nightly every 100 yards along the city streets, stopping cars and people asking for their identification.

At least 52 people were killed in the pro-democracy movement leading up to the legalization of political parties.

#90113u1997 04/23/1990 ~United Press International

WASHINGTON (APRIL 23) UPI - Members of the House Agriculture Committee will have to tear up most of their outline for the new farm policy law if they are going to meet budget limits, Agriculture Secretary Clayton Yeutter said Monday.

"It seems to me the full committee has no choice but to modify (subcommittee recommendations) in a major way," Yeutter said in response to questions at the annual National Association of Agricultural Journalists meeting.

"Something has to give in this process. My view is the action by (Budget Committee Chairman Leon) Panetta ... has made (recommendations) by the subcommittees irrelevant."

Panetta told Agriculture Committee members last week they would have to cut $900 million out of farm spending in fiscal 1991 with larger cuts expected in the following years.

Agriculture subcommittees, however, have given first-round approval to proposals that would add $6 billion to crop subsidy spending over the next five years as well as calling for inflation escalators for cotton, rice, and sugar and a more expensive dairy program than the administration wants.

The wheat, soybeans and feed grains subcommittee took a one-week break in drafting its portion of the farm bill in order to try to reduce the cost of it. The panel was scheduled to meet Thursday.

A major unresolved issue for the subcommittee is whether to create a "marketing loan" program for soybeans and other oilseed crops. The cost could range from $500 million over five years to as much as $4.8 billion, depending on the loan formula and the impact on other crops.

Cotton and rice already operate under the marketing loan concept. In it, farmers with a government loan on their crops can sell them at the usually lower world price and pocket the difference between the sale price and the loan rate.

House Agriculture Committee Chairman Kika de la Garza has said he wants the full committee to begin work on the farm bill May 2. The Senate Agriculture Committee has approved export and food-aid language for its version of the farm bill but has not yet begun work on crop support programs.

#90113u1998 04/23/1990 ~United Press International

WASHINGTON (APRIL 23) UPI - President Bush signed into law Monday the Hate

Crimes Statistics Act, which requires the attorney general to collect information on crimes motivated by bigotry.

In brief remarks, Bush said the bill ''is an important further step toward the protection of all Americans' civil rights and pledged the administration will work with Congress to determine whether new law enforcement measures ''are needed to bring hate-mongers out of hiding and into the light of justice.''

He announced that the Justice Department is establishing a new toll-free phone number (1-800-347-HATE) for reporting complaints of hate crimes that will go into operation at 4:30 p.m. EDT, April 30.

''The faster we can find out about these hideous crimes, the faster we can track down the bigots who commit them,''he added.

Bush pledged ''to use this noble office - this bully pulpit - to speak out against hate and discrimination where it exists.''

''Justice for all has been the historic mission of the civil rights movement,'' said Bush. ''And it is a mission still to be fulfilled. Bigotry and hate still exist in this country, and hate breeds violence threatening the security of our entire society.''

''We must rid our communities of the poison we call prejudice, bias and discrimination,'' he declared.

''Enacting this law today helps move us toward our dream - a society blind to prejudice, a society open to all,'' he asserted.

-30- 1643

#90113u2009 04/23/1990 ~United Press International

UNITED NATIONS (APRIL 23) UPI - West Germany told the United Nations Monday a new "social market economy" will emerge as Central and Eastern European countries get away from state-run economies, but they would not follow the path of "ruthless capitalism."

Jergen Warnke, the West German Minister for Economic Cooperation, and Hans-Wilhelm Ebeling, his counterpart from East Germany, also said during the General Assembly's week-long economic session that the two countries will have similar aid programs for developing countries.

Warnke said the introduction of a market economy in Central and Eastern Europe, whose nations are enjoying an "economic upswing," will generate more demands for goods from the Third World.

"There are already signs that Central and Eastern Europe may become an

engine for progress and development in the world," Warnke said. He said the centrally planned and state-run economies of communist countries were heading to a "dead end."

"The alternative, however, is not the ugly face of ruthless capitalism," Warnke said. "There is a third way: social market economy, an economic order in which the free play of market forces is held in check by social and ecological responsibility."

The social market economy developed in West Germany after World War II and was called an economic miracle because of the country's successful reconstruction.

East-West detente will free defense funds that will be released to industrial countries as well as to the Third World and that will offer a greater latitude in the area of development aid, Warnke said. He called for open markets and a global economy, saying: "There will be no trading fortress in Europe in 1992 if my government has its way."

West German authorities estimated that cuts in defense spending would free about $300 million in their 1990 federal budget and that this amount would increase in coming years.

The General Assembly's week-long session on international economic cooperation began Monday with an opening address by Enrique Garcia, Bolivia's Minister of Planning and Coordination Enrique Garcia, who spoke on behalf of a group comprising 125 developing countries.

Garcia said developing countries' demands include solving the debt problem reversing protectionist practices, increasing net flows of capital and making international cooperation more effective.

Eberling said East Germany will strive to become an equal partner in a "New Europe," although he conceded change in his country is "too new, the emotion too fresh."

Like Warnke, Eberling said a unified Germany will keep its commitment to developing countries. Assistance from East Germany "must never again serve to oppress, exploit, and make people suffer," and future aid efforts will reflect "joint endeavors with similar programs of the Federal Republic of Germany," he said.

"As the process of unification of the two states in Germany goes on, there will be increasingly a single German commitment in the countries of the Third World."

Warnke and Ebeling, who came to New York together Sunday on a West German air force plane, will travel to Managua, Nicaragua, for the inauguration

of President Violetta Chamorro Wednesday.

#90113u2011 04/23/1990 ~United Press International
WASHINGTON (APRIL 23) UPI - Current senators received $96.3 million in political action committee money from 1983-88, with financial industry PACs, such as those representing the savings and loan industry, being the most generous, a Common Cause study said Monday.

The self-styled public interest group added that Sen. Lloyd Bentsen, D-Texas, the head of the Senate Finance Committee, led all 99 senators in PAC contributions during the six years, pulling in nearly $2.6 million.

Overall, it said 44 current senators received more than $1 million each from PACs during the six years.

In terms of the interests represented by the PACs, financial institutions led the way, donating $8.5 million to the campaigns of current senators. Other groups were energy PACs with $7 million, insurance PACs at $5.8 million and what Common Cause defined as pro-Israel PACs at $4.8 million, Common Cause said.

The report was part of a series of studies done by Common Cause, which is pushing for Congress to reform campaign finance laws.

The Senate is expected to begin debate on a reform bill later this week and sponsors believe it may have an improved chance of passage because of public outrage over campaign contributions, such as those made by Charles Keating of California's failed Lincoln Savings and Loan Association.

The study showed that 22 of the current 99 senators received more than $125,000 from finance PACs and were led by Sen. Donald Riegle, D-Mich., the chairman of the Senate Banking Committee. Riegle was one of five senators who came under fire for receiving money from Keating.

Using more broad definitions, the study said business PACs contributed $58.2 million and labor PACs gave $14.3 million to current senators in the six-year period.

During the time frame covered by the study, Congress considered several key measures related to finacial services and also enacted a major tax revision, which was drafted in large part by the Finance Committee.

WASHINGTON (APRIL 23) UPI - U.S. officials risk repeating the mistakes of Stalinist economic planners by emphasizing Eastern European development at the expense of the environment, the chairman of a House subcommittee on hazardous wastes warned Monday.

Rep. Thomas Luken, D-Ohio, holding what he said was the first congressional hearing on environmental problems in Eastern Europe, criticized legislation now before the House that he said would reduce the role of the Environmental Protection Agency in that region.

Under an aid package for Poland and Hungary approved last November, the EPA was put in charge of U.S. environmental initiatives in those nations, costing about $10 million. A new Eastern Europe aid plan would enlarge the role of the Agency for International Development, which would administer $100 million in environmental aid ''in cooperation'' with the EPA.

Luken said Eastern European countries lack experience with environmental regulation - a legacy of Josef Stalin's ''industrialization at any cost'' policies - and that the EPA would have more expertise than AID in helping them set up a regulatory system and clean up their ''ruined landscape.''

''In the rush to provide economic assistance to those ruined nations, it is imperative that we not commit the very mistakes that their own governments have made since the second world war by choosing development

at the expense of the environment,'' he said.

''By putting control of environmental assistance in the hands of AID, an agency whose very purpose is development, we could well be dooming ourselves to repeat the past.''

Administration officials testified that the new division of responsibility would help give them needed flexibility in administering environmental aid.

''This is not something being directed at EPA. ... What we have asked for is flexibility,'' said Robert Barry, special assistant to Deputy Secretary of State Lawrence Eagleburger, coordinator of U.S. aid to Eastern Europe.

Alexander Hittle, international coordinator for Friends of the Earth, an environmental group, noted that environmentalists played a key role in the recent political upheaval in Eastern Europe and warned that they could turn against capitalism if free market policies lead to greater pollution.

''A trade already exists for Western hazardous wastes going into both East Germany and Hungary,'' he said. ''If Eastern Europeans see this sort of dirty trade develop further, they will pin the blame on capitalism and the free market.''

NEW YORK (APRIL 23) UPI - The fate of fallen junk bond wizard Michael Milken could be decided in federal court Tuesday when he is expected to strike a plea bargain to settle a 98-count indictment on insider trading and other charges.

Milken, who pioneered the use of high-yield, high-risk bonds that fueled the feverish corporate takeovers of the 1980s, was expected to plead guilty to six felony counts of securities law violations and pay a record $600 million in fines and penalties.

He was scheduled to appear at 11:30 a.m. before U.S. District Court Judge

Kimba Wood, the U.S. Attorney's office said.

After lengthy negotiations, Milken reached an 11th-hour agreement Friday with federal prosecutors to settle a March 1989 indictment on 98 counts of racketeering and fraud charges, sources close to the discussions said.

Milken, who once earned as much as $550 million a year, had faced a noon deadline Friday, after which prosecutors said they would bring a new and broader indictment.

Under terms of the agreement, the former head of the junk bond department for the defunct Drexel Burnham Lambert Inc. will plead to six lesser charges rather than the insider trading and racketeering charges included in the indictment, sources said.

Milken could, however, change his mind or the court could refuse to accept the agreement.

The agreement does not rule out a possible prison term for Milken, sources said. Any prison term is likely to be less than five years, they said.

If he had been convicted of racketeering, Milken could have faced a possible sentence of 20 years in prison and been forced to forfeit much of his fortune.

Milken reportedly will plead guilty to five counts relating to unlawful securities trading and one count of filing a false tax statement. The first five counts each carry a maximum five-year prison sentence, while the sixth carries a maximum three-year term.

There were conflicting reports on whether Milken, who has steadfastly maintained his innocence, would cooperate with government investigators.

A spokesman for Milken would not elaborate on terms of the agreement.

His attorney, Arthur Liman, who served as chief counsel for the Senate committee that investigated the Iran Contra affair in 1987, could not be reached for comment.

Milken continues to face civil litigation by investors and shareholders who claim they were defrauded.

The 43-year-old financier has emerged as one of the best-known and controversial of the Wall Street figures implicated in the government's wide-ranging insider trading investigation.

The probe began in 1986 based on information from Ivan Boesky, an arbitrage genius who agreed to pay a $100 million penalty to settle

charges he traded on inside information. Boesky also pleaded guilty to a criminal charge and cooperated with prosecutors.

The first indictment against Milken was based on information provided by Boesky, but the second indictment was expected to include information supplied by other Drexel employees as well.

Milken pioneered the use of junk bonds in corporate takeovers and collected more than $1.1 billion between 1983 and 1987 from Drexel. His personal worth is estimated at almost $1 billion.

He already has put up more than $600 million as a guarantee against the amount he might have had to forfeit under a racketeering conviction.

Milken, who was based in Drexel's Beverly Hills, Calif., office, left the investment firm after Drexel pleaded guilty in 1988 to six felonies and agreed to pay $650 million in fines and penalties to settle insider trading charges.

Drexel also agreed to cooperate with the government's investigation of its former superstar. The firm filed for bankruptcy protection Feb. 13.

Under terms of the agreement, charges will be dropped against Milken's brother Lowell, who also worked for Drexel and was named in the indictment. sources said.

The effect of the agreement on the Milkens' co-defendant Bruce L. Newberg, a former Drexel trader, remained unclear but would be determined ''fairly soon,'' Newberg's attorney Fred Hafetz said.

''My view all along was this was inappropriate prosecution,'' Hafetz said.

Newberg and five members of Princeton/Newport LP were convicted in July on 63 counts of securities violations, including racketeering.

#90113u2136 04/23/1990 ~United Press International
MOSCOW (APRIL 23) UPI - Lithuania's only oil refinery closed Monday, victim of a Soviet economic blockade that cut off its crude, but a Soviet spokesman softened Moscow's demand that the republic cease in its independence drive.

Arkady Maslennikov, President Mikhail Gorbachev's chief spokesman, said Lithuania could keep its March 11 declaration of independence as long as it freezes the act for two years and accepts the authority of the Soviet Constitution during negotiations with Moscow.

''How they come back to the Soviet Constitution - by rescinding the independence laws or by freezing the laws - is secondary,'' Maslennikov said. ''If Lithuanians want (the laws) to stand for history, then that is OK.''

Lithuanian leaders did not immediately respond to the proposal, which represented a significant step back from Gorbachev's insistence that Moscow could not consider any formal talks unless the Baltic republic rescinds the unilateral independence act.

''If they come with a freeze and are ready to stop producing unconstitutional laws, this may provide a basis for negotiations,'' Maslennikov said.

While easing its political demands, the Soviet government continued to flex its economic muscle in Lithuania, where Moscow's nearly weeklong

embargo of basic raw materials forced the republic's sole oil refinery to stop operation.

Lithuanian parliament spokeswoman Claudia Sinnig said the refinery in the town of Mazeikiai, 250 miles north of Vilnius, shut down Monday. It had operated at half its production capacity since Thursday following the imposition of economic sanctions last week.

''It's not a question of a decision,'' Sinnig said. ''There is nothing (no crude oil for the refinery) to work with anymore.''

Sinnig said the republic was getting only about one-sixth of its normal supply of natural gas since Moscow closed two lines from the Latvian capital of Riga and a main from the Byelorussian capital of Minsk.

Lithuanian deputies met amid the growing economic squeeze, holding a heated debate on the status of the republic's representatives in the Soviet parliament, the official Soviet news agency Tass said.

The Lithuanian government released the text of a letter in which one of its deputy prime ministers, Romualdas Ozolas, warned Soviet Premier Nikolai Ryzhkov on Sunday that Moscow's blockade might force the republic to stop shipping products to the rest of the country.

''In connection with the abrupt decrease in the supply of natural gas and the breaking off of the supply of crude oil and other raw materials and goods, the government of the Republic of Lithuania has been forced since April 19, 1990, to convert its economy to an extraordinary regime of operation,'' the letter said.

''Further continuation of the economic blockade will unavoidably lead to a complete stoppage in the next few days of many of the republic's industrial enterprises and correspondingly to a complete halt in supplies of an entire complex of goods and wares produced by them both for the internal Soviet market and for export,'' it said.

Ozolas sent Ryzhkov a long list of products that might be cut off in Lithuania, including fertilizers, chemical fibers, plastics, engine pumps, engines and compressors for household appliances, freezers and integrated circuits and other components for electronic equipment.

Soviet television showed an agricultural-equipment plant in Vilnius where it said work shifts have already been cut back and fuel reserves would only allow another two weeks of operation.

''The problem is that it produces equipment for the largest tractor plant in the Soviet Union and makes half the spare parts for all tractor motors in the U.S.S.R.,'' the television said.

Sinnig said cars were lined up at gas stations in the republic despite a rationing program announced Friday by Algirdas Brazauskas, another deputy prime minister and head of Lithuania's independent Communist Party. Motorists are allowed 8 gallons of gasoline a month per car.

Maslennikov refused to call Moscow's cutoff of oil and natural gas a blockade or an embargo.

''The more rational redistribution of the oil and gas to satisfy other republics was a strong signal to Lithuania that there cannot be a free-for-all with this question,'' he said.

Maslennikov also indicated Moscow may try to prevent Lithuania from replacing the oil and gas from outside sources.

''Lithuania is still a part of the Soviet Union, and what can be imported or delivered is a question for the Soviet Union,'' he said.

Estonia's premier said Sunday his tiny fellow Baltic republic will do what it can to help Lithuanians cope with the Soviet sanctions, but no countries have pledged supplies despite pleas from Vilnius.

(APRIL 23) UPI - U-S officials plan to question freed American hostage Robert Polhill as soon as he's up to it. The officials say Polhill's debriefing is intended to gather information about the conditions he was under while held for 39 months by the pro-Iranian Islamic Jihad for the Liberation of Palestine. Polhill is undergoing medical tests today in Wiesbaden, West Germany.

The Bush administration is looking for clues to Iranian intentions that might signal the release of seven other American hostages. White House spokesman Marlin Fitzwater says the administration is keeping up the pressure for the release of all hostages in Lebanon.

The White House is hailing what it says is ''some flexibility'' by Moscow

in dealing with the Lithuania crisis. Spokesman Marlin Fitzwater says the Kremlin's proposal to let Lithuania keep its independence laws during negotiations with Moscow ''will be factored in'' when President Bush decides how to respond in support of Lithuania.

In Atlanta today... friends, acquaintances and parishioners filled the West Hunter Street Baptist Church for a final glimpse of the man who championed the cause of racial justice and fought to end poverty in America. Civil rights pioneer Ralph Abernathy died Tuesday of cardiac arrest. Family members say Abernathy will be carried by a mule-drawn wagon to his final resting place at Lincoln Memorial Park Cemetery.

#90113u2202 04/23/1990 ~United Press International

DALLAS (APRIL 23) UPI - Attorney General Richard Thornburgh, listing thrift fraud among seven major white collar crimes in the country, said Monday that up to 30 percent of Savings & Loan failures can be blamed on criminals within that industry.

"Attorneys from our Department of Justice Fraud Squads talk about an 'epidemic of fraud' among the S&L's presently in default," Thornburgh told a group of Dallas area business people and government relations officers. "Twenty-five to 30 percent, conservatively, of these 'thrift failures' can be laid to actual wrong-doing by miscreant bank officials."

The attorney general said the misdeeds by thrift officials - which contributed to an estimated loss of $500 billion in the industry - has compounded the harm society suffers from financial and corporate crimes.

Among other while collar crimes being vigorously investigated by his department, Thornburgh cited defense procurement fraud, insider trading, corruption among public officials, scandals in the Department of Housing and Urban Development, money laundering, and corporate violations including environmental damage.

Talking to reporters after his speech, Thornburgh held out little hope of making any substantial recovery of the money looted from thrifts. "Those who prosecuted these crimes are pessimistic to effect any substantial recovery. Some of them have dissipated, some are beyond our reach and a lot of them are collaterals which were vastly overvalued," he said.

Since white collar crimes are extremely difficult to detect, the attorney general said following the paper trail left behind by those committing such crimes has been found to be an effective method of investigation.

"That is frequently the only way we can catch white collar criminals - by picking up at the damning paper trail that can corral an embezzler, or

expose a penny stock fraud, or unravel a bogus transaction on the falsely balanced books of an S&L," he said. "What such paper trails reveal, over and over again, is a twisted, convoluted pattern of illegal manipulation for personal gain," he said.

Thornburgh paid tribute to the Dallas Bank Fraud Task Force which he said has helped produce 66 indictments and 49 convictions. The attorney general said the two-fold intent of the prosecution effort is to bring those who committed the crimes to justice and through it to create a deterrent against such crimes being committed in the future.

Thornburgh also said efforts are being made with the cooperation of other countries to stem the laundering of money, including that taken from the thrifts. "We have signed mutual assistance treaties with six countries and we have other efforts under way," he said.

(APRIL 23) UPI - The U-S Supreme Court has refused to overturn an Oregon court ruling ordering a trial in the case of a man trying to assert parental rights for a child born as the result of artificial insemination. The case deals with the artificial insemination of a woman who made a deal to share parental duties with the sperm donor. The woman, who gave birth to a daughter in 1986, wanted high court review of an Oregon court ruling that granted a trial after she refused to allow the man contact with the child.

Marilyn Quayle appeared before a House panel today and urged an ''all-out-war'' against breast and cervical cancer. But the wife of the vice president stopped short of endorsing a 50-Million-dollar plan for health screening for low-income women. A House panel is reviewing legislation to establish grants to states for preventive health screening and referral agencies for low-income women.

More bloodshed in the tiny Himalayan kingdom of Nepal. Protesters today clashed with police in violence that killed at least 16 people. The unrest prompted the government to impose an all-night curfew in Katmandu, with orders for the army to shoot to kill violators. Nepal's new prime minister issued a statement affirming that he's in control.

NEW YORK (APRIL 23) UPI - Undercover police officers will pose as cab drivers as part of a beefed-up effort to track down the attackers who have stalked Bronx cab drivers, killing as many as six in the past seven weeks, police said Monday.

''We are going to have officers driving gypsy cabs,'' said Sgt. Peter Sweeney, a police spokesman. ''Whether or not they're going to pick up passengers, we're not going to say.''

Six cab drivers have been shot in the Bronx in the past two months, sparking fears among thousands of drivers. Another driver was fatally shot in Brooklyn Saturday in an unrelated killing.

Mayor David Dinkins last weekend asked Police Commissioner Lee Brown to expand a 30-member task force that has been set up to investigate the killings.

Police said four of the killings were believed to have been committed with the same .22-caliber handgun.

The driver found Sunday was shot once behind the left ear and robbery was being considered as a motive. Investigators did not believe the killing was linked to the other deaths, said Sgt. Mary Wrensen, a police spokeswoman.

The victim, identified only as a male Pakistani, was found dead in his locked Lincoln Town Car about 6:40 a.m. in the Morris Heights section of the Bronx, said Sgt. Nick Vreeland, a police spokesman.

Taxi and Limousine Commission spokesman Tony Carter said the car was registered to Mian Mohammad Salim, of Queens, but he was unsure whether Salim was the victim.

Salim told the commission in his license application that he was affiliated with Elite Car Service on Queens Boulevard in Queens, but Elite manager Ralph Tedesco said Salim never worked for him.

A former neighbor of Salim's, Kenneth Keiley, said photographs of the dead man did not match Salim's description.

Carter said the commission, which oversees the licensing of some 82,000 cabs, was doing all it could to protect drivers - many of whom have

stopped showing up for night shifts.

He said the commission was advising drivers to double check radio dispatched fares and to store cash in a locked strongbox.

Some drivers were also talking about devising a code, such as turning off their headlights, when they felt threatened by a fare, he said.

''Do these measures really stop people from committing these horrible crimes? We don't know,'' Carter said.

There is a $20,000 reward for information leading to the arrests of the gunmen responsible for the shootings, with Gaseteria Oil Corp. and the city each offering $10,000.

#90113u2263 04/23/1990 ~United Press International

MIAMI (APRIL 23) UPI - Liquidation is not in strikebound Eastern Airlines' future, and the first task facing the carrier is ending its bitter labor dispute, the court-appointed trustee of the airline said Monday.

''This trustee is not a liquidator,'' Martin Shugrue said in his first news conference since his appointment last week by U.S. Bankruptcy Court Judge Burton Lifland in New York.

''I came here to help stem the financial losses of Eastern and make it economically viable,'' Shugrue said. ''Nobody can deny that our disruptive labor environemnt has frightened away passengers. We must establish an effective dialogue with labor leadership now.''

Shugrue insisted that bringing the carrier out of debt is not an impossible task. The carrier has lost $1.2 billion since filing for protection from creditors under Chapter 11 of the federal bankruptcy code in March 1989.

But Shugrue said it will take him several days to draft a re-organization plan to present to Lifland and the airline's creditors.

Lifland's appointment of Shugrue to run the carrier stripped control from its parent firm Texas Air Inc. and its chairman, Frank Lorenzo. Shugrue, who once ran Eastern's sister company, Continental Airlines, said he no longer has any connections with Texas Air or Lorenzo.

Eastern was forced into bankruptcy in March 1989 after the International Association of Machinists struck the carrier after months of bitter contract negotiations, during which Eastern demanded about $500 million in concessions from its unions.

The Eastern chapter of the Air Line Pilots Association and the Transportation Workers, representing the carriers flight attendants, honored the strike, effectively shutting down most of the carriers routes.

The pilots and flight attendants took down their picket lines in November 1989, leaving the machinists alone in the strike.

IAM members were on the picket line as Shugrue held his news conference in Eastern's coorperate offices in Miami. They marched in front of a wall on which someone had spray-painted, ''Trustee Equals Bye Scabs,'' in reference to the workers who crossed the picket line or where hired after the strike.

''The first step is Charlie (Bryan, head of the Eastern chapter of the IAM) and I are talking,'' Shugrue said. ''It's going to be an arduous process a lot of blood has been spilled. We need to get talks going on less than a hysterical plane.''

On Saturday, Shugrue dismissed the carrier's principal labor negotiator, Tom Matthews, the senior vice president of human resources, and replaced him with Al Gibson, a 25-year Eastern employee. He said there were no immediate plans to layoff any of the carrier's 18,000 workers.

Key to the carrier's recovery from bankruptcy is the sale of its Latin American routes to American Airlines, Shugrue said, adding that his appointment does not threaten that deal.

''That in my view is a done deal, central to our reorganization process here,'' he said.

But other transactions are subject to renegotiation because of the replacement of the Texas Air management team by Shugrue, including the $285 million the court ordered Texas Air to pay Eastern to settle claims related to a dozen transactions since 1987 in which Texas Air acquired Eastern assets at less than market value.

Asked if he would preside over the sale of the carrier, Shugrue said: ''I don't see the buyers lined up nine deep on 36th Street (outside the carrier's corporate headquarters).''

He later acknowledged that there has been new interest in buying the airline. ''There have been recently expressions of interest on part of a number of parties, but that is not our priority,'' Shugrue said.

Eastern expects to lose $330 million in 1990, $184 million more than it had projected in January.

NEW YORK (APRIL 23) UPI - Round-by-round list of Sunday's NFL draft (listing pick, team, player, position and school):

FIRST ROUND

1, Dallas (used selection in 1989 supplemental draft). 2, Indianapolis (from Atlanta), Jeff George, QB, Illinois. 3, New York Jets, Blair Thomas, RB, Penn State. 4, Phoenix (used selection in 1989 supplemental draft). 5, Seattle (from New England), Cortez Kennedy, DT, Miami. 6, Tampa Bay, Keith McCants, LB, Alabama. 7, San Diego, Junior Seau, LB, USC. 8, Chicago, Mark Carrier, S, USC. 9, Detroit, Andre Ware, QB, Houston. 10, New England (from Seattle), Chris Singleton, LB, Arizona. 11, Miami, Richmond Webb, T Texas A&M. 12, New England (from Indianapolis through Seattle), Ray Agnew DT, North Carolina St. 13. Los Angeles Raiders, Anthony Smith, DE, Arizona. 14, Cincinnati, James Francis, LB, Baylor.

15, Kansas City, Percy Snow, LB, Michigan State. 16, New Orleans, Renaldo Turnbull, DE, West Virginia. 17, Houston, Lamar Lathon, LB, Houston. 18, Buffalo, J.D. Williams, CB, Fresno State. 19, Dallas (from Pittsburgh), Emmitt Smith, RB, Florida. 20, Green Bay (from Cleveland), Tony Bennett, LB, Mississippi. 21, Green Bay, Darrell Thompson, RB, Minnesota. 22, Atlanta (from Washington), Steve Broussard, RB, Washington State. 23, Pittsburgh (from Minnesota through Dallas), Eric Green, TE, Liberty. 24, Philadelphia, Ben Smith, CB, Georgia. 25, Los Angeles Rams, Bern Brostek, C, Washington. 26, New York Giants, Rodney Hampton, RB, Georgia. 27, Denver (used selecton in 1989 supplemental draft). 28, San Francisco, Dexter Carter, RB, Florida State.

SECOND ROUND

29, Dallas, Alexander Wright, WR, Auburn. 30, Atlanta, Darion Conner, LB, Jackson State. 31, NY Jets, Reggie Rembert, WR, West Virginia. 32, Seattle (from New England), Terry Wooden, LB, Syracuse. 33, Tampa Bay, Reggie Cobb RB, Tennessee. 34, Phoenix, Anthony Thompson, RB, Indiana. 35, Chicago, Fred Washington, DT, TCU. 36, Chicago (from San Diego), Ron Cox, LB, Fresno State. 37, Seattle, Robert Blackmon, DB, Baylor. 38, Detroit, Dan Owens, DE, USC. 39, Indianapolis, Anthony Johnson, FB, Notre Dame. 40, LA Raiders, Aaron Wallace, LB, Texas A&M. 41, Cincinnati, Harold Green, RB, South Carolina. 42, Miami, Keith Sims, G, Iowa State.

43, Kansas City, Tim Grunhard, C-G, Notre Dame. 44, Houston, Jeff Alm, DE, Notre Dame. 45, Buffalo, Carwell Gardner, FB, Louisville. 46, Pittsburgh, Kenny Davidson, DE, LSU. 47, New Orleans, Vince Buck, DB, Central State (Ohio). 48, Cleveland, Leroy Hoard, RB, Michigan. 49, Washington, Andre Collins, LB, Penn State. 50, San Francisco (from Minnesota through Dallas)

Dennis Brown, DT, Washington. 51, Green Bay, Leroy Butler, DB, Florida State. 52, LA Rams, Pat Terrell, S, Notre Dame. 53, Philadelphia, Mike Bellamy, WR, Illinois. 54, NY Giants, Mike Fox, DT, West Virginia. 55, Denver, Alton Montgomery, DB, Houston. 56, San Francisco, Eric Davis, DB, Jacksonville State.

THIRD ROUND

57, Minnesota (from Dallas), Mike Jones, TE, Texas A&M. 58, Atlanta, Oliver Barnett, DE, Kentucky. 59, NY Jets, Tony Stargell, DB, Tennessee State. 60, San Diego (from Tampa Bay), Jeff Mills, LB, Nebraska. 61, Phoenix, Richard Proehl, WR, Wake Forest. 62, New England, Tommy Hodson, QB, LSU. 63, San Diego , Leo Goeas, G, Hawaii. 64, Chicago, Tim Ryan, DL, USC. 65, Detroit, Marc Spindler, DE, Pittsburgh. 66, Dallas (from Seattle through New England), Jimmie Jones, DL, Miami. 67, Chicago (from LA Raiders), Peter Tom Willis, QB, Florida St. 68, Cincinnati, Bernard Clark, LB, Miami. 69, Miami, Alfred Oglesby, DT, Houston. 70, San Diego (from Indianapolis), Walter Wilson, WR, East Carolina.

71, San Francisco (from Kansas City through Dallas), Ron Willis, WR, Florida St. 72, Buffalo, Glenn Parker, T, Arizona. 73, Pittsburgh, Neil O'Donnell, QB, Maryland. 74, New Orleans, Joel Smeenge, DE, Western Michigan. 75, Houston, Willis Peguese, DE, Miami. 76, Cleveland, Anthony Pleasant, DE, Tennessee St. 77, Minnesota, Marion Hobby, DE, Tennessee. 78 Green Bay, Bobby Houston, LB, North Carolina St. 79, Washington, Mohammed Elewonibi, G, Brigham Young. 80, Philadelphia, Fred Barnett, WR, Arkansas St. 81, LA Rams, Latin Berry, RB, Oregon. 82. NY Giants, Greg Mark, DE, Miami. 83, New England (from Denver through Dallas, Greg McMurty, WR, Michigan. 84, Pittsburgh (from San Francisco through Dallas), Craig Veasey DT, Houston.

FOURTH ROUND

85, Denver (from Dallas), Jeroy Robinson, LB, Texas A&M. 86, Indianapolis (from Atlanta), Stacey Simmons, WR, Florida. 87, NY Jets, Troy Taylor, QB, California. 88, Phoenix Travis Davis, DT, Michigan State. 89, Washington (from New England), Cary Conklin, QB, Washington. 90, Tampa Bay, Jesse Anderson, TE, Mississippi State. 91, Chicago, Tony Moss, WR, LSU. 92, San Francisco (from San Diego through LA Raiders), Dean Caliguire, C, Pittsburgh. 93, Seattle, Chris Warren, RB, Ferrum. 94, Detroit, Robert Hinckley, LB, Stanford. 95, Cincinnati, Mike Brennan, T, Notre Dame. 96, Miami, Scott Mitchell, QB, Utah. 97, Indianapolis, Bill Schultz, G, USC. 98. LA Raiders, Torin Dorn, DB, North Carolina.

99, Kansas City, Fred Jones, WR, Grambling. 100, Pittsburgh, Chris Calloway, WR, Michigan. 101, New Orleans, Demond Winston, LB, Vanderbilt. 102, Houston, Eric Still, G, Tennessee. 103, Buffalo, Eddie Fuller, RB, LSU. 104, Cleveland, Harlon Barnett, DB, Michigan State. 105, Green Bay,

Jackie Harris, TE, Northeast Louisiana. 106, Indianapolis (from Washington), Alan Grant, DB, Stanford. 107, Minnesota, Alonzo Hampton, DB, Pittsburgh. 108, Detroit (from LA Rams), Chris Oldham, DB, Oregon. 109, Indianapolis (from Philadelphia), Pat Cunningham, T, Texas A&M. 110, NY Giants, David Whitmore, DB, Stephen F. Austin. 111, Tampa Bay (from Denver), Tony Mayberry, C, Wake Forest. 112, Washington (from San Francisco through LA Raiders), Rico Labbe, DB, Boston College.

FIFTH ROUND

113, New England (from Dallas through Washington), Junior Robinson, DB, East Carolina. 114, Denver (from Atlanta through Washington and New England), Jeff Davidson, G, Ohio State. 115, NY Jets, Tony Savage, DT, Washington State. 116, New England, Jon Melander, T, Minnesota. 117, Tampa Bay, Ian Beckles, G, Indiana. 118, Phoenix, Larry Centers, RB, Stephen F. Austin. 119, Minnesota (from San Diego through Dallas), Reggie Thornton, WR, Bowling Green. 120, Chicago, Pat Chaffey, RB, Oregon State. 121, Detroit, Jeff Campbell, WR, Colorado. 122, Seattle, Eric Hayes, DT, Florida State. 123, New England (from Miami through Dallas), James Gray, RB, Texas Tech. 124, Atlanta (from Indianapolis), Reggie Redding, TE, Fullerton State. 125, Cincinnati, Lynn James, WR, Arizona State. 126, Dallas (from LA Raiders), Stan Smagala, DB, Notre Dame.

127, Kansas City, Derrick Graham, T, Appalachian State. 128, New Orleans, Charles Arbuckle, TE, UCLA. 129, Houston, Richard Newbill, LB, Miami. 130, Kansas City (from Buffalo), Ken Hackemack, DT, Texas. 131, Pittsburgh, Barry Foster, RB, Arkansas. 132, Cleveland, Rob Burnett, DE, Syracuse. 133 Washington, Brian Mitchell, RB, Southwest Louisiana. 134, Minnesota, Cedric Smith, RB, Florida. 135, Green Bay, Charles Wilson, WR, Memphis State. 136, Philadelphia, Calvin Williams, WR, Purdue. 137, NY Jets (from LA Rams), Robert McWright, DB, TCU. 138, NY Giants, Craig Kupp, QB, Pacific-Lutheran. 139, Denver, Le-Lo Lang, DB, Washington. 140, Miami (from San Francisco through Washington), Leroy Holt, RB, USC.

SIXTH ROUND

141, San Diego (from Dallas), John Friesz, QB, Idaho. 142, Atlanta, Mike Pringle, RB, Fullerton State. 143, NY Jets, Terance Mathis, WR, New Mexico. 144, Tampa Bay, Derrick Douglas, RB, Louisiana Tech. 145, Phoenix, Tyrone Shavers, WR, Lamar. 146, San Diego (from New England through Dallas), Frank Cornish, C, UCLA. 147, Chicago, John Mangum, DB, Alabama. 148, San Diego, David Pool, DB, Carson Newman. 149, Seattle, Ned Bolcar, LB, Notre Dame. 150, Detroit, Maurice Henry, LB, Kansas State. 151, Indianapolis, Tony Walker, LB, Southeast Missouri State. 152, LA Raiders, Marcus Wilson, RB, Virginia. 153, Cincinnati, Don Odegard, DB, UNLV.

154, Miami, Sean Vanhorse, DB, Howard. 155, Kansas City, Tom Sims, DT, Pittsburgh. 156, Houston, Tony Jones, WR, Texas. 157, Buffalo, John Niess,

P, Arizona. 158, Pittsburgh, Ronald Heard, WR, Bowling Green. 159, New Orleans, Mike Buck, QB, Maine. 160, Cleveland, Randy Hilliard, QB, Northwestern Louisiana. 161, New Orleans (from Minnesota through Dallas and LA Raiders), James Williams, LB, Mississippi State. 162, Green Bay, Bryce Paup, LB, Northern Iowa. 163, Washington, Kent Wells, DT, Nebraska. 164, LA Rams, Tim Stallworth, WR, Washington State. 165, Philadelphia, Kevin Thompson, DB, Oklahoma. 166, San Diego (from NY Giants through Dallas), Derrick Walker, TE, Michigan. 167, Denver, Ronnie Haliburton, TE, LSU. 168, San Francisco, Frank Pollack, T, Northern Arizona.

SEVENTH ROUND

169, Buffalo (from Dallas through New England), Brent Griffith, G, Minnesota-Duluth. 170, NY Jets (from Atlanta), Dwayne White, G, Alcorn State. 171, NY Jets, Basil Proctor, LB, West Virginia. 172, Phoenix, Johnny Johnson, RB, San Jose State. 173, Buffalo (from New England), Brent Collins, LB, Carson-Newman. 174, Tampa Bay, Donnie Gardner, DE, Kentucky. 175, San Diego, Jeff Novak, G, SW Texas State. 176, LA Raiders (from Chicago), Garry Lewis, DB, Alcorn State. 177, Detroit, Tracy Hayworth, LB, Tennessee. 178, Seattle, Bob Kula, T, Michigan State. 179, Chicago (from LA Raiders), Bill Anderson, G, Iowa. 180, Cincinnati, Craig Ogletree, LB, Auburn. 181, Cleveland (from Miami), Scott Galbraith, TE, USC. 182, Indianapolis, James Singletary, LB, East Carolina.

183, Kansas City, Dave Szott, G, Penn State. 184, Buffalo, Fred De Riggi, DT, Syracuse. 185, Pittsburgh, Dan Grayson, LB, Washington State. 186, New Orleans, Scott Hough, G, Maine. 187, Houston, Andy Murray, RB, Kentucky. 188, San Diego (from Cleveland), Joe Staysniak, T, Ohio State. 189, Green Bay, Lester Archambeau, DE, Stanford. 190, San Diego (from Washington), Nathaniel Lewis, WR, Oregon Tech. 191, Minnesota, John Levelis, LB, C.W. Post. 192, Philadelphia, Terry Strouf, G, Wisconsin-LaCrosse. 193, LA Rams Kent Elmore, P, Tennessee. 194, NY Giants, Aaron Emanuel, RB, USC. 195, Denver, Shannon Sharpe, WR, Savannah State. 196, San Diego (from San Francisco), Keith Collins, DB, Appalachian State.

EIGHTH ROUND

197, Detroit (from Dallas), Willie Green, WR, Mississippi. 198, Atlanta, Tory Epps, NT, Memphis State. 199, NY Jets, Roger Duffy, C, Penn State. 200, LA Raiders (from New England through Dallas), Arthur Jimerson, LB, Norfolk State. 201, LA Rams (from Tampa Bay), Ray Savage, LB, Virginia. 202, Phoenix, Mickey Washington, DB, Texas A&M. 203, Chicago, James Rouse, RB, Arkansas. 204, San Diego, J.J. Flannigan, RB, Colorado. 205, Seattle, Bill Hitchcock, T, Purdue. 206, Detroit, Roman Fortin, G, San Diego State. 207, Cincinnati, Doug Wellsandt, TE, Washington State. 208, Miami, Thomas Woods, WR, Tennessee. 209, Indianapolis, Ken Clark, RB, Nebraska. 210, New Orleans (from LA Raiders), Gerry Gdowski, QB, Nebraska.

211, Buffalo (from Kansas City), Marcus Patton, LB, UCLA. 212, Pittsburgh, Karl Dunbar, DT, LSU. 213, New Orleans, Derrick Carr, DE, Bowling Green. 214, Houston, Brett Tucker, DB, Nothern Illinois. 215, Buffalo (used selection in 1989 supplemental draft). 216, Cleveland, Jock Jones, LB, Virginia Tech. 217, Indianapolis (from Washington), Harvey Wilson, DB, Southern. 218, Minnesota, Craig Schlichting, DE, Wyoming. 219, Green Bay, Roger Brown, DB, Virginia Tech. 220, LA Rams, Elbert Crawford, C, Arkansas. 221, Philadelphia, Curt Dykes, T, Oregon. 222, NY Giants, Barry Vorhees, T, Cal State-Northridge. 223, Denver, Brad Leggett, C, USC. 224, San Francisco, Dwight Pickens, WR, Fresno State.

NINTH ROUND

225, Dallas, Kenneth Gant, DB, Albany State, Ga. 226, Atlanta, Darrell Jordan, LB, Northern Arizona. 227, NY Jets, Dale Dawkins, WR, Miami. 228, Tampa Bay, Terry Cook, DE, Fresno State. 229, Phoenix, David Bavaro, LB, Syracuse. 230, New England, Shawn Bouwens, G, Nebraska Wesleyan. 231, San Diego, Chris Goetz, G, Pittsburgh. 232, Chicago, Johnny Bailey, RB, Texas A&I. 233, Detroit, Jack Linn, T, West Virginia. 234, LA Raiders (from Seattle through Dallas), Leon Perry, RB, Oklahoma. 235, Miami, Phil Ross, TE, Oregon State. 236, Indianapolis, Darvell Huffman, WR, Boston U. 237, New Orleans (from LA Raiders), Broderick Graves, RB, Winston-Salem. 238, Cincinnati, Mitchell Price, DB, Tulane.

239, Kansas City, Michael Owens, RB, Syracuse. 240, New Orleans, Lonnie Brockman, LB, West Virginia. 241, Houston, Pat Coleman, WR, Mississippi. 242, Buffalo, Clarkston Hines, WR, Duke. 243, Pittsburgh, Gary Jones, DB, Texas A&M. 244, Cleveland, Eugene Powell, WR, Southern Mississippi. 245, Minnesota, Terry Allen, RB, Clemson. 246, Green Bay, Kirk Baumgartner, QB, Wisconsin-Stevens Point. 247, Washington, Tim Morley, G, Ohio State. 248, Philadelphia, Cecil Gray, DT, North Carolina. 249, LA Rams, Tony Lomack, WR, Florida. 250, NY Giants, Clint James, DE, LSU. 251, Denver, Todd Ellis QB, South Carolina. 252, San Francisco, Odell Haggins, DT, Florida State.

TENTH ROUND

NEW YORK (APRIL 23) UPI - Stock prices closed with broad, sharp losses Monday in light trading as fears about inflation and sharply rising interest rates once again took their toll on the market.

The Dow Jones industrial average, which lost 15.99 Friday, fell 29.28 to 2666.67.

Among broader market gauges, the New York Stock Exchange composite index lost 2.13 to 181.93 and Standard & Poor's 500-stock index fell 4.13 to 330.99. The price of an average share dropped 11 cents.

Declines overwhelmed advances 1,213-330 among the 1,967 issues crossing the NYSE tape. Big Board volume was 136,150,000 shares, compared with 174,260,000 shares traded Friday.

The market's tone was set early in the day. Prices opened lower as Treasury bonds extended their decline, with yields nearing nine percent. A bout of computerized program selling exacerbated the drop and prices drifted with broad, sharp losses for the rest of the day. In afternoon trading, Treasury bonds showed losses of 6/32 to trade at 95 7/32 with the yield at 8.96 percent.

"The market is having a tough time competing with the bond market," said Tom Gallagher, managing director in charge of capital commitment at Oppenheimer and Co.

Gallagher said he expected that stocks would continue to suffer as long as yields remained near where they are now. "There's just no interest on the part of anybody in buying stocks and there's a lot of selling interest above the market, so any rallies will be short-lived. If we get up near 2700 we'll see selling again," he predicted.

Gallagher also said concern about whether the Federal Reserve would boost short-term rates in light of the weakness in bonds and the unexpectedly sharp jump in March inflation weighed on prices.

Other analysts said they found a silver lining in Monday's action, mainly that the market may have seen its lows for this reaction to the sudden rise in long-term rates.

"I'm seeing some signs today that the bears have done their dastardly deed for the short term," said Alfred Goldman, market strategist with A.G. Edwards and Sons Inc. in St. Louis.

Goldman noted that some buying interest did emerge in the blue chips late in the session. "I think the market is, short term, oversold; bonds have been down 12 sessions in a row. Enough is enough. I think buyers will start showing up as soon as tomorrow," he said.

On the trading floor, Merrill Lynch was the most active issue, down 3/4 to 22 1/2, as were other securities firms.

Philip Morris followed, up 5/8 to 41 5/8. Pansophic Systems was third, plunging 5 1/8 to 10 1/2 after saying it expects break-even results for the fiscal year ending April 30. The results will include charges for closing its Brazilian unit and for writing off some assets of its graphics division, reports said.

Among the other blue chips, AT&T fell 3/4 to 40 1/4, IBM eased 1/8 to 109 1/4, Merck lost one to 73 3/8 after proposing to make its prescription drugs available to Medicaid patients at lower prices, General Electric tumbled 1 1/4 to 64 3/8, Sears fell 3/4 to 36 1/2, and General Motors fell 7/8 to 46 1/8. Coca-Cola bucked the trend, up 1/4 to 76 7/8.

Elsewhere, McDonnell Douglas sank 3 7/8 to 51 1/4 after reporting a 98 percent drop in quarterly earnings.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 164,623,030 shares, compared with 205,984,340 shares traded in the previous session.

Prices closed sharply lower in moderately active trading on the American Stock Exchange. The Amex Market Value index tumbled 3.01 to close at 344.95. Declines pounded advances 404-163 among the 806 issues traded. The price of an average share lost 11 cents. Composite volume totaled 15,527,800 shares, compared with 15,701,205 shares traded Friday.

B.A.T. Industries led the Amex issues, down 7/16 to 11 9/16. Sir James Goldsmith said he would not renew his bid for the company, which was allowed to lapse during regulatory proceedings in the United States.

The National Association of Securities Dealers composite index slumped 5.71 to 420.08.

PORTLAND, ME (APRIL 23) UPI - All documents in the divorce suit filed by

President Bush's daughter, Dorothy LeBlond, against her husband have been impounded and sealed from public view, court officials said Monday.

Bush's only daughter filed for divorce from William LeBlond in January, saying the seven-year marriage had ''broken down.''

Cumberland County Superior Court clerks said the order to seal the documents prohibited them from discussing which judge had granted it or when it was issued.

The LeBlond file had remained unsealed until early April. The couple is scheduled to go before a court mediator in mid-April.

William LeBlond's lawyer, Thomas Allen, said the case was pending but refused additional comment. Dorothy LeBlond's attorney was unavailable and has declined to discuss the lawsuit with reporters in the past.

Dorothy LeBlond's petition cited ''irreconcilable marital differences,'' but William LeBlond disputed the claim in his initial response. Her petition also sought shared parental rights for their two children; Samuel 5, and Nancy, 3.

Dorothy LeBlond, 30, is Bush's only living daughter. Another daughter, Robin, died of leukemia before her fourth birthday.

Dorothy LeBlond works as a meetings and conferences coordinator for the Maine Tourism Bureau. William LeBlond, 32, is a contractor. The couple own a house in Cape Elizabeth, a wealthy Portland suburb.

NEW YORK (APRIL 23) UPI - The Bonn government's announcement that it will convert East German wages and a large portion of savings to West German marks at a potentially inflationary one-to-one rate sent the dollar higher Monday in New York trading.

Traders said the mark fell sharply on the West German decision, long awaited in world financial markets, to convert East German wages directly to deutsche marks in the July 1 German monetary union. Bonn said the rate will apply to pensions and up to 4,000 East marks in savings.

"The amount being converted is a bit more than the market had hoped for," commented foreign exchange vice president Morris Armstrong of Girozentrale Vienna bank in New York. "The market is looking at the deutsche mark with a more negative view than it has had in quite a while."

In late New York trading, the dollar fetched 1.70 West German marks, up from 1.6875 marks Friday. Against the Japanese unit, the dollar was quoted at 157.70 yen, up from 157.45.

Friction between West German politicians and officers of the Bundesbank, the country's central bank, has also undermined the mark, said assistant vice president Carl Amendola of the Bayerische Hypotheken-und Wechsel Bank.

The Bundesbank, warning that one-to-one conversion could unleash inflation in an economically unified Germany and increase unemployment in the less-competitive East, had sought a less generous conversion rate.

But Armstrong said details of the mark conversion plans that have not yet been disclosed could mitigate the inflationary effect. Added currency analyst Terri Reid of Harris Trust & Savings Bank in Chicago: "Until it happens, the market is going to have to test the waters."

Amendola said Lithuania's decision to counter a Soviet energy blockade by halting exports of building materials made players nervous about the deutsche mark, whose strength has been tied to East Bloc reforms. "You've got a tug of war going on now," commented the trader.

Other dollar rates: 1.4940 Swiss francs, up from 1.4905; 5.7035 French francs, up from 5.6675; and 1,247.25 Italian lire, up from 1,239.50. The British pound eased to $1.6352 from $1.6380.

In Europe, the dollar mainly rose on the Lithuanian situation and on worries about inflationary fallout from German monetary union.

Alan Chase, head of strategic dealing at National Westminster Bank in London, cited fears the Lithuanian standoff "might develop into military action rather than the peaceful blockade we have at the moment."

In Frankfurt, the dollar rose to 1.6965 deutsche marks against 1.6815 Friday and strengthened in Zurich to 1.4915 Swiss francs against 1.4900. In London, the pound rose slightly to $1.6360 against $1.6350.

The dollar gained in Paris and Milan, to 5.6945 French francs against 5.6495and to 1245.30 Italian lire against 1235.25, respectively.

Earlier in Tokyo, the dollar weakened slightly against the Japanese yen in a market without news, closing at 157.55 yen against 157.60.

Republic National Bank in New York closed cash gold at $378.75 an ounce, up from $376.50 Friday. The New York Commodity Exchange settled gold at $378.90 an ounce, ahead from $376.60. In Zurich, gold rose to $375.50 an ounce from $375. London gold moved up to $376 an ounce from $375.25.

Republic closed cash silver at $5.105 an ounce, down from $5.115. Comex spot silver declined to $5.093 an ounce from $5.099. Zurich silver rose to $5.10 an ounce from $5.07. London silver fell to $5.09 an ounce from $5.10.

#90113u2427 04/23/1990 ~United Press International

ATLANTA (APRIL 23) UPI - Mourners saluted the Rev. Ralph David Abernathy as ''a five-star general in the non-violent war'' against racial injustice as thousands attending his funeral lauded the controversial autobiography that earned him the scorn of civil rights leaders in the last months of

his life.

At Abernathy's request, his family arranged for his funeral to resemble services 22 years ago for his best friend and confidant during the civil rights struggles of the 1950s and 1960s, Martin Luther King Jr.

''Martin Luther King was assassinated on Apr. 4, 1968,'' said Georgia state Rep. Tyrone Brooks, who drew a thundering ovation from the congregation when he placed a copy of Abernathy's memoirs, ''And the Walls Came Tumbling Down,'' on the speaker's podium.

''The assassination of Ralph David Abernathy began on Apr. 5, 1968, and ended on Apr. 17, 1990,'' Brooks said. ''He was crucified for 22 years,'' especially last year when civil rights leaders rebuked Abernathy for revealing details about King's alleged extramarital affairs in his autobiography.

''I urge you to read 'And the Walls Came Tumbling Down.' It was not a mistake. It was the truth.''

Abernathy died of cardiac arrest Apr. 17, 22 years and 13 days after cradling the dying King in his arms on the balcony of the Lorraine Motel in Memphis, Tenn.

''Success needs no explanation,'' said the Rev. Jesse Jackson, another of King's lieutenants. ''Ralph Abernathy is in the hall of fame. Ralph was there... when we needed him. Those of us who are the beneficiaries of his work must pay homage.''

Civil rights and political leaders used the more than four-hour service to recall the milestones - the Montgomery bus boycott, the march on Selma, Ala., and the Civil Rights Act of 1964 - achieved by Abernathy and King as they waged a peaceful fight for racial equality in the United States.

''Our country owes Ralph Abernathy a deep, lasting debt of gratitude,'' said Health and Human Service Secretary Louis Sullivan, who attended the service to express ''the deep sorrow of President and Mrs. Bush.''

Abernathy's wife Juanita, two sons and two daughters, and about 2,500 mourners filled the pews and fellowship halls of West Hunter Street Baptist Church where Abernathy preached for 29 years. Coretta Scott King, her children, Robert Kennedy Jr. and Georgia Gov. Joe Frank Harris were also on hand.

''I am the son of a giant slayer,'' said Ralph David Abernathy III, who compared his father to the biblical King David.

''With the slingshots of love ... you caused the walls of injustice to

come tumbling down,'' said Abernathy, weeping as he read an open letter to his father. ''Like David, you ran out to meet the Goliaths of your time,'' he said, referring to racism, poverty and inequality. ''And the stones sank in.''

The funeral featured passages from Psalms and Matthew and was sprinkled with Abernathy's favorite hymns, including a solo by his daughter, Juandelyn Ralphela Abernathy, of ''City Called heaven.''

Like King, Abernathy's passing rites included a memorial service and funeral. His body lay overnight for public viewing and a wooden, mule-drawn wagon was to carry his body to the tomb on a grassy knoll at Lincoln Memorial Cemetery.

While King was entombed next to his Ebenezer Baptist Church, Abernathy's final resting place was among the poor and downtrodden he championed.

The epitaph on his crypt read simply, ''I Tried.''

''I think all of us will agree that Ralph Abernathy tried, but he also succeeded,'' said Hugh Gloster, a close friend and president emeritus of Morehouse College, an historically black institution in Atlanta.

''He tried to make a commitment to mankind, and he succeeded,'' Gloster said. ''He tried to end segregation on buses ... and he succeeded. Ralph was a five-star general in the non-violent war against racial discrimination.''

Shortly before the noon service began, funeral directors draped a red velvet cloth over Abernathy's body, closed the mahogany casket and covered it with a blanket of red roses.

Wreaths of yellow daisies, white gladiolas and white carnations spelling out the letters SCLC - the organization Abernathy founded with King - flanked either side of the coffin.

Abernathy, who labored under the shadow of King, a praised orator and 1964 Nobel Peace Prize winner, wanted his body carried to the grave in a wooden cart pulled by mules because they represent humility and poverty.

BRIDGEPORT, CT (APRIL 23) UPI - Twenty-eight construction workers killed in the 1987 collapse of L'Ambiance Plaza were mourned Monday on the third anniversary of the tragedy as plans were announced for a new building on the site.

Family and loved ones dressed in black attended a memorial ceremony for the dead men and 16 others injured in New England's worst construction accident, while plans were unveiled for a $9.4 million apartment house.

''Our main purpose was to have some good rise from that debris of death,'' Senior U.S. District Judge Robert C. Zampano said of the structure to be built where L'Ambiance Plaza toppled to the ground on April 23, 1987.

Would-be rescuers worked round-the-clock for 10 days to recover all the bodies from tons of concrete and twisted steel that had led officials to compare the disaster scene to a war zone.

Zampano and Superior Court Judge Frank Meadow engineered a settlement in December 1988 with the companies involved in L'Ambiance Plaza that created a $43 million fund for families of those killed and injured.

The families also acquired ownership of the property and will receive income from rents from the new apartment building that will include 65 to 80 affordable units, Zampano said.

No timetable or completion date had been scheduled for the project, officials said.

Speaking at a permanent memorial outside City Hall to honor the dead and injured workers, Zampano said the new building would help remove ''the pall on that property.''

''The land was a place of doom and the gloom hung over and darkened whatever global effects the settlement might have had,'' Zampano said of the nearby L'Ambiance Plaza site.

Anthony V. Milano, secretary of the Office of Policy and Management, attended the ceremony on behalf of Gov. William A. O'Neill and said the new building would be called Renaissance Plaza.

''Renaissance means rebirth and it is indeed a rebirth, an example of how new life can spring from tragedy,'' Milano said.

Theresa Schneider of Bridgeport, who lost her brother, Mario Colello, 42,

in the collapse, said the families of the victims have mixed emotions about the plans to rebuild on the disaster site.

''In a way you want to see it up and over with and in a way you don't,'' said Schneider, who attended the ceremony with her three sisters, all of them dressed in black.

''I know I can't stop them from building it and I know they can't leave it like it is, all rubble and trash, but I don't know,'' she said of the site. ''If you drive by, it's just a bad memory now.''

Schneider said her brother had only been on the job three days when the collapse occurred.

''I just hope to God, construction work benefits,'' Schneider said, referring to outraged calls for tighter safety regulations after the tragedy. ''My brother died for the cause.''

#90113u2488 04/23/1990 ~United Press International

(APRIL 23) UPI - Led by a strong European market, world oil prices rose sharply Monday in moderate trading as traders held back from selling in the face of uncertainties created by next week's meeting of OPEC oil ministers.

On the European cash market, Britain's widely traded North Sea Brent climbed 63 cents to $17.20 a barrel.

United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - jumped 40 cents to $14.35 a barrel.

On the New York Mercantile Exchange, the benchmark West Texas Intermediate for June delivery climbed 25 cents to $19.07 a barrel, after failing to break through a technical resistance level at $19.50 a barrel.

Merc trading volume was an average 89,422 estimated contracts.

On the U.S. Gulf Coast cash market, prompt-delivery WTI was quoted at $18.40 a barrel, a gain of 45 cents.

Sun Co., of Radnor, Pa., Marathon Oil Co., the Findlay, Ohio, unit of USX Corp., and Du Pont's Conoco Inc. subsidiary in Houston all raised the posted price they will pay for crude at the wellhead by $1 a barrel to $18 a barrel for WTI.

Unleaded gasoline for May delivery rose 1.61 cent to 63.54 cents a gallon on the Merc and gained 1.60 cents on the New York Harbor spot market to 63.40 cents a gallon.

''Selling tends to dry up with an OPEC meeting coming,'' said Bill Hinton of Stotler & Co., New York.

Oil ministers of the 13-nation Organization of Petroleum Exporting Countries will meet in Geneva May 2 to see what can be done to stop a decline in oil prices that saw crude lose 14 percent of its value early this month.

The cartel pumps more than a third of the world's crude oil. Cheating by Kuwait and the United Arab Emirates on their OPEC quotas has helped create a crude glut on world markets.

Hinton said a rise of Brent crude prices on the European market initially started the ball rolling on the Merc. Buy orders were then triggered when the WTI price passed through $19.10 a barrel, he said.

WTI rose hit a high of $19.49 a barrel and ''had trouble breaking through the $19.50-a-barrel resistance level,'' the analyst said.

The early surge in crude prices helped the gasoline market, Hinton said, ''but then gasoline developed a life of its own. The gasoline market was real strong all day.''

On the Merc, heating oil finished the day at 53.12 cents a gallon, up 0.18 cent, while prompt delivery heating oil in the New York spot market fell 0.8 cent to 56.45 cents a gallon.

(APRIL 23) UPI - An estimated one-thousand environmental activists were foiled today in attempts to block entrances to the New York and American stock exchanges in New York City. Police in riot gear arrested more than 155 protesters. Protesters said the objective was to punish companies ''responsible for ecological devastation.''

Hundreds of demonstrators rallied in Chicago today outside the headquarters of the Prudential Insurance Company and the American Medical Association. Police say 150 people have been arrested. The demonstrators were protesting the way doctors and local governments treat people with AIDS. They also called for national public health care.

Chinese Premier Li Peng met with Soviet Prime Minister Nikolai Ryzhkov in Moscow today. It's the highest-level Chinese trip to Moscow since a split between the two nations in the 1960's. Li... who studied in the Soviet Union and speaks Russian... said there are ''good prospects'' for improved relations.

An 18-hour prison riot ended in Britain today, but NOT before seven people were injured. More than 100 prisoners took over part of the Pucklechurch prison near Bristol, 120 miles west of London. They fought guards and set entire buildings on fire before giving up. Seven inmates are still occupying Strangeways Prison in Manchester.

Family members say the Reverend Ralph David Abernathy's body will be carried by mule to an Atlanta cemetery where many working class blacks are buried. The activist's epitaph will read- ''I tried.'' Mourners are paying their respects today to Martin Luther King Junior's best friend, who died Tuesday at the age of 64.

#90113u2522 04/23/1990 ~United Press International

LONDON (APRIL 23) UPI - Prison guards captured one of the ringleaders of the uprising at Strangeways Prison Monday, but his six remaining partners set two wings of the jail ablaze when authorities apparently opted to use force to try to break the 23-day siege.

Earlier, more than 100 rioting prisoners surrendered after 18 hours of fierce clashes that left seven people wounded at Pucklechurch jail near Bristol, 120 miles west of London.

The rebellion at Strangeways Prison in Manchester began against overcrowding and squalid conditions, and has inspired disturbances in 10 other jails. It has also aroused criticism of the state of prisons in Britain, which recently topped Turkey for having the highest per capita penal population in Europe.

Strangeways Governor Brendan O'Friel said guards had captured one inmate. Officials identified him as Alan Lord, a convicted murderer who with his colleague Paul Taylor claimed to have masterminded the uprising that began April 1.

''This afternoon we have succeeded in returning one more prisoner into legal custody,'' O'Friel said. ''After one week without any returns ... we now have one of the seven prisoners.''

He did not say how officers had snared Lord, who was earlier seen sunbathing on the roof. O'Friel had said he would reconsider tactics of avoiding force, and the entry of squads of riot police into the Victorian-era jail indicated that a push was under way.

The British Broadcasting Corp. said guards had occupied all of F-wing, which had been in the prisoner's hands earlier Monday.

Soon after O'Friel announced the capture, the remaining prisoners torched two wings of the jail and pelted tiles on firemen when they moved to control the flames.

Police advanced with shields over their heads, drawing the bombardment and protecting the firemen.

Two prisoners remained on the roof. The BBC quoted them as saying, ''We are the last two,'' possibly indicating they had been cut off from their associates.

All lower floors have been blocked by mountains of debris, some up to 40 feet high. The inmates are armed with spears and bombs made from floor polish. They can drop iron fixtures on anyone trying to reach the upper floors, to which they have cut off all access by smashing the spiral staircases, officials say.

Repair costs are estimated to exceed $164 million, and officials have pledged that the rebels, when captured, will spend the rest of their prison lives in solitary confinement.

At Pucklechurch, inmates overpowered a guard Sunday evening and took his keys to gain access to other areas of the center, which housed about 120 youths awaiting trial.

The action exploded into a full-fledged riot, with inmates rampaging through the medium-security prison, smashing furniture and setting alight entire buildings.

Guards - confronted by attackers armed with chisels, pickaxes and knives -

retreated and fended off barrages of missiles from more than 100 inmates stationed on the roof.

The guards regrouped and assaulted the rioters about 6 a.m., using batons, water cannons and hand-to-hand fighting to regain control of most of the jail and force the inmates onto the roof of one wing.

A mass surrender then took place. Officials said five guards and two prisoners were injured.

''There was a large number of missiles thrown,'' said prison spokesman John Aldridge. ''These consisted of heavy metal, beds, and metal frames, large amounts of masonry and bricks. Very dangerous indeed.''

Authorities said the complex was ruined and could not be used until repairs had been completed. Peter Hall of the prison officer's association warned of the infectious impact of Strangeways.

''One of the major issues ... is the length of time it has taken the authorities to control the Strangeways incident,'' he said.

#90113u2565 04/23/1990 ~United Press International

LONDON (APRIL 23) UPI - Sir James Goldsmith said Monday Hoylake Investments Ltd. will not renew its $21 billion hostile takeover bid for tobacco and insurance giant B.A.T Industries PLC and its subsidiaries.

Goldsmith last year set up Hoylake Investments to lead the takeover attempt of the British-American conglomerate and joined forces with France's Axa Midi Assurances to overcome regulatory objections to the proposed acquisition of Farmers Insurance Group, B.A.T's U.S. insurance subsidiary.

On the American Stock Exchange Monday, B.A.T stock was the most active issue, closing down 44 cents to $11.56 a share.

Goldsmith offered no reason for giving up Hoylake's bitter nine-month fight to acquire the conglomerate. The announcement came only two weeks after a crucial ruling by California insurance regulators who denied Hoylake and Axa Midi's bid for Farmers.

Sources close to the company suggested that the April 9 ruling in California left Goldsmith with little hope for success in his B.A.T takeover attempt.

B.A.T's subsequent unbundling of its paper and retail companies had also dampened Hoylake's interest, the sources said.

Goldsmith previously had said he would pursue the bid only if Axa Midi were successful in its quest for Farmers.

The California ruling was the first of nine scheduled decisions in the states where Farmers operates. Besides California, Farmers operates in Arizona, Idaho, Illinois, Kansas, Ohio, Oregon, Texas and Washington.

In Los Angeles, Leo E. Denlea Jr., chairman and chief executive officer of Farmers Group Inc., said: ''We are pleased with today's decisions, which further confirm our view that the proposals by Hoylake and Axa Midi were not in the best interest of Farmers' policyholders and would not have been approved by insurance regulators in the nine states.

Hoylake still owns 19.4 million B.A.T shares, but has not decided yet what it will do with them, a spokesman said.

The news came as a great relief for B.A.T, which had spent months fending off the Hoylake bid by imposing a rigorous defense strategy to unbundle most of its paper and retail interests in order to focus on its tobacco and financial services, a company spokesman said.

B.A.T Chairman Patrick Sheehy welcomed the Hoylake announcement, saying it was ''overdue.''

If the bid had been successful, the Bermuda-based Hoylake had hoped to sell B.A.T's U.S. insurance operations to Axa Midi and spin off all the conglomerate's non-tobacco interests. Hoylake, headed by Goldsmith, an international financier, Jacob Rothschild, a British financier, and Australian businessman Kerry Packer, launched the bid last July.

The bid had generated strong reaction from members of Congress, who last August attacked as a ''highly-leveraged deal, financed in dollar-denominated junk bonds'' that was intended to avoid U.S. securities laws.

In New York, Standard & Poor's said that ratings of issues guaranteed by B.A.T remained on CreditWatch with negative implications, meaning a downgrade was possible, and that it plans to meet with management to discuss the company's ''major'' restructuring plan to ''assess the exent to which creditworthiness may be diminished.''

Roughly $262 million of guaranteed long-term debt and a $1 billion medium-term note program are on CreditWatch, S&P said.

#90113u2731 04/23/1990 ~United Press International

ASPEN, COL (APRIL 23) UPI - An Aug. 14 trial date was set for gonzo journalist Hunter S. Thompson, who faces drug and sexual assault charges in Pitkin County District Court, a court official said Monday.

Thompson, 52, has called the felony and misdemeanor charges a ''witch hunt'' because of his anti-establishment views.

A hearing had been scheduled Monday to set the date for the jury trial, but was cancelled because a full docket prevented Mesa County Judge Charles Buss of Grand Junction from traveling to Aspen for the proceeding. Buss was named to hear the case after Pitkin County District Judge J.E. Devilbiss disqualified himself without giving a reason.

A court spokesman said the trial date was set during a teleconference last week. A preliminary hearing in the case is scheduled May 22, and a motions hearing is scheduled June 25.

Five felony drug charges and three misdemeanor counts, including sexual assault, were filed against Thompson Apr. 9 stemming from an incident at his Woody Creek home last winter.

Gail Palmer-Slater, 35, a former pornographic movie actress and producer, claimed Thompson took drugs in her presence and touched her breast when she went to his home Feb. 21 to discuss a business deal. She said Thompson roughed her up when she refused to conduct the meeting in his hot tub.

Thompson has said he pushed the woman because she was drunk and was pressuring him to have sex.

Palmer-Slater's allegations led to an 11-hour search of Thompson's home, during which authorities seized drugs and explosives.

The felony charges include use of cocaine and possession of cocaine, LSD, a Valium-type drug and explosives. The misdemeanor charges include possession of marijuana, sexual assault and simple assault.

''It's a witch hunt,'' Thompson told reporters after the charges were filed. ''I stand for everything they (authorities) don't like.''

Friends of Thompson formed a defense fund after the charges were filed. They planned to raise money by showing Palmer-Slater's X-rated films at the Aspen Opera House, but could not obtain permission from the film-licensing company.

#90113u2768 04/23/1990 ~United Press International

CRAIGSVILLE, PA (APRIL 23) UPI - Fires continued to flare Monday in three

derailed crude oil tanker cars, but most of the 200 people evacuated after the accident were allowed to return to their homes.

About 100,000 gallons of crude oil and an undetermined amount of sodium hydroxide spilled from the cars and contaminated an Allegheny River tributary, causing a massive fish kill.

An estimated nine different species of fish and acquatic life were affected by the spill, but booms and dikes were stretched across Buffalo Creek and emergency officials said the river would likely be safe for community drinking water supplies in southwestern Pennsylvania.

Fire officials said all but 20 families evacuated from Craigsville, about 40 miles north of Pittsburgh, and surrounding boroughs were allowed to return to their homes at 9:45 a.m. Monday. Homes located near the derailment scene were expected to remain off limits until sometime Tuesday.

Authorities lifted the evacuation notice for most residents after a cloud of sodium hydroxide, a caustic chemical used to clean drains, dissipated and a burning crude oil freight car was doused with foam. The oil-covered creek resembled a fuse as it burned for about four hours, a firefighter said.

But fires erupted again Monday in three tanker cars carrying crude oil which were leaning against three other cars, causing them to heat up as well, officials said. Emergency crews continued to spray mist on the cars in an attempt to cool them and were said to be pondering the use of plastic explosives to get the fires to burn out faster.

The tanker containing sodium hydroxide was moved from the site and it was expected to take several hours to cool the other cars threatened by flare-ups, officials said.

Sen. Arlen Specter, R-Pa., toured the site and afterward declared it ''unstable.'' He urged the Federal Railroad Administration and the chairman of the National Transportation Safety Board to launch a prompt investigation into the accident.

Specter said he is concerned about the frequency of train accidents over the past several years.

''There has been a disturbing series of derailments in western Pennsylvania, resulting in fatalities, significant property damage and the evacuation of residents,'' Specter said in a letter to the federal agencies. ''Many of these derailments involved the leakage of hazardous materials.''

The spectacular fire burned for about 10 hours after 29 freight cars owned

by Buffalo and Pittsburgh Railroad Co. of Punxsutawney derailed near the Armstrong-Butler County line at about 9:30 p.m. Sunday.

High-leaping flames could be seen for several miles, said Dwight Claypoole of Worthington, who was among the estimated 300 firefighters who fought the blaze.

Area residents complained of watery eyes resulting from the chemical cloud but no one was hospitalized, authorities said. Three firefighters were treated for minor chemical burns.

Officials at Buffalo and Pittsburgh Railroad said the train was northbound from Butler, Pa., and headed for Buffalo, N.Y. The cause of the derailment was not immediately known.

Early Monday, state Department of Environmental Resources agents spotted about 200 dead fish along Buffalo Creek, including darters and minnows, as a result of the spill, DER spokeswoman Betsy Mallinson said.

#90113u2776 04/23/1990 ~United Press International

NEW YORK (APRIL 23) UPI - The star prosecution witness in the Bensonhurst racial trial testified Monday she saw four white teenagers draw guns and chase a group of black youths moments before one of them was fatally shot.

Gina Feliciano, a white woman whose plans to invite black and Hispanic friends to her 18th birthday party allegedly set the stage for the killing defended her testimony under a three-hour barrage of questioning by defense lawyers in state Supreme Court in Brooklyn.

Feliciano, an admitted drug abuser, denied spreading rumors that her black and Hispanic friends were coming into the neighborhood to beat up Keith Mondello, the alleged ringleader of the gang accused of killing 16-year-old Yusef Hawkins.

Mondello is charged with second-degree murder in the shooting of Hawkins, 16, who came to the predominantly white neighborhood to look at a used car. Prosecutors say Hawkins and his friends were mistaken for Feliciano's friends and attacked by a gang of angry whites.

Defense lawyer Stephen Murphy, who has called Feliciano a ''contemptible liar,'' tried to discredit her by pointing out inconsistencies in her testimony, causing the young woman to break into tears several times during the day.

He focused on a secretly tape recorded conversation between Feliciano and her sister in which he claims Feliciano admitted her mother told her to

lie at a grand jury hearing.

''Didn't you tell your sister that mommy told me to say Jimmy Patino had a gun?'' Murphy demanded.

''Yes,'' Feliciano admitted.

But under questioning by prosecutors, Feliciano testified she had lied to her sister - a resident of the tightly knit neighborhood - so as not to antagonize her and insisted she had not lied to a grand jury.

Feliciano earlier testified Mondello bragged he had five guns hours before the attack and said ''I can't wait for tonight.''

Feliciano said Mondello harrassed her the day before the Aug. 23, 1989, killing for talking to a Hispanic man.

''He said 'I should spit in your face nigger lover,''' Felciano testified about her conversation with Mondello.

Mondello, 19, is on trial with Joseph Fama, the alleged triggerman in the attack.

Mondello and Fama, 19, were ordered to be tried together but before separate juries because Mondello allegedly implicated Fama as the gunman.

The two are the first of eight suspects to be tried in the case.

#90113u2813 04/23/1990 ~United Press International

(APRIL 23) UPI - Freed U-S hostage Robert Polhill undergoes medical tests in West Germany... Moscow softens its stance on Lithuanian independence... Civil rights pioneer Ralph Abernathy is eulogized in Atlanta... And researchers say barley lowers cholesterol... U-P-I has these top stories and more, next.

While a former hostage enjoys his first full day of freedom... U-S officials are trying to determine if other Americans held in Lebanon will be freed soon.

The Bush administration was quick to thank Syria for that nation's role in yesterday's release of Robert Polhill by a pro-Iranian group in Lebanon. However, Tehran's involvement remains unclear, and Bush administration officials say they caN'T say for sure what Iran's intentions are.

Spokesman Marlin Fitzwater says the White House believes Iran at least has influence over the hostage-takers. In Fitzwater's words, if Tehran

supported Polhill's release- ''we appreciate that.''

Tehran radio today raised the possibility that more Americans still held in Lebanon may be released. But the radio related the fate of hostages to the release of a Lebanese Moslem cleric and other prisoners held by Israel.

Fitzwater says the Bush administration continues to oppose any deals involving the hostages, but says the United States is willing to talk.

At an Air Force base in Wiesbaden, West Germany, U-S officials say Robert Polhill is alert, but malnourished and dehydrated after 39 months as a hostage.

U-S officials say the college accounting professor will be debriefed when he is ''up for it and doctors say he is ready.''

-30- 1772

#90113u2837 04/23/1990 ~United Press International

(APRIL 23) UPI - The Bush administration says the Soviet Union's latest word on Lithuania is a welcome sign of flexibility.

The White House praised today's Kremlin proposal that the Baltic republic freeze its declaration of independence during negotiations with Moscow.

Spokesman Marlin Fitzwater's comments come one day before President Bush consults with congressional leaders on possible U-S counter-measures.

While the Kremlin is getting a warm response from Washington, there was NO immediate reaction from Lithuania. President Vytautas Landsbergis did indicate during the weekend that he may consider such a proposal.

The Soviet offer involves a two-year freeze on Lithuanian independence as a basis for talks. The Kremlin has said it would NOT hold formal discussions as long as Lithuania's independence declaration remains in effect.

A spokesman for Mikhail Gorbachev says the Soviet oil embargo against Lithuania will continue.

The shuttle Discovery was cleared today for a second launch attempt to fire the Hubble Space Telescope into orbit.

A NASA test director says the shuttle and the telescope are both in good shape, the flight crew is ready, and the weather looks good.

Thunderstorms might delay fueling, but Air Force meteorologists predict an 80 percent chance of acceptable conditions at launch time tomorrow.

The Discovery flight is two weeks late because a broken hydraulic unit had to be replaced.

The space telescope is the most expensive satellite ever, at seven BILLION dollars. But scientists say it will be more than justified by a quantum leap in understanding the universe.

NASA chief Lennard Fisk says ''astronomers are starting to tingle again in anticipation of what Hubble will be able to accomplish.''

A telescope engineer says the instrument was NOT significantly bothered by dust during its two-week delay.

#90113u2877 04/23/1990 ~United Press International

BATAVIA, IA (APRIL 23) UPI - An Amtrak passenger train en route from the West Coast to Chicago derailed south of Batavia, flipping three of its 16 cars and injuring at least 74 people, three of them seriously, officials said.

Most of the injuries were said to be minor, and no deaths were reported.

The combined California Zephyr, Pioneer and Desert Wind, made up of 16 cars and three locomotives, was carrying 394 passengers and 24 crew when it jumped the tracks about 1:30 p.m. CDT about 80 miles southeast of Des Moines in southeastern Iowa, Amtrak spokesman Patrick Jeffery said.

The cause of the derailment had not been established, but one witness said the cars tipped over as the train passed a switch.

Three of the last four cars tipped completely over on their sides, while a fourth sat at a steep angle off the track. Most of the passengers walked off the train, but some suffered injuries that required hospital treatment.

Shirley McCauley, the nursing spokeswoman for the nearby Ottumwa Medical Center, said the facility had received 35 people injured in the derailment. Three suffered serious injuries while three were released, she said.

Walter Brownlee, administrator of Jefferson County Hospital in nearby Fairfield, said the facility treated 37 people. Three people were hospitalized for unspecified injuries and the rest were released, Brownlee said.

Mercy Medical Center in Des Moines flew two patients from the accident site to Des Moines, but the extent of their injuries was unknown although

they were being admitted, spokeswoman Barb Paul said.

The University of Iowa Hospitals and Clinics in Iowa City said Mona Buehler, 61, of Red Oak, with history of heart problems, was flown to the facility when she complained of chest pains. She suffered no visible injury from the derailment itself, hospital spokesman Gary Mans said.

''Most of the injuries have not been serious, there's no deaths,'' Brownlee said. ''The injuries we've seen are mostly cuts, abrasions and knee sprains. They're real sore people but fortunuate, I guess.''

Uninjured passengers were loaded onto 10 buses and taken to Chicago or their intermediate destinations, Amtrak spokeswoman Sue Martin said.

Investigators from the National Transportation Safety Board were expected on the scene Thursday night, NTSB spokeswoman Drucella Anderson said.

The trains, en route from Seattle, Oakland, Calif., and Los Angeles to Chicago, linked together at Salt Lake City and was traveling on Burlington Northern tracks when it derailed while passing a crossing near Batavia.

''The train came flying through at normal speed and started rocking,'' said Brett Schmitt, 30, a witness. ''It just come off the track is what happened. I saw cars flopping up and down.'' He said the accident occurred as the train passed near a switch.

''We just felt sliding and bumping all around the track, we felt the car go up one time and turn on its side,'' said passenger Jeff Newton, 27, of Washington D.C., who was traveling from Glenwood Springs, Colo. with his 23-year-old wife, Laura. ''We were doing this because I'm afraid to fly.''

The train rocked violently side to side just before the derailment. When the cars went off the tracks, dishes and silverware flew from dining car tables, and some pasengers were dumped on the floor, but there was no panic as riders made their way to safety.

Cindy Nabozny, 32, from California was in the last car of the train, a sleeper, when it flipped over and was dragged down the track.

''All I remember I was holding him (6-month-old son, William) and my brother screamed, 'Hold on!' and we were looking out the window that was down watching the ground go by,'' she said.

''It looked awful scary,'' Nabozny said. ''You watch your life running in front of you. I'm afraid to go up in the air, so I took a train, but I think I'm going to fly back.''

Nabozny said her infant son was sitting alone in a seat a minute before

the accident. ''I had just come back and picked him up. A minute before, he may not have survived,'' she said.

Richard Lempitski, 43, a passenger from Providence, expressed anger at Amtrak. ''No more trains for me, I've had enough, I've had nothing but bad service, bad food, and now this. This is it,'' said Lempitski, who had been riding the train four days.

But Newton said he was not ready to give up on trains. ''If we were in a plane and this were to happen there's a 99 percent chance we would be dead '' the passenger said.

#90113u2890 04/23/1990 ~United Press International

(APRIL 23) UPI - Mourners are paying their last respects this afternoon to the Reverend Ralph David Abernathy, one of the nation's most active civil rights crusaders.

A steady stream of friends, acquaintances and parishioners filled the West Hunter Street Baptist Church in Atlanta where Abernathy preached for 29 years.

Family members say Abernathy wanted his funeral to parallel the 1968 service for his best friend, Martin Luther King Junior. Like King's funeral, Abernathy's body will be carried to its burial place in a mule-drawn carriage, symbolizing humility and his fight to help the nation's poor.

Martin Luther King Junior's sister is speaking at today's funeral, despite the fact that the King family was angry with Abernathy for discussing King's alleged extra-martial affairs in his memoirs.

Abernathy died of cardiac arrest at 64 Tuesday.

The Supreme Court today decided to get involved in a fight over a beer.

Five days before Christmas of 1986, Darlina France shot her husband Neil in the shoulder. Police said she was angry because her husband knocked over a Christmas tree and took her beer during an argument in their house on a military base in Hawaii.

But at the trial, Neil France said he and his wife loved each other. He asked the government NOT to prosecute.

Darlina was convicted anyway, and sentenced to five years in prison. However, an appeals court overturned her conviction because jury selection was conducted by a magistrate, not a judge.

The high court today agreed to hear arguments next year on a government appeal.

In another case, the court refused to become involved in one portion of a major lawsuit against the Church of Scientology of California. The justices, without comment, rejected an appeal by a former church member.

The court let stand a ruling that the city of St. George, Utah, violated the First Amendment ban on entangling church and state when it gave free electricity to the local Mormon Temple.

#90113u2907 04/23/1990 ~United Press International
(APRIL 23) UPI - Hundreds of environmental activists today tried to close down stock markets on both coasts.

Organizers said the objective was to punish companies ''responsible for ecological devastation.''

Both demonstrations began peacefully, but in San Francisco, crowds rampaged through the streets, smashing windows and trying to overturn a police van.

Two officers were injured in what police described as the most violent demonstation in the Bay City in years. 49 people were arrested.

In New York, an estimated one-thousand demonstrators tried in vain to block entrances to the New York and American stock exchanges.

Police in riot gear arrested more than 155 protesters and cordoned off approaches to the two markets at Broad and Wall streets and Trinity Place.

The demonstrators caused massive traffic jams, but both stock markets opened on time.

One bond trader said he agreed with some of the activists' objectives, but he called the protest ''a joke.''

Protesters in Nepal clashed with police today in violence that left at least 18 people dead in the tiny Himalayan kingdom.

Angry demonstrators charged that recent crime, strikes, and street violence are part of a plot by supporters of the former government to cast the new pro-democracy government in a bad light.

Witnesses and hospital officials said police opened fire on the marchers

in the capital of Katmandu.

Demonstrators chased police to the roof of one police office. The protesters also set ablaze the office of the chief administrator of Katmandu.

Hospitals and residents report at least seven people were killed in police gunfire and 22 wounded.

An all night curfew was imposed in the capital and the army is ordered to shoot to kill violators.

Nepal's new pro-democracy prime minister issued a statement at the end of the day maintaining he is in control.

#90113u2911 04/23/1990 ~United Press International

(APRIL 23) UPI - A nutritionist says barley is good for more than making beer, whiskey and using as animal feed.

Montana State University researcher Rosemary Newman says barley is also an overlooked food that is effective in lowering blood cholesterol.

Newman says men who ate a diet high in barley experienced a notable drop in their chosesterol levels after four weeks.

Newman says researchers believe that barley lowers cholesterol because it contains significant amounts of a soluable fiber found in oats, NOT wheat. She says the fiber appears to partially stop the absorption of fats that raise cholesterol.

Newman says she is suggesting that barley be used more in cereals and baked goods as a way to encourage good health.

#90113u3024 04/23/1990 ~United Press International

(APRIL 23) UPI - An Amtrak passenger train carrying about 300 people from Oakland, California, to Chicago, derailed today south of Batavia, in southeast Iowa. Three passenger cars flipped over on their sides. Amtrak says ''there are preliminary reports of passenger injuries.''

The State Department says it has NO evidence that yesterday's release of an American hostage in Lebanon will be followed by freedom for another hostage. U-S officials also say Iran's role in Robert Polhill's release is unclear.

Lithuania has NOT responded to Mikhail Gorbachev's proposal that it freeze its independence declaration to allow for negotiations. But the White House welcomed the statement as a signal that Moscow may be softening its stance against the rebublic.

A judge in New York today ordered a psychiatric test for Harry Helmsley to see if the 81-year-old hotel magnate is competent to stand trial for tax evasion. Helmsley's attorneys claim the stress of a trial may kill him.

Michael Milken is scheduled to appear in another New York courtroom tomorrow. The fallen junk bond wizard is expected to plead guilty to six felony counts of securities law violations and pay 600-Million dollars in penalties.

Authorities say actress Paulette Goddard died at her home today in Porto Ronco, Switzerland. Goddard starred with Charlie Chaplin in such classic movies as ''Modern Times'' and ''The Great Dictator,'' and married Chaplin.

Greta Garbo's niece is the sole beneficiary of the film star's reportedly multi-Million-dollar estate. The attorney in charge of Garbo's estate says the actress named her closest surving relative in her will.

Two 18-year-olds were held on assault charges today in Portland, Oregon, accused of shooting blowgun darts from a pickup truck and hitting five pedestrians. One of the darts struck a pregnant woman, but she and her unborn child apparently were NOT seriously hurt.

200 evacuated residents of Craigsville, Pennsylvania, returned home today after officials said a chemical cloud from a derailed freight train cleared. Officials say booms contained crude oil and sodium hydroxide that spilled and contaminated an Allegheny River tributary.

''Maximum Bob'' is back in the news. The judge in the trial of Jim Bakker came under attack by Australian groups today for saying that AIDS victims should be exiled to Australia. Judge Robert Potter of North Carolina said he was exaggerating.

#90113u3068 04/23/1990 ~United Press International
(APRIL 24) UPI - SPORTS DIGEST

BASEBALL

Outfielder Ken Griffey, Jr. and pitcher Brian Holman of the Seattle Mariners, were named the American League's ''Co-Players of the Week'' for April 16-22. Griffey batted .414 with two home runs and 10 RBI. Holman was 1-0 for the week, and came within an out of tossing a perfect game against

the Oakland Athletics. ... Barry Larkin of the Cincinnati Reds was named National League Player of the Week. Larkin hit .500 going 10-for-20 and leads the league in batting (.512), hits (22) and multi-hit games (8).

BASKETBALL

San Antonio Spurs rookie center David Robinson was named the Edge NBA Player of the Week for the final week of the regular season. Robinson averaged 26 points, 14.3 rebounds and 3.3 blocked shots, leading his team to a 4-0 record and helping the Spurs capture the Midwest Division championship.

GYMNASTICS

Andreas Wecker, a leading East German gymnast left the country last weekend for a future in the West, the West German news agency DPA reported. Wecker, European champion and World Cup silver medalist on the horizontal bar, sought a new home in Hannover, West Germany, DPA said.

RUNNING

London Marathon director Chris Brasher slammed the British Broadcasting Company's television coverage of Sunday's marathon saying the telecast was ''not up to par to say the least. Coverage was hampered by low clouds which prevented helecopters from taking off to beam pictures from the front of the race. Brasher plans to met with BBC Head of Sport Jonathan Martin to discuss the the matter.

SOCCER

Cleveland Crunch forward Zoran Karic and Kansas City goalkeeper Jim Goresek were named the Major Indoor Soccer League Offensive and Defensive Players of the Week. ... Mahmoud El Gohary, Egypt's World Cup Coach, is considering taking 37-year-old Thabet El Battal, a goalkeeper with the Al Ahali club with the team to Italy in July. He would be the oldest player in the tournament. ... Tickets went on sale in Vienna for the European Champions Cup final match between AC Milan and Benifica Lisbon and were sold out in a matter of minutes, organizers said. Austria was allotted 15,000 tickets for the match to be played May 23 at Vienna's 56,000-seat Prater Stadium.

TENNIS

Katerina Maleeva, 20, overtook her older sister Manuela, 23, in the latest women's tennis rankings. Katerina, winner of 11 of her last 13 matches, despite her loss to Monica Seles in Sunday's final of the Eckerd Open, is No. 6 in the rankings while her sister is No. 8.

TABLE TENNIS

Chinese table tennis star Chen Xinhua, now based in Huddersfield, England, will make his England international debut in the World Cup in Hakkido, Japan May 17, two days after he qualifies under the two-year residence rule, it was announced Monday.

VOLLEYBALL

Karch Kiraly and Kent Steffes defeated John Hanley and Dan Vrebalovich 15-8,to win the $60,000 Miller Lite Open at New Orleans on April 22. Before meeting Hanley and Vrebalovich in the championship, Kiraly and Steffes upset defending champions and the top-seeded team of Sinjin Smith and Randy Stoklos, 15-13.

#90113u3151 04/23/1990 ~United Press International

MONTREAL (APRIL 23) UPI - John Carter scored two goals Monday night to lift the Boston Bruins to a 6-3 victory over the Montreal Canadiens and take a 3-0 lead in the Adams Division Finals.

The fourth and possible deciding game of the series will be played in Montreal on Wednesday night.

Carter's second goal at 5:30 of the second period broke a 2-2 tie.

Carter, standing just on the rim of the faceoff circle, flipped a shot at the Montreal net which bounced in after striking the right shoulder of Canadiensgoaltender Patrick Roy.

Less than two minutes later, at 6:58, Brian Propp made the score 4-2 with a backhand shot from the slot.

Shortly after, at 7:29, Roy was lifted for the first time in this year's playoffs and replaced by Brian Hayward.

Hayward was beaten by at 13:49 by a 50-foot slap shot from Don Sweeney on a power play.

Dave Poulin got his sixth goal of the playoffs at 7:48 of the final period after taking a rebound off the goal post, improving the lead to 6-2.

Russ Courtnall scored his second goal of the game at 14:23 to make the score 6-3.

The Bruins took a 1-0 lead at 9:49 of the first period with a short-handed goal.

Bob Sweeney was sitting out a penalty assessed to goaltender Andy Moog when Carter scored on a slap shot.

Carter raced into the face off circle to the right of Roy and fired a drive into the far corner of the net.

Ray Bourque drilled a shot past Roy on his stick side at 13:02 of the first period to improve the lead to 2-0.

Moog was screened by two of his own players at 15:09 of the opening period when Brent Gilchrist shot the puck along the ice and right into the Bruins net, narrowing the Boston lead to 2-1.

Montreal tied the score 2-2 at 3:10 of the second period when Courtnall fired a shot through the legs of Moog.

CAPITALS 7, RANGERS 1

John Druce scored two goals and assisted on another during a four-goal first-period outburst Monday night to lead the Washington Capitals to a 7-1 victory over the New York Rangers and take a 2-1 lead in their second-round NHL playoff series.

Washington played without injured star Dino Ciccarelli, who sustained a serious left knee sprain in Game 2 and will miss the rest of the series, and lost starting goalie Don Beaupre to a groin pull early in the first period.

But Druce, who recorded a hat trick in Game 2 and has six goals against the Rangers and nine in the playoffs, scored power-play goals at 6:04 and 10:33 of the opening period and set up Geoff Courtnall's goal at 8:20 of the opening session. Mike Ridley's short-handed goal at 11:29 of the period helped the Capitals to a 4-1 lead.

The best-of-seven Patrick Division finals resume Wednesday at the Capital Centre with Game 4.

Mike Liut, shelled in a 7-3 loss in Game 1, replaced Beaupre at 3:16 of the first period after Beaupre, who faced just one shot, was hit by New York's Kelly Kisio. Beaupre's status for Game 4 was scheduled to be reevaluated Tuesday.

But Liut stopped 17 shots, as Washington outshot New York 49-19.

Druce lifted a rebound of his own miss over prone goalie Mike Richter, then Druce's pass from the right boards set up Courtnall's goal from the slot for a 2-0 Capitals lead.

Paul Broten scored on Liut with a short-handed breakaway at 9:29 of the first period to pull the Rangers within 2-1.

But Druce controlled a loose puck in front of the net and scored with a short high shot, then Ridley scored his own short-handed breakaway goal after stealing the puck from Darren Turcotte for the 4-1 Washington lead.

The Capitals increased the lead to 5-1 on Calle Johansson's rebound goal at 4:14 of the second period.

Courtnall scored his second goal of the game on the power play at 11:58 of the third period for a 6-1 lead, with Druce picking up his second assist of the night.

Steve Leach made it 7-1 at 17:05 of the third period.

Ciccarelli, who had eight playoff goals when he was injured, was examined by team doctor Stephen Haas Monday, club spokesman Lou Corletto said. Ciccarelli was scheduled to be fitted with a protective cast and will be reexamined in a week to 10 days.

Only Brett Hull (10 goals) of the St. Louis Blues had more goals in postseason play than Ciccarelli entering Monday's action.

Ciccarelli, whose physical play and intensity helped make him a team leader and a local fan favorite, left the game Saturday in the third period after checking Kris King of the Rangers. His knee became swollen that night and he was walking with crutches Sunday.

#90113u3354 04/23/1990 ~United Press International

(APRIL 23) UPI - Ambulances and helicopters are on the scene of an Amtrak passenger train derailment south of Batavia, Iowa. Officials say the train carrying about 300 passengers and crew was on its way from the West Coast to Chicago when it rocked violently and three cars tipped over. Most of the passengers walked off the train, but an UNknown number remained inside the cars waiting for rescue workers. One passenger remarked that he was on the train because he's ''afraid to fly.''

Lithuania's only oil refinery closed today, the victim of a Soviet economic blockade that cut its crude. Lithuania also warns that the embargo may force it to stop shipping products to the rest of the Soviet Union. But Lithuania has so far NOT responded to a softened Kremlin stance. Moscow says Lithuania can keep its declaration of independence as long as it freezes the act for two years.

The American Lung Association says one of the nation's toughest smoking bans is a heartbeat away from passage in New Hampshire. A spokesman for Governor Judd Gregg says the governor is likely to sign the bill into law. The law would require the segregation of smokers in all buildings except private workplaces and restaurants by 1991.

A woman testified today in the trial of the accused ringleader of a racial slaying that left a 16-year-old black teen-ager dead in New York. Gina Feliciano says Keith Mondello warned her NOT to invite blacks and Hispanics to their predominately-white Bensonhurst neighborhood, telling her he owned ''five guns.'' Mondello is charged with second-degree murder in the fatal shooting of Yusuf Hawkins last summer.

Three more homes burned in the path of lava from Hawaii's Kilauea Volcano. One of the homes incinerated had been threatened three times previously. The owner said she wanted the ordeal over so she could collect her insurance and get on with her life.

A judge in Corwin Springs, Montana, ordered a nearby survivalist sect to stop building a bomb shelter complex today... the same day church members predicted that 12 years of global disasters would begin. The state sought the temporary injunction following a petroleum fuel leak outside the facility this month. Hundreds of members of Church Universal and Triumphant today tried to chant away almost 26-thousand years worth of what they call ''bad karma.''

#90113u3689 04/23/1990 ~United Press International

(APRIL 23) UPI - An Amtrak passenger train heading from the West Coast to Chicago derailed southeast of Des Moines in southeastern Iowa today. An Amtrak spokesman says 57 people were injured- two seriously- but NO one was killed. Most of the injuries are cuts, sprains, and abrasions. The train, which was carrying 394 passengers and a crew of 20, combined cars from Oakland, Seattle and Los Angeles. Three of its last four cars flipped on their sides.

A Soviet spokesman says Lithuania can keep its March declaration of independence as long as it freezes the act for two years. In Moscow, the chief spokesman for Soviet President Gorbachev said the rebellious republic must also accept the authority of the Soviet Constitution for negotiations to begin. The offer represents a significant step back from Gorbachev's refusal to talk unless Lithuania rescinds its independence stance.

Iran is claiming credit for arranging the release of an American hostage in Lebanon yesterday. Tehran says now is the time for ''the other side'' to release Palestinian and Iranian prisoners held by Israel and its allies

in Lebanon. Iran's foreign minister said in an interview today that another Western hostage may be released soon... but he tied it to a reciprocal goodwill gesture.

The Reverend Ralph David Abernathy is being remembered as ''a five-star general in the NON-violent war against racial injustice.'' Thousands of mourners attended Abernathy's funeral in Atlanta today... six days after the civil rights activist died of cardiac arrest. Abernathy's funeral resembled services 22 years ago for his best friend, Martin Luther King Junior.

-30- 1828

#90113u4025 04/23/1990 ~United Press International

(APRIL 23) UPI - Officials now say at least 59 people were injured, three seriously, in the derailment of an Amtrak passenger train south of Batavia Iowa. The combined California Zephyr, Pioneer and Desert Wind carrying 424 people jumped the tracks this afternoon, about 80 miles southeast of Des Moines. The cause of the derailment has NOT been determined, but one witness says the cars tipped over as the train passed a switch.

The White House phones were busy today, with President Bush calling Syrian President Hafez Assad and Jordan's King Hussein. A spokesman says Bush telephoned Assad to express appreciation for yesterday's release of a U-S hostage in Lebanon. Bush also expressed hope that the remaining Americans held will be released ''as soon as possible.'' The spokesman says Bush and Hussein discussed ''Middle East issues.''

The White House says a new Soviet proposal toward Lithuania may ease the crisis in the Baltic republic. The Soviets today proposed negotiations with Lithuania if the republic freezes its independence movement for two years. White House spokesman Marlin Fitzwater welcomed the Soviet statement as an apparent sign of flexibility. He says the announcement ''will be factored in'' to any action by the Bush administration.

Chicago police today arrested 150 people who protested the way the insurance industry, doctors and local governments treat AIDS victims. As many as 700 demonstrators gathered outside the buildings of the Prudential Insurance Company and the American Medical Association. They chanted- quote- ''We die, they do NOTHING.'' Prudential says it has been a leader in dealing with AIDS in grant programs and in its own businesses.

#90113u4190 04/23/1990 ~United Press International

(APRIL 23) UPI - At least 59 injured in Amtrak derailment in Iowa... President Bush thanks Syria for its role in hostage release... White House welcomes Soviet statement on Lithuania... and civil rights giant Ralph Abernathy buried. U-P-I has it all, next:

An Amtrak passenger train went off the tracks this afternoon in southeastern Iowa, injuring at least 59 people, three of them seriously.

Officials say most of the injuries were minor... and NO deaths were reported.

The combined California Zephyr, Pioneer and Desert Wind was traveling from the West Coast to Chicago when it derailed south of Batavia, Iowa.

The train was carrying 394 passengers and 20 crew when seven cars jumped the tracks, leaving three tipped on their sides... one car at a steep angle... and three more off the track but upright.

The most seriously injured waited as long as two hours to be removed by rescue teams before being taken away in helicopters and ambulances.

It was NOT immediately clear what caused the derailment. However, one witness says the accident occurred as the train passed near a switch.

Passengers had different reactions to the scare.

In the words of one- ''If we were in a plane and this were to happen there's a 99 percent chance we would be dead.'' But another expressed anger at Amtrak, describing it as four days of- ''bad service, bad food and now this.''

-30- 1559

#90113u4213 04/23/1990 ~United Press International

(APRIL 23) UPI - President Bush telephoned Syrian President Hafez Assad today to thank him for Syria's role in the release of hostage Robert Polhill.

The White House said Bush expressed hope the remaining Americans held in Lebanon would be released ''as soon as possible.''

Assad's influence was a crucial element in the behind-the-scenes efforts to win freedom for Polhill, an accountant who taught at the American University of Beirut.

Spokesman Marlin Fitzwater said the president also telephoned King Hussein of Jordan ''for a general discussion of Middle East issues.''

Fitzwater said the administration did NOT know what was the motivation for the release. But Fitzwater expressed appreciation if Iran helped Polhill's release.

Iran's foreign minister today grabbed credit for arranging he release of Polhill.

But Ali Akbar Velayati appeared to link any future release to the return of Moslem prisoners in Israeli jails.

The State Department cautioned there is NO reason to believe another release is imminent.

Polhill is undergoing medical tests in Wiesbaden, West Germany, to see how three years of captivity affected him.

An administration official says President Bush will ''likely'' announce possible measures against the Soviet Union for its crackdown on Lithuania following talks with congressional leaders tomorrow.

But the official did NOT provide any details of the potential announcement.

The development came as the White House conducted business as usual with the Soviet Union in light of the Kremlin's softened stance toward Lithuania.

There has been speculation of possible economic sanctions in support of the Baltic republic's drive for independence. But spokesman Marlin Fitzwater earlier said the administration is hopeful ''the two sides can get together.''

Fitzwater praised Moscow for showing flexibility with today's statement that Lithuania can keep its declaration of independence during negotiations.

While Washington gave a warm reception to the Kremlin proposal, there has been NO official response to it from Lithuania's leaders.

-30- 2295

#90113u4245 04/23/1990 ~United Press International

(APRIL 23) UPI - The Reverend Ralph David Abernathy was buried today in a crypt that reads- ''I tried.''

The civil rights activist was eulogized during services in Atlanta as a ''giant slayer'' who fought racism with ''a slingshot of love.''

Abernathy's funeral resembled services held 22 years ago for his friend and confidant, Martin Luther King Junior.

About 25-hundred people attended the funeral, including Jesse Jackson and relatives of Martin Luther King Junior. Some 300 were family members of close friends.

Abernathy died Tuesday of cardiac arrest at age 64... 22 years and 13 days after cradling a dying King in his arms in Memphis, Tennessee.

As Abernathy wanted, a mule-drawn wagon carried his casket from the Baptist church where he preached to a cemetery where many poor blacks are buried.

Christian leaders in Israel say they will shut down holy sites in Jerusalem and Bethlehem for one day to protest a new Jewish settlement.

Officials say the closure will begin Friday and may continue indefinitely. But the length may depend on legal attempts to evict 150 Jewish residents from St. John's Hospice in the Christian quarter of Jerusalem's Old City.

The Jews moved into the building four days before Easter and are thought to be the first Jews to live in the quarter since Israel captured the Old City in 1967.

Yesterday, the Israeli government acknowledged it contributed nearly two-Million dollars toward buying the disputed building.

And today, the U-S State Department described the Jewish takeover of the building as ''insensitive and provocative.'' It also called the Israeli government's financial support of the action ''deeply disturbing.''

A department spokeswoman says the incident may change the system of Israel getting three-BILLION dollars in U-S aid without review of how the money is spent.

-30- 2034

#90113u4294 04/23/1990 ~United Press International

(APRIL 23) UPI - West Germany today gave in and agreed to convert East German wages at a rate of one West German mark for one East German mark.

The conversion will take place when the German monetary and economic union takes effect July 1st.

The West German decision is a significant concession to East Germany.

Personal savings up to about 24-hundred dollars also will be converted at the one-to-one rate. Pensions will be tied to wages and paid on the same basis as they are in West Germany.

However, the debts of East German industry will be calculated at a two-to-one rate.

The decision came at a two-day meeting in Bonn between Chancellor Helmut Kohl, government and party leaders, and the Bundesbank, the West German central bank.

The Bundesbank had sought an exchange rate of two East marks for every West mark, but that proposal sparked a massive protest in East Berlin this month.

The West German mark has much greater buying power on the open market.

New York City police say they'll go undercover as cab drivers to try to catch killers who have murdered six Bronx cabbies in the past seven weeks.

A police spokesman said the officers will drive gypsy cabs, but he would NOT say whether they'll pick up any passengers.

Besides the six fatalities, another driver was fatally shot in Brooklyn Saturday in an UNrelated killing. The shootings have prompted many cabbies to stop driving at night.

Mayor David Dinkins last weekend asked police to expand a 30-member task force to investigate the killings.

Police say four of the slayings are believed to have been committed with the same 22-caliber handgun.

A Taxi and Limousine Commission spokesman advises drivers to double check radio dispatched fares and to store cash in a locked strongbox.

Some drivers are also talking about devising a code, such as turning off their headlights, when they feel threatened by a fare.

-30- 2100

#90113u4380 04/23/1990 ~United Press International

(APRIL 23) UPI - Federal investigators are en route to the scene of today's derailment of a Chicago-bound Amtrak passenger train near Batavia, Iowa. Amtrak officials now say at least 74 people were injured, three seriously, when seven of the train's passenger cars went off the tracks. Three flipped onto their sides.

A senior administration official says President Bush ''likely'' will announce what steps he plans to take against Moscow for its crackdown on Lithuania following a meeting tomorrow with congressional leaders.

The development comes as the White House appeared to be adopting a softer tone in the crisis. An earlier White House statement said it welcomed a statement from the Soviet Union that Lithuania can keep its independence declaration during the republic's talks with Moscow.

President Bush phoned Syrian President Assad today to express his appreciation for Syria's role in yesterday's release of American hostage Robert Polhill. The White House says during the call, Bush expressed hope the remaining U-S captives would be freed ''as soon as possible.''

Iran's role in Polhill's release his pro-Iranian captors remains a mystery. But today, the Iranian foreign minister claimed Tehran had arranged the release and hinted that further releases depended on Israel freeing a captive Shiite leader.

Polish authorities suspect arson in yesterday's early morning apartment fire in Warsaw that killed the wife of a Solidarity journalist. The journalist was known for his tough reporting on the security police of

Poland's ousted communist government.

Fires continued to burn today in three crude oil tank cars that were among the 29 rail cars that derailed last night in Craigsville, Pennsylvania... 40 miles north of Pittsburgh. But most of the 200 people evacuated after the accident are now back in their homes.

(APRIL 23) UPI - Amtrak now says at least 100 people were injured, three seriously, when one of its passenger trains derailed this afternoon south of Batavia, Iowa. NO one was reported killed. Most of the injuries are said to be minor, although 15 people have been hospitalized. In addition, one woman with a history of heart problems was hospitalized with chest pains. Passengers say the West Coast-to-Chicago train rocked violently from side to side before leaving the tracks... with some people and dishes falling to the floor.

President Bush may have word tomorrow on U-S moves in support of Lithuania's drive for independence. A senior administration official says Bush will ''likely'' announce measures he plans to take against the Soviet Union after he meets with congressional leaders tomorrow. Earlier today, the Kremlin said Lithuania may keep its independence declaration while negotiating with Moscow.

The United States and the European Community agreed today to consider developing a comprehensive aid package for struggling democracies. The aid would be more widely available to include countries in Central America... similar to the economic help being given to Eastern Europe. Secretary of State Baker hosted the one-day ministerial talks in Washington, D-C.

Chinese Premier Li Peng is in Moscow on the highest-level Chinese trip to the Soviet capital in 25 years. Li met with Soviet Premier Nikolai Ryzhkov and then attended a state dinner held in his honor at the Kremlin. The Soviet news agency Tass reports Ryzhkov described Li's visit as ''a landmark in the development of relations between the two countries.'' Soviet President Gorbachev met with Chinese leaders in Beijing last May.

#90113u4553 04/23/1990 ~United Press International

(APRIL 23) UPI - Nicaragua's outgoing Sandinista government is giving its military and police officers a choice. They can either retain their government posts or resume party duties when opposition President-elect Violeta Chamorro takes office Wednesday. Holdover government workers would allow the Sandinistas to retain some control over the Nicaraguan armed forces. A transition agreement bans the military from holding key

political positions.

In New York City today, the star prosecution witness in the Bensonhurst murder trial of a black teen-ager defended her testimony under a barrage of questioning. Gina Feliciano says she saw four white teen-agers draw guns and chase a group of black youths moments before one of them was fatally shot last August. Keith Mondello is charged with second-degree murder in the shooting of 16-year-old Yusuf Hawkins.

A court official in Aspen, Colorado, says gonzo journalist Hunter Thompson is scheduled to go on trial August 14th on drug and sexual assault charges. The charges stem from accusations by a 35-year-old former pornographic movie actress and producer that Thompson roughed her up at his home. Friends of Thompson had planned to raise defense money by showing the woman's X-rated films... but they could NOT obtain permission from the film-licensing company.

A spokeswoman says actress Elizabeth Taylor is ''seriously ill'' after undergoing a lung biopsy and being placed on a ventilator to help her breathe. The two-time Academy Award winner is hospitalized with pneumonia in Santa Monica, California. The 58-year-old Taylor checked into a hospital two weeks ago with what was then described as a sinus condition and fever.

#90114b0014 04/24/1990 ~Business Wire

NEWPORT BEACH, CA (APRIL 24) BUSINESS WIRE - Downey Saving and Loan Association (NYSE,PSE:DSL) Tuesday reported first-quarter 1990 net earnings of $13,156,000, or 81 cents per share.

For the like period in 1989, $21,007,000, or $1.30 per share, was posted and included approximately $11 million, or 68 cents per share, from a one-time earnings credit (cumulative effect of change in accounting principle regarding income taxes) realized in that quarter.

M.L. McAlister, president of Downey Savings, in making the announcement, said, ''The company's net earnings for the first three months of 1990 are especially noteworthy in that they almost equaled 1989's full-year results of $13.6 million, or 85 cents per share.''

New loan volume for the first three months of 1990 amounted to $163.7 million, up sharply from the $77.2 million posted in the like quarter of 1989. For the quarter, the yield on new loans recorded was approximately 10.3 percent. According to McAlister, the company expects to increase the tempo of its lending activities, both in the residential and consumer areas.

At March 31, total loans amounted to $2.7 billion with an average yeild of 10.5 percent. At quarter's end over 60 percent of the association's loan holdings consisted of adjustable-rate loans and loans with a due date of five years or less. The company's non-performing loan ratio of .2 percent continues to be below industry averages by a wide margin and attests to the quality of Downey's loan portfolio.

At quarter's end, total deposits were $3.4 billion, down $72.7 million since year-end 1989. Of this amount, approximately $126 million represented intentional run-off of high-cost deposits acquired from Downey's former subsidiary, Butterfield Savings.

The Downey portfolio increased $54 million during the first quarter. At March 31, the average cost of deposits was 7.52 percent as compared with 7.76 percent at year-end. According to McAlister, ''This reduction in our cost of deposits was primarily responsible for the increase to 2.48 percent in our margin (yield on loans and investment less cost of money).''

RENO, NV (APRIL 24) BUSINESS WIRE - Sierra Pacific Resources (NSYE:SRP) Tuesday reported first quarter earnings of 68 cents per share of common stock, down 2 cents from the like quarter in 1989.

Net income per share of 68 cents for the three months ended March 31, declined 2 cents compared to earnings of 70 cents for the first quarter of 1989. This decrease is due primarily to warmer than normal weather during the quarter and the effects of a general rate decrease in electric revenues for the corporation's utility subsidiary which became effective Oct. 1, 1989.

Operating revenues for the quarter ended March 31 were $129,896,000, up from $121,974,000 a year ago. Operating expenses for the like quarter were $105,142,000, up from $96,345,000 a year ago.

#90114b0079 04/24/1990 ~Business Wire

CLEVELAND (APRIL 24) BUSINESS WIRE - Centerior Energy Corp. (NYSE:CX)

Tuesday reported first quarter earnings of $50,509,000, 36 cents per share down 25 percent from $67,690,000, 48 cents per share, in the first quarter of 1989.

The Northern Ohio electric utility holding company noted a continuing improvement in the quality of its earnings. Non-cash acounting credits were a significant part of Centerior's earnings in recent years.

These non-cash credits will continue to decline and the cash component of Centerior's earnings will continue to grow as investments in two new nuclear units are increasingly reflected in rates.

First quarter revenues of $560,594,000 were up 1 percent from $555,230,000 in the year-ago period, despite a 3.1 percent drop in kilowatt-hour sales, as a result of a 9 percent rate increase in February 1989 and a 7 percent increase in February 1990.

Net income declined sharply despite the slight gain in revenues because of lower deferred operating costs and carrying charges (non-cash accounting credits) in connection with two nuclear units as stipulated in a January 1989 negotiated rate settlement.

For the 12 months ended March 31, 1990, earnings per share were $1.78 and net income was $249,705,000 compared to per share earnings of $1.83 and net income of $257,416,000 for the period ended March 31, 1989 before a write-off of nuclear plant investments. (The fourth quarter 1988 write-off caused a reported loss of 65 cents per share and $91,458,000 for the 12 months ended March 31, 1989.)

For the 12 months ended March 31, 1990, revenues of $2,307,800,000 were up 10.6 percent from $2,086,211,000.

Kilowatt-hour sales to retail customers in the first quarter were down 1.1 percent from the first quarter of 1989. Commercial sales increased 2.4 percent, while residential sales dropped 0.8 percent and industrial sales declined 3.0 percent.

The mildest January-March period in northern Ohio history reduced Centerior's normal heating load. The ongoing revitalization of downtown Cleveland contributed to the increase in commercial sales. Sales to industrial customers dropped from the exceptionally strong first quarter of 1989, largely because of a slump in the automotive sector.

First quarter wholesale sales dropped sharply (80.3 percent) due to the May 1989 expiration of The Cleveland Electric Illuminating Co.'s 18-month agreement to sell 80 megawatts of its share of Perry Unit 1 output to another utility.

Cleveland Electric is one of Centerior's operating subsidiaries; the other is The Toledo Edison Co.

Total retail and wholesale sales of 7,078 millions of kilowatt-hours in the first quarter were down 3.1 percent from the year-earlier quarter.

For the 12 months ended March 31, 1990, retail sales were down 1.0 percent from the year-earlier period, wholesale sales were down 65.1 percent, and total sales were down 2.8 percent. Commercial sales were up 3.6 percent, while residential sales were down 1.8 percent and industrial sales were down 3.3 percent.

#90114b0093 04/24/1990 ~Business Wire

NEW YORK (APRIL 24) BUSINESS WIRE) - Metro Mobile CTS Inc. (AMEX:MMZ.A and MMZ.B) Tuesday announced that it began mailing proxy materials today to its stockholders (as of April 11) for its previously announced May 24 special meeting of stockholders.

At that meeting, stockholders will be asked to vote on a proposed amendment to Metro Mobile's charter to (i) increase the number of authorized shares of its Class B common stock from 50 million to 150 million and (ii) change the par value for shares of its Class A and Class B common stock from 10 cents per share to 3-1/3 cents per share.

The proposed charter amendment must be approved by a majority of the outstanding shares of both Class A and Class B common stock, each voting separately as a class. Metro Mobile CTS Limited Partnership - the holder of 57 percent of Class A shares outstanding and 32 percent of Class B shares outstanding - intends to vote all of its Class A shares ''FOR'' the amendment and to vote its Class B shares in the same proportion as the Class B shares it does not hold are voted.

The proposed charter amendment is necessary to permit occurance of essentially a 3-for-1 stock split in the form of a stock dividend of two Class B shares for every share of Class A or Class B common stock outstanding (the ''distribution''). The distribution is subject to certain conditions described in the special meeting proxy materials, including approval of the proposed charter amendment by both classes of common stock. If all conditions have been satisfied, Metro Mobile expects the distribution to be made on May 25. Holders of record as of May 15, will be entitled to receive the distribution when made.

Holders of Metro Mobile Class A or Class B common stock should contact their brokers and watch for announcments from the American Stock Exchange with respect to the actual ex-distribution date, trading of ex-distribution Metro Mobile common stock and the dates on which due bills will settle.

Stockholders will not have to return any stock certificates if the distribution is made. New stock certificates representing Class B shares issued in the distribution will be mailed to stockholders promptly after the distribution occurs.

For complete information about the proposed charter amendment and the distribution, stockholders should review the proxy materials for the May 24 special meeting of Metro Mobile stockholders.

#90114b0099 04/24/1990 ~Business Wire

HOUSTON (APRIL 24) BUSINESS WIRE - Shell Oil Co. earned $203 million in the first quarter of 1990, a decline of $159 million from the 1989 period, President Frank H. Richardson announced Tuesday.

The first quarter of 1989 included a $70 million gain from an insurance settlement. Excluding this item, 1990 first quarter earnings declined $89 million.

Domestic crude oil prices averaged $18.09 per barrel for the first quarter of 1990, up $4.11 per barrel over the like 1989 period. However prices weakened considerably in March and continued to fall in April. By mid-April crude oil prices were about $4 a barrel below the first-quarter 1990 average. Natural gas prices averaged 13 percent higher than the like 1989 period, but declined seasonally during the quarter.

Total crude oil production in the first quarter of 1990 averaged 496,000 barrels per day, compared with 520,000 barrels per day in the like 1989 period. Net domestic production decreased 33,000 barrels per day to 409,000 barrels per day, primarily due to natural declines in older fields.

However foreign production continued to grow, averaging 87,000 barrels per day, up 9,000 barrels per day. The increase in foreign production was mainly in Syria.

Natural gas production was 1,484 million cubic feet per day for the quarter, an improvement over the preceding two quarters, but 110 million cubic feet per day below that of a year ago.

Oil products incurred a loss of $21 million in the first quarter of 1990, compared with earnings of $113 million in the like 1989 period. Excluding the effect of the $70 million property insurance settlement in the first quarter of 1989, the decline in 1990 was $64 million.

Refined product sales volumes averaged 1,174,000 barrels per day, up 3 percent over the like 1989 period. The increase was due primarily to higher inter-refiner gasoline sales. Chemical Products

Richardson reported that chemical products earnings were $98 million, down $125 million from record earnings in the first quarter of 1989. The decline mainly reflected lower margins and sales volumes in commodity chemicals, and, to a lesser extent, freeze-related damage.

BEVERLY HILLS, CA (APRIL 24) BUSINESS WIRE - Willis B. Wood., Jr., president of Pacific Enterprises, Los Angeles, has been elected a director of Great Western Financial Corp., it was announced at the company's annual meeting Tuesday.

Wood, 55, is also a member of the board of directors of Pacific Enterprises, the parent firm of Southern California Gas Co., Thrifty Corp. and Pacific Enterprises Oil Co., an independent oil and gas company.

James F. Montgomery, Great Western chairman and chief executive, said, ''Mr. Wood's extensive experience in the managemnet of one of Southern California's largest and most respected corporations will be a valuable addition to Great Western's board of directors.''

Wood replaces Stuart Davis, retired vice chairman, who served Great Western and a predecessor company for nearly 50 years, many of them as chief executive officer and chairman. Davis has been named an honorary director of the company.

Wood joined Pacific Lighting Gas Supply, a Pacific Enterprises subsidiary, in 1960. He has held a variety of positions, including serving as president and chief executive officer of Pacific Lighting Gas Supply Co. and executive vice president of Southern California Gas Co.

Wood is a trustee of Harvey Mudd College in Claremont, the California Medical Center and the Southwest Museum, in Los Angeles. He is active in

various professional associations and civic organizations.

A graduate of the University of Tulsa, Wood holds a degree in petroleum engineering and completed the Advanced Management Program at Harvard Business School.

Great Western Financial Corp., with assets of more than $37 billion, is the parent company of a real estate-oriented retail bank. One of the nation's leading residential mortgage lenders, the company operates 1,000 mortgage lending, retail banking and consumer finance offices nationwide.

#90114b0152 04/24/1990 ~Business Wire
NEW YORK (APRIL 24) BUSINESS WIRE - Southern Natural Gas Co.'s (SNG) 'BBB+' senior debt rating is affirmed by Fitch Investors Services.

The rating applies to four outstanding issues of sinking fund debentures and notes totaling $305 million. All issues are removed from General Review, where they were placed on May 11, 1989, along with all other securities rated by Fitch. The company's near-to intermediate-term credit direction is viewed as improving.

The rating affirmation reflects improving credit quality and greatly reduced regulatory risk following a take or pay settlement agreement effective the first quarter of 1989. Pretax interest coverage increased to 3.24 times in 1989 (before non-recurring items) from 2.99x in 1988 and 3.01x in 1987 and is expected to remain comfortably above three times over the foreseeable future. In addition, healthy cash flows should fund all or most capital expenditures, and total debt is projected to remain a conservative 40 percent of capitalization.

A proposal to introduce a new firm sales rate (SURF - Supply Reservation

Fee) is pending before the Federal Energy Regulatory Commission (which regulates interstate pipelines). Approval of this or a similar rate structure would avert the accrual of future take or pay expenses.

Southern Natural Gas Co. is engaged in the transmission and sale of natural gas to markets in seven southern states. Headquarters are located in Birmingham, Ala. SNG is a wholly owned subsidiary Sonat Inc., a diversified energy company.

PHOENIX (APRIL 24) BUSINESS WIRE - William H. Mallender, chairman and chief executive officer of Talley Industries Inc. (NYSE:TAL), addressing the company's annual meeting Tuesday morning, said first quarter earnings were $2.5 million, or 21 cents per share, on total revenues of $103.2 million for the quarter ended March 31.

This compares with earnings of $2.7 million, also 21 cents per share, on sales of $102.5 million recorded during the first three months of 1989.

''Our first quarter performance was led by outstanding results in our solid propellant manufacturing companies and by strong earnings at our savings bank,'' Mallender said.

Mallender also told shareholders that while the overall Phoenix economy appears strong, he does not expect improvement in the company's real estate segment in the near term.

''Our real estate people are taking every possible approach to deal creatively with the property we have and we are exploring all options to lessen our investment,'' he said.

Mallender said the challenges for 1990 include the reduction of Talley's real estate portfolio, restructuring the company's debt to a lower number, improving the debt to equity ratio to levels recently deemed more acceptable and adjusting to the changing environment for military business caused by the dramatic and positive events in Eastern Europe. Management is working aggressively on all fronts.

Talley Industries is a diversified designer, manufacturer and supplier of aerospace, industrial and commercial products and services, including high reliability electronic components and stainless steel rod and bar products.

Talley also invests in and develops real estate, primarily in the Phoenix

area, and operates a federally chartered savings bank as an autonomous, wholly owned subsidiary, which specializes in serving the Asian population in the greater Los Angeles area.

DENVER (APRIL 24) BUSINESS WIRE - Galt Financial Corp. announced it has signed a letter of intent to acquire Denver-based, privately held Metropolitan Golf Club Inc.

Metropolitan Golf Club operates an indoor golf complex which includes a driving range, putting greens, bunkers, pro shop, cafe and locker rooms.

The Club also offers stroke analysis and instructional videotaping by Metropolitan's own golf professional.

This urban indoor golf concept is a time-saving, year-round weatherproof alternative to traditional golf links. It was designed to capture business from the growing ranks of golf enthusiasts, especially urban executives who work in the confines of a downtown area, who are looking for a time-conscious, convenient alternative to spending several hours away from the office on the golf course.

Metropolitan Golf is currently operating in downtown Denver, and has plans to open additional facilities in other large metropolitan cities across the nation, starting with Houston.

Galt Financial Corp. is publicly traded over-the-counter.

SAN FRANCISCO (APRIL 24) BUSINESS WIRE - First Republic Bancorp Inc. (ASE/PSE:FRC) Tuesday reported its quarterly results for the first quarter of 1990.

Net income in the first quarter of 1990 was $272,000, an increase of 46 percent over net income of $186,000 in the first quarter of 1989. Results for the first quarter of 1990 are after a special loss reserve of $600,000 on a pretax basis, related to a previously announced potential loss on collateralized overnight advances.

Quarterly earnings per share were 8 cents in 1990 compared with 6 cents for the like quarter in 1989. The number of common stock share equivalents outstanding were 3,376,000 for both quarters. For the quarter ended March 31, 1990, net interest income was $2,602,000, compared to $1,811,000 for the first quarter of 1989.

During the quarter ended March 31, 1990, the company originated $81,900,000 of loans compared with loan originations of $47,900,000 for the like quarter in 1989. The total portfolio of real estate loans serviced for secondary market investors was approximately $441,000,000 at March 31, 1990, an increase of 10 percent from $400,000,000 at March 31, 1989.

Consolidated assets were $552,874,000 at March 31, 1990. Substantially all of the company's $442,700,000 loan portfolio consists of adjustable rate, first trust deed, California real estate secured loans. As of March 31, 1990, assets over 90 days delinquent were less than 1.0 percent of total assets.

The company's two California industrial banking subsidiaries offer investment certificates which are insured by the FDIC. At March 31, 1990, total certificates were $492 million.

The company continues to maintain a strong capital base. Total capital resources at March 31, 1990, of $49,467,000 represented over 9.0 percent of total assets. Intangible assets are minimal with net goodwill of only $110,000 at March 31, 1990.

First Republic Bancorp Inc. functions as a mortgage banker and direct lender through its California-chartered industrial banking subsidiaries, First Republic Thrift & Loan (San Francisco and Los Angeles) and First Republic Thrift & Loan of San Diego.

DALLAS (APRIL 24) BUSINESS WIRE - Wyndham Garden Hotels, a division of Wyndham Hotels & Resorts, Tuesday announced an agreement to purchase and renovate 11 recently constructed hotel properties for a total transaction cost of $130 million.

These properties are currently owned and operated by Ramada Hotel Operating Co. and were originally built as prototypes for its new development program. The hotels will become Wyndham Garden Hotels after substantial upgrading and renovation.

The purchase of the 11 hotels for $116 million will be completed through a joint venture between YTB Leasing (America) Inc. and other Japanese investors and Wyndham Hotels & Resorts based here.

''These hotels closely fit the Wyndham Garden Hotel concept -- properties that are designed as smaller, conveniently located, upscale suburban hotels created specifically to meet the needs of the business traveler,'' said Les Bentley, president of Wyndham Garden Hotels.

When completed, the acquisition will bring the present number of Wyndham Garden Hotels to 17. Two additional Garden Hotels in Milwaukee, Wis. and Indianapolis, Ind. are under construction and four others are scheduled to begin construction shortly which will bring the Wyndham Garden Hotels' national presence to 23 by early 1991.

"Currently, we are negotiating approximately 10 luxury and resort hotel management contracts. Additonally, Wyndham has acquisition transactions in excess of $200 million in process,'' explained James D. Carreker, president of Wyndham Hotels & Resorts.

A division of the Trammell Crow Group, Wyndham owns, operates and manages hotel properties throughout the United States and the Caribbean. With hotels operating in three specific segments of the industry -- luxury, upscale suburban and resort -- Wyndham is one of the fastest growing hotel management companies in the United States.

BERKELEY, CA. (APRIL 24) BUSINESS WIRE - TENERA L.P. (ASE:TLP) Tuesday announced revenue of $11.3 million and net earnings of $1.2 million, or 13 cents per unit, for the three months ended March 31, 1990.

This compares with revenue of $10.4 million and net earnings of $1.0 million, or 11 cents per unit, for the three months ended March 31, 1989. After elimination of depreciation and amortization, cash income was 20 cents per unit for this quarter, compared to 15 cents for the corresponding period last year.

In commenting on these results, Don K. Davis, chairman and chief executive officer of TENERA's General Partner, said: ''For the third time in the last 12 months we have achieved a historic high in quarterly revenue.

''This volume has been achieved with our largest client accounting for only 13 percent of revenue. I am pleased with the success of our client and revenue diversification strategy, first initiated in 1987.''

TENERA L.P. provides information based services and software products for utilities and large industrial corporations through offices in California, Idaho, Maryland, Michigan, New York, North Carolina and Tennessee.

GEYSERVILLE, CA (APRIL 24) BUSINESS WIRE - Geyser Peak Winery has promoted Paul White to the position of Production Manager in charge of winery production, warehousing and maintenance.

Paul has been with Geyser Peak since 1978, starting as a lab technician. Having been promoted through several winemaking positions since then, his most recent job was as production coordinator.

Paul has a Bachelor of Science degree in chemistry from U.C. San Diego. Plans for the future include increasing the winery's crush capabilities and plant size.

Paul replaces Henry Snedker, who recently retired after five years with Geyser Peak. Prior to that, Henry spent 14 years as Production Manager at Almaden Vineyards.

#90114b0233 04/24/1990 ~Business Wire

EL SEGUNDO, CA (APRIL 24) BUSINESS WIRE - International Rectifier Corp. (NYSE/PSE:IRF) Tuesday reported a net profit of $525 thousand, or 5 cents per share, on sales of $61.3 million in its third fiscal quarter ended March 31, compared with a net loss of $3.5 million, or 32 cents per share, on sales of $48.2 million in the year-ago period.

Third-quarter sales grew 27 percent year-to-year.

Results showed improvement for the fifth consecutive quarter, reflecting higher production rates and improved gross margins at HEXFET America, the company's $100 million power MOSFET manufacturing plant in Riverside County, Calif. Utilization of wafer fabrication capacity at the plant averaged 51 percent in the quarter, compared with 30 percent in the year-ago quarter.

Several factors partially offset improved efficiencies at HEXFET America. The move to Mexico of power products assembly operations and consolidation of power products silicon processing, negatively impacted margins. Currency exchange rates on increasing sales in the Far East also had a negative effect. In the military business, a slack market and price pressure affected margins on standard parts.

For the nine months ended March, the company reported sales of $165.2 million with a net profit of $69 thousand, or .01 cent per share, vs. sales of $140.4 million with a net loss of $12 million, or $1.07 per share in the prior year. Sales for the period grew 18 percent year-to-year.

On April 10, the company reported that a Federal District Court in Los Angeles, after a lengthy trial held valid all five of its key U.S. patents relating to power MOSFET technology and ruled that Siliconix Inc. had infringed those patents. Shortly following that decision, Siliconix filed for protection from creditors under Chapter 11 of the bankruptcy code.

The amount of damages incurred by IR from Siliconix's infringement will be determined in subsequent court proceedings.

The company believes that its patents cover virtually all power MOSFETs made and sold in the U.S. marketplace. IR also holds numerous foreign patents on its HEXFET power MOSFET technology and has a number of additional applications pending.

The company directly commands about a 25 percent share of the world market and currently has royalty-bearing licenses with Hitachi, Toshiba, Matsushita and Unitrode.

Order input in the third quarter ran 33 percent ahead of the comparable quarter last year. The strength in orders and backlog reflected seasonal business patterns and lengthening leadtimes in the power MOSFET market.

Management expects further improvement in results in the quarter ending June. Expected increases in volume and efficiencies at HEXFET America could be partially countered by any remaining costs of completing consolidation of power products manufacturing in the fourth quarter.

International Rectifier is a major worldwide supplier of power semiconductors and the international leader in power MOSFETs with its HEXFET line.

TORONTO (APRIL 24) BUSINESS WIRE - Corona Corp. (ASE:ICR.A, ToSE/VcSE/MoSE:ICR.A./ICR.B.) announced Tuesday that since Apr. 2 it has acquired a further 2,655,300 common shares representing an additional 4.2 percent of the common shares of Breakwater Resources Ltd. by way of open-market purchases.

Pursuant to a plan of arrangement by which American Pacific Mining Company Inc. amalgamated with a wholly owned subsidiary of Breakwater, Breakwater issued common shares on Mar. 19 that resulted in the previously reported holding of Corona of approximately 14 percent being diluted to 6.8 percent of the outstanding common shares.

Corona, through its wholly owned subsidiary, New Venture Equities Inc., purchased a total of 1,955,300 common shares on the open market between Apr. 2 and Apr. 16, which purchases resulted in an increase in Corona's interest to 9.85 percent of the outstanding common shares of Breakwater.

On Apr. 24 Corona, through New Venture Equities Inc., purchased a total of 700,000 common shares on the Toronto Stock Exchange. Corona now owns directly 1,152,100 common shares and owns through New Venture Equities Inc. 5,762,221 common shares for a total of 6,914,321 common shares representing approximately 11 percent of the total number of common shares of Breakwater outstanding.

Breakwater has previously announced that it had entered into an agreement

in principle with Bathurst Base Metals Inc. whereby Breakwater will acquire all of the issued and outstanding shares of Bathurst by way of business combination through which the shareholders of Bathurst will receive one common share of Breakwater for each 3.75 common shares of Bathurst held by them.

Corona holds 3,002,300 common shares of Bathurst and a debenture in the principle amount of $2,500,000. The debenture may be converted into common shares of Bathurst on or before Nov. 30 at the rate of $1.50 per share (equivalent to $5.625 per share after giving effect to the business combination) and thereafter at $2.50 per share (equivalent to $9.375 per share after giving effect to the business combination) at any time up to and including Nov. 30.

If the business combination proceeds as planned and Corona converts the debenture on or before Nov. 30, Corona will own directly and indirectly 8,159,378 common shares of Breakwater representing approximately 12 percent of the common shares of Breakwater outstanding.

Corona has acquired these additional shares for investment purposes and intends to continue to increase its holding in Breakwater.

Corona's present intention is to acquire a substantial interest in Breakwater. However, Corona will continue to evaluate its investment and may increase or decrease its holdings as circumstances require.

OAKBROOK TERRACE, IL (APRIL 24) BUSINESS WIRE - James Q. Crowe, chairman of Metropolitan Fiber Systems Inc., Tuesday announced that Anthony J. Pompliano Sr. has been elected vice chairman of the MFS board of directors and that Royce Holland has been named MFS president and chief executive officer.

Holland, who succeeds Pompliano as MFS president and chief executive officer, formerly was MFS vice president in charge of new city development. He also is president of MFS's parent company, Kiewit Communications Company Inc.

MFS is a subsidiary of Peter Kiewit Sons' Inc., Omaha, Neb., a multibillion-dollar company with interests in packaging, construction,

mining and communications. MFS has emerged as the leader in a new industry -- building and operating telecommunications networks that compete against the Regional Bell Operating Companies.

As the first nationwide local telecommunications competitor, the company already operates fiber optic networks in eight major metropolitan business centers throughout the United States and has two additional networks under construction.

SUNNYVALE, CA (APRIL 24) BUSINESS WIRE - Falco Data Products, Sunnyvale, is introducing a new series of video display terminals incorporating an industry-first user interface which adds a DOS application feel and dramatically improves the terminals' ease of configuration and windowing capability.

The Falco Infinity S Interface is patterned after those utilized on personal computers. It provides a simple to understand, step-by-step process to direct the user through either a mouse or cursor control to choose the settings necessary for the desired set-up and window configuration. This is in sharp contrast to standard VDTs which require a complex series of commands.

Falco Data Products, founded in 1979, provides a full spectrum of video display terminals and systems products including computers, monitors and LAN workstations. Falco, a leader in the VDT marketplace, designs, manufactures and sells a full range of ANSI, ASCII and multiple personality video display terminals.

All Falco's products are assembled at the company's Sunnyvale facility and sold through distributors, value-added resellers and original equipment manufacturers in the United States and international markets.

PRINCEVILLE, HI (APRIL 25) BUSINESS WIRE - An agreement has been

completed between Nippon Shinpan Co. Ltd. of Japan and the court appointed receivers of Qintex Australia Limited (QAL), David Crawford and John Allpass, for Nippon Shinpan's purchase of QAL's 51 percent interest in Qintex Resorts B.V. (QRBV), the 100 percent parent of Princeville Corp. and the owner of other Princeville assets.

The agreement is only subject to Hawaii regulatory approval, for which an application has been submitted.

QRBV's ownership following this transaction will be 75.5 percent Nippon Shinpan and 24.5 percent Mitsui & Co. Nippon Shinpan and Mitsui & Co. Ltd. each purchased 24.5 percent of the stock in QRBV, and a similar interest in the two Mirage Resorts in Australia, in April 1989.

The current agreement is for Princeville only and its holdings in Mirage Princeville Resort, and does not include the two Australian Resorts.

A spokesperson for Nippon Shinpan stated: ''It has been a complex purchase to complete and therefore, has taken longer than we had anticipated. We are now confident that Princeville Corp. will be in a position to move forward with the development plans at Mirage Princeville Resort.''

Walter W. Challenger, chief operating officer and executive vice president of Princeville Corp., said: ''Princeville's first priorities will be to settle with all lienholders and creditors, and to remobilize the construction staff on the Sheraton Mirage Princeville Hotel as quickly as possible.''

Completion of the hotel is expected to take approximately six to seven months once construction resumes. According to Challenger, the completion of the Resort's 18-hole Prince Course and the refurbishment of the Makai Courses' Ocean Nine will begin as soon as the additional golf course maintenance staff are brought back.

Other development projects at Princeville which were suspended will be resumed as soon as Princeville's new owners have evaluated and refined the development schedule. The company's restaffing will be based upon the finalized project timetable.

Princeville is engaged in resort operations and real estate development on the island of Kauai, Hawaii.

#90114b0382 04/24/1990 ~Business Wire

REDWOOD CITY, CA (APRIL 25) BUSINESS WIRE - Network Equipment Technologies Inc.'s (NYSE:NWK) audited year end financial statements show revenue of $181.3 million compared to the $136.7 million for the previous fiscal year.

Net income for the year was $13.5 million, or 93 cents per share, down from $16.0 million, or $1.15 per share for last fiscal year.

The company also announced revenue for the fourth quarter, ended March 31, 1990, or $45.7 million, and net income of 4 cents per share. This was an increase of $6.9 million in revenue and a decrease of 29 cents in net income per share from the prior fiscal fourth quarter.

As a result of a previously announced internal investigation, the company concluded, with the concurrence of its external auditors, that its unaudited revenue and earnings for its second and third quarters of fiscal 1990 should be restated. This restatement reduced the second and third quarter revenue and net income from those previously reported.

The restatement of results for the second quarter, which ended Oct. 1, 1989, relates to the reversal of revenue from one shipment, valued at approximately $519,000, that was made pursuant to an invalid order that was received in late September of 1989. Restated revenue for the second quarter is $47.2 million and net income is $4.9 million, or 34 cents per share.

This represents a $519,000 decrease in revenue and a 2 cents decrease in earnings per share compared with previously reported results.

Restated results for the third quarter, which ended Dec. 31, 1989, are

$46.7 million in revenue and $3.1 million in net income, or 21 cents per share. This represents a decrease in revenue of $5.4 million, and an 18 cents decrease in earnings per share compared with previously reported results.

Approximately $1.4 million of this amount was due to shipments made pursuant to the invalid order received in September. The balance of $4.0 million represented shipments now known to have been made without appropriate order documentation from customers.

Subsequently, the company received appropriate order documentation for approximately $2.4 million of these shipments, and $1.8 million of such revenue is correctly reported in the fourth quarter. The remaining shipments of $1.6 million have been returned and the related revenue reversed.

N.E.T. develops, manufactures, markets, and supports advanced communications products and services that enable large, information-intensive organizations to build and manage wide-area networks.

These networks interconnect computer and communications devices among geographically dispersed locations, enabling organizations to utilize their information systems to competitive and economic advantage.

REDWOOD CITY, CA (APRIL 24) BUSINESS WIRE - The Specialty Chemicals Group of Pfizer Inc (NYSE:PFE) and Advanced Polymer Systems Inc. (NASDAQ:APOS) Tuesday announced they have agreed to a broad commercial development and manufacturing collaboration worldwide, in which Pfizer will explore and develop APS' Microsponge delivery systems in industrial markets over the next 18 months.

The agreement calls for APS to receive license fees and royalties on the sales of all industrial products, using the patented APS technology. Pfizer has agreed to fund APS' research and development costs over the 18-month period for all Pfizer activated projects and provide commercial development and technical services to commercialize the APS technology in industrial fields.

Pfizer will have exclusive rights to manufacture products it commercializes and, in addition, will be a supporting manufacturing source if required, for certain existing APS licensees.

''This is a milestone agreement because it offers APS access to sizeable industrial markets, and provides us with an important second source for manufacturing,'' said John H. Williford, chairman and chief executive officer of APS.

''While the agreement offers the potential to realize significant royalties at some point in the future, these revenues will not occur until some time after the initial exploration and development period,'' said Williford.

Headquartered in Redwood City, Advanced Polymer Systems presently has approximately 20 major product development projects under way in a wide range of pharmaceutical, cosmetic, food and industrial applications for a number of major companies including Scott Paper Co., Rorer Group Inc., Mobil Chemical Co. and Wm. Wrigley Jr. Co.

The Specialty Chemicals Group is a division of Pfizer Inc, a diversified research-based health-care company with businesses in pharmaceuticals, hospital products, consumer products, animal health, specialty chemicals and specialty minerals. The company reported sales of approximately $5.7 billion for 1989.

#90114b0614 04/24/1990 ~Business Wire

SAN FRANCISCO (APRIL 24) BUSINESS WIRE - Impacted by a $20 million pre-tax provision for accounts receivable and a decline in the profits of its Armor All Products subsidiary, McKesson Corp. Tuesday reported lower earnings in the fourth quarter and fiscal year 1990 ended March 31.

Revenues in both periods registered gains.

For the quarter, revenues rose 11 percent to a record $2.1 billion from $1.9 billion, while income from continuing operations and net income declined 28 percent to $18.3 million from $25.4 million.

Fully diluted earnings per share from continuing operations and net earnings per share were 37 cents, down 37 percent from the 59 cents reported a year earlier. Per share results were based on 46.3 million shares in the latest quarter, up from 44.8 million in the prior year period.

For the full year, revenues increased 11 percent to a record $7.8 billion from $7 billion while income from continuing operations rose 5 percent to $98.7 million from $94 million. Earnings per share from continuing operations slipped 2 percent to $2.10 from $2.14 on 46.3 million shares, up from 45.8 million shares in fiscal 1989.

Net income dropped 2 percent to $98.7 million from $100.6 million in fiscal 1989, which included income of $6.6 million from discontinued operations. Earnings per share were off 8 percent to $2.10 from $2.28, including 14 cents from discontinued operations in 1989.

The increase in fully diluted shares reflects the sale last year of $125 million in convertible preferred stock to the company's Employee Stock Ownership Plan. McKesson will use the proceeds of the sale to repurchase 3.7 million common shares, but the company said that only 1.7 million shares were bought back during the past year. The balance of the repurchase is being carried forward in the current fiscal year.

The decision to increase reserves for customer accounts receivable was announced last week by the company, the nation's largest distributor of pharmaceuticals and health and beauty aids. At that time McKesson said the decision was prompted by its concern over the weakened financial condition of some of its retail customers who have employed excessive financial leverage.

The increase in reserves is reflected principally in the results of McKesson's drug distribution business, with lesser amounts charged against the company's service merchandising segment and Armor All Products.

SAN FRANCISCO (APRIL 24) BUSINESS WIRE - Southern Pacific Telecommunications Co., a subsidiary of the San Francisco-based Southern Pacific Transportation Co., announced Tuesday the completion of its acquisition of Digital Signal Inc., a Southfield, Mich.-based carrier's carrier.

The two companies will be combined and operated as a single entity, with headquarters in San Francisco and the major operating center in Southfield.

The combined companies form America's second largest fiber-based, nationwide, private-line carrier's carrier. The SP Telecom network serves

all major U.S. markets with DS-3, DS-1 and DS-0 services. Digital Signal Inc. has built a reputation in the long distance industry for providing high quality end-to-end service to long-distance carriers.

Douglas Hanson, president of SP Telecom, stated that the organization plans to build upon that reputation by introducing new, enhance products and services which will give customers greater control in managing their private line networks later in the year.

James Voelker, president of Digital Signal, will become executive vice president of SP Telecom. Voelker said that providing excellent customer service will continue to be the company's primary objective.

In addition to its communications service business, SP Telecom provides a complete package of services for carriers and businesses who want a fiber optic cable installation anywhere along the 15,000-mile Southern Pacific Transportation Co. right-of-way.

SACRAMENTO, CA (APRIL 24) BUSINESS WIRE - Unify Corp. and IBM Corp. Tuesday announced the companies have reached agreement on a Cooperative Selling Program allowing IBM representatives to market Unify's ACCELL family of Unix-based 4GL application development technologies to users of AIX-based IBM platforms.

''Unify is pleased to be among IBM's first Unix software partners,'' said Reed Taussig, Unify's senior vice president for sales. ''This noteworthy agreement with IBM underscores the calibre and performance of our ACCELL development tools for all leading Unix-based platforms.''

Under terms of the agreement, IBM sales representatives can market Unify's state-of-the-art ACCELL/SQL integrated application development system. ACCELL/SQL is fast becoming the ''Open Systems 4GL'' because it allows developers to choose any leading back-end Unix database engine (including Oracle, Informix, SCO/Integra, SYBASE and UNIFY 2000) and front-end user interface (including character-based, Microsoft Windows, Open Look and OSF/Motif).

Two other ACCELL products are covered under the current CSP. ACCELL IDS provides a fully integrated 4GL designed to run with the UNIFY relational

DBMS. ACCELL/CP is a cooperative processing option to allow AIX developers to integrate solutions with their DOS PC installed base. Unify Corp. will provide support for IBM sales representatives nationwide.

These ACCELL products are being marketed by IBM on a non-exclusive basis to users of IBM's AIX-based PS/2 and the RT workstation. Support for IBM's new line of RISC System/6000 (RIOS) high-performance Unix workstations will be added to the CSP by early summer.

In connection with the CSP agreement, Unify representatives will be joining IBM officials on a 20-city, cross-country AIX road show program beginning later this spring.

Unify Corp. is a leading manufacturer of Unix-based application development software tools. Based in Sacramento since 1980, Unify employs 250 people in 19 offices across the United States, Europe, Japan and Australia.

In 1988, Unify's ACCELL/SQL and UNIFY 2000 RDBMS were chosen by the U.S. Air Force as the foundation software technology for its $1 billion worldwide Unix conversion project -- the AFCAC-251 contract awarded to AT&T.

#90114b0627 04/24/1990 ~Business Wire

SAN DIEGO (APRIL 24) BUSINESS WIRE - Cohu Inc. (ASE:COH) Tuesday reported that sales for the first three months of 1990 were $9,843,000, with net income of $692,000, or 35 cents per share.

This compares with year-earlier sales of $8,480,000, with net income of $677,000, or 34 cents per share.

Order input for the quarter totaled $11,716,000, compared with $8,133,000 during the year-earlier quarter. Backlog at the end of the first quarter was $15,748,000, which compares with year-earlier backlog of $10,663,000 and year-end 1989 backlog of $13,875,000.

James W. Barnes, president and chief executive officer, said that first-quarter improvements in sales were mostly due to improved shipments of solid-state imager television cameras and pick-and-place test/handling systems. Earnings for the first quarter, while lagging the improvement

in sales, were about equal to those of the prior year.

Both business segments showed improvements in orders and ending backlog for the first quarter, compared with the prior year.

Continued acceptance of solid-state imager cameras and microwave radio/antenna systems provided improvement in orders for the television products business segment while improved orders for the modular, pick-and-place, test/handling systems provided improvement in the electronic test and detection business segment.

Quote activity remains high in all of the company's operations. This activity, along with the high backlog level, places the company in a favorable position for improvements in sales and profits.

#90114b0636 04/24/1990 ~Business Wire

EAST ROCHESTER, NY (APRIL 24) BUSINESS WIRE - MOSCOM Corp. (NASDAQ NMS:MSCM) Tuesday announced that another of its Unix call accounting software products targeted toward small businesses is now being marketed by AT&T.

The call accounting software is being sold nationwide by AT&T's General Business Systems group as part of its Integrated Solution II which also includes voice processing software and System 25 PBX administration.

All of the Integrated Solution II applications run on AT&T's 6386 Intel WGS Computer in conjunction with the System 25 PBX. The call accounting application of Integrated Solution II is available in two model sizes capable of supporting 120 and 250 telephone extensions. Retail prices will be $2,099 to $4,099.

The Integrated Solution II call accounting system is Unix-based software designed to provide users of the System 25 PBX with detailed information about the calls placed through the system. That information is presented in reports formatted to assist users to identify inefficient or improper uses of the system or to enable revenue generation or cost allocation. In most business applications, savings from use of call accounting software can result in payback of the purchase price in less than 12 months.

Commenting on the product introduction, Albert J. Montevecchio, MOSCOM president, said, ''We are extremely pleased that AT&T will be marketing another MOSCOM product. The combination of AT&T's very successful System 25 PBX, the powerful 6386 computer, voice processing, PBX administration

and MOSCOM's proven call accounting software is an ideal market strategy. We expect it to be very successful for both AT&T and MOSCOM.'' -0-

AT&T sells other products designed and produced by MOSCOM, including Call Accounting Software for personal computers, the Integrated Solution I for 3B1 computers and the CDRU/s data acquisition product. MOSCOM Corporation is the world's leading producer of telephone cost management products for single and multiple site telecommunications systems. Unix is a registered trademark of AT&T.

NEW YORK (APRIL 24) BUSINESS WIRE - The Board of Directors of Viacom Inc. has approved the creation of a new class of Non-Voting Common Stock and the issuance of a dividend of one share of the new stock for each of the currently outstanding shares of Viacom Inc. Common Stock.

The new Non-Voting Common Stock will be identical in all respects to the currently outstanding voting shares of Common Stock except that the new shares will generally have no voting rights.

In making the announcement, Sumner M. Redstone, Chairman of the Board, and Frank J. Biondi, Jr., President and Chief Executive Officer of Viacom Inc. said, ''This new class of stock will provide our company greater financial flexibility, and enhance our ability to expand our core businesses and to seize opportunities that arise in the growing global marketplace. The issuance of the dividend also will double the number of shares available for public trading.''

The existing Viacom Inc. Common Stock consists of 100 million authorized shares, of which approximately 53.4 million shares are currently outstanding. The Board of Directors approved the creation of 150 million authorized shares of the new Non-Voting Common Stock, of which approximately 53.4 million shares are expected to be issued in the dividend.

The creation of this new class of stock and the issuance of the dividend is subject to shareholder approval, which is anticipated at the Annual Meeting of Shareholders on May 24, 1990. If approved, the dividend will be issued as promptly as possible after the conditions to the dividend have

been met; among these conditions is the approval of the new Non-Voting Common Stock for listing on the American Stock Exchange. The dividend will be issued to shareholders of record on June 5, 1990.

Viacom Inc., the holding company parent of Viacom International Inc., is an approximately 84 percent-owned subsidiary of National Amusements, Inc., a closely-held corporation which owns and operates approximately 625 movie screens in 14 states and England. Viacom International Inc. is a diversified communications and entertainment company based in New York City.

#90114b0644 04/24/1990 ~Business Wire

HOUSTON (APRIL 24) BUSINESS WIRE - Santa Fe Energy Resources Inc. (SFR) reported first quarter net income of $5.1 million, or 9 cents per share, compared with $5.8 million, or 11 cents per share, of net income before the effect of an accounting change in the first quarter of 1989.

Inclusion of the cumulative effect of $24.5 million for the change in accounting for income taxes resulted in net income in the first quarter 1989 totaling $30.3 million, or 58 cents per share.

Operating income in the first quarter of 1990 was $21.5 million, more than double the $10.2 million from a year ago, principally due to higher oil prices.

First quarter oil and gas production were both higher in 1990, averaging 52,600 barrels of oil and 111.2 million cubic feet of gas per day, compared with 50,300 barrels of oil and 100.2 million cubic feet of gas per day for the first quarter last year.

Oil prices increased over $4 per barrel, averaging $16.67 per barrel compared with $12.28 per barrel in the first quarter of 1989.

Gas prices for the quarter averaged only $1.74 per thousand cubic feet in 1990 compared with $1.84 in 1989. As a result, total revenues for the quarter increased to $96.1 million from $79.1 million in 1989.

Operating expenses increased $5.7 million for the quarter, due primarily to a $7.1 million increase in production expenses, which includes additional costs necessary to raise production levels such as higher fuel costs for steam generation and maintenance activity. A $12.3 million increase in interest costs resulted from a $365 million revolving credit facility which was funded in January, and increased debt to an affiliate.

Both the affiliate debt and the revolving credit facility have been repaid principally with proceeds from the March 1990 sale of 11.7 million shares of SFR common stock and the April 1990 private placement of $365 million in senior notes.

The senior notes carry fixed interest rates averaging 10.35 percent, and are scheduled to be repaid in the years 1993-2005.

Santa Fe Energy Resources Inc. is a large, independent oil and gas company which is traded on the New York Stock Exchange using the symbol SFR.

#90114b0648 04/24/1990 ~Business Wire

MATTITUCK, NY (APRIL 24) BUSINESS WIRE - North Fork Bancorporation (NYSE:NFB) Tuesday reported that net income for the three months ended March 31, 1990 was $3.6 million, or $0.40 per share.

This compares with net income of $5.3 million, or $0.57 per share, for the first quarter of 1989.

The provision for loan losses was $2.3 million in the 1990 first quarter vs. $600,000 in the same period a year ago. Net charge-offs were $632,000 for the quarter or 0.05 percent of total loans compared with $755,000 for the fourth quarter of 1989 and $128,000 for the 1989 first quarter.

Net interest income on a taxable equivalent basis rose $1.0 million or 6.2 percent from the year-ago first quarter. The net interest margin was 4.19 percent for the three months ended March 31, 1990 compared with 4.39 percent for the fourth quarter of 1989 and 4.38 percent in the 1989 first quarter. The reduction in the net interest margin is principally attributable to a $19.5 million increase in nonaccrual loans during the 1990 first quarter.

Excluding securities transactions, noninterest income was down by $172,000 from the 1989 first quarter. Strong growth in service and other fee-based revenues was offset by a decline in income from mortgage banking operations as a result of the discontinuance of the company's mortgage banking subsidiary in August 1989.

Operating expenses were higher by just $545,000 or 5.4 percent from the 1989 first quarter, despite the addition of two new branches since March 31, 1989. ''The progress made in controlling costs,'' said Kanas,

''reflects not only the success of our stringent cost-cutting measures, but also the savings associated with the consolidation of operations with Southold Savings Bank are now being fully realized.''

At March 31, 1990, total assets were $1.83 billion and deposits amounted to $1.45 billion. Shareholders' equity of $142.0 million was equivalent to 7.77 percent of total assets or a book value of $15.97 per share.

On April 19, 1990, North Fork Bancorporation announced that it had entered into a definitive agreement with Eastchester Financial Corp. (NASDAQ:ECFC) the parent company of Eastchester Savings Bank, under which Eastchester will merge with a subsidiary of North Fork. Terms of the agreement call for North Fork to pay Eastchester common stockholders $20.00 per share in cash, for a total purchase price of approximately $79.5 million. The merger is conditioned upon, among other things, approval by Eastchester stockholders and the receipt of required regulatory approvals by both companies.

North Fork Bancorp. is the holding company for North Fork Bank and Trust Company and Southold Savings Bank. North Fork Bank and Trust is a commercial bank with 25 branches in Suffolk and Nassau Counties, and Southold Savings Bank is an eight-branch savings bank operating in Suffolk County.

MIAMI (APRIL 24) BUSINESS WIRE - IVAX Corp. (AMEX:IVX) announced Tuesday the appointment of Frederick E. Baxter as senior vice president - Financial Affairs and chief financial officer.

Baxter was previously employed by AEG, a subsidiary of Daimler-Benz and the parent company of Modular Computer Systems Inc. (''MODCOMP''), headquartered in Fort Lauderdale, FL. Baxter served as vice president and chief financial officer for MODCOMP from 1982 until 1988. During 1989 and 1990 Baxter was employed by the parent company in Frankfurt, Germany.

Baxter is filling a position at IVAX vacated by Vincente Sanchez, who since February 1989 has served in the dual role of chief financial officer of IVAX Corp. and president of IVAX Industries Inc., a wholly owned chemical specialities subsidiary. Sanchez will now serve exclusively as president of IVAX Industries.

IVAX Industries Inc., manufactures and markets chemical specialties to the vacuum, aerospace, electronics, floor care, janitorial supply, food service and textile industries. The annual sales of the chemical specialties group of IVAX Corp. is approximately $30 million.

IVAX Corp. is a holding company consisting of three operating divisions: IVAX Industries Inc., a chemical specialties business; Diamedix Corp., a medical diagnostics company; and the pharmaceuticals group which includes Baker Cummins Pharmaceuticals Inc., a pharmaceuticals company; Baker Cummins Dermatologicals Inc., a determatological products company owned 50 percent by Baker Cummins Pharmaceuticals; Best Generics Inc., a national distributor of generic pharmaceuticals.

BEVERLY HILLS, CA (APRIL 24) BUSINESS WIRE - International Lease Finance Corp. (NASDAQ:ILFC) Tuesday announced lease placement of 15 jet aircraft and the remarketing of six aircraft to 11 airlines and two financial institutions.

The 15 airplanes leased by ILFC have a combined aircraft value of $705 million and include the following transactions:

Japan Air System

Japan Air System, Tokyo, agreed to lease two new Boeing 747-400 long-range jumbo jets from ILFC for nine years. Deliveries are scheduled for April 1995 and March 1997. JAS is a new ILFC client and strengthens the company's market presence in the Asia-Pacific area. Alaska Airlines

Alaska Airlines Inc., Seattle, leased two McDonnell Douglas MD-83s on seven-year contracts. These aircraft have been delivered to Alaska and bring the total number of ILFC's MD-80s leased to Alaska to six aircraft. Linjeflyg

Linjeflyg, AB, Stockholm, Sweden's national airline (50 percent owned by SAS), contracted to lease five aircraft, including four new Boeing 737-500s and one used Boeing 737-300, on five-year agreements. The 737-300 will be delivered in October 1990, upon completion of a lease with a British airline. The four new B-737-500s will be delivered between July 1991 and March 1992. Linjeflyg is a new ILFC customer from Scandinavia. Ladeco

Ladeco-Chile, Santiago, leased two new Boeing 757-200ERs and a spare PW 2040 engine on an eight-year arrangement. The two 757s which will delivered in May 1991 and April 1992 will be used on Ladeco's major international scheduled routes from Santiago, Chile to Miami and New York.

Jet Alsace

Jet Alsace, Mulhouse, France, leased an MD-83 in April 1990. This French Alsatian carrier which is owned by the Minerve Group and BALAIR Switzerland (a Swissair subsidiary), will utilize the aircraft on services to Mediterranean destinations. Jet Alsace is a new ILFC lessee. Air Liberte -- Tunisia

The Tunis-based affiliate of Air Liberte, France, leased an ILFC MD-83 for six years. This builds upon the relationship already established between ILFC and Air Liberte, France's largest charter airline, owned by the Club Aquarius Group and leading French banks. TAP -- Air Portugal

Air Portugal, Lisbon, the government-owned international airline, signed definitive agreements to lease a new Boeing 737-300 for delivery in May 1992 on an eight-year contract and an agreement to lease another ILFC 737-300 from May 1993 for 10 years, this latter being subject to government approval at a later date.

These aircraft represent the seventh and eighth Boeing 737-300s leased by TAP-Air Portugal, in addition to a new Airbus A-310-300 which ILFC leased to the Portuguese carrier from early 1991.

On the remarketing side, ILFC sold four aircraft from its portfolio and acted as agent in the palcement on lease of two Boeing aircraft on behalf of two financial institutions.

Pegasus Capital Corp. purchased a 737 from ILFC along with its respective lease to American. This completes a package sale which included the sale last quarter to Pegasus of a DC9-31 leased to Midway.

ILFC sold three Boeing 737-200s acquired earlier this month from Malaysian Airlines, to a Swedish leasing consortium.

ILFC negotiated the three-year lease of a Boeing 737-200 to COPA-Panama on behalf of a lessor based in the Isle of Man, United Kingdom, as a third party agency transaction, with delivery in early May 1990.

ILFC also arranged a remarketing transaction whereby Intercredit Corp. leased a Boeing 737-200 to Eagle Air-Iceland, a former ILFC lessee, for 26 months.

In addition, Texas Air Corp., exercised a purchase option to acquire ILFC's oldest MD-82 built in late 1981 and a spare engine, operated by

Continental Airlines. This transaction is scheduled to close on or before May 15, 1990.

Based in Beverly Hills, International Lease Finance Corp. (ILFC) is the world's premier operating lessor and remarketer of advanced-technology commercial jet aircraft with a current fleet of 91 planes under ownership, valued at more than $3 billion. Less than 2 percent of this value is represented by Stage II aircraft. International Lease Finance Corp.

#90114b0669 04/24/1990 ~Business Wire

NEW YORK (APRIL 24) BUSINESS WIRE - Frank B. Hall & Co. Inc. (NYSE:FBH) Tuesday reported financial results for the first quarter ended March 31.

For the first quarter of 1990, the company reported a pre-tax profit of $5.5 million compared with a pre-tax loss of $.6 million in the same period last year. The net income for the quarter was $3 million vs. a net loss of $3.1 million for the first quarter of 1989.

Revenues for the first quarter of 1990 rose 12 percent to $111.9 million, vs. $100.2 million in the same period last year.

The company attributed the strong revenue growth in the quarter to record levels of new business production, continued strong account retention and, to a lesser degree, strategic acquisitions completed in 1989.

Hall's Chairman and Chief Executive Officer, Donald R. Bell, commenting on the first quarter results said, ''I am pleased that we have returned to profitability in the quarter. We are confident that sustained imporvement in revenues and controlled expenses will continue to result in improved performance throughout 1990 compared to 1989.

''Hall is now beginning to realize the returns on its substantial investments of recent years in spite of the fact that the industry is not yet experiencing any significant in premium rates.''

Frank B. Hall, headquartered in New York, is a leading provider of insurance brokerage and employee benefits consulting services in the United States and abroad. The company had revenues in 1989 of $384

million and has approximately 200 offices and affilitates in over 50 countries.

#90114b0671 04/24/1990 ~Business Wire

SEATTLE (APRIL 24) BUSINESS WIRE - Arctic Alaska Fisheries Corp. (NYSE:ICE) Tuesday announced revenues and earnings for its first quarter ended March 31, 1990.

Revenues for the quarter totaled $50.0 million compared with $47.8 million in the 1989 period. Net income for the quarter was $7.5 million, or 46 cents per share, versus $9.4 million and 65 cents per share in the comparable quarter last year. There were 14 percent more shares outstanding during the 1990 quarter than in the 1989 quarter.

Arctic Alaska's export sales for the quarter were 57 percent of revenues compared with 64 percent in the first quarter of 1989, as the company continued its emphasis on balancing domestic and foreign sales. The company's first-quarter bottomfish production was 15 percent greater than last year's. The effect of greater production for the domestic market was to build inventories of products to be sold during the remaining three quarters of the year.

Lower earnings were due to weaker pricing on some of the species the company sells. The 15 percent quarter-to-quarter decline in the value of the yen contributed to lower values on Japanese sales.

Arctic Alaska Fisheries Corp. is a vertically-integrated company that sells a variety of seafood products under the Arctic Ice trademark in the United States, Japan and other export markets.

#90114b0672 04/24/1990 ~Business Wire

SUNNYVALE, CA (APRIL 24) BUSINESS WIRE - Amdahl Corporation announced Tuesday that net income for the quarter ended March 30, 1990, amounted to $29,904,000 or 42 cents per share, down from $45,595,000 or 42 cents a share, in the record first quarter of 1989. Revenues rose to $506,764,000 compared to $470,312,000 in the same period last year.

According to John C. Lewis, chairman and chief executive officer, demand

continues to be strong for the company's 5990 series of mainframe computers and for its line of advanced data storage products. During the quarter, Amdahl began delivering cache memory for its 6100 series of storage processors and shipped the first of its new 6110 solid-state storage devices.

Gross margins and earnings, however, were lower than a year ago because of competitive pricing pressures that accelerated shortly after the first quarter of 1989 and because of a shift in product mix since that time. In early 1989, the company's 5890 mainframes constituted the majority of product shipments, but Amdahl is now delivering more 5990 systems, which have higher average selling prices but also inherently higher manufacturing costs because of more complex technology.

Lewis said he is encouraged by the large number of sales to new customers during the first quarter. The penetration of new accounts reached record levels in 1989, and he views this as a continuation of that momentum.

He believes the continued growth of Amdahl's customer base and healthy demand for its products should contribute to improved financial results as the year progresses.

With annual sales in excess of $2 billion, Amdahl is a major supplier of large-scale data processing systems and peripherals, data communications products, software, and educational and consulting services.

#90114b0673 04/24/1990 ~Business Wire

SANTA MONICA, CA (APRIL 24) BUSINESS WIRE - FirstFed Financial Corp. (NYSE:FED), parent of First Federal Bank of California, Tuesday reported a 77 percent increase in first quarter net earnings to $7 million, or 81 cents per share of common stock, compared with $4 million, or 46 cents per share, one year earlier.

Net earnings for the fourth quarter of 1989 were $6.3 million or 72 cents per share.

William S. Mortensen, chairman and chief executive officer of FirstFed Financial commented, ''The continued growth of earnings is right on target with our stated long-term goals.'' He continued, ''We are especially pleased to report that core earnings comprise 100 percent of pre-tax earnings for the first quarter.''

Core earnings exclude gains from loan sales and securities and are a measure of a company's basic earnings from operations.

Net interest income, a key component of core earnings, increased 71 percent over the prior year quarter. The average portfolio of interest-earnings assets, primarily loans and mortgage-backed securities, increased 16 percent over the prior year first quarter. Additionally, net interest spreads, which benefited from a more stable rate environment during 1990, improved to 2.81 percent for the first quarter from 1.75 percent for the first quarter of 1989.

The quality of the bank's assets remained high during the first quarter which also added to the strong earnings performance. Only .39 percent of the bank's total assets are non-performing as of March 31, 1990, compared with .53 percent as of March 31, 1989.

Total loan originations for the first quarter reached $238 million, a reduction of 14 percent from the prior year level. However, they were maintained at a pace designed to reach the bank's goal of $1 billion for the year 1990. Over 90 percent of the first quarter originations were adjustable-rate mortgages and the bank's portfolio of adjustable loans rose to 94.2 percent at March 31, 1990.

The bank's one-year GAP (the difference between rate sensitive assets and rate sensitive liabilities repricing within one year or less as a percentage of total assets) was a positive 12 percent at March 31, 1990.

Loan sale profits decreased due to fewer sales and changes in estimated life assumptions. Reported loan sales for the first quarter were $27.9 million at a loss of .2 million compared with sales of $44.9 million at a gain of $.5 million for the same quarter of 1989.

Non-interest expense as a percentage of total assets increased to 1.58 percent from 1.45 percent the year before based on an accrual for loss contingencies relating to pending litigation. Additionally, occupancy expense increased as a result of the opening of two new branches. Salaries and employee benefits increased due to normal salary adjustments.

#90114b0675 04/24/1990 ~Business Wire

PALO ALTO, CA (APRIL 24) BUSINESS WIRE - Hewlett-Packard Co. and McDonnell Douglas Systems Integration Co. Tuesday announced they have entered into a three-year, $75 million value-added-reseller (VAR) agreement that allows McDonnell Douglas to resell HP's Motorola- and

RISC-based HP 9000 family of workstations with its Unigraphics software.

RISC refers to reduced-instruction-set computing.

Over the past few years, the CAD/CAM (computer-aided design and computer-aided manufacturing) team of HP and McDonnell Douglas has served many of the major automotive, aerospace and manufacturing corporations that previously used mainframes with terminals for CAD applications.

HP workstations combined with McDonnell Douglas Unigraphics software meet the CAD users' growing need for computational and graphics performance with design, prototyping and manufacturing tools that significantly shorten the time to market for many new products.

The team of software engineers and hardware engineers from McDonnell Douglas and HP have worked to ensure that Unigraphics software takes full advantage of HP workstations' advanced graphics capabilities. This software and hardware tuning provides CAD users with a tool that is on the leading edge of technology and provides the advantage needed to win in today's competitive environment.

McDonnell Douglas Systems Integration Co. is recognized worldwide as a leading systems integrator with total information-systems solutions. The company, which has headquarters in St. Louis, is a division of McDonnell Douglas Corp. and sells information systems and services to a variety of markets, including the manufacturing, telecommunication and insurance industries and government agencies.

The company's 1989 revenue totaled $300 million.

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. HP has 94,000 employees and had revenue of $11.9 billion in its 1989 fiscal year.

#90114b0680 04/24/1990 ~Business Wire

FRAMINGHAM, MA (APRIL 24) BUSINESS WIRE - Liant Software Corp. Tuesday

announced the availability of a wide array of programming languages and software development products for IBM's RISC System/6000 family of workstations running on the company's AIX operating system. These include:

o RM/COBOL-85 Compiler -- a high-level ANSI X3.23-1985 COBOL system with extentions to facilitate the development of both X/Open and IBM SAA compliant applications.

o RM/COBOL-85 Runtime System -- available for use with existing applications already developed in RM/COBOL-85. This allows more than 500 existing applications written in RM/COBOL-85 by hundreds of independent developers to be available for the RISC System/6000.

o LPI-FORTRAN -- a full ANSI-FORTRAN-77 implementation, is X/Open compliant and conforms to MIL-STD-1753. It offers user-selectable optimization levels and numerous VAX FORTRAN extentions for conversion ease.

o LPI-FORTRAN Runtime Environment -- allows execution of an LPI-FORTRAN application on the IBM RISC System/6000.

o CodeWatch -- an interactive source-level debugger that works with LPI-FORTRAN. Features include watchpoints, breakpoints, stepping, tracing action lists and macros.

The RM/COBOL-85 Compiler and Runtime System prices start at $1,800 and $400, respectively. LPI-FORTRAN and Runtime Environment prices start at $1,095 and $400, respectively. CodeWatch pricing starts at $795.

Liant Software Corp., a privately held company headquartered in Framingham Mass., provides integrated programming systems for constructing and maintaining portable applications.

Liant is the parent company of three operating subsidiaries: Framingham, Mass.-based Language Processors, Inc. (LPI), specializing in scientific and engineering programming systems; Austin, Texas-based Ryan McFarland Corporation (RM), specializing in commercial programming systems; and Template Graphics Software, Inc. (TGS), based in San Diego, California, which specializes in program development systems for graphic applications.

#90114b0686 04/24/1990 ~Business Wire
LOS ANGELES (APRIL 24) BUSINESS WIRE - Anthony Industries Inc. (NYSE:ANT) Tuesday reported higher sales and, as anticipated, lower earnings, for this year's first quarter as compared with last year's.

For the 1990 quarter, net income was $1.3 million, or 15 cents per fully diluted share, on sales of $94.3 million, compared with last year's first quarter net income of $2 million, or 23 cents per fully diluted share, on sales of $90.3 million.

Chairman and Chief Executive Officer B.I. Forester said that the lower earnings largely reflected an almost unprecedented third straight winter of extremely poor European snow conditions, affecting the ski business and the effect of excess customer inventories in the paperweaving industry supplied by Shakespeare Monofilament.

''Partially offsetting those declines,'' Forester noted, ''were dramatic improvements in profitability at Shakespeare Fishing Tackle, record operating earnings at Simplex Products, fueled by strong performances in industrial packaging and commercial coatings and record sales and earnings at Shakespeare Electronics & Fiberglass, which has been seeing increased acceptance of its fiberglass light pole products.''

Forester added, ''While the fluid state of the economy is certainly affecting the business world, including Anthony, it is simply premature to read with any clarity its likely effect on the periods ahead.''

Anthony Industries is a diversified manufacturer with operations in two major business segments: recreational; products consisting of K2 skis, Hilton active apparel, Shakespeare fishing tackle, Anthony swimming pools, Poolsaver pool covers and Stearns water safety products; and industrial products including Simplex building materials, Shakespeare fiberglass antennas and light poles and Shakespeare monofilaments.

#90114b0701 04/24/1990 ~Business Wire
SANTA ANA, CA (APRIL 24) BUSINESS WIRE - EECO Inc. (ASE:EEC) announced Tuesday that it recommended the American Stock Exchange suspend trading of

its stock until the uncertainty regarding its current financial condition is clarified.

The company referred to its press release of April 22 which is quoted verbatim below:

''EECO stated that their previously announced negotiations for the sale of their Maxi-Switch Computer Keyboard subsidiary have been terminated. EECO Inc. Chairman Robert B. Bonney stated that the terms of the proposed sale were unsatisfactory to the company's bank which holds liens on the assets involved. The company has entered into discussions with two other potential purchasers for Maxi-Switch.

''Bonney also stated that EECO is in preliminary discussions with potential buyers for possible sale of several or all of the company's subsidiaries as going concerns. However, no assurance can be given at this time that any agreement will be reached.

''The company's credit agreement with the bank expired on March 31., 1990, and the bank has informed the company that it will not extend any further advances to the company. However, the bank has not declared the loan in default. Such a decision by the bank would have a material adverse effect on the company's operations.

''In this event, the company would be forced to immediately attempt to secure other sources of funding which may not be available to it including a restructuring under the protection of Chapter 11.''

The company is continuing discussions with its bank and is continuing to pursue discussions with a number of parties who have expressed an interest in purchasing all or part of EECO.

EECO would not comment on when its current situation would be clarified to the point where it might recommend the Exchange resume trading of its stock.

#90114b0705 04/24/1990 ~Business Wire
LOS ANGELES (APRIL 24) BUSINESS WIRE - Coast Savings Financial Inc. (NYSE & PSE: CSA), announced Tuesday that net earnings were $5.8 million for the quarter ended March 31, compared to $6.1 million for the first quarter of 1989.

Fully diluted earnings per share totaled 38 cents, compared to 43 cents

for the year earlier period.

The latest quarter earnings include a $5.2 million after tax charge, or 33 cents per fully diluted share, to reflect diminution in the market value of the company's high yield bond portfolio precipitated by deteriorating conditions in the high yield bond market caused by the FIRREA legislation and other factors.

As a result of this continued improvement, Coast's nonperforming asset ratio (net nonperforming assets expressed as a percent of total assets) was reduced to 1.64 percent at March 31, down from 1.77 percent and 1.98 percent at Dec. 31, 1989, and Sept. 30, 1989, respectively.

Loan origination volume totaled $520 million for the quarter, on target with the company's annual funding goal. Virtualy all of these originations were one-to-four family adjustable rate residential mortgages tied to the Eleventh District cost of funds index.

At March, 31, 1990, Coast had 91 percent of its loan portfolio in adjustable rate and match-funded loans, and its one year gap ratio -- a measure of interest rate exposure -- stood at 3 percent, an improvement from the negative 1 percent as of March 31, 1989.

Coast's net interest rate spread -- the difference between the yield on interest-earning assets and the cost of interest-bearing liabilities -- stood at 2.33 percent at March 31, compared to 2.42 percent and 2.32 percent at Dec. 31, and Sept. 30, respectively.

As a result of the foregoing items and the redeployment of funds previously invested in real estate development activities, net interest income rose to $53.2 million for the quarter ended March 31, an increase of more than 8 percent over the fourth quarter level of $49.2 million. Combined with a $3.1 million reduction in operating expenses from the fourth quarter level, this margin improvement resulted in coverage of $8.7 million, a substantial improvement over the fourth quarter level of $1.6 million.

In response to deteriorating conditions in the high yield bond market following enactment of the FIRREA legislation, the company has moved aggressively to reduce its investment in such securities. Coast's net investment in high yield bonds was reduced from $105.9 million at Dec. 31, 1989, to $59.0 million at the end of the quarter.

The portfolio has been subsequently reduced to $49.7 million as positions have been sold at their March 31 carrying values.

The dollar amount of loans serviced for investors rose to $4.4 billion at the end of the quarter, up form $4.0 billion as of March 31, 1989.

Primarily as a result of this increase, loan servicing fees and charges increased to $4.1 million for the first quarter of 1990, a 25 percent improvement over the $3.2 million registered in the year-earlier period. Reflecting strong improvement in fee generation from retail banking activities, other income surged 28 percent and 18 percent, over the year earlier and fourth quarter periods, respectively.

Coast Savings Financial Inc., is the holding company of Coast Savings and Loan, one of the nation's largest savings and loan associations. Coast's primary emphasis is on residential real estate lending and retail banking provided through 124 retail banking offices and 8 regional mortgage lending centers located throughout California.

CHICAGO (APRIL 24) BUSINESS WIRE - Sears, Roebuck and Co. (NYSE:S) Tuesday reported first quarter consolidated net income of $106.3 million or 31 cents per share compared with $257.7 million or 70 cents per share last year.

Consolidated revenues rose 3.7 percent to $12.61 billion from $12.16 billion in 1989, with all business groups reporting record revenues.

Sears Merchandise Group reported a loss of $37.4 million for the first quarter compared with income of $33.8 million a year ago. Revenues rose 1.3 percent to $6.84 billion from $6.76 billion in 1989.

Allstate Insurance Group reported first quarter income of $193.2 million compared with $243.9 million last year. The 1990 first quarter income included $10.5 million from discontinued group life-health operations. Income from continuing life operations increased 12.9 percent to $49.0 million from $43.4 million in 1989.

Property-liability income was $133.7 million compared with $200.5 million in 1989. Revenues for the period rose 5.6 percent to $4.39 billion from $4.16 billion in 1989.

The Dean Witter group reported first quarter income of $60.7 million compared with $37.4 million last year. Discover Card operations contributed income of $35.4 million compared with $20.1 million in 1989, and Dean Witter's securities business reported income of $24.7 million compared with $21.0 million a year ago. Group revenues rose 13.4 percent to $1.10 billion from $966.9 million in the first quarter of 1989.

Coldwell Banker Real Estate Group reported a loss of $33.5 million for the first quarter compared with a loss of $16.2 million last year. The comparison was affected by the timing of the sale of property. Revenues rose 2.9 percent to $319.6 million from $310.7 million in 1989.

#90114b0708 04/24/1990 ~Business Wire

MOBILE, AL (APRIL 24) BUSINESS WIRE - QMS Inc. (NYSE: AQM) Tuesday reported second quarter sales and profits.

This is the second consecutive record-setting quarter for the company. Quarterly sales for the three months ended March 30, reached $69,076,000, an increase of 33.2 percent over second quarter fiscal 1989 sales of $51,870,000.

Net income increased to $3,579,000, or 33 cents per share, compared with $1,681,000, or 15 cents per share, for the same quarter a year earlier.

Included in the second quarter fiscal 1989 results were $195,000, or 2 cents per share, in extraordinary income resulting from utilization of a portion of IMAGEN Corporation's net operating loss carryforwards.

Sales for the first half of fiscal year 1990 were $131,884,000, an increase of 31 percent over the $100,642,000 in sales recorded for the first half of fiscal 1989.

Net profit after tax for the first half of fiscal 1990 was more than double that of the previous year's first half, reaching $6,929,000, or 63 cents per share, compared with $3,002,000, or 27 cents per share, for the same period in fiscal 1989. Included in results for the first half of fiscal year 1989 was extraordinary income of $753,000, or 7 cents per share.

QMS Inc. is a leader in the rapidly expanding nonimpact print systems market and is a major producer of enhancement products for impact printers. The company offers a wide selection of laser and thermal transfer printers for electronic publishing, office automation, advanced imaging and automatic identification applications.

#90114b0710 04/24/1990 ~Business Wire
GLENVIEW, IL (APRIL 24) BUSINESS WIRE - Zenith Electronics Corp. (NYSE:ZE) Wednesday reported a first quarter l990 loss from its continuing operations (consumer electronics and components) of $4 million, or 15 cents per share.

In l989, the first-quarter loss from continuing operations of $6.7 million or 25 cents per share, included a nonrecurring pre-tax gain of $l.l million from the disposition of properties.

First quarter l990 sales from continuing operations were $356 million, compared with $344 million in l989.

CONSUMER ELECTRONICS. Sales in the first quarter of l990 were $308 million, up 7 percent from $287 million a year ago. Increased shipments of color television sets were partially offset by a decline in sales of video cassette recorders. Revenues from ''flat tension mask'' monitors and cable products increased modestly over 1989's first quarter.

COMPONENTS. Sales of $48 million in the first quarter were down 16 percent from $57 million in l988.

HIGH-DEFINITION SYSTEMS. Investments in Zenith's two major high definition systems research efforts (net of outside funding) were about $2 million in the first-quarter of l990, representing an increase of about $1 million from last year.

The high-definition systems program involves further development work on Zenith's ''Spectrum Compatible'' HDTV transmission system and on larger screen sizes of Zenith's unique ''flat tension mask'' high resolution color displays for computer monitors and TV sets.

DISCONTINUED OPERATIONS. As reported last week, Zenith reported an $11 million first-quarter loss from discontinued operations (the computer business that was sold on Dec. 28, 1989).

HADDONFIELD, NJ (APRIL 24) BUSINESS WIRE - United Medical Corp. of Haddonfield, N.J., (ASE: UM), Tuesday announced that its board of

directors declared on April 24, a special cash dividend on its common stock in the amount of $1 per share.

The dividend will be payable on May 31 to holders of recored as of the close of business on May 8. UM also announced that it is declaring a quarterly dividend of five cents per share of common stock payable August 15 to holders of record as of July 30. It is anticipated that, profits permitting, regular dividends will be paid in the future and will be reviewed on a quarterly basis.

UM Chairman John Aglialoro, stated, ''UM's restructuring efforts over the last few years have produced consistent earnings and an extremely strong balance sheet. The special $1 per share dividend and the quarterly dividend reflect the company's strong financial positiion and constitute an appropriate reward to its loyal shareholders.''

UM, which has never before paid a cash dividend, is engaged through its subsidiaries in the provision of health and research services and products including Holter monitoring, comprehensive management services to providers of physical examinations, new drug applications and the manufacture and sale of motorized treadmills.

#90114b0734 04/24/1990 ~Business Wire

BASEL, SWITZERLAND (APRIL 24) BUSINESS WIRE - Roche Holding Ltd Tuesday reported record consolidated net income for the Roche Group of Sfr. 852 million (US $553 million) for 1989.

The earnings represented an increase of 33 percent over 1988 consolidated net income of Sfr. 642 million (US$428 million).

Cash flow for the worldwide health care group, parent company of Hoffmann-La Roche Inc. in the United States, rose by 23 percent to Sfr. 1,449 million (US $889 million) or 15 percent of sales.

The board of directors will propose to the annual general meeting of shareholders on May 22, 1990 that the dividend be set at Sfr. 38 (US$25).

As a result of the capital restructuring carried out in 1989, the dividend per share cannot be directly compared with the previous year. The dividend amount proposed by the board of directors is Sfr. 157 million (US $102 million).

In the previous year, dividends of the former Roche and Sapac Groups came

to Sfr. 118 million (US $79 million.)

The Roche Group had previously announced consolidated 1989 sales of Sfr. 9,814 million (US$6,021 million), up 21 percent in Swiss franc terms and 12 percent in local currency terms from the 1988 figures.

Besides the fine sales performance, the generally favorable economic climate during 1989, the Swiss franc's relative weakness against other currencies as well as liquid fund investments contributed significantly to the excellent results.

Roche's Research and Development expenditure for 1989 totaled Sfr. 1,419 million (US $921 million) and represents 14 percent of sales. The 20 percent of pharmaceutical sales Roche spent for pharmaceuticals research is one of the highest percentages in the pharmceuticals industry.

Over 6,000 of Roche's 50,000 employees worldwide are engaged in research. Roche has its own research centers in Switzerland, the United States, the United Kingdom and Japan and supports two independent basic research institutes.

These are the Basel Institute for Immunology (three of whose associates have won Nobel prizes for Medicine in the past seven years) and the Roche Institute of Molecular Biology, in Nutley, N.J. in the U.S. There have been eight members of the U.S. National Academy of Sciences affiliated with the Roche Institute in Nutley.

Additions to property, plant and equipment amounted to Sfr. 908 million (US $557 million) in 1989 with 59 percent invested in Europe, 36 percent in the Americas and 5 percent for the others (Asia, Africa and Oceania).

Roche's capital structure underwent a major change in 1989 aimed at strengthening the company's financial structure to meet international challenges in the coming years.

The capital stock includes bearer shares with voting rights and non-voting shares. In 1989 shareholders approved the creation of Roche Holding Ltd as the holding company for all operations of the former F. Hoffmann-La Roche & Co., Limited Company and Sapac Corporation, Ltd and their subsidiaries. Roche Holding Ltd voting and non-voting shares are listed on all major Swiss stock exchanges.

Roche is a leading international health care company with businesses in pharmaceuticals (45 percent of sales in 1989), vitamins and fine chemicals (25 percent), diagnostics (14 percent), fragrances and flavors (11 percent) and plant protection (5 percent).

Its major division, Pharmaceuticals, has a wide range of products in

therapeutic areas such as infections and inflammatory diseases, the central nervous system, cancer, dermatological disorders and cardiovascular problems.

The division's top selling product is Rocephin, a broad spectrum antibiotic which requires only one dose per day and is the largest selling injectable antibiotic in the world.

Roche is also a leader in biotechnology and intends to strengthen this position with its planned 60 percent participation in the U.S. biotechnology company Genentech Inc.

It also runs the second largest clinical laboratory network in the United States.

#90114b0735 04/24/1990 ~Business Wire

BARTLESVILLE, OK (APRIL 24) BUSINESS WIRE - Phillips Petroleum Co. Tuesday reported first quarter net income of $259 million, or $1.06 a share, compared with $190 million, or 78 cents a share, for the same period last year.

Total revenues were $3.1 billion for both quarters.

First-quarter results benefitted from a $101 million gain arising from the settlement of a dispute over company assets seized by Iran in 1979, and also include a $137 million gain resulting from the adoption of Statement of Financial Accounting Standards No. 96, dealing with accounting for income taxes.

These items were partly offset by an after-tax loss of $90 million from the sale of Offshore Insurance Management Co., owner of Walton Insurance Limited. Without these three items, earnings would have been $111 million.

According to C.J. Silas, chairman and chief executive officer, a $3-a-barrel improvement in crude oil prices for the quarter was not enough to offset lower chemicals margins. ''We're seeing sharply lower margins for olefins and plastics,'' Silas noted. He added that the quarter's earnings recognize $49 million for business-interruption insurance related to lost earnings from last year's explosion and fire at the Houston Chemical Complex. First-Quarter Operating Summary

For the quarter, exploration and production had higher net income, aided by higher crude oil prices and improved natural gas revenues, partly offset by lower foreign currency gains. Gas and gas liquids profit was down slightly.

In spite of higher sales prices, earnings declined for petroleum products as a result of higher costs, mainly for feedstocks, and lower sales volumes. Chemicals earnings, which include income from business-interruption insurance, were down substantially on lower margins and lower sales volumes for olefins and polyethylene.

Worldwide crude oil production was the same as for a year ago. Natural gas production rose 5 percent, and gas liquids production dipped 15 percent due to low demand for ethane. Capital expenditures rose to $329 million, compared with $173 million a year ago.

#90114b0738 04/24/1990 ~Business Wire

BOSTON (APRIL 24) BUSINESS WIRE - Earnings for the three months ended March 31, 1990, were 81 cents per common share, compared with 87 cents in the quarter ended March 31, 1989, Eastern Utilities Associates (NYSE:EUA) shareholders were told today at the annual meeting here.

Donald G. Pardus, President and Chief Executive Officer, said that al though EUA's earnings were about $700,000 higher than the first quarter last year, an additional 1.9 million shares were outstanding. This resulted in the lower earnings per share. He went on to say that the economic decline in Massachusetts and Rhode Island had a negative impact on kilowatt-hour sales of electricity, as did three months of warmer than normal weather.

Pardus reminded shareholders that EUA Trustees voted a week ago to in crease the annual dividend 10 cents, calling that move ''primarily driven by our long-term outlook and by the strength of our cash flow'' in EUA's electric utility business.

Consolidated net earnings for the first quarter of 1990 were $12.4 million on revenues of $104.3 million, compared with consolidated net earnings of $11.6 million on revenues of $102.6 million in the first quarter of 1989.

For the 12 months ended March 31, 1990, per share earnings of $2.90 were off 4 cents from the $2.94 reported a year ago.

Pardus called the issuance of a full-power license to the Seabrook Nuclear

Generating Station favorable for electric customers throughout New England ''including Blackstone Valley Electric, Eastern Edison and Newport Electric,'' EUA's retail electric utility subsidiaries.

He noted that EUA anticipates the effect of Seabrook entering commercial service to be an impact of about 4 percent at the retail level.

EUA is a Boston-based investor-owned holding company whose shares are traded on the New York and Pacific Stock Exchanges. Subsidiaries are Blackstone Valley Electric Co., Eastern Edison Co., Newport Electric Corp. EUA Cogenex Corp., EUA Energy Investment Corp., EUA Ocean State Corp., EUA Power Corp., EUA Service Corp., and Montaup Electric Co. Together, the companies are known as the EUA System.

#90114b0754 04/24/1990 ~Business Wire

SANTA CLARA, CA (APRIL 24) BUSINESS WIRE - Intel Corp. filed a complaint Tuesday alleging that Advanced Micro Devices (AMD) has infringed microcode copyrights on the Intel 80287, an Intel math co-processor.

The action was taken following notice given to Intel by AMD stating that they have incorporated the Intel microcode into a co-processor which AMD plans to bring to the market in the near future.

Under a 1976 cross-licensing agreement, Intel and AMD exchanged patent rights. The agreement also gave AMD the right to copy but not distribute Intel microcode. F. Thomas Dunlap, Intel vice president, said ''This agreement only grants rights to copy, but does not grant distribution rights.''

Dunlap noted that this issue is very similar to standard software license agreements in which rights are typically granted to copy software, but the ability to duplicate, distribute and re-sell the software would require an additional license.

Intel is requesting an injunction to prevent the sale of AMD's 80C287.

Intel manufactures microcomputer components, modules and systems.

#90114b0762 04/24/1990 ~Business Wire

CONCORD, MA (APRIL 24) BUSINESS WIRE - GenRad Inc. Tuesday announced several enhancements to its GR2286 Production Test System.

Key among them are its Combo II Pin Board which provides up to 960 real pins (3840 total test pins) to handle customers' growing needs to test larger boards with large pin count devices, and multiple timing sets for faster test throughput.

Multiple Timing Sets provide programmers with more flexibility when defining device timing, and dramatically increase test throughput, especially for memory blocks and other functional clusters with complex timing requirements.

Other enhancements include an Expanded Digital Test Library, Power Monitoring, and a new GR2276-to-GR228X Fixture Converter.

The system's Digital Test Library, already the industry's largest high-speed library with more than 6,000 devices, has expanded by the addition of Multiple Timing Sets and 27 new models.

Power Monitoring improves the system's uptime and repeatability by monitoring the system's power supplies and temperature, providing system status information enabling the operator to take corrective action and avoid downtime.

The Fixture Converter eliminates the need to make wiring modifications when migrating programs from GenRad GR227X test systems. This represents significant savings for GR227X owners who add a GR2286 to their test system suite.

The GR2286, first introduced in August of 1989, is designed for production testing applications for electronics manufacturers who require rapid test program development and high test throughput. High-Speed Testing and Test Generation

The host computer in the GR2286 is the Digital Equipment Corp. 32-bit MicroVAX III. The system software of the GR2286, combined with the computer power of the MicroVAX III, provides users with high-speed system run-time capability and improved test throughput. This enables test engineers to speed the development of test programs for complex circuit boards that contain new device technologies, such as ASICs, 32-bit microprocessors and large memory devices.

With GenRad's ATG software environment, engineers are able to generate complete analog and digital test programs automatically. Analog tests include 6-wire Kelvin measurements, guard points, instrument set-up, voltage and current level, and test frequencies and delays. Digital

tests include inhibits, disables, and bus tests.

''These capabilities will further enhance the already successful market acceptance of the GR2286, one of GenRad's GR228X family of production test systems,'' said Lyons.

Prices for the GR2286 start at under $300,000 U.S. list.

GenRad Inc. is a leading worldwide supplier of integrated software systems and automatic test equipment, to manufacturers and users of electronic and mechanical equipment, for design verification, product testing, and process quality management. The company's stock is traded on the New York Stock Exchange; its trading symbol is GEN.

#90114b0766 04/24/1990 ~Business Wire

EDEN, NC (APRIL 24) BUSINESS WIRE - Fieldcrest Cannon Inc. (NYSE: FLD) Tuesday announced sales and earnings figures for the first quarter of 1990.

Net income for the first quarter was $.3 million or 3 cents per share compared to $3.1 million or 30 cents per share for the first quarter of 1989.

Sales for the first quarter were $274.4 million, a decrease of 7 percent from sales of $296.3 million in the first quarter of 1989. Carpet and rug division sales for the first quarter of 1990 increased 3 percent over the like quarter last year while bed and bath division sales decreased 11 percent from prior year sales.

Bed and bath division operating results were significantly impacted by lower sales levels. Many customers are attempting to lower inventory levels, and therefore, they reduced shipments of new merchandise in the first quarter. In addition, well publicized operating problems for several major customers resulted in reduced first quarter sales.

The improved level of carpet and rug division sales reflected the continuing efforts of management to increase sales volume. However, intense competition for carpet sales did not permit margin improvement and the division experienced a small operating loss for the quarter.

Capital expenditures were $44.8 million in the first quarter of 1990 compared to $7.8 million last year. The major items in the first quarter

1990 expenditures were the $26 million purchase of equipment previously leased in the Kannapolis, N.C. area and $11 million for the towel modernization project at the F.C. ''Buck'' Dumaine Plant.

The market environment for the company's products continues to reflect a cautious attitude on the part of retailers. Unfilled orders are below levels at this time last year. However, the recent domestics market in New York was very successful for new products and it is anticipated that sales levels will improve in the second half of the year.

Fieldcrest Cannon Inc. manufactures and markets bed and bath products under the Fieldcrest, St. Marys, Royal Family, Monticello and private brand labels. Carpet and rug division products include high quality woven and tufted carpets and rugs marketed under the Karastan, Bigelow, Sanford, Cannon and private brand labels.

Fieldcrest Cannon Inc. common stock is traded on the New York Stock Exchange under the symbol FLD.

NEW YORK (APRIL 24) BUSINESS WIRE - Commodore Business Machines President Harold Copperman Tuesday strengthened the company's leadership position in the multimedia market by introducing powerful multimedia authoring software.

The new system can be used to create innovative applications ranging from complex business presentations to daily courseware.

Commodore Vice President of Marketing C. Lloyd Mahaffey said the new software system, called AmigaVision, significantly expands the multimedia market by providing an easy-to-use and affordable method for business, education, government and consumer users to develop new applications by creatively combining graphics, text, video and audio components. Shipping is expected to begin in May.

The announcement was made as part of a live multimedia presentation at the Palladium. The company also introduced the latest in its Amiga family of personal computers, the Amiga 3000, and a full line of networking products.

Previously the domain of programmer-level professional users, multimedia can new be a tool for creative teachers, presentation professionals, computer-based trainers, instruction specialists as well as exhibit and display professionals. AmigaVision does not require previous programming experience and is operable through an intuitive user interface.

Mahaffey said the Amiga is the only computer that was originally designed as a multimedia class machine.

David Archambault, director of business markets, said AmigaVision takes full advantage of the Amiga's built-in graphics, video and music capabilities.

The system uses the Amiga's native multitasking capability to allow users to run programs simultaneously. Unlike other authoring systems, AmigaVision is a non-intrusive environment which allows applications to run without the AmigaVision menus being visible, he said.

Enhanced design capabilities allow for immediate on-screen preview while the presentation program is running. This allows the user to create unique user interface elements quickly and with ease.

AmigaVision provides a flow-chart type iconic interface programming environment featuring a single control screen/menu. The Amiga operating system's AREXX communications protocol support allows applications to interact with programs on the same or other networked machines.

The system will be bundled with all Amiga 2000 and 3000 series machines. For existing owners, AmigaVision is available at Authorized Commodore Amiga Resellers for a suggested retail price of $149.

Mahaffey said AmigaVision is a key component of Commodore's product marketing strategy for the Amiga family. While professional users comprise the majority of multimedia-related markets today, future plans call for penetration into the consumer market as home users begin to discover the benefits of multimedia.

For more information on AmigaVision, contact David Archambault, director of business markets, Commodore Businces Machines, 1200 Wilson Drive, West Chester, Pa. 19380 or call 215/431-9100.

#90114b0783 04/24/1990 ~Business Wire

CLEVELAND, OH (APRIL 24) BUSINESS WIRE - Brush Wellman Inc. (NYSE-BW) today reported net income for the first quarter 1990 of $5.5 million and earnings of 34 cents per share. This compares with net income of $10.2 million and earnings of 59 cents per share in the first quarter 1989.

Several non-recurring items, both gains and losses, impacted results in each period. In the first quarter 1989 there was a gain on the sale of the cutting edge business and a loss from the penalty for long-term debt prepayment. A settlement in connection with the former Chief Executive Officer's resignation was recorded in the first quarter 1990. In the absence of these items, first quarter earnings per share would have been 40 cents for 1990, and 48 cents last year, a decrease of 17 percent.

Sales for the first quarter were $81 million, virtually unchanged from the first quarter last year.

Commenting on the results, Henry G. Piper, President and Chief Executive Officer said, ''The earnings decline was largely the result of a significant change in product mix, as declines in beryllium copper strip

sales were offset by increases in sales of lower margin precious metal products and specialty metal systems.''

He added, ''Order rates appear to be firming in several areas, we are beginning to see some improved operating efficiencies as a result of our Continuous Improvement Process, and the restructuring is contributing to earnings. For these and other reasons, we expect improved performance in 1990 compared with last year.''

At the Company's Annual Meeting of Shareholders today in Cleveland, Dr. Charles F. Brush, Mr. William E. MacDonald and Mr. Clark G. Waite were re-elected to the Board of Directors. Shareholders approved a stock option plan for non-employee Directors and confirmed the appointment of Ernst & Young as independent auditors for the Company.

Brush Wellman Inc., with headquarters in Cleveland, Ohio, is a manufacturer of engineered materials. The Company and its subsidiaries supply worldwide markets with beryllium, beryllium alloys, beryllia ceramic, precious metal products, and specialty metal systems.

#90114b0798 04/24/1990 ~Business Wire

PHOENIX, AZ (APRIL 24) BUSINESS WIRE - Mexican Patio Cafes Inc. (NASDAQ:MXPC-U) announced Tuesday it has entered into a letter of intent with Two Pesos Inc. (AMEX:TWP) to acquire through lease the Two Pesos Mexican Patio Restaurant in Oklahoma City and to become the exclusive franchisee for the development of additional Two Pesos restaurants in Oklahoma.

The transactions are subject to a definitive development agreement to be executed between the parties, MPC said.

Mexican Patio Cafes will assume operations of the restaurant approximately May 1. Two Pesos opened its Oklahoma City restaurant in May, 1989 and the restaurant has historically generated cash flow from its operations, MPC noted.

Under the terms of the triple net lease, which includes a five-year initial term and three additional five-year options, the company said it will pay the greater of a nominal fixed monthly rent or a percent of gross sales plus a percent of the restaurant's annual net profits.

Joseph J. Johnston, chairman of the board and chief executive officer, said, ''The acquisition of the Oklahoma City restaurant is important to

Mexican Patio Cafes for a number of reasons. First it represents a significant vote of confidence from our franchisor Two Pesos. Second, it allows our company, with a minimal capital outlay, to commence operations, generate revenues and share in the profits of the restaurant while we are constructing our first California Two Pesos Restaurant in Moreno Valley.

''Third, the restaurant will provide a valuable training resource for our managers who will operate the Two Pesos Restaurants in our California territory and allow us to test market new menu items for use in California and Oklahoma.''

Johnston continued, ''The opportunity to develop additional locations in Oklahoma City is a gratifying expression of Two Pesos' confidence in our management team and development expertise.

Mexican Patio Cafes also announced that it has entered into a letter of intent to purchase an equipment package from Two Pesos, which will finance the purchase for the company over a four-year term. The company intends to use such equipment in one of its future Two Pesos restaurants.

Mexican Patio Cafes Inc. is the franchisee for an exclusive territory of Two Pesos Mexican Patio Restaurants in Southern California that makes it the holder of the largest territory of any Two Pesos Mexican Patio Restaurant franchisee.

MUNCIE, IN (APRIL 24) BUSINESS WIRE - Ball Corp. (NYSE:BLL) Tuesday reported a 25 percent increase in first quarter sales and a 30.5 percent increase in income from consolidated operations before taxes.

The company said it was optimistic about full year results, crediting improved margins and increased sales in its core business of metal beverage containers.

Record first quarter sales were $321.5 million, vs. $257.3 million last year. All segments contributed to the increase. Income from consolidated

operations before taxes rose to $12.4 million vs. $9.5 million a year ago.

Net earnings per share increased 9.1 percent to 36 cents, against 33 cents a year ago. Earnings available to common shareholders rose 2.6 percent to $7.9 million, vs. $7.7 million in the first quarter last year. Earnings in 1990 reflected a net cost of $1.1 million for the employee stock ownership plan (ESOP) adopted at the end of the second quarter of 1989, or approximately five cents per share. The company has acquired approximately 2.2 million shares of its common stock in connection with the ESOP.

WOODLAND HILLS, CA (APRIL 24) BUSINESS WIRE - Amwest Insurance Group Inc. (AMEX/PSE:AMW) Tuesday reported results for the quarter ended March 31.

Premiums written for the first quarter of 1990 were $12,292,000 as compared to $10,050,000 for the first quarter of 1989. Premiums earned, net for the first quarter of 1990 were $11,021,000 as compared to $8,794,000 for the first quarter of 1989.

Net income for the first quarter of 1990 was $713,000 (30 cents per share)

as compared to $995,000 (40 cents per share) for the first quarter of 1989. Weighted average shares outstanding were 2,399,000 during the first quarter of 1990 as compared to 2,517,000 during the first quarter of 1989.

The company's reported results for the three months ended March 31 reflect adjustments due to potential rebates the company may incur pursuant to the provisions of Proposition 103. The company has not recorded any reserves for potential rebates under Proposition 103 for bonds effective after Nov. 8, 1989. However, adjustments on bonds effective before that date and recorded during the first quarter of 1990, and the earned effect of reserves for unearned premiums established in prior periods, continue to affect the company's reported results.

Without accounting for the estimated effects of Proposition 103, premiums written for the first quarter of 1990 would have been $12,303,000 as compared to $10,050,000 for the first quarter of 1989, premiums earned, net would have been $11,091,000 as compared to $8,794,000 for the first quarter of 1989, and net income would have been $848,000 (35 cents per share) as compared to $995,000 (40 cents per share) for the first quarter of 1989.

Amwest in a Woodland Hills, Calif., based insurance holding company, engaged through its wholly-owned subsidiaries, Amwest Surety Insurance Co. and Far West Insurance Co., in writing surety bonds in California, District of Columbia, Guam and 48 other states. The company specializes in writing surety bonds, including contract performance, court, contractors license and sales tax bonds.

#90114b0819 04/24/1990 ~Business Wire

EXETER, NH (APRIL 24) BUSINESS WIRE - The board of directors of UNITIL Corp. (AMEX:UTL) Tuesday declared a quarterly dividend of 55 cents per share on the company's common stock payable May 15, 1990 to shareholders of record on May 3, 1990.

This dividend represents an increase of 3 cents over the previously paid quarterly dividend of 52 cents per share, or approximately 6 percent on an annualized basis.

At the annual meeting of shareholders, held earlier this same day, shareholders overwhelmingly re-elected Charles H. Tenney II, William W. Treat and Douglas K. Macdonald as directors of the company.

UNITIL company officials expressed satisfaction regarding 1989 earnings, which neared record levels in spite of the unusual events over the past year, principally related to the costs incurred in responding to the inadequate, hostile tender offer by Eastern Utilities Associates.

Company officials also expressed confidence that 1990 earnings should be relatively unaffected by the continuing takeover attempt. Today's favorable action to increase the dividend reflects the company's strong condition as it satisfies both its financial and operating goals.

UNITIL Corp. is a New Hampshire-based electric utility holding company. Its subsidiaries are Concord Electric Co., Exeter & Hampton Electric Co., UNITIL Power Corp., UNITIL Realty Corp. and UNITIL Service Corp.

LOS ANGELES (APRIL 24) BUSINESS WIRE - MGM Grand Air, the luxury coast-to-coast airline which made its debut in Sept. 1987, announced Tuesday it will add three reconfigured DC-8 Super 62s to its transcontinental route in August, MGM Grand Air President and Chief Executive Officer Charles L. Demoney said.

The new aircraft will more than double MGM Grand Air's passenger and cargo capacity between New York and Los Angeles.

Two of the three DC-8 Super 62s will replace the current B727-100s in MGM Grand Air's regularly scheduled coast-to-coast flights. The planes will be reconfigured from their original seating arrangement of 190 to a luxurious and spacious 81.

The $55.5 million investment in acquisition and refurbishment of the three planes equates to an average expenditure of more than $162,500 per seat.

Since its launch three years ago, MGM Grand Air has redefined the concept of luxury travel and its financial results confirm its success. For the year ended Dec. 31, 1989, the airline posted revenues of $30,230,000 compared to $22, 271,000 for 1988, an increase of $7,959,000, or 36

percent.

The airline also posted significant gains in charter revenues and passenger loads.

All three of the DC-8 Super 62 aircraft are being equipped with state-of-the-art noise abatement equipment, making the fleet among the quietest DC-8s operating in the world. Other additions include all-weather color radar and provisions for collision avoidance and wind shear detection equipment.

The aircraft's new interiors will include beautifully designed paneling, oversized seats which recline and swivel, and essential business equipment such as an in-flight fax machine, 35 GTE Airfones and a technologically advanced audio1/4video system.

The front section of the aircraft features a fully functional stand-up bar that serves as an ideal gathering spot. This area includes 33 single, leather and fabric seats, with each seat having a clear view of several large video screens. Additional improvements include oversized dining trays and ample leg room.

SAN MATEO, CA (APRIL 24) BUSINESS WIRE - Franklin Resources Inc. (NYSE:BEN) Tuesday reported unaudited record earnings for the quarter and six months ended March 31, 1990.

Charles B. Johnson, president of the diversified financial services company, said net income for the quarter increased 16 percent, to $21.8 million from $18.8 million, or to 56 cents a share from 48 cents a year ago.

Revenues for the period increased 10.8 percent to $69.6 million, compared to $62.8 million. Average shares outstanding for the quarter were 39,289,450 compared to 39,285,843.

Net income for the six months increased to $43.8 million from $36.9 million, or to $1.12 a share from 94 cents a share in the same year-earlier period.

Revenues came to $138.7 million, compared to $122.1 million. Net income per share and average shares outstanding for 1989 were restated to reflect a 3-for-2 stock split declared in December 1989.

Johnson attributed the gains in net income to the 14 percent increase in total net assets under management by the company's subsidiaries to more

than $42.9 billion, up from $37.6 billion this time last year.

Franklin Resources' main business is the management of the 55-member Franklin Group of Funds. The company has its headquarters at 777 Mariners Island Blvd., San Mateo, Calif. 94404.

NEW ORLEANS (APRIL 24) BUSINESS WIRE - Sizeler Realty Co. Inc. (NYSE:SIZ) and Westminster Corp. Tuesday announced the consummation of a business combination that both firms believe will magnify their presence in the regional real estate market.

By joining together as sister companies, Sizeler Real Estate Management Co. Inc., which manages more than 11 million square feet of shopping center space in the Gulf South, and Westminster Management Co., which manages approximately 10 million square feet of office building space and other real estate in Louisiana, Texas and Illinois, become one of the major providers of real estate services in the southern United States.

''By combining these formerly separate fields of expertise, we will be able to serve a much broader spectrum of the institional real estate market,'' said Sidney W. Lassen, chairman of Sizeler Realty Co Inc., which is now the parent company of both firms.

''While real estate has always been -- and will remain -- a local business '' said Lee H. Schlesinger, chairman of Westminster Corp., ''the era of the individual owner-operator is passing as the industry becomes increasingly more complex and capital intensive. By joining with Sizeler at this time, we will be positioned to compete in the environment we envision in the future.''

The principals of Sizeler Realty Co. Inc. several years ago formed Sizeler Property Investors Inc., a publicly owned real estate investment trust ('REIT') that is listed on the New York Stock Exchange (symbol 'SIZ') and is the only such REIT in Louisiana.

''The combination of the two firms will allow us to immediately enhance the depth and quality of services to our tenants, property owners and the shareholders of Sizeler Property Investors Inc., while providing greater opportunity for the professional development of our personnel,'' according to Lassen.

LOUISVILLE, KY (APRIL 24) BUSINESS WIRE - SKOLNIKS INC. (NASDAQ:SKNS, Warrants:SKNSW) Tuesday announced that President E. Robert Holmberg has resigned to become a SKOLNIKS franchisee.

Holmberg will remain on the SKOLNIKS board of directors and will also remain as chief financial officer until a replacement is named.

SKOLNIKS' Chairman Joe R. Love will assume the additional duties of president. Love has been SKOLNIKS' chairman and chief executive officer since 1986 when he led a group that purchased the company from RJR/Nabisco. SKOLNIKS went pubic in April 1988.

SKOLNIKS recently announced second quarter earnings of $217,023, or 10 cents per share, up from (2 cents) per share for the same period last year. Six month earnings were $353,303, or 16 cents per share, compared to $49,385 and 2 cents per share, last year.

SKOLNIKS entered into an agreement with Holmberg wherein the company may reacquire his common stock over approximately four years. Under the agreement, SKOLNIKS has already purchased 125,000 shares, and may purchase an additional 50,000 shares over the next two years. In addition the company may purchase 75,000 additional shares beginning in 1992.

SKOLNIKS operates and franchises 36 Bakery/Restaurants in eight states under the name ''SKOLNIKS BAGEL BAKERY RESTAURANTS.''

EAST HARTFORD, CT (APRIL 24) BUSINESS WIRE - United Technologies Research Center (UTRC) Tuesday announced the formation of a new venture unit, United Technologies Photonics, to design, build and sell a variety of fiber and integrated optic components, modules and subsystems.

The unit is comprised of personnel, technology and assets from the Electronics and Photonics Department of UTRC. It will continue to be based at the Research Center's facility in East Hartford.

''United Technologies Photonics is rich in technology and deep in talent and leadership,'' said Dr. Wayne G. Burwell, director of research. ''This group has earned a highly respected reputation over the past ten years for its advancement of photonics.

''The group has brought this technology of manipulating and transforming signals and data with light, rather than conventional electronics, to a point where it now provides the corporation with substantial new business potential,'' Burwell added.

Sales prospects for the new venture include both aerospace and commercial customers. United Technologies Photonics also will provide custom and standard components for UTC's fly-by-light and fiber-based communication systems, radio frequency and microwave fiber-optic systems, and optical navigation systems.

Burwell explained that United Technologies Photonics will continue to look to the Research Center for technical support.

The new unit will be headed by Dr. Fred Leonberger who will report directly to Burwell. ''Our outlook is bright,'' said Leonberger. ''We're excited to bring to the marketplace a variety of products based on our leadership position in integrated optic chips and embedded fiber gratings.''

Leonberger, known internationally for his work with integrated wave-guide optics, joined UTRC in 1984 and most recently served as manager of photonics and applied physics. For his many contributions he was named a Fellow of The Institute of Electrical and Electronics Engineers and the Optical Society of America.

The Research Center, headquartered in East Hartford, Conn., is the central research organization of United Technologies Corp. Employing close to 1,100 scientists, engineers, technicians and support staff, the Research Center carries out basic and applied research across a broad span of scientific disciplines.

LITTLE ROCK, AK (APRIL 24) BUSINESS WIRE - The stockholders of Worthen Banking Corp. (ASE:WOR) held their 23rd annual meeting Tuesday in Little Rock and ratified four proposals.

The stockholders voted to fix the number of directors for the ensuing year at 10 and elected the proposed slate of 10 directors, all of whom had served on the Worthen Banking Corp. board in 1989.

In the second motion, the stockholders approved an amendment to the 1984 Amended and Substituted Stock Option Plan for Employees of the company, extending for five years the termination of the 1984 Plan.

The stockholders also ratified and approved the appointment of KPMG Peat Marwick as independent auditors for the corporation for the fiscal year ending Dec. 31, 1990, and in the fourth motion, ratified and approved the actions of the directors and officers in handling the affairs of the corporation in the previous year.

Commenting on the $11.1 million earned by the corporation in 1989 and the $4.1 million earned in the first quarter of 1990, the highest quarterly operating earnings recorded by the corporation in its 22 year history, Curt Bradbury, chairman, president and chief executive officer, stated: ''There should be no fear among our supporters or hope among our competitors that this particular juncture in our history will be met with a complacent gazing backwards, or a loss of our well-honed sense of urgency. If anything, the financial results of 1989 have increased our excitement for the next phase of the challenge.''

Bradbury stated that the corporation's 1990 plan does contemplate some

growth in assets by gaining market share in its 10 banking communities. Bradbury defined this ''as not the mere accumulation of money but the accumulation of capacity -- the capacity to participate in the critical cycle of investing in our markets, stimulating businesss activity, being adequately rewarded and re-investing.''

Bradbury stated that the corporation will maintain other areas of emphasis in 1990, including: (1) a continued focus on maintenance of high levels of liquidity; (2) a continued focus on low operating costs; (3) a continued emphasis on the activities of its full-service brokerage subsidairy, Worthen Investments Inc., as a defense against the intrusion of non-banks into its market areas and as an offensive tool for profits; (4) a renewed emphasis on response time in all areas of its business, particularly lending; and (5) increased emphasis on all issues pertaining to customer service and salesmanship.

LOS ANGELES (APRIL 24) BUSINESS WIRE - At its annual meeting Tuesday, the shareholders of Reebok International Ltd. re-elected all nine members of

the comapny's board of directors and approved an amendment to its 1985 Stock Option Plan to increase from 5,600,000 to 10,600,000 the number of shares of common stock available for issuance.

Reebok's board of directors declared the regular quarterly cash dividend of $.075 per share on its common stock, payable on July 3, to shareholders of record as of June 12, 1990.

Reebok International Ltd. (NYSE:RBK), headquartered in Stoughton, Mass., is the leading designer and marketer of active lifestyle and performance products, including footwear and apparel.

The company's operation units include Reebok's Footwear and Apparel Products divisions, and AVIA, Ellesse North America, Rockport and Boston Whaler Boats.

#90114b0907 04/24/1990 ~Business Wire

NEW ORLEANS (APRIL 24) BUSINESS WIRE - Tidewater Inc. (NYSE:TDW) announced Tuesday that its board of directors has adopted a Shareholder Rights Plan in which preferred stock purchase rights will be distributed as a dividend at the rate of one right for each common share held as of the close of business on May 7, 1990.

The Rights Plan is designed to deter coercive or unfair takeover tactics and to prevent an acquiror from gaining control of the company without offering a fair price to all of the company's shareholders. The rights will expire on May 1, 2000.

In a letter being sent to shareholders, John P. Laborde, chairman, president and chief executive officer, said the plan is intended to protect the interests of Tidewater Inc. shareholders in the event the company is confronted with coercive or unfair takeover tactics.

He noted that such tactics include ''offers that do not treat all shareholders equally, the acquisition in the open market of shares constituting control without offering fair value to all shareholders, and other coercive or unfair takeover tactics that could impair the board's ability to represent your interests fully.''

Laborde stressed, however, that the plan ''is not intended to prevent an acquisition of the company on terms that are favorable and fair to all shareholders and will not be used for that purpose. The plan is designed

to deal with the very serious problem of unilateral actions by hostile acquirors which are calculated to deprive a company's board and its shareholders of their ability to determine the destiny of the company.''

The rights will be exercisable only if a person or group acquires beneficial ownership of 15 percent or more of the company's common shares, or commences a tender or exchange offer upon consummation of which such person or group would beneficially own 15 percent or more of the common shares.

Each right will entitle holders of Tidewater Inc. common stock to buy one two-hundredth of a newly issued share of Series A Participating Preferred Stock of the company (or, under certain circumstances, an equivalent value of other securities of the company, property or cash or any combination thereof) at any exercise price of $50 (subject to adjustment).

If any person becomes the beneficial owner of 15 percent or more of the company's common shares other than pursuant to an offer for all shares which is fair to and otherwise in the best interest of the company and its shareholders, each right not owned by such person or related parties will enable its holder to purchase, at the right's then-current exercise price, common shares of the company having a value of twice the right's exercise price.

In addition, if the company is involved in a merger or other business combination transaction with another person in which its shares are changed or converted, or sells more than 50 percent of its assets to another person or persons, each right that has not previously been exercised will entitle its holder to purchase, at the right's then-current exercise price, common shares of such other person having a value of twice the right's exercise price.

The company will generally be entitled to redeem the rights at 1 cent per right at any time until the 10th day following public announcement that a 15 percent position has been acquired.

Details of the shareholder rights plan are outlined in a letter which will be mailed to all shareholders.

Tidewater Inc. owns and operates one of the largest fleets of vessels supporting the international offshore oil and gas industry and one of the largest fleets of gas and air compressors in the United States. The company also has modest intersts in domestic oil and gas operations, real estate and insurance.

#90114b0921 04/24/1990 ~Business Wire

NEW ORLEANS (APRIL 24) BUSINESS WIRE - Freeport-McMoRan Copper Company, Inc. (NYSE: FCX), an affiliate of Freeport-McMoRan Inc. (NYSE: FTX), Tuesday reported first-quarter 1990 net income of $15,639,000 or 18 cents per share on an average 85,380,000 shares outstanding compared with first-quarter 1989 net income of $24,816,000 or 29 cents per share on an average 85,380,000 shares outstanding.

First-quarter 1990 and 1989 revenues totaled $80,144,000 and $83,975,000, respectively.

The 85,380,000 FCX Class A and Class B shares outstanding and earnings per share in both periods reflect the May 1989 two-for-one stock split and the one-for-one stock dividend paid to all shareholders on April 2, 1990. Freeport-McMoRan Inc. owns approximately 77 percent of the total outstanding FCX common stock through ownership of all outstanding Class B shares.

First-quarter 1990 revenues and earnings also reflect FI's scheduling of copper concentrate shipments. Because of transportation considerations, FI made more shipments than usual during the fourth quarter of 1989 and also scheduled an increased number of shipments for the second quarter of 1990. Consequently, one less shipment was made during the first quarter of 1990 than would have otherwise been scheduled. Earnings for the three months ended Mar. 31, 1990, were also affected by increased interest expense and depreciation charges as a result of placing certain assets into operation to accommodate production from the Grasberg ore body. Prior to 1990, all interest costs associated with the Grasberg project had been capitalized.

FCX's continued strong operating and financial performance enabled the declaration on Apr. 5, 1990, of a first-quarter 1990 cash dividend of 25 cents per share on the company's Class A and Class B common stock, payable on May 1, 1990, to shareholders of record on Apr. 16, 1990. The dividend amount significantly exceeds the minimum quarterly dividend of 10-1/4 cents per share that would otherwise accumulate on the Class A common stock through the five-year period ending May 1, 1993.

#90114b0924 04/24/1990 ~Business Wire

NEW ORLEANS (APRIL 24) BUSINESS WIRE - Freeport-McMoRan Resource Partners, Limited Partnership (NYSE:FRP), an affiliate of Freeport-McMoRan Inc.

(NYSE:FTX), Tuesday reported first-quarter 1990 net income of $108,957,000 or $1.33 per unit on an average 82,061,000 units outstanding compared with first-quarter 1989 net income of $41,355,000, or 51 cents per unit on an average 80,504,000 units outstanding.

First-quarter 1990 net income included a gain of $100,930,000 on the sale of certain nitrogen fertilizer assets. Revenues during the first quarters of 1990 and 1989 totaled $222,191,000 and $268,931,000, respectively.

First-quarter 1990 cash to be distributed to unitholders totals $56.8 million and includes cash flow from operations and permanent working capital reductions related to the recent sale by FRP of certain nitrogen fertilizer assets. On April 20, 1990, FRP declared a cash distribution for the first quarter of 1990 of 60 cents per unit, payable on May 15, 1990, to unitholders of record on April 30, 1990.

This level of cash available for distribution will enable FRP to repay $7.4 million of cash distributions previously deferred by Freeport-McMoRan Inc., which owns approximately 62 percent of the outstanding FRP units. Earlier this month, Freeport-McMoRan Inc. announced that it had extended the period for minimum quarterly cash distributions of 60 cents per unit on publicly held FRP units through the second quarter of 1993. That period was originally scheduled to conclude at the end of the second quarter of 1991.

Freeport-McMoRan Inc. also stated that it would not extend, beyond the second quarter of 1991, its undertaking to fund the ordinary capital requirements of FRP's existing businesses, for which it receives additional FRP units.

#90114c0081 04/24/1990 ~Comtex

WASHINGTON (APRIL 24) COMTEX - Financial services industry executives today differed on whether to take a step-by-step approach to modernize U.S. financial services regulation or take more radical action to overhaul the system.

Kenneth Whipple, the president of Ford Motor Company's financial services group, told the Senate Banking, Housing and Urban Affairs Committee that "neither Ford nor other U.S. financial service providers will be able to meet the customer demand for increasingly sophisticated and convenient products unless our regulatory system is modernized to allow us the flexibility to provide these products."

Testifying on behalf of the Financial Services Council, a coalition of 25 companies representing all segments of the financial services industry, Whipple argued in favor of legislation introduced by Sens. Alfonse D'Amato (R-N.Y.) and Jake Garn (R-Utah).

The bill would effectively repeal the Glass-Steagall Act, which imposes a separation of banking and securities activities, by establishing depository institution holding companies which would have the power to participate in any financial services business through subsidiaries.

It also provides for functional regulation without regard to ownership, control or affiliations. Thus, regulations of banks and thrifts would remain with the appropriate bank and thrift regulators, regulation of insurance by the respective state insurance commissions and securities with the Securities and Exchange Commission.

Noting that foreign banks now account for 23 percent of U.S. banking assets and more than 28 percent of commercial and industrial loans, Whipple said this legislation will enhance the ability of the U.S. financial sector to be more competitive in the global marketplace.

"To prepare for the new European marketplace, European financial services firms are rapidly expanding their capabilities," Whipple said. "But while global competition has increased and technology offers the potential of better products and lower costs, the extent to which U.S. financial institutions can take advantage of these opportunities has been limited by statutory and regulatory constraints."

Philip Vallandingham, president of the Independent Bankers Association of America (IBAA), an association which represents the interests of community banks, opposes deregulation proposals such as the repeal of the Glass-Steagall Act. Vallandingham says such action "benefits only a handful of American banks, and few American consumers, while increasing instability for the financial system."

Vallandingham said that according to Federal Reserve Board Chairman Alan Greenspan, "international banking is and has been concentrated in a small number of U.S. banks. Four out of 10,000 U.S. banking organizations account for roughly half of international assets; 10 of those account for a little over 80 percent."

The IBAA says it favors an incremental approach to granting banks additional powers and has proposed the Consumer Financial Services Act. "Specifically, our bill would give national banks and bank holding companies the power to sell insurance and securities products to their customers and to broker real estate," Vallandingham said. "They would not get the power to underwrite insurance, securities or invest in real estate."

Whipple countered that sweeping legislation will permit the consolidation necessary for U.S. firms to become global competitors and still preserve the local banking system.

"There is no question that some institutions will consolidate to compete internationally, but there will always be a need for institutions that specialize in serving local needs," he said. "We need to recognize that a prohibition on affiliations between banks and commercial firms is not necessary to protect the financial system from abuse, and that barriers to entry must be eliminated in order to provide the banking industry with new sources of equity capital and management."

The IBAA worries that such legislation will place small banks at a competitive disadvantage and only benefit the large multinational banks.

"If there is a wholesale restructuring of our financial system, community banks could face unfair competition from banks under common ownership with wholesale financial firms, such as insurance and securities companies," Vallandingham said. "It does not make sense to radically change our entire financial system to accomodate the international aspirations of a few international banks."

#90114d0120 04/24/1990 ~French/German News Agency

WASHINGTON (APRIL 24) - The U.S. government indicated Tuesday that it regards Syria's assistance in the freeing of hostage Robert Polhill as insufficient to warrant lifting its sanctions against that country.

State Department Spokeswoman Margaret Tutwiler said there was ''evidence of direct Syrian involvement in international terrorism''.

Relations with Syria had been ''difficult for a number of years, notwithstanding Syrian assistance with the release of Robert Polhill'', she

said.

''There remain important impediments to improving relations, particularly the continued presence of terrorist groups in Syria and Syrian-controlled areas of Lebanon.''

While Syria had taken certain positive steps since 1986 to combat terrorism ''including its role in the release of Mr. Polhill, we continue to be very concerned about ... the presence of terrorist groups ... (Ahmed Jibril's Popular Front for the Liberation of Palestine General Command, Japanese Red Army, Abu-Nidal)'', Tutwiler said.

''We continue to urge Damascus to disassociate itself from such groups of internatiopnal terrorism,'' Tutwiler said.

#90114d0190 04/24/1990 ~French/German News Agency

BELGRADE (APRIL 24) - South Africa's hopes of returning to the Olympic fold will rest with the other African nations, the International Olympic Committee decided at their first executive board meeting of the year here on Tuesday.

The meeting, chaired by IOC president Juan Antonio Samaranch, adopted a resolution that African national Olympic committees be asked to vote on whether there have been sufficiently radical reforms in the apartheid system in the Republic to allow South Africa back into the various international sporting federations.

In the mean time, the IOC also plans to provide aid to underprivileged black South African sportsmen and women to allow them to emerge on to the international stage.

On a purely sporting front, the IOC is proposing the retention of archery as an Olympic sport in Barcelona in 1992, but abandoning the rhythmic gymnastics team competition. It has also been suggested that the table tennis team competiton be scrapped, but that will be on the agenda on Thursday when the executive board meet representatives of the Barcelona Organinsing Committee.

NEW YORK, UNITED NATIONS (APRIL 24) - Several countries ready to provide humanitarian aide to Ethiopia have called for a cease-fire in that nation's civil war so they can get supplies to the victims.

The initiative was sponsored by Canada, the European Economic Community,

the United States, Norway, Switzerland and Sweden. They drafted an "agreement in principle" demanding a cease-fire to allow supplies to get through.

The Soviet Union, which did not join the countries in pressing the demand, has called such initiatives an interference in internal affairs.

But the Soviet Union, in collaboration with the United States, plans to make a separate effort to aid Eithopia, said Ernest Obminksy, the Soviet vice minister for foreign affairs.

The signatories of the declaration have asked that ports and landing strips be opened up to allow distribution of the supplies through neutral intermediaries.

Some 4.5 million people have been stricken by famine as a result of the civil war being waged in Eritrea where rebels have been fighting government troops since 1961 for independence.

#90114d0570 04/24/1990 ~French/German News Agency

MOSCOW (APRIL 24) - Lithuanian President Vytautas Landsbergis expressed disappointment Tuesday after U.S. President George Bush declined to order sanctions against Moscow to protest the Soviet economic blockade of the breakaway republic.

Mr. Bush Tuesday postponed adopting trade sanctions against Moscow after consulting with Congressional leaders, saying "there is a lot at stake in this situation".

"We were afraid that America would sell us down the river. Let people decide for themselves if that has really happened," Mr. Landsbergis said in a statement released by the Lithuanian parliament's press service.

-30- 799

#90114d5450 04/24/1990 ~French/German News Agency

PARIS (APRIL 24) - France had a trade deficit of 858 million francs (150 million dollars) in March, following its 1.078 billion franc (170 million dollar) deficit in February.

Seasonally adjusted figures issued by the customs service Tuesday showed that exports rose to 100.105 billion francs compared with 98.271 billion the previous month, while imports were at 100.963 billion, up from February's 99.349 billion.

The seasonally adjusted deficit for the first quarter was 2.114 billion

francs, against 4.890 billion for the first three months of 1989.

-30- 729

#90114d5620 04/24/1990 ~French/German News Agency

JAKARTA (APRIL 24) - Indonesia's export income surged by 15 percent in 1989 to 22.16 billion dollars due to strong performance in both the oil and non-oil sectors, according to the Central Bureau of Statistics (CBS) Tuesday.

CBS said in its latest report that imports grew to 16.36 billion dollars last year, up 24 percent from 1988.

Exports of oil and gas increased nearly 13 percent last year to 8.68 billion dollars, accounting for around 40 percent of the total, while non-oil commodities posted a 17 percent gain reaching 13.48 billion dollars.

Economists attributed the higher oil income to stronger world prices while the impressive growth of the non-oil exports was a reflection of the success of Indonesia's drive to reduce its dependency on hydrocarbons for export revenues.

The 1989 performance brought Indonesia's exports back roughly to the levels of the early 1980s before plunging oil prices devastated the country's foreign earnings.

Jakarta has launched a series of deregulatory measures since 1983 to boost the non-oil sector of the economy in response to the oil price plunge from a peak of 30 dollars a barrel in 1982 to around 16-18 dollars at present.

Non-oil exports netted only 3.9 billion dollars in 1982, representing 17 per cent of the 22.33 billion dollars total export revenues.

The CBS report said wood products and textiles had the most impressive growth rates last year among non-oil commodities. Wood products, mostly plywood, grew 20 percent to reach 3.4 billion dollars while textile and garments surged 42 percent to 2.0 billion dollars.

#90114d5900 04/24/1990 ~French/German News Agency

Tokyo (APRIL 24) - Toyota Motor Corp. announced Tuesday it would start making and selling compact passenger cars in Pakistan under a business link with a major Pakistani business concern, House of Habib.

The joint venture, Indus Motor Co., is to begin the production around late 1992 or early 1993 at a factory to be built near Karachi, according to Toyota officials.

Indus Motor plans initially to turn out about 10,000 of the 1.3-1.6 litre Corolla and Hilux cars a year, with Land Cruiser and Hiace models to be added in the future. Annual production is to be increased to 20,000 by 1996, they said.

-30- 761

#90114d6000 04/24/1990 ~French/German News Agency

TOKYO (APRIL 24) - Japan's crude oil imports in fiscal 1989 rose 5.6 per cent from the previous year to 210.9 million kiloliters (1.33 billion barrels), the Ministry of International Trade and Industry said Tuesday.

The annual volume topped 200 million kiloliters for the first time in five years due to brisk demand in the manufacturing and energy supply industries, the ministry said.

It added that crude imports in March, the final month of fiscal 1989, increased 3.8 percent from a year earlier to 19.6 million kiloliters (123.3 million barrels).

In fiscal 1989, the United Arab Emirates was the biggest crude oil supplier for Japan with shipments totaling a record 44.9 million kiloliters (282.4 million barrels), up 12.2 percent from fiscal 1988.

Japan, which covers almost all of its oil needs with imports, depended on Middle East nations for 71.3 percent of its crude imports and on member states of the Organization of Petroleum Exporting Countries (OPEC) for 77.3 percent, the ministry said.

-30- 1199
#90114d6040 04/24/1990 ~French/German News Agency
MANILA (APRIL 24) - Central Bank governor Jose Cuisia said here Tuesday that the Philippine government was preparing measures to make banks more competitive.

These measures include liberalized regulations on setting up new banks and new bank branches and on mergers and acquisitions among existing banks.

This would be in contrast to previous government policies which tightly controlled the establishment of new banks following the collapse of several banks in the early 1980s.

Mr. Cuisia, a former private banker, told finance executives that there would be "lesser government presence in the banking sector," including faster privatization of several banks taken over by the government.

He reiterated his vow to work for lower intermediation costs and other policy changes that would bring down interest rates for lenders but would also allow the banks to offer higher rates for depositors.

Lending rates currently are as high as 26 per cent, largely due to government attempts to lower inflation. However, businessmen say these high rates are stifling investment.

Mr. Cuisia said the government might allow more foreign banks to set up operations here "in the not-too-distant future." Currently, only three foreign banks have commercial operations in this country.

-30- 1470
#90114d6080 04/24/1990 ~French/German News Agency
TOKYO (APRIL 24) - Japanese clothes manufacturer Renown Inc. is about to launch a 74 million pound (121 million dollar) friendly takeover bid for Aquascutum Group PLC, a British clothes maker, Renown executives said Tuesday.

Renown will submit a bid on May 20 to purchase all 30.7 million Aquascutum stocks, including 3.5 million voting shares and 27,275,886 non-voting shares, at 5.5 pounds (nine dollars) for a voting share and two pounds (3.25 dollars) for non-voting shares.

The executives said the takeover will be friendly because both sides have a prior agreement on the deal.

It is the first total acquisition of a foreign firm by Renown, which posted sales of 231 billion yen (1.471 billion dollars) in the year to March 31, 1990.

Aquascutum, established in London in 1951, enjoys a worldwide reputation for raincoats and other garments.

-30- 1039

#90114d6100 04/24/1990 ~French/German News Agency

LONDON (APRIL 24) - Economic reform in eastern Europe could boost world trade by 10 percent but initial growth will be limited by a weak economic base and high debts, the American Express Bank said in its latest AME

Growth in international trade is the key to the reform process because eastern Europe's budding democracies need imports of new technology to start catching up with western industrialized countries, the review said.

New imports of consumer goods are also needed as a "political safety valve" in eastern Europe and, because foreign investment would be limited, a substantial rise in exports from eastern Europe is also necessary to finance new imports.

The review said that "the effect will be large" if eastern European countries, which currently export around 400 dollars worth of goods and services per capita annually, manage to catch up with western European exports which average 3,437 dollars per capita.

But it added that while this prospect was possible in the long term, the outlook for the next five years was more modest.

It also said that the Soviet Union's trade with the West was likely to grow relatively slowly because it was dominated by raw materials which probably could not be increased as fast as manufactured goods.

-30- 1469

#90114d6190 04/24/1990 ~French/German News Agency

MANILA (APRIL 24) - President Corazon Aquino called on the Finance Department here Tuesday to "set our fiscal house in order" and take innovative actions to reduce servicing of the country's domestic debt.

Mrs. Aquino called for the removal of tax and customs privileges and other rules extended to protected industries.

The Aquino government has been trying to simplify tax regulations and increase revenues in order to shrink the fiscal deficit which is expected to hit more than 19 billion pesos (834 million dollars) this year, against an initial target of 13 billion pesos (597 million dollars).

However although government revenue collections have risen sharply,

congress has refused to approve new taxes despite warnings from economic planners that this will balloon the deficit, increasing inflation.

"We can no longer have an economy with far too many exemptions for the few who already have much while the greater burden of financing economic growth is borne by the many who have so much less," Mrs. Aquino said in one of her strongest attacks against protected industries.

Manila recently bought back 1.3 billion dollars of its 27 billion dollar foreign debt at a 50 percent discount, using funds from multilateral institutions.

#90114d6470 04/24/1990 ~French/German News Agency

BASEL (APRIL 24) - Swiss chemical group Sandoz boosted profit by 25.9 percent to 958 million Swiss francs (638 million dollars) last year on sales of 12.49 billion francs (9.38 billion dollars), the group announced Tuesday.

The group's pharmaceutical division posted sales of 5.66 billion francs last year, 46 percent of total group sales. Chemical products accounted for 20 per cent.

Total sales showed a 16.5 percent rise from 1988.

Sandoz's main markets outside Europe are the United States and Japan. The group makes 27.8 percent of its sales in the United States and 11.8 percent in Japan. It employs more than 50,000 people.

Sandoz expects less rapid growth this year, although first-quarter sales totalled 3.6 billion francs (2.4 billion dollars), up 13 percent from the same period last year.

Sandoz president Marc Moret said it was difficult to make reliable forecasts for the current year, but advanced the view that an "ambitious goal would be to achieve two-figure growth in sales expressed in Swiss francs". He said he was satisfied with the first-quarter result.

#90114d6680 04/24/1990 ~French/German News Agency

FRANKFURT (APRIL 24) - Dresdner Bank of West Germany is the first European bank to become a shareholder in a Taiwanese brokerage firm with a 7.5 percent stake in Grand Cathay Securities Corporation, the bank said here Tuesday.

Grand Cathay is particularly active in new stock issues, Dresdner said in a

statement announcing its move.

The main shareholders in Grand Cathay, founded in 1988, are the holding company of the Kuomintang ruling party and three local private banks.

Dresdner also announced the launch of a new wholly-owned Taiwan-based subsidiary, Dresdner Thornton Securities Investment Consulting Co. Ltd.

The new company will distribute Dresdner's investment capital. Contracts have been signed with 11 local banks with a total of more than 500 branches in Taiwan.

LONDON (APRIL 24) - British Nuclear Fuels Ltd. (BNFL) has won a 225 million pound (360 million dollar) contract to reprocess nuclear waste from the Lingen reactor near Dortmund, West Germany, the firm said Tuesday.

The waste will be reprocessed in BNFL's future installations in Sellafield, north-west England, where ecologists have led a campaign to protest what they say is an alarming rise in cancer cases caused by the Sellafield nuclear plant.

BNFL said in February that it would open its own inquiry into cases of leukemia among children of workers at the plant after a report by a Southampton University professor raised concern.

The plant has suffered a series of nuclear leaks and accidents in recent years.

The first 10 years of operations at the new thermal oxide reprocessing plant, due to come on stream in 1993, are already booked for power companies in Britain, western Europe and Japan, which have financed the project with payments committing all 7,000 tons of the plant's reprocessing capacity. BNFL is expected to make about five billion pounds (eight billion dollars) from the deals.

SEOUL (APRIL 24) - A group of investors angrily protested here Tuesday against the recent sharp plunge in South Korean stock prices, hampering operations at security firms.

Amid growing signs of stagflation, the market has lost 23.7 percent in value, with the Composite Price Index falling from a peak 1,007 points a year ago to 768.0 points as of Tuesday.

Two groups of investors, numbering about 50 to 100 each, raided more than a dozen security firms in central Seoul, shouting abuses and overturning desks and chairs.

Stock dealers looked on, some of them turning off electric boards displaying stock prices at the demand of the protestors.

Police did not intervene.

The protestors demanded that the government set up measures to boost the lagging market, urging President Roh Tae-Woo to declare emergency decrees to stop land speculation, which they blame for the decrease in prices.

A series of market-boosting measures have failed to produce results and, by giving a temporary infusion of money to the market, have instead allowed large-scale speculators -- known here as the "big hands" -- to cut their losses and bail out.

Gloomy prospects for the country's economy, spiraling property prices and concerns about rising inflation were all contributing to the flight of money out of the market, analysts said.

Statistics from the Korea Housing Bank showed that in 1989 alone, housing rent in Seoul soared by 35 percent.

CAIRO (APRIL 24) - A coup attempt Sunday against Sudan's military government headed by General Omar el Beshir, the second in less than a month, has laid bare the weakness of a regime which appears increasingly like the main obstacle to peace with rebels and national reconciliation.

Gen. Beshir announced Monday that forces loyal to the government had crushed a coup bid by young officers and retired army veterans and that all those involved had been arrested.

He said that the coup had been planned by the "alliance formed to compromise with the outlaws."

That was a clear reference to an agreement reached last month in Cairo between Sudanese opposition parties in exile and the Sudan People's Liberation Army (SPLA), which has been fighting the central government since 1983.

The Cairo agreement itself was based on the "Charter of Democratic National Alliance," a pact reached last October among all groups outlawed by the

junta when it seized power ten months ago from a civilian government.

In the charter, 11 political parties and 51 trade unions pledged to overthrow the military government through a popular uprising that would install a transitional government.

The interim government's task would be to lay the groundwork for a democratic regime that would restore basic freedoms and abolish Islamic law.

Islamic Sharia law, imposed in 1983 by then leader Gaafar Nimeiri, prompted an armed rebellion in the mainly Christian south.

When the Nimeiri regime was overthrown in 1986, the Sudan People's Liberation Army rebels led by Colonel John Garang and various Sudanese political forces signed a agreement which was later confirmed and broadened by the 1988 Addis Ababa pact between the Democratic Unionist Party, then part of a government coalition, and the SPLA.

The Addis Ababa pact was approved a few months later by the government of Sadek el Mahdi.

This slow groping towards national reconciliation was cut short by the June 30 coup which brought the current junta to power.

The junta, whose only popular support appears to be from the Moslem fundamentalists of the National Islamic Front, recognized the significance of the agreement reached last month between the SPLA and Sudan's exiled political parties.

Soon after, the junta announced it had uncovered a plot to overthrow it and arrested several leading civilian and military figures, included the son of Mr. Mahdi, leader of the former civilian government.

Analysts said the move looked much like an attempt to intimidate the opposition.

Earlier this month a cabinet reshuffle left Islamic hardliners with more power.

According to reports from Khartoum, the situation was calm on Monday. Security forces were posted along all strategic points of the capital and the airport, which was closed during the coup attempt, had been reopened.

NAIROBI (APRIL 24) - A British Caledonian Boeing 757 charter flight which

left the Kenyan Indian Ocean port of Mombasa for London's Gatwick Airport with 245 tourists and crew aboard landed here safely after the plane's captain collapsed in the cockpit, an informed airport source said here Tuesday.

Captain Duncan Jack collapsed minutes after flight KT 245 took off from Mombasa, but First Officer Michael Kirk managed to land the plane safely at Nairobi's Jomo Kenyatta International Airport at 10.57 GMT Tuesday.

The captain, ill with suspected food poisoning, was taken off the aircraft in a wheelchair and rushed to Nairobi Hospital.

Another captain was being flown to Nairobi to fly the plane back to London, airport sources said.

BERLIN (APRIL 24) - The East German economy faces major problems associated with German monetary union although Monday's announcement of a one-for-one exchange rate between Deutsche marks and Ost marks was broadly in line with the hopes of the East German leadership.

The first non-Communist government in East Germany has two months to make the change from a centrally planned economy to a market economy.

By the day of monetary union, due to be before July 2, "the abolition of the old system of planning will have to be essentially completed", said Christian Democratic Prime Minister Lothar de Maiziere, who opened talks on monetary union with West German Chancellor Helmut Kohl in Bonn on Tuesday.

Monetary union "may have catastrophic consequences for most citizens in East Germany" particularly through a big increase in unemployment, the trade union daily Tribune said on Tuesday.

The difference between average pay in East Germany of about 1,000 marks before tax and a figure about three times as high in West Germany, and productivity which is at half the West German level, suggest that there is room for pay increases.

But the planned abolition of subsidies will increase prices sharply and will lead to a fall in real purchasing power, union sources stress.

The former Communist administration maintained prices at artificially low levels by multiplying subsidies for basic products and for rents.

Food subsidies alone total 55 billion marks or 32 billion dollars per year,

the finance ministry has said.

Loss of sovereignty in East Germany will mean that it will no longer be possible to absorb the deficit by printing money.

But expenditure to assist adaptation to changes in the economy, training, increased retirement, and help for the unemployed will be increased.

Unemployment, which hitherto has not been acknowledged officially, could rise fast at least during the transition period, Finance Minister Walter Romberg of the Social Democratic party has said.

It has been estimated that 20 per cent of East German companies are not viable in any case.

West Germany has proposed dividing in two the burden of carrying the internal debt of companies which would therefore fall from 260 billion Ost marks to 130 billion Deutsche marks (76 billion dollars).

But this would not mean that East German companies would become competitive. East Germany had sought cancellation of these debts, particularly in the private and co-operative sectors.

The difficulties have been exacerbated by a tendency by East Germans to buy West German or foreign goods. This has meant that in recent months, in some sectors such as construction or the auto industry, shortages in East Germany have been replaced by unsaleable surplus local production.

The payment of wages on a one-for-one basis is expected to accelerate this trend by making products bought in West Germany appear cheaper for East Germans.

To deal with this challenge, the government is counting on West German and foreign capital via massive investment in East Germany, on high-quality training for East German workers, and on continued usage of much existing equipment.

The government wants to reduce taxation on small and on medium-sized companies with a view to creating 500,000 jobs.

It also wants to obtain delays for integration of agriculture, taxation, social and ecological standards, into West Germany and into the European Economic Community (EEC), Mr. de Maiziere has said.

PRAGUE (APRIL 24) - Czechoslovak President Vaclav Havel will seek to

explain PLO leader Yasser Arafat's views and offer his own services as a Middle East mediator during a two-day official visit to Israel, his spokesman said Monday.

Mr. Havel leaves Wednesday for Israel where he is scheduled to meet with Israeli President Chaim Herzog, Prime Minister Yitzhak Shamir and the Labor party leader and deputy prime minister, Shimon Peres.

It will be his last official visit abroad (except for a brief trip to Strasbourg to address the Council of Europe's parliamentary assembly) before Czechoslovakia's free elections in June.

Presidential spokesman Michael Zantovsky told a press conference that Mr. Havel planned to "discuss in detail the proposals of the Palestine Liberation Organization chairman who has expressed his desire to open an Israeli-Palestinian dialogue" on the basis of a peace plan put forth by U.S. Secretary of State James Baker.

"The mediator's role that President Havel might play will depend on the Israeli response," his spokesman said.

Mr. Arafat travelled to Czechoslovakia earlier this month, on his first trip to the country since the collapse of the communist regime which had long given support to the PLO.

During that visit, Mr. Havel pledged to continue Czechoslovak humanitarian aid to the organization.

Czechoslovakia, meanwhile, had restored diplomatic relations with Israel in February, ending a 23-year break imposed after the 1967 Israeli-Arab war.

Mr. Havel will be accompanied by the Czechoslovak foreign minister, Jiri Dienstbier, who is scheduled for meetings with his Israeli counterpart, Moshe Arens.

On the same occasion, nearly 400 Czechoslovak Jews will be travelling to Israel on special free flights aboard Czechoslovak army aircraft.

Mr. Zantovsky said the group were "tourists" and would be returning to Prague. There had been speculation here that the 400 would attempt to settle in Israel.

Mr. Zantovsky added that Prague was not keen to become a new transit point for Soviet Jews emigrating to Israel because of the "complexity of the problem."

During his two-day visit, Mr. Havel will visit the T.G. Masaryk kibbutz, named after Czechoslovakia's first president who visited Palestine in 1927.

Mr. Havel will be awarded an honorary degree by the Hebrew University in Jerusalem.

His spokesman did not say whether Mr. Havel would visit the occupied territories, as Mr. Arafat had urged during his trip to Czechoslovakia.

"He will speak to Palestinians and visit Jerusalem," Mr. Zantovsky said.

FRANKFURT (APRIL 24) - Growth in the West German money supply slowed in March after a sharp increase in the first two months of the year, the Bundesbank said Tuesday.

Provisional figures released by the central bank showed a five percent increase in M3, including notes and coins in circulation and sight deposits and time accounts of less than four years.

M3 had risen by 5.5 percent in February after being revised downwards, and by 5.9 percent in January.

The Bundesbank said West Germany's money supply was developing in line with its target of four to six percent growth over the year.

HONG KONG (APRIL 24) - A new line of telecommunications products and services for multinational companies was launched here Tuesday by Britain's Cable and Wireless plc and U.S. Sprint Inc.

The new brand of products, called GLOBAL FON (Fibre Optic Network), aims to cater to the needs of multinational companies operating in North America, Europe, Asia and the Caribbean, U.S. Sprint Inc. and Cable and Wireless plc's subsidiary, Hong Kong Telecom, announced in a statement.

GLOBAL FON offers a digital global communications network that overcomes problems of technological incompatibility and varying standards, said Brian Pemberton, managing director of Cable and Wireless.

The two companies also announced the first GLOBAL FON product, Global Virtual Private Network (GVPN), which will give users the benefit of a "high specification digital network which seamlessly interconnects business centres around the world using compatible switch technology in each location".

The product will be commercially available in September.

TOKYO (APRIL 24) - Japan's Kokusai Denshin Denwa Co. Ltd. (KDD) said an agreement on a cable linking Hong Kong, Japan and South Korea would be revised Tuesday to boost capacity and include three new carriers in the project.

The new participants, which boost the number of carriers to 29 companies from 13 countries, are Data Communications Corp. of South Korea, Philippine Long Distance Telephone Co. and PT Indonesia Satellite Corp., the company said.

The revised agreement for the 190 million dollar cable, to be signed in Tucson, Arizona later Tuesday, will boost overall capacity from 3,780 kilobits a second to 6,474 kilobits a second.

The capacity on the Japan-Hong Kong cable is being raised from 1,890 kilobits a second to 2,694 kilobits, with KDD's share climbing from its initially proposed 652 kilobits to 700 kilobits.

The capacity between Japan and South Korea is being boosted from 1,890 kilobits to the maximum 3,780 kilobits, with KDD lifting its share from 1,080 kilobits to 1,631 kilobits, the company added.

Major investors in the project are Hong Kong Telecommunications International Ltd. with 28 per cent, Korea Telecommunications Authority with 18 per cent, KDD with 16 per cen. and American Telephone and Telegraph Inc. with nine per cent. The cable is due to start operating in late May.

Frankfurt (APRIL 24) - The West German chemical concern Hoechst Ag said Tuesday its net profit in 1989 surged to a record 1.17 billion marks (688 million dollars), 22 per cent over the previous year's 960 million marks.

The company said it would propose a 13 mark dividend per share at the June 12 annual shareholders conference, one mark higher than last year's payout.

Hoechst achieved world group turnover of 45.9 billion marks in 1989, up 12 per cent from the year before.

EAST BERLIN (APRIL 24) - The West German airline Lufthansa and its East German counterpart Interflug established here Tuesday their second joint venture company, Interhansa Service.

The 50-50 joint venture is to build up a food catering infrastructure in East Germany to bring airline and airport gastronomical services there up to world standards.

Under the venture, new food catering facilities will be built at the East Berlin Schoenefeld airport and at the Leipzig airport. New production facilities may also be established at Dresden and Erfurt, creating 350 new jobs.

In early April the two airlines set up their first joint venture, Interhansa Software. Last March, Lufthansa acquired a 26 percent minority holding in Interflug.

TOKYO (APRIL 24) - The crisis in the financial markets here has so far spared most of the nation's vibrant economy and profitability, but it has shaken confidence among investors who question Japan's economic fundamentals.

The Economic Planning Agency said Tuesday in its monthly report that despite the slide by the stock market and the yen, April would be the 41st straight month of economic growth -- only a month short of matching Japan's post-war growth record set between 1958 and 1961.

Even so, the self-satisfaction and wildly optimistic forecasts prevalent in 1989 have yielded to uncertainty and caution.

"All it took was for stock brokers to lack a little perspective and the yen to waver for people to no longer believe in the invincibility of the Japanese economy," a Japanese economist said.

Japan ranks top among industrialized nations in economic growth -- nearly five percent in 1989 -- and in foreign trade, foreign reserves, employment and productivity, while it is among the lowest in inflation at 2.7 percent.

Its economic strength rests intact and is still awaiting dividends from recent foreign investments.

But there are storm clouds: More than a billion dollars were lost as Tokyo's shares shed nearly 30 percent of their value, the yen has slipped steadily against the dollar, there is inflationary pressure and the chance of another rise in interest rates.

Plus there are social tensions, a drop in current accounts, slowing of industrial growth and output, tightening money supply, foreign trade disagreements and shaky political stability.

Having just shaken off a string of scandals that rocked the political structure, the Japanese are wondering if the dark economic trends are a bellwether of crisis or the price of success.

For bulls, it is part of a temporary, healthy correction after excesses in recent years like easy credit and speculation in stocks and real estate.

"The Japanese economy, with its vastly bloated assets, has become a hideous monstrosity incapable of moving under its own weight," said Hiroshi Takeuchi, an economist at the Long-Term Credit Bank.

They say without the purge, overheating would have occurred, but the sweating-out has left Japan's economic muscle -- toughened by 40 years of work -- intact.

Mr. Hatakeyama meanwhile announced that Kabun Muto, Japan's international trade and industry minister, would leave for the United States on Saturday for his first visit there as minister.

The week-long visit includes meetings with Washington officials and the so-called quadrilateral meetings among trade ministers from the United States, Japan, Canada and the European Economic Community to be held near San Francisco, he said.

PRETORIA (APRIL 24) - South Africa's official inflation rate, as measured by the Consumer Price Index (CPI), held steady at a year-on-year rate of 14.9 percent in March, the government's Central Statistical Services said Tuesday.

Since July when it was pegged at 15.5 percent, the CPI inflation rate has been hovering at just under the 15 percent level, with a rate of 14.9 recorded in February.

Economists who thought the cycle might have turned expressed concern at the high monthly increase in the CPI, but said the underlying inflation trend remained downwards.

Trust Bank economist Nick Barnardt predicted the CPI would fall to below 14 per cent by mid-year but Johannesburg Consolidated Investment (JCI) economist Ronnie Bethlehem said: "We will need a much lower monthly increase to see a clear improvement in inflation by the end of the year."

The price index for food increased by 15.1 percent over the corresponding period last year while relatively large monthly increases occurred for alcoholic beverages (10.5 percent) and furniture (7 percent).

Inflation reached a peak of 20.6 percent in January 1986 but dropped to 12.3 percent in August 1988.

#90114d8430 04/24/1990 ~French/German News Agency

FRANKFURT (APRIL 24) - British Airways is reportedly considering taking a stake in a West German airline German Wings, which has been trying for a year to break Lufthansa's virtual monopoly on West German domestic lines.

The daily Frankfurter Allgemeine said Tuesday that British Airways would buy a 49 percent stake in German Wings for 70 million Deutsche marks (41 million dollars). The British carrier would also take an option on further stock to obtain a majority stake later, it said.

German Wings has suffered heavy financial losses in its bid to challenge Lufthansa.

A Hamburg daily said last weekend that German Wings was considering a link-up with Scandinavian airline SAS.

German Wings declined to comment on either report.

German Wings is 45 percent owned by the brothers Franz and Frieder Burda, while its two managers Christian and Peter Kimmel hold 40 percent and a Bavarian investment company owns 15 percent.

#90114d8440 04/24/1990 ~French/German News Agency

ZOUG, Switzerland (APRIL 24) - Merck SA, a Swiss-based holding company controlling the foreign assets of West German pharmaceutical and chemical giant Merck, on Tuesday announced a 39 percent surge in the group's net profit for last year to 162 million Swiss francs (108 million dollars).

The group is to raise its dividend from 20 to 24 percent.

The group's sales, consolidated according to European Economic Community standards, also rose 16 percent to 1.88 billion Swiss francs (1.25 billion dollars). Pharmaceutical sales were up 22 percent at 796 million Swiss francs (530 million dollars).

Sales in Merck's main market, Europe, rose 22 percent to 1.2 billion Swiss francs (800 million dollars), while north American sales were 259 million francs (172 million dollars) and Asian sales were 149 million francs (99 million dollars).

The net profit of the Merck SA holding company rose 35 percent to 71 million francs (47 million dollars).

-30- 1130

#90114d8600 04/24/1990 ~French/German News Agency

MANILA (APRIL 24) - The Philippines' finance secretary warned Tuesday of a possible economic slowdown unless vital fiscal measures were put in place and accused politicians of dragging their feet on crucial legislation.

Finance Secretary Jesus Estanislao warned that the impasse would result in higher inflation, higher interest rates and a wider trade deficit.

The finance chief's warning came after President Corazon Aquino called on the finance department Tuesday to "set our fiscal house in order" and to take innovative action to reduce the costs of servicing the domestic debt.

Mr. Estanislao called for new excise taxes, while Mrs. Aquino called for the removal of tax and customs privileges and other rules extended to protected industries.

Mr. Estanislao said the "entire mechanism of the fiscal sector... allowed itself to be thrown out of line simply because some fairly tough decisions that should have been made six to nine months ago were simply swept under the rug."

He said the projected budget deficit of 13 billion pesos (597 million dollars) this year had grown to 21 billion pesos (923 million dollars) and the consolidated public sector deficit was estimated to be 22 billion pesos (966 million dollars) more than what was programmed.

He blamed it on slow export growth, high interest rates on government securities and the depletion of a government fund which cushions officially controlled domestic oil prices against changes on the international market.

Mrs. Aquino, speaking at the finance department, said, "We can no longer

have an economy with far too many exemptions for the few who already have much while the greater burden of financing economic growth is borne by the many who have so much less."

She also urged the department to "give special focus on domestic debt service reduction."

#90114d8650 04/24/1990 ~French/German News Agency

RAWALPINDI, PAKISTAN (APRIL 24) - Pakistan's Minister of State for Defense Ghulam Sarwar Cheema Tuesday warned India that a fourth Indo-Pakistan war would be totally different from their previous encounters.

"Our defense capability was in a position to fully counter any threat to the homeland," he said, adding "the results of war with India this time would be much different" from the previous three clashes since independence from Britain in 1947.

He told a defense ministry news briefing here that India had moved its troops in a defensive posture close to the Pakistan border at three unspecified points and in an "aggressive position" at another location.

India and Pakistan have fought two wars over Kashmir.

In 1971 India supported Bangladesh, formerly East Pakistan, in its war of independence against Islamabad.

He said his warning was "the message of the political and military leadership of Pakistan" which he was conveying "through the press and the media with full responsibility."

The minister added that the Moslem secessionist movement in Kashmir was "indigenous and spontaneous" and any outside interference was out of the question.

Tension has mounted between the two countries with India blaming Pakistan for fuelling the militant campaign in Kashmir, a charge Islamabad has denied.

Meanwhile in Islamabad several thousand members of Pakistan's fundamentalist Jamiat-i-Islami party staged an anti-India rally to condemn alleged Indian "atrocities" in Kashmir.

Led by party leader, Qazi Hussain Ahmed, demonstrators gathered outside the foreign ministry before a delegation marched to the Indian High Commission (embassy) to present a memorandum.

"What is happening in Kashmir today is against all international norms and values," the memorandum said. It called for an "impartial" United Nations-supervised plebiscite to allow Kashmiris to decide their own future, adding the result should be respected by both Pakistan and India.

LONDON, April 24 (AFP) - Midland bank chairman and chief executive Sir Kit McMahon warned shareholders Tuesday that the bank's results, hit by high interest rates, were likely to be poor this year.

Sir Kit said profit would be "well below the level achieved in the very different conditions prevalent in the first half of last year".

British banks have been forced by the government's high interest rate policy to raise base interest rates from nine to 15 percent in the past two years.

-30- 679

#90114d8990 04/24/1990 ~French/German News Agency

MOSCOW (APRIL 24) - Leaders of official unions in the Soviet Union

demanded social guarantees to cushion radical economic reforms in an appeal to the government published by the union newspaper Trud on Tuesday.

Meanwhile two leading economists stressed that the economy faces severe problems at home, and that interest payments abroad are absorbing currency reserves.

The union leadership referred to "the serious negative consequences in society...of the most radical changes in the social-economic system of our country since October 1917".

It said: "The monopoly of producers, and shortages on the consumer market, will cause uneven price rises, inflation, unemployment and therefore a reduction of living standards for most of the population."

Economic reforms must firstly "guarantee social defence of Soviet citizens",

and the unions were maintaining that "there must be no going back on the main gain in our society of the right to work for all, guaranteed by the constitution".

The unions called on the government for annual agreements on social and economic problems in the country, the creation of a minimum wage and compensation for price increases.

It said the government should seek a "mandate of the people's confidence" before reforms were launched.

President Mikhail Gorbachev's spokesman, Arkady Maslennikov, said on Monday that the Soviet leadership had decided to make social protection a priority of reforms due to take effect on January 1.

In the Soviet Union, "on the basis of sociological reports, the population is ready to queue, to accept ration cards, but is not ready to accept price increases", Mr. Gorbachev's economic adviser Nikolai Petrakov said in an interview with the daily Rabochaya Tribuna.

He said that "only 30 per cent of people favour the rules of the market and are ready to accept higher prices on condition that the shops be full".

He said that "the opposition of the people to the market is so deep that it results in charges against co-operatives (private enterprise) to such an extent that the government has adopted measures limiting the activities of co-operatives under pressure from the population".

The official unions, "beaten by miners' strikes last summer, now want to re-build their political capital through social and economic demagogy," he

said.

Obstruction to the introduction of the market now came not from the ministerial apparatus but from "politicians who play on the state of mind of the masses", he said.

#90114d9490 04/24/1990 ~French/German News Agency

CAPE TOWN (APRIL 24) - The present downturn in the South African economy has been weathered better than the previous one in the mid-1980's, Finance Minister Barend du Plessis said Tuesday.

Speaking in parliament here, Mr. Du Plessis said that because the private sector was better geared to the required stabilisation measures, the unavoidable toll of the downswing had been much lighter.

"One could say that confidence has continued so high through 1989 and into 1990 that the cooling down measures have taken some time to bite."

The positive results of the measures taken were now being seen in the form of a "soft landing" and the foundation was being laid for a new period of economic growth, he said.

The sacrifices involved in the process of consolidation -- high interest rates, retrenchments and insolvencies -- were bearing fruit for the common good, Mr. Du Plessis said.

Turning to the country's performance internationally, he said imports in the second half of 1989 had dropped but the volume of exports had increased by more than 17 percent.

The result was that the income on current account of the balance of payments had improved during this period by 5.8 billion rands (2.18 billion dollars).

Present information indicated a further surplus on current account apparently occurred in the first quarter of 1990.

He said a net outflow of 5.6 billion rands (2.11 billion dollars) was shown on the capital account in 1989, which was considerably lower than the 6.5 billion rands (2.45 billion dollars) recorded in 1988.

Despite the lower outflow, the net capital outflow was larger than the surplus on the current account.

Net gold and other foreign reserves thus decreased in 1989 by 1.5 billion rands (566 million dollars), which, he said, indicated the necessity to keep the economy in a cooling down mode for the time being.

#90114d9510 04/24/1990 ~French/German News Agency
MANAGUA (APRIL 24) - While Nicaragua's leftist government Tuesday was gearing up for a peaceful transfer of power, a heated debate was raging within President-elect Violeta Chamorro's coalition over the latest concessions made to the Sandinista leaders.

On Wednesday, outgoing President Daniel Ortega was to formally relinquish power to Mrs. Chamorro following her surprise victory in the February 25 polls, which spelled an end to the Sandinista National Liberation Front's (FSLN) 10-year rule.

U.S. Vice President Dan Quayle will be in Managua on Wednesday to attend Mrs. Chamorro's inauguration and voice his government's support of the UNO administration.

(U.S. officials said Tuesday that President George Bush would use his emergency powers to authorize 2.6 million dollars in medical aid for Nicaragua on Wednesday as a show of support for Mrs. Chamorro. A 300 million dollar aid package was pending in Congress.)

But on the eve of the historic transition, the incoming National Opposition Union (UNO) remained divided over the March 27 agreement between Mrs. Chamorro and the Sandinista administration.

UNO hardliners headed by Vice President-elect Virgilio Godoy strongly objected to the Sandinistas retaining control of the armed forces and the police, both run by current Interior Minister Humberto Ortega, the president's brother.

There were also doubts that the U.S.-backed contras rebels would surrender their weapons and disband by June 10, in compliance with the cease-fire and demobilization agreements they signed here April 26.

Contra leaders continued to demand the resignations of top Sandinista police and military officers.

General Humberto Ortega and the heads of the armed forces and the national police resigned Tuesday as members of the FSLN in a bid to retain their posts, which, under the terms of the March 27 agreement, must remain politically neutral.

Their move renewed concerns that Mrs. Chamorro might ask Humberto Ortega to stay on as commander-in-chief of the armed forces and drew strong objections from Mr. Godoy.

"I don't think their presence, or that of any officer or government official linked to the repression of the past 10 years, is appropriate,"

Mr. Godoy told a local radio station.

In an interview published Tuesday in a Montevideo newspaper, Mrs. Chamorro said Humberto Ortega would not stay on as army commander, adding that she would announce a general amnesty in her inauguration speech.

"What we need here is forgiveness. That's what my heart dictates and that's what we must do," said Mrs. Chamorro, adding that once the contras disarm, the army "will have no choice but to reduce its forces."

She said the troop reduction would be carried out gradually, and that soldiers cut from the ranks would be absorbed by and employed in civil society.

Squabbles within Mrs. Chamorro's 13-party coalition also focused on the chair of the 90-seat National Assembly, of which the Sandinista opposition will control 39 seats.

With 28 legislators backing her, conservative leader Miriam Arguello was chosen as chairwoman last week over Social Democrat Alfredo Cesar, one of Mrs. Chamorro's closest aides.

The Arguello nomination was subject to confirmation by the assembly with a vote scheduled late Tuesday.

Observers pointed out that even in the best of cases, UNO legislators will need the support of at least nine Sandinista collegues to pass much needed constitutional reforms with the required two-thirds majority.

GENEVA (APRIL 24) - Kazem Rajavi, representative of the People's Mujahedin of Iran resistance movement in Switzerland, was shot and killed Tuesday on a street in Coppet, near Geneva, Swiss police said.

While driving to his home in nearby Tannay on Lake Geneva, Kazem Rajavi was stopped by another car. One of two persons in the car opened fire on the 56-year-old Rajavi, killing him.

Swiss police in Lausanne said they were unable to give any details as to the killers or their motive.

Rajavi had commented critically on Iran's human rights policy, most recently in January. He was said to have received death threats on several occasions.

Kazem's brother Massoud Rajavi, who is the leader of the People's Mujahedin of Iran and lives in Baghdad, issued a statement blaming the Teheran regime for the slaying.

He said the Iranian embassy in Switzerland, acting on instructions from President Alki Akbar Hashemi Rafsanjani, carried out the crime and demanded that the Swiss government arrest and punish the killers.

Massoud Rajavi said the assassination of his brother was a consequence of the ''hideous and treacherous report'' on the human rights situation in Iran compiled earlier this year by U.N. Special Representative Galindo Pohl.

#90114d9660 04/24/1990 ~French/German News Agency
PARIS (APRIL 24) - British Foreign Secretary Douglas Hurd Tuesday affirmed his government's reticence on European political union, backing "institutional improvements" of the European Economic Community over a second inter-governmental meeting.

His speech here, made in French at the Foundation of Political Sciences, came after President Francois Mitterrand and West German Chancellor Helmut Kohl jointly urged a review of EEC institutions last week to speed up political union. Their initiative is to be discussed at the EEC summit Saturday.

"We are sceptical about the timing, given the risks of division and the immense importance of success in the tasks we are already tackling", Mr. Hurd said, adding that Britain was nevertheless ready to "join actively in the tasks and contribute our own ideas on the future development" of EEC institutions.

"We would, however, be reluctant to pre-empt the debate by deciding in advance that there must be a second inter-government conference and ... amendment" of the 1957 Treaty of Rome that created the EEC, he cautioned.

Mr. Hurd, stressing that the British felt "a certain unease if the aspirations leap too far ahead of the achieved facts", said the 12-nation EEC should fully analyze "in the normal Council machinery, ... what institutional improvements might indeed make for greater efficiency".

He proposed greater powers for the European Commission, the EEC's executive branch, and the Luxemburg-based Court of Justice to ensure that decisions, notably referring to the 1993 single market, be carried out properly.

But Britain was "deeply sceptical" about proposals for greater centralisation within the Community", he said.

"I do not find persuasive the argument that we must accelerate the pace of political integration in the Community" because of the recent upheavals in the former communist bloc, he added.

Mr. Hurd said the North Atlantic Treaty Organization continued to be the cornerstone of western defense despite these changes.

But he acknowledged that it had to be considered "how to adapt the doctrines of flexible response and forward defence to the likelihood of much lower force levels in Europe in the future".

Calling Franco-British cooperation in bringing about a new Europe fundamental, Mr. Hurd said he was hoping for security arrangements in which France could participate fully.

France, while remaining a NATO member, withdrew from the alliance's military command in 1966.

U.S. STUDYING REPORTS OF IRAQI MISSILE TESTING SITE

WASHINGTON (APRIL 24) - The U.S. government is studying reports that Iraq is planning to set up a test facility for long range missiles in Mauritania, State Department Spokeswoman Margaret Tutwiler said Tuesday.

The U.S. was concerned over the prospect because of the proliferation of missiles in the Middle East and because the technology was being introduced in West Africa.

Tutwiler said the U.S. was in contact with its allies over the reports, which have not been confirmed.

According to the New York Times, Mauritanian government officials have rejected the reports said to be based on intelligence findings.

It was thought possible in Washington that Iraq may have sought permission to hold missile tests in Mauritania but was turned down.

In 1989, Iraq announced it had developed a missile with a range of 1,800 kilometres. The country lacks a testing range however.

BERLIN (APRIL 22) - East German Prime Minister Lothar de Maiziere is to hold talks with Soviet President Mikhail Gorbachev during a two-day visit to Moscow starting Saturday, a government spokesman said here Tuesday.

Mr. de Maiziere, who became East Germany's first non-communist premier on April 12, was invited by the Soviet leader, ADN news agency quoted government spokesman Mathias Gehler as saying.

The Moscow trip comes after Mr. de Maiziere's first official visit to West Germany Tuesday during which he agreed to a West German draft project introducing the Deutsche mark in East Germany on July 2.

Mr. de Maiziere will go to Moscow accompanied by the minister for foreign affairs, economics and disarmament an defense, Markus Meckel, Gerhard Pohl and Rainer Eppelmann.

Mr. Gorbachev and the East German premier will meet early Sunday, according to ADN.

VINELAND, NJ (APRIL 23) PR NEWSWIRE - Disposable diapers that carry the seeds of their own destruction may soon enable Americans to couple ecology with convenience.

New Hampshire-based Micro Vesicular Systems, Inc., a majority-owned subsidiary of IGI, Inc. (AMEX: IGI), headquartered here, has received a U.S. Patent Office Notice of Allowance for a biodegradable diaper which, unlike others, doesn't require sunlight to decompose.

The diaper's decay is activated by moisture only, using specially encapsulated enzymes in enhancer granules and cellulosic materials that are naturally biodegradable.

The diaper could play a key role in muting growing public pressure to ban

disposable diapers, a $3.3 billion U.S. industry.

A recent national survey by pollsters Robert Teeter and Peter Hart revealed that 74 percent of American voters would like throw-away diapers banned despite their convenience. Fifty-six percent of parents with children under age three agree with a ban, according to the survey, which was sponsored by NBC News and The Wall Street Journal.

The keys to IGI's new diaper design are (1) use of only cellulosic, or other environmentally sound materials, for the structural components of the diaper -- the fluff and superabsorber, as well as the inner and outer liners; and (2) incorporation into the diaper of enhancer granules that degrade the diaper material. The diaper preferably uses a biodegradable superabsorber, made by IGI's subsidiary, to obtain total biodegradability.

The enhancers contain catalysts that promote the degradation process, says a company spokesman. "The diaper contains its own means of destruction and will start to degrade within hours of use."

What's more, company officials say the diaper's enhancer granules can migrate to adjacent cellulosic materials in a landfill, stimulating their degradation.

Industry sources estimate that 18 billion diapers enter U.S. garbage dumping grounds each year, the equivalent of 2 million per hour, each day of the year.

IGI said it has no plans to make or market the diapers, choosing to rely instead on the resources of leading disposable diaper marketers or other companies with suitable capability.

CONTACT: Michael Dodge of IGI, 609-691-2411, or Thomas Redington of Redington, Inc., 203-222-7399 or 212-926-1733, for IGI.

#90114p6323 04/24/1990 ~PR Newswire

SEATTLE (APRIL 24) PR NEWSWIRE - The Rainier Brewing Co. of Seattle today announced it will counter the national trend and begin refilling all of its single-serving beer bottles.

In a move that is applauded by the state's leading environmental officer, Rainier becomes the only Pacific Northwest brewery to offer the once-common and now nearly extinct practice of bottle refilling.

Rainier believes it may be the only major brewer in the United States to be refilling its full line and offering the service to consumers who buy beer in stores. Most bottles are non-returnable and only a few brewers

even refill tavern bottles.

The announcement came less than a week after Gov. Booth Gardner bestowed Rainier with Washington state's business and industry 1990 Environmental Excellence Award for the brewer's recylcing efforts.

Rainier has refilled bottles since its founding in 1878; however competition and industry trends in recent years had caused the brewery to not refill some of its newer bottle styles and to slow down its overall refilling program.

The brewery has backed its bottle-refilling effort with $300,000 in capital improvements, new recyclable corrugated packaging, environmental messages in each carton, a cash-back system for bottle return, and recycling messages in its advertising.

Christine Gregoire, director of the Washington State Department of Ecology applauded the move. "The highest form of resource conservation is the reuse of materials. Programs like these set important standards for others to follow. I think it's great," she said.

Rainier's environmental program also includes annual recycling of 3,000 tons of aluminum cans, 600 tons of corrugated cardboard and wastepaper, and 18 million pounds of spent grains and yeast. The latter, a byproduct of the brewing process, are used as a feed supplement for dairy livestock.

Rainier is joined in its refilling program by its sister brewery, the Blitz-Weinhard Brewing Co. in Portland, Ore. Both breweries are owned by the G. Heileman Brewing Co. of La Crosse, Wis.

Rainier launched its well-known recycling program in 1971, when it became the first Northwest brewer to introduce all-aluminum beer cans.

SAN DIEGO (APRIL 24) PR NEWSWIRE - GTI Corp. (AMEX: GTI) today announced confirmation of a purchase agreement with IBM (NYSE: IBM) to supply amzirc connector pins for the manufacture of ceramic substrates, a component used in memory products such as mainframes, typewriters, word processors and copiers. The purchase agreement represents a significant percentage of IBM's amzirc pin requirements.

Commenting on the agreement, Gary L. Luick, president and chief operating officer said, "To the best of our knowledge, GTI is one of only two

qualified suppliers of amzirc pins worldwide and we are pleased that IBM has selected us to supply this product." Luick further stated, "The agreement will provide GTI and our Electronics Group with a meaningful opportunity for additional future growth and profitability."

GTI Corp. is a multi-plant distributor and manufacturer of electronic components, circuit boards and electronic component processing equipment for the automotive, instrumentation, industrial, electronics and computer industries.

HARRINGTON PARK, NJ (APRIL 24) PR NEWSWIRE - Officials of United Water Resources (NYSE: UWR), NUI Corporation (NYSE: NUI), and Pennsylvania Enterprises, Inc. (NASDAQ: PENT) announced today the execution of definitive agreements providing for the merger of Pennsylvania Enterprises Inc. (PEI) and Pennsylvania Gas & Water Company (PG&W), a wholly owned subsidiary of PEI, into NUI and the purchase by United Water of the water operations and related assets of PEI.

The merger agreement between NUI and PEI provides for stockholders of PEI to receive from NUI $52.05 for each share of PEI common stock. Forty percent of the aggregate purchase price will be payable in cash and the remaining 60 percent in shares of NUI common stock, valued at the average price over 20 trading days prior to the merger. In no event will PEI stockholders receive more than 3.0 shares or fewer than 2.6 shares for each full share of PEI common stock exchanged for NUI common stock. The consummation of the transactions contemplated by the merger agreement is

conditioned on the expiration of the waiting period under the Federal antitrust laws, receipt of regulatory approvals, PEI, PG&W and NUI stockholder approvals, the consummation of the sale of the water operations and related assets of PEI to United Water, and certain other conditions.

The asset purchase agreement provides for the acquisition by United Water of the water operations and related assets of PEI for approximately $220 million, subject to adjustment for several factors, including among others the level of expenditures associated with the construction program currently under way by PEI. The consummation of the transactions contemplated by the asset purchase agreement is conditioned upon expiration of the waiting period under Federal antitrust laws, receipt of regulatory approvals, satisfaction or waiver of the conditions to the Merger Agreement, PEI and PG&W stockholder approval and certain other conditions, including possible United Water stockholder approval.

United Water has the right to terminate the asset purchase agreement until June 7, 1990, if it determines that a recently filed purported class action against PG&W (which seeks damages for costs incurred by PG&W's customers for reasons related to water quality) will materially adversely affect PG&W's water business.

PG&W provides water service to a population of about 425,000 in northeastern Pennsylvania, including the cities of Scranton and Wilkes-Barre. With 129,000 customer accounts, PG&W ranks 11th among investor-owned water companies in the nation in number of customers served. The acquisition would add 56 percent to United Water's utility customer base.

CONTACT: Martha Green of United Water Resources, 201-784-9434, evenings: 201-487-0011; or David Vincent of NUI Corporation, 201-781-0500; or Tom Ward of Pennsylvania Enterprises, 717-829-8812.

DARIEN, CT (APRIL 24) PR NEWSWIRE - EXECUTONE Information Systems, Inc. (NASDAQ: XTON) announces the signing of an agreement with Bell Atlantic (NYSE: BEL) to sell Centrex services through EXECUTONE's offices in Philadelphia, Pittsburgh, Baltimore, and Fairfax, Richmond and Virginia Beach, Va. The agreement, which runs through 1990, enables EXECUTONE to provide Centrex or network services such as WATS, digital data service, access to the public data network and T1 transmission service.

Bell Atlantic Vice President of Marketing Bruce Gordon noted, "By using a network of distributors, Bell Atlantic will increase its revenue and market share by making products and services easier for our customers to obtain."

"We're very excited about this development. At EXECUTONE, we have always prided ourselves on our ability to provide our customers with tools to help them run their businesses both efficiently and profitably. This agreement is one more very significant way in which we can better serve our customers," stated Eric Erickson, EXECUTONE regional manager.

EXECUTONE Information Systems Inc. designs, manufactures, sells, installs and services voice and data communications equipment for businesses with under 300 desktops and is the leading supplier of specialized hospital communications equipment. Products are sold under the EXECUTONE(R), ISOETEC(R) and INFOSTAR(TM) brand names through a nationwide network of company- owned direct sales and service offices and independent distributors.

#90114p6333 04/24/1990 ~PR Newswire

FULLERTON, CA (APRIL 24) PR NEWSWIRE - Wynn's International Inc. (NYSE: WN) reported today net income of $1,752,000 or $.45 per share in the 1990 first quarter as compared to $3,208,000 or $.84 per share in the first quarter of 1989. The 1989 first quarter results included a nonrecurring gain of $1,375,000 (net of tax) or $.36 per share from the sale of a joint venture interest.

Net sales for the quarter ended March 31, 1990 were $72,544,000, down less than 1 percent from $73,176,000 in the first quarter of 1989.

Wynn's Climate Systems Inc. (WCS), which designs and manufactures automotive air conditioning systems, experienced a 16 percent decrease in sales during the first quarter, as compared with the first quarter of last year. This expected decline in sales was due principally to reduced sales to Chrysler, Isuzu and independent Hyundai dealers. Sales to Mazda increased in the first quarter of 1990 compared to the same period in 1989. WCS was able to post a slight profit in the first quarter of 1990 despite the lower revenues.

Wynn Oil Company, the petrochemical specialties division, recorded a 24 percent increase in sales and a 25 percent increase in operating profit compared to the same quarter in the prior year. Domestic operations of this division continued to improve during the quarter with pretax results improving by 22 percent on a slight revenue increase. Foreign operations were exceptionally strong with a 36 percent growth in revenues and 17 percent increase in pretax compared to the first quarter of 1989. Excluding the effect of exchange rate fluctuations, growth in foreign revenues and earnings were 34 percent and 11 percent respectively. The

1990 figures include the results of the two recently acquired companies in France.

Wynn's-Precision Inc. (Precision), a key supplier of sealing products recorded a 2 percent increase in sales and a 7 percent increase in operating profit in the first quarter compared to the first quarter of 1989. The percentage increase in pretax earnings for the first quarter exceeded the percentage increase in sales due primarily to improved gross margins. Precision plans to open a new production facility in the United Kingdom to serve its growing European customer base.

Wynn's International Inc., founded in 1939, is a worldwide supplier of automotive air conditioners, O-rings, seals, molded rubber products, petrochemical specialties products and builders hardware. The company has 2,017 employees and is headquartered at 2600 E. Nutwood Ave., Fullerton, Calif., 92631, telephone: 714-992-2000.

HOUSTON (APRIL 24) PR NEWSWIRE - Microsoft Corporation (NASDAQ: MSFT) and Compaq Computer Corporation (NYSE: CPQ) announced today that Microsoft will supply Microsoft LAN Manager to computer resellers, including selected COMPAQ dealers. Both companies will continue to work together in a broad range of joint marketing, support, training and development activities. Under Microsoft's new Network Specialist Program, Microsoft will become a primary provider of networking software products to computer resellers.

Microsoft and Compaq worked together to develop full support in LAN Manager 2.0 for COMPAQ 386- and 486-based personal computers. LAN Manager takes advantage of COMPAQ SYSTEMPRO multiple processors, intelligent disk drive arrays and 32-bit network interface controllers, eliminating the need for Compaq to distribute its own previously announced version of COMPAQ LAN MANAGER 386/486.

Steve Ballmer, senior vice president of Systems Software at Microsoft, said a Microsoft-supplied version of LAN Manager will simplify marketing for both companies and provide more synergy in marketing and development efforts.

Microsoft will authorize selected COMPAQ resellers to become Microsoft Authorized Network Specialists. Microsoft and Compaq will provide training and product support for the Network Specialists.

Microsoft support personnel will receive Compaq training on the COMPAQ SYSTEMPRO; Compaq personnel will receive Microsoft training on LAN Manager. Both companies' support personnel will assist Authorized COMPAQ Computer Dealers in integrating COMPAQ networking hardware, such as the COMPAQ SYSTEMPRO, and LAN Manager. Calls will be routed to technical experts within both companies to achieve this. Both companies expect these support practices to be implemented for all relevant future products.

Microsoft Corporation (NASDAQ:MSFT) develops, markets and supports a wide range of software for business and professional use, including operating systems, languages and application programs, as well as books, CD-ROM products and hardware for the microcomputer marketplace.

Compaq Computer Corporation (NYSE:CPQ) is a world leader in the manufacture of PC systems and desktop, portable and laptop personal computers.

#90114p6339 04/24/1990 ~PR Newswire

NILES, OH (APRIL 24) PR NEWSWIRE - RMI Titanium Co. (NYSE: RTI), a leading integrated producer of titanium metal products, is making its first earnings release as a publicly traded company.

An initial public offering of the 7.5 million shares of the company's common stock held by Quantum Chemical Corp. (NYSE: CUE) was consummated on April 20, 1990. Prior to the offering, RMI was operated as a 50/50 partnership of Quantum Chemical Corp. and USX Corp. (NYSE: X). USX has retained its 7.5 million shares of RMI Titanium Co. common stock.

RMI Titanium Co. today announced significantly improved first quarter 1990 partnership income of $9.2 million on net sales of $68.0 million. Results for the same quarter in 1989 showed partnership income of $7.2 million on net sales of $58.5 million.

Pro forma net income for the first quarter 1990 was $8.5 million and net income per common share was $0.57. Pro forma net income and net income per common share for the comparable 1989 period were $6.0 million and $0.40, respectively.

Net sales and partnership income for the first quarter of 1990 increased by 16.2 percent and 28.8 percent, respectively, compared to the results

reported for the three months ended March 31, 1989. Operating income increased from $7.9 million in the first three months in 1989 to $10.5 million in 1990, an increase of $2.6 million, or 33 percent.

Improved mill product shipment levels combined with increased average selling prices on mill products are primarily responsible for these improved results, reflecting an increased demand for the company's products in all of its major markets.

RMI manufactures products that are used principally in the aerospace industry in commercial and military aircraft with major nonaerospace applications in chemical processing equipment, mesh for bridge and deck repair, pulp and paper production facilities and medical implants.

#90114p6340 04/24/1990 ~PR Newswire

NEW YORK (APRIL 24) PR NEWSWIRE - RJR Nabisco Holdings Corp. today announced significantly higher business unit contribution and cash flow for the first quarter of 1990, reflecting strong operating performance by the company's tobacco and food businesses.

Operating income in the first quarter increased 50 percent to $602 million from $402 million. Consolidated net sales were $3.20 billion, a 9.5 percent increase from $2.93 billion in the 1989 period.

Cash flow from operations totaled $557 million, including the sale of certain receivables for $327 million. Contributing to the favorable cash flow performance were higher operating earnings as well as ongoing programs to reduce working capital.

The company reported a net loss in the first quarter of 1990 of $222 million after interest and debt expense costs of $830 million.

For the first quarter, the company's worldwide tobacco businesses recorded sales of $1.86 billion, a 15 percent increase from $1.62 billion in 1989. Business unit contribution was $637 million, a 41 percent increase from the $453 million recorded in the first quarter of 1989.

Domestic tobacco oprations achieved higher net sales for the first quarter, due largely to the favorable effects of the decision to eliminate excess trade inventories in the second half of 1989. Business unit contribution was up substantially from 1989 due to the higher net sales and cost reductions realized from restructuring and downsizing in the second half of 1989.

International tobacco operations recorded higher sales, with strong overall unit volume growth in Europe, the Middle East and Asia. Business unit contribution was up sharply due to the volume gains and higher prices offset in part by increased marketing spending.

Food businesses reported first quarter 1990 sales of $1.34 billion, up 3 percent from 1989 despite the loss of sales from certain product lines divested in 1989 and 1990. Business unit contribution increased 18 percent to $141 million from $119 million despite significantly higher marketing spending. Higher prices, productivity savings and volume gains in several key product categories contributed to the earnings improvement.

RJR Nabisco Holdings Corp. is the indirect parent company of RJR Nabisco Inc., an international consumer products company. RJR Nabisco's major operating subsidiaries are R.J. Reynolds Tobacco Co., R.J. Reynolds Tobacco International Inc., Nabisco Brands Inc., and Planters LifeSaver Co.

#90114p6341 04/24/1990 ~PR Newswire

MIDLAND, MI (APRIL 24) PR NEWSWIRE - The Dow Chemical Company (NYSE: DOW) today announced higher sales and lower earnings for the first quarter compared to a year ago.

Sales for the quarter were $4.9 billion, up more than 9 percent from a year ago and is a new quarterly record. Operating income was $897 million down nearly 26 percent from a year ago and up 28 percent from fourth quarter. Net income was $462 million, down 38 percent from a year ago and up 8 percent from the previous quarter. Earnings per share were $1.71, up 8 percent from last quarter and down 37 percent from a year ago.

"The sales increase reflects strong volume gains and the consolidation of recent acquisitions," said Frank Popoff, president and chief executive officer of Dow. "Earnings were impacted by lower prices in some ethylene-based products and by higher feedstock costs."

Volume increased more than 18 percent compared to a year ago, while prices fell nearly 8 percent. Hydrocarbon and energy costs were up nearly 6 percent from a year ago and more than 10 percent from last quarter. The operating rate was 92 percent, matching last year's average.

Sales for Chemicals and Performance Products dropped 8 percent and operating income fell 43 percent from a year ago as a result of higher costs and lower prices for vinyl chloride and ethylene glycol. The supply/demand balance for caustic soda continues to be tight, with prices

increasing during the quarter. Performance products posted an 11-percent sales gain and continued to demonstrate strong profit margins.

Plastics sales slipped 2 percent and operating income was down 42 percent from a year ago due to price declines in polyethylene and polystyrene combined with higher raw material costs. Sales for thermosets and fabricated products both increased during the quarter, again reflecting strong global demand and stable growth of these value- added products.

Sales in the Hydrocarbons and Energy segment increased 11 percent, while operating income fell 89 percent as a result of lower margins on product sales, higher feedstock costs and production lost following the U.S. Gulf Coast freeze.

The Consumer Specialties segment posted a 62-percent gain in sales and a 102-percent increase in operating income. While both agricultural products and pharmaceuticals benefitted from the consolidation of recent acquisitions, the underlying businesses showed strong growth.

#90114p6343 04/24/1990 ~PR Newswire

DALLAS, April 24 /PRNewswire/ -- Grace Energy Corporation (NYSE: GEG) today reported that its first quarter 1990 net income of $5.9 million, or 24 cents per share, increased 6 percent over first quarter 1989 pro forma net income of $5.6 million, or 23 cents per share. Sales and revenues for the 1990 quarter were $114.0 million, up 20 percent from sales and revenues of $95.1 million for the 1989 period.

Results for the quarter ended March 31, 1990, included an after-tax dry-hole expense of $1.3 million, which was offset by improvements in the energy services businesses. First quarter results also included net income from a gas contract settlement of $4.3 million after tax, or 17 cents per share, compared to contract settlements of $4.6 million after tax, or 19 cents per share, in 1989.

First quarter 1990 operating profit from energy services was $5.0 million, compared to an operating loss of $3.8 million for the 1989 first quarter. Results for 1990 reflect a higher level of onshore and offshore drilling activity, an increase in the number of active workover rigs and the performance of three jackup drilling rigs added to Grace Offshore's fleet in January 1989. Grace Drilling benefited from a higher average onshore rig utilization rate (35.5 percent in 1990 vs. 29.0 percent in 1989) and improved margins.

Beginning in 1990, Grace Drilling's losses are no longer being partially

absorbed by the minority ownership but are being borne entirely by Grace Energy. In the first quarter of 1989, Grace Energy was able to allocate $3.9 million of Grace Drilling losses to the minority interest.

Grace Energy Corporation, headquartered in Dallas, is a diversified energy holding company whose subsidiaries are engaged in supplying services and equipment to the petroleum industry; in the exploration for and development of oil and natural gas; and in coal mining.

#90114p6344 04/24/1990 ~PR Newswire

FORT LAUDERDALE, FL (APRIL 24) PR NEWSWIRE - BLOCKBUSTER Entertainment Corporation (NYSE: BV), the leader of the home video industry, today reported record earnings for its 13th consecutive quarter.

Revenue was $139,150,000 for the three-month period ended March 31, 1990, as compared to $77,009,000 for the same period in 1989, an increase of 81 percent. Systemwide revenue, consisting of revenue generated from company operations and by its franchise owners, was $246,975,000 for the three months ended March 31, 1990 as compared to $126,713,000 for the same period in 1989, an increase of 95 percent.

Net income for the first quarter of 1990 was $13,449,000, compared to $7,389,000 for the same quarter of 1989, an increase of 82 percent. Earnings per share for the first quarter of 1990 were 17 cents, or 70 percent higher than the 10 cents reported for the comparable period in 1989.

All 1989 figures reflect the two-for-one stock split effected in May 1989 and the pooled acquisition of Video Superstore Master Limited Partnership in August 1989.

The results of operations for the three months ended March 31, 1990 include the effect of the company's adoption of a more conservative amortization period for certain videocassettes held for rental. Effective Jan. 1, 1990, new purchases of a certain number of "hit" videocassettes held for rental, namely the top titles released annually, are being amortized over 12 months on an accelerated basis with no salvage value. Previously, these videocassettes were being amortized over three years on an accelerated basis with no salvage value. This change in the amortization period for these videocassettes resulted in a decrease in earnings per share of one cent for the three months ended March 31, 1990.

"The record first quarter results reflect the impressive operating perfomance of company-owned stores," H. Wayne Huizenga, chairman and chief

executive officer, said in announcing the results. "We are looking forward to continued strong performance as the year progresses and more stores are in operation."

As of March 31, 1990, there were 1,185 stores in the BLOCKBUSTER system, of which 592 were company-owned. Stores are located in 133 markets in 43 states, Canada, the United Kingdom, Guam and Puerto Rico.

#90114p6346 04/24/1990 ~PR Newswire

ATLANTA (APRIL 24) PR NEWSWIRE - Telecom USA Inc. (NYSE: TTT) today reported revenue and earnings for the quarter ended March 31.

The telecommunications company reported quarterly revenue of $209.9 million, a 30 percent increase over 1989 first quarter revenue of $161.9 million.

Net income for the quarter was $8.6 million, compared with net income of $9.2 million for the first quarter of 1989. Earnings per share were $.30 vs. $.32 for the same period in 1989. Net income and earnings per share comparisons were negatively impacted by an increase in the company's effective tax rate from 36 percent in the first quarter of 1989 to 41 percent in the current quarter.

As previously announced, Telecom USA revenue and earnings in the second half of 1989 were negatively impacted by several factors including: the effect of Hurricane Hugo on the company's large South Carolina customer base, conversion and closing costs from acquisitions, increased use of volume discount services, and product development costs. The company had previously indicated that it expected these factors to have a lingering but declining effect upon its results during the first half of 1990.

On March 23, Telecom USA announced the signing of a letter of intent under which Rochester Telephone Co. would acquire Southland Telephone Co., the Atmore, Ala.-based subsidiary of Telecom USA. The company currently expects that transaction to be completed during the second quarter of 1990 in the absence of any regulatory delay.

On April 9, MCI Communications Corp. (NASDAQ: MCIC) and Telecom USA announced the signing of a definitive agreement under which MCI will acquire all outstanding shares of Telecom USA's common stock for cash at a price of $42 per share. The two companies' boards of directors have approved the transaction, which is subject to Telecom USA shareholder approval and applicable regulatory approvals. It is expected to be

concluded as expeditiously as possible.

Telecom USA, the nation's fourth-largest long distance company, provides a wide range of long distance products to over 500,000 customers throughout the country. Headquartered in Atlanta, the company is publicly traded on the New York Stock Exchange under the symbol "TTT."

TORRANCE, CA (APRIL 24) PR NEWSWIRE - International Technology Corp. (NYSE: ITX) announced today that it has executed an agreement with an asset-based lender which provides a commitment for a $25 million five-year fixed rate loan, secured by two of IT's Hybrid's Thermal Treatment System (R) 1/8HTTS(R)3/8 units. The commitment extends to June 30, 1990. The company's option to fund the loan is conditioned upon IT obtaining approval from the U.S. Environmental Protection Agency of its trial burn plan for the use of the two HTTS units at the MOTCO Superfund site in LaMarque, Texas.

"Financing of our HTTS equipment requirements provides the company with the ability to expand our major remediation project activity," said Murray H. Hutchison, chairman and chief executive officer. "The funding of this loan coupled with the recent expansion of our bank credit facility will provide the company with significant liquidity for the expansion of our business."

International Technology Corp., based in Torrance, is a leading environmental management company providing services to government and industry. The company's common stock is traded on the New York Stock Exchange under the symbol ITX.

PASADENA, CA (APRIL 24) PR NEWSWIRE - Jacobs Engineering Group Inc. (NYSE: JEC) today announced it has been selected to provide technical services in support of the U.S. Air Force Occupational and Environmental Health Laboratory (USAFOEHL) to evaluate hazardous and toxic waste sites in and around government installations worldwide.

Maximum contract value is $50 million. The five-year contract will be

administered from Wright-Patterson Air Force Base in Ohio.

Depending on contract negotiations and specific task order assignments, Jacobs will provide services including collection and analysis of water, soil, and sediment samples; geologic, geotechnical, and hydrogeologic investigations; evaluation of water, wastewater, and solid waste treatment systems. Also included will be support of environmental assessment and permitting efforts.

"We recognize this as a tremendous opportunity to further help in finding real solutions to the environmental problems our nation faces in the coming year," stated Roger Williams, Jacobs senior vice president, environmental.

Jacobs Engineering Group Inc. provides single-source environmental and hazardous waste management, consulting, engineering, design, architectural construction, construction management, contract maintenance, and operations services to government and industry worldwide.

#90114p6368 04/24/1990 ~PR Newswire

MINNEAPOLIS (APRIL 24) PR NEWSWIRE - Control Data Corporation (NYSE: CDA) today reported first quarter 1990 net earnings of $6.8 million, or $.16 per share, on revenues of $421.6 million. Net earnings included an after-tax restructuring gain of $5.8 million, primarily from the sale of a facility.

In the same quarter in 1989, Control Data reported net earnings of $3.5 million, or $.08 per share, on revenues of $843.5 million. Results in that period included an after-tax restructuring gain of $14.5 million, mainly from the sale of several international Control Data Institutes.

Excluding restructuring, first quarter 1990 results reflect earnings before taxes and interest expense of $16.0 million, compared to earnings of $3.5 million in the same period in 1989, which included a $10.7 million favorable international litigation settlement. The decline in quarterly revenues from 1989 resulted primarily from the sale or discontinuance of several operating units, most notably the Imprimis disk drive subsidiary and the third party maintenance business.

"Apart from restructuring gains and charges, Control Data has now been profitable for three consecutive quarters," said Lawrence Perlman, president and chief executive officer. "Although the first quarter traditionally has not been a strong one for Control Data, earnings were

stronger in several businesses than we had anticipated. Business Management Services sustained its revenue and earnings growth, and Computer Products continued to make progress.

"We are increasingly confident that Control Data's momentum will continue to build in 1990," Perlman said. "The degree of our success largely depends on how strongly the company performs in the second half of the year.

"Control Data further strengthened its cash position in the first quarter, primarily from the proceeds of asset sales. The company has ample cash resources to finance ongoing operations and fund restructuring payments throughout 1990."

Control Data is a provider of data solutions that integrate hardware, software and services to meet customers' complex data collection, processing and communications needs. Its businesses include the Arbitron Company, Automated Wagering, Business Management Services, Computer Products, Data Services, Empros Systems International, Government systems and Micrognosis.

#90114p6369 04/24/1990 ~PR Newswire

LOS ANGELES (APRIL 24) PR NEWSWIRE - Times Mirror (NYSE: TMC) announced today that revenues for the first quarter of 1990 increased 3.3 percent to $875.2 million from $846.9 million in the comparable quarter of 1989. Net income totalled $46.0 million, or 36 cents per share, compared with $68.8 million, or 53 cents per share, in the same period a year ago.

The company's operating profit in the first quarter of 1990 declined to $94.2 million from $129.6 million in last year's first quarter, primarily due to continued softness in advertising demand that has affected newspaper publishing operations in the Northeast, consumer magazines and broadcast television operations. Higher costs at the Los Angeles Times stemming from increased circulation and promotional efforts also contributed to the decline.

Circulation averages for the six months ending March 31, 1990, as reported by Times Mirror to the Audit Bureau of Circulations, showed that daily circulation for the entire newspaper group increased by 4.1 percent and Sunday circulation rose 3.2 percent.

At the Los Angeles Times, daily circulation averages over the six-month period rose 8.1 percent to 1,210,077, an increase of 90,237. Sunday circulation grew 5.7 percent to 1,504,540, an increase of 81,230. Average

figures for the three-month period ending March 31 more accurately reflect the Times' current reach because they indicate how much circulation has grown since the Herald Examiner closed in November 1989. The three-month figures show a 9.5 percent rise in daily circulation to 1,225,189, and a 5.6 percent improvement in Sunday circulation to 1,514,096.

Of the total six-month averages reported by Newsday, New York Newsday achieved 11.6 percent growth in daily circulation, adding 22,680 for a total of 217,514. In the comparatively smaller market of Hartford, Connecticut, The Hartford Courant reported a 2.2 percent increase in daily circulation, climbing to 230,358.

Times Mirror is a Los Angeles-based media and information company. It publishes the Los Angeles Times, Newsday and New York Newsday, the Baltimore Sun newspapers, The Hartford Courant, The Morning Call, The (Stamford) Advocate and Greenwich Time. The company also has interests in broadcast and cable television, and book, magazine and other publishing. Times Mirror stock is listed on the New York and Pacific stock exchanges, and traded under the symbol TMC.

ATLANTA (APRIL 24) PR NEWSWIRE - Thomas W. Crawford, president and chief executive officer of Southern Heritage Insurance Co. today announced unaudited results for the first quarter ended March 31.

The three month period ending March 31 produced a net profit of $65,000 or 2 cents per share. The results for the same period in 1989 were net profits of $175,000 or 7 cents per share.

Crawford indicated that the severe storms that occurred in Georgia and Alabama during February affected the company's earnings for the first quarter by approximately $175,000. He indicated that despite the unusual storm activity, he remains pleased with the company's growth and future.

#90114p6376 04/24/1990 ~PR Newswire

FREMONT, MI (APRIL 24) PR NEWSWIRE - After nearly 80 years, public tours of the original Gerber baby food plant in Fremont will be replaced by a new visitor program featuring an entertaining 3-D movie that depicts a day in the life of an infant.

Approximately 15,000 people annually tour the company's manufacturing facility. The final day for public tours of the baby food plant will be May 4.

Gerber will replace the plant tour with a program designed to attract a comparable number of tourists and avoid any adverse economic impact that loss of the tours could have upon this tiny West Michigan community of 3,500 people.

"Our challenge was to create an innovative replacement for the plant tours. After thorough consideration, we determined a 3-D movie, based upon a family theme, could provide an unusual, entertaining vehicle and be special enough to draw visitors to Fremont," said Gerber spokesman Steve Poole. The change in the tour program follows Gerber's introduction of several innovative products in recent years and the installation of proprietary equipment to produce or package those products.

"Plant tours have become increasingly more difficult to conduct, because we no longer have adequate space to present an informative tour while assuring the safety of our visitors," added Poole.

To accommodate the construction of a 60-seat 3-D theater, the Gerber Visitor Center will be closed for renovation May 4, 1990, with plans to re-open Labor Day weekend, 1990.

Introduced in the 1950s, 3-D movies recently achieved technological advances that are expected to create a strong impact on the entertainment industry in the 1990s. According to Poole, Gerber Products Company (NYSE: GEB) is the only company in Michigan to produce such a movie for general public viewing.

Gerber Products Company is the leading U.S. manufacturer of baby food, with approximately 70 percent of the domestic baby food market. Company sales exceeded $1 billion in fiscal 1989.

DAYTON, OH (APRIL 24) PR NEWSWIRE - Mead Corporation (NYSE: MEA) announced today that Charles W. Joiner, Jr., president of Mead Imaging, has been appointed to the newly created position of vice president and assistant to the president of the corporation. Joiner's successor will be Jack C. Goldfrank, who is presently with Eastman Kodak (NYSE: EK) but worked for Mead as senior vice president of operations of Mead Systems division before it was sold to Kodak in 1982.

"Charlie and I are both delighted that Jack Goldfrank will be returning to Mead to accept this important responsibility," said Steven C. Mason, Mead president and chief operating officer.

According to Mason, Joiner will continue to work to support Mead's relationships with Mead Imaging's hardware producing partners. The move will also permit Joiner to pursue his interest in the field of organization and leadership development, about which he published a book in 1986.

"Mead Imaging has made great progress under Charlie's leadership and will be announcing its new second generation color imaging materials in the near future," Mason said.

Goldfrank's current position at Kodak is director, strategic planning, for the Printer Products Division. He had previously been senior vice president of operations of Diconix, Inc., a Kodak subsidiary specializing in ink jet and thermal printing technologies. He will assume his new position on May 7.

Mead Imaging develops and markets Cycolor products, used in Mead's proprietary color imaging technology.

WALTHAM, MA (APRIL 24) PR NEWSWIRE - Thermo Instrument Systems Inc. (AMEX: THI) announced today that it has signed a Memorandum of Understanding for the acquisition of Finnigan Corporation (NASDAQ: FNNG). Under the proposed terms, Thermo Instrument would acquire Finnigan for $20 in cash per share of Finnigan's common stock. Consummation of the proposed acquisition is subject to several conditions, including the completion of due diligence reviews, approval by the board of directors for each company, the execution of a definitive acquisition agreement, and

receipt of regulatory and other approvals.

Finnigan is the world's leading manufacturer of mass spectrometers. Its products, sold under the trade name Finnigan MAT, are used in industrial, analytical, service, university and government research laboratories. Applications include analysis for pharmaceuticals, foods, chemicals, petrochemicals, and environmental, health, and forensic science. Based in San Jose, Calif., the company has manufacturing facilities there as well as in the United Kingdom and West Germany.

Thermo Instrument Systems develops, manufactures and markets analytical instruments used to detect and monitor air pollution, radioactivity, complex chemical compounds, and toxic metals and other elements in a broad range of liquids and solids. The company also provides environmental science and engineering services, laboratory-based testing, and nuclear health physics services. Thermo Instrument Systems is a public subsidiary of Thermo Electron Corporation (NYSE: TMO).

DETROIT (APRIL 24) PR NEWSWIRE - Ford Motor Company (NYSE: F) today announced prices of the all-new Mercury Capri 2+2 convertible, which goes on sale at Lincoln-Mercury dealerships this summer.

The front-wheel-drive Capri will have a manufacturer's suggested retail price of $12,588. Included in the price are a driver air bag supplemental restraint system, a 100-horsepower 1.6-liter double overhead cam (DOHC) 16-valve, four-cylinder engine, five-speed manual transmission, power steering, power four-wheel disc brakes, steel-belted radial tries, tinted glass, power windows, reclining cloth bucket seats, a folding rear seatback for easy trunk access, interval windshield wipers, dual remote control rearview mirrors, and AM/FM stereo radio.

The Capri will have a Preferred Equipment Package of options including air conditioning, power door locks, and aluminum wheels -- a $1,338 value when ordered separately -- for $838, which is a $500 discount.

The high-performance Capri XR2 model, priced at $15,522, will have all of the standard car's equipment, plus a 132-horsepower turbocharged 1.6-liter double overhead cam (DOHC), 16-valve engine, upgraded sport suspension, air conditioning, fog lights, aluminum wheels, AM/FM cassette system, speed control and power locks.

Among the options offered on the Capri are air conditioning, aluminum

wheels, automatic transaxle (not available on XR2), power door locks, removable hard top with storage rack and cover, built-in rear- window defroster, map lights, and dome light.

Ross H. Roberts, Ford vice president and Lincoln-Mercury Division general manager, said market research indicates that Capri buyers will be 25-35 years old, and that many will be first-time car buyers. He said the car is expected to sell particularly well on the coasts and in metropolitan areas.

"The Capri is designed to be a fun-to-drive car -- a funabout -- but we didn't forget value and versatility," said Roberts. "We believe it will have strong appeal to young professionals who want a car with personality that is also affordable and versatile for everyday use."

BRIDGEPORT, CT (APRIL 24) PR NEWSWIRE - The Hydraulic Company (NYSE: THC) today reported net income for the three months ended March 31, 1990 of $1,377,000, or 29 cents per share, compared with $1,579,000 or 33 cents per share, in the 1989 first quarter.

Revenues were $17,598,000 and $15,663,000 in the 1990 and 1989 first quarters, respectively.

Jack E. McGregor, THC president and chief executive officer, said THC's year-to-date decline in income is attributable to a continued decline in the earnings from THC's water utility segment.

McGregor observed that THC's public water supply subsidiary, Bridgeport Hydraulic Company, is planning in the second quarter to file an application with the Connecticut Department of Public Utility Control for rate relief. He noted that BHC's 1989 7.75 percent rate increase represented less than half of the amount requested, yet has been the only rate relief granted the company since September 1986.

THC is a diversified water management corporation whose core business is public water supply. THC also is engaged in nonutility enterprises through its Hydrocorp, Inc. subsidiary, which is involved in diversified water management services, including analytical testing laboratories; through its Timco, Inc. subsidiary, which has forest products and electricity cogeneration facilities in New Hampshire; and through its Main Street South Corporation real estate subsidiary.

WASHINGTON (APRIL 24) PR NEWSWIRE - MCI Communications Corp. (NASDAQ-NMS: MCIC) and American Express Company (NYSE: AXP) today announced a non-exclusive three-year agreement in which MCI will provide a full range of data, messaging and voice network services to American Express business units worldwide.

The contract is the largest awarded MCI by American Express since the two companies began working together in the early 1970s. It includes an option for an additional two-year period, making a potential five-year arrangement valued at up to $100 million, according to Bert C. Roberts Jr. MCI president and chief operating officer.

The terms of the agreement call for MCI to provide services to all five of American Express' operating units; American Express Travel Related Services Company, American Express Information Services Company, American Express Bank, Shearson Lehman Hutton and IDS Financial Services.

MCI's services supporting American Express' day-to-day business activities domestically, and around the world, include: toll-free 800 calling; Vnet, MCI's virtual networking service for customers with multiple locations; digital data services; international voice calling; domestic and international private lines; facsimile and other electronic messaging services.

"We are pleased with the level of service and dedication that MCI has been providing," said Garland Cupp, executive vice-president of Technologies and New Product Development for American Express Travel Related Services Company. "This new agreement will further strengthen the American Express-MCI business relationship. As American Express has continued to expand as a company, MCI has grown with us. Together, we have succeeded in adding value to the many customer services which are the mainstay of American Express' business and operating philosophy."

"Today's announcement is the culmination of a long and prosperous relationship between our companies," said MCI's Roberts. "We are pleased to work side-by-side with a company that has such a strong orientation toward quality. American Express is second-to-none in anticipating the needs of customers and marshalling the most sophisticated global information technology in response to those needs. We appreciate American Express as a customer and as a marketing partner."

American Express Company, a diversified travel, financial and information services company founded in 1850, is a world leader in charge cards,

Travelers Cheques and travel related marketing.

MCI is the worlds's second largest long-distance provider, supplying a full range of voice and data telecommunications services to business and residential customers, as well as a growing number of government agencies.

LOWELL, MA (APRIL 24) PR NEWSWIRE - Wang Laboratories Inc. (AMEX: WAN) today announced enhancements to its Information Distribution System (IDS) family of software products for sharing information between IBM mainframes and Wang VS computers.

IDS Release 3.0 provides support for IBM's System Network Architecture (SNA) communications over industry-standard X.25 transports as well as IBM's Synchronous Data Link Control (SDLC). The support for X.25 allows customers to implement IDS across both private and public packet-switched networks.

"IDS increases the value of existing IBM mainframes and network configurations by allowing Wang applications to exchange information across an SNA network," said Dennis Francoeur, Wang's director of IBM coexistence products. "IDS Release 3.0 helps us maintain our leadership position in the IBM connectivity arena. As a key element of our OPEN/Systems Networking strategy, we will continue to develop industry-leading communications products that integrate Wang systems with those offered by IBM and industry-standard platforms.

"By enhancing IDS with support for X.25, Wang is expanding its compliance to the Common Communications Support (CCS) standards defined within IBM's SAA (Systems Application Architecture) strategy. This gives our customers the opportunity to take advantage of value-added services offered by Wang while also protecting their investments in SNA, SAA, and the VS."

IDS Standard Components, a base product for configuring and monitoring the IBM host node, now provides conversation transport tuning that can improve throughput performance by 25 to 30 percent over IDS Release 2.5. The enhanced product also offers upgraded network administrator and management control. IDS Host Delivery Services, an optional product that transfers VS files to the IBM host, has been enhanced to allow creation of packages that contain files with multiple formats, such as document images.

Available immediately are the following IDS offerings: Store and Forward, Host Delivery Services, and Host File Access Facility, priced at $11,000

for all three components; Host-to-Host Transport, $2,200; Standard Components, $11,000; and VS IDS Transport, $500 and up.

#90114p6394 04/24/1990 ~PR Newswire

BIRMINGHAM, AL (APRIL 24) PR NEWSWIRE - Torchmark Corporation (NYSE: TMK) reported that Lewis E. Melahn, director of the Missouri Division of Insurance, yesterday issued an order that Torchmark's solicitation of proxies for five independent nominees for director at American General Corporation's (NYSE: AGC) annual meeting on May 2, 1990, does not have the effect of change of control.

In a letter accompanying the order, Melahn stated, "It is my opinion that a proxy solicitation should not in every instance invoke the requirement of a filing of a Form A. Regardless of whether or not federal law would preempt rules governing the solicitation of proxies, such an application would significantly preempt rights of a minority shareholder to address issues of corporate concern."

The order is premised upon representations made by the individual nominees in the proxy solicitation materials that, if elected, they will not oppose the election of Harold Hook and certain executive officers of American General.

Torchmark stated that it is gratified by this decision, and intends to continue with its proxy solicitation for both the nominees and its shareholder resolution.

Torchmark noted that this decision joins formal actions by state regulatory authorities in California and Virginia that have held Torchmark's solicitation to be in compliance with the applicable laws and regulations in those states. Torchmark said that it filed a disclaimer of affiliation yesterday in Texas, and believes it has satisfied insurance regulations there.

Torchmark emphasized that, to date, all injunctive applications brought in the various states by or at the behest of American General have been denied.

#90114p6400 04/24/1990 ~PR Newswire

ST. LOUIS (APRIL 24) PR NEWSWIRE - Monsanto Company (NYSE: MTC) today reported that net income for the first quarter of 1990 was $194 million, 13 percent lower than last year's record first quarter earnings of $222 million.

"While earnings were down from the same period last year, results were affected by seasonal timing shifts in our agricultural markets and slow business conditions in U.S. automotive markets," said Monsanto chairman and chief executive officer Richard J. Mahoney. "Nevertheless, we're off to a good start toward another record year for Monsanto."

Earnings per share for the period were $2.95, 9 percent below the $3.24 per share recorded in the first quarter a year ago. Consolidated net sales for the quarter reached $2.29 billion, a 1 percent increase compared with $2.27 billion for the same period in 1989.

Earnings for Monsanto Agricultural Company's Crop Chemicals unit were lower than last year's record first quarter, due principally to timing factors related to Lasso and Roundup herbicides. Shipments of Lasso, the unit's corn and soybean herbicide, continued to shift significantly toward the second quarter of the year, as customers increasingly purchase Lasso in the more convenient and economic bulk form. The purchase of Lasso in bulk allows customers to delay those purchases until closer to the time of application in spring.

Volumes for the family of Roundup herbicides improved, although the first quarter sales mix for the product favored lower-priced formulations. "Our agricultural business is very sound," Mahoney said, "and the level of business toward the end of the quarter suggests that another strong season is under way. Given reasonable weather conditions, the Agricultural Company will improve earnings again in 1990."

In the Agricultural Company's Animal Sciences Division, volumes for Alimet animal feed supplement grew, but competitive pricing pressures reduced selling prices compared with a year ago. The unit's earnings were more than offset by ongoing expense for the development of bovine and porcine somatotropin.

The Chemical Company's operating income was down only modestly from a year ago, despite sharply depressed levels of U.S. motor vehicle production during the first quarter. "The Chemical Company performed very well during the quarter, given the state of the United Stated auto industry," Mahoney noted. "We think the worst is behind us in these auto markets and look forward to another solid year from the Chemical Company." Demand remained strong in other Chemical Company markets, especially those outside the United States. The Chemical Company also benefited from

somewhat lower raw material costs compared with a year ago.

First quarter results for Searle improved compared with the same period last year. Sales of Calan antihypertensive drug for the quarter were well ahead of last year's record pace. Cytotec ulcer preventive drug, the only drug approved for the prevention of gastric ulcers caused by many common arthritis medications, continued to gain acceptance worldwide.

Earnings for The NutraSweet Company reflected continued volume growth worldwide for NutraSweet brand low-calorie sweetener. Operating income for the unit was below that of the record quarter of year ago primarily due to early launch costs for Simple Pleasures, the unit's frozen dairy dessert made with Simplesse all-natural fat substitute.

First quarter operating income for Fisher Controls improved compared with the same period in 1989. Fisher made strong worldwide shipments of its valve and regulator products and gained from ongoing cost reduction programs.

HOUSTON (APRIL 24) PR NEWSWIRE - CRSS Inc. (NYSE: CRX), today announced operating results for the third quarter and first nine months of fiscal 1990. The company is pleased to report a 28 percent increase in third quarter net earnings over the level achieved a year earlier.

Net earnings for the third quarter ended March 31, 1990, were $4.6 million or $0.31 per share (fully diluted) on gross revenues of $125.5 million. Comparable amounts for the third quarter of the previous year were net earnings of $3.6 million or $0.30 per share on gross revenues of $149.2 million.

For the nine months ended March 31, 1990, net earnings were $13.3 million or $0.99 per share on gross revenues of $391.4 million. For the same period of the prior fiscal year, net earnings were $8.3 million or $0.68 per share on gross revenues of $461.8 million.

Bruce Wilkinson, chairman, president and CEO of CRSS, noted that the company's operating revenue backlog at March 31, 1990, amounted to more than $223 million compared to the record level of $255.8 million at the end of the third quarter of the prior fiscal year, and $227.7 million at Dec. 31, 1989.

During the third quarter of the current fiscal year, the company announced that it had been selected, in association with the team of Parsons Brinckerhoff of New York, and Morrison Knudsen of Boise, Idaho, for negotiations to be the architect, engineer and construction manager for the Superconducting Supercollider, the high-energy physics particle accelerator and associated laboratory to be built approximately 30 miles south of Dallas. Also, in January, the company announced that the U.S. Department of Energy (DOE) had selected a project proposed by CRSS Capital Inc., a subsidiary, and TECO Power Services in the third round of its Clean Coal Technology Demonstration Program. The DOE is prepared to provide up to $121.1 million as its share of the estimated $400 million cost of the project, which is designed to employ the latest and most advanced technology for generating electrical power from coal.

CRSS is a diversified design and construction services company and is involved in the independent power/cogeneration industry. CRSS has also expanded through its interest in NaTec Resources, Inc., into the acid rain pollution control market.

#90114p6410 04/24/1990 ~PR Newswire

RICHMOND, VA (APRIL 24) PR NEWSWIRE - Reynolds Metals Company (NYSE: RLM) a 40-percent participant in the Boddington Gold Mine in Western Australia today announced that reserves at the mine have been increased significantly with the addition of more than six hundred thousand ounces of new minable reserves.

The additional proven reserves of 616,000 troy ounces of recoverable gold raise Boddington's current total minable gold reserves to 3,071,600 troy ounces. Reserves at Boddington, when the mine began operation in October 1987, were 3,082,000 troy ounces. The mine has produced 790,300 troy ounces of gold to date, while total reserves added since start up amount to 779,900 ounces.

Dr. Douglas Jinks, operations manager of precious metals and geology for Reynolds, said that drilling is continuing at a high level with the prospect of proving out still more reserves.

Last year Reynolds reported 764,800 troy ounces of new measured geological resources, which have now been converted into minable reserves. The bulk of these added reserves is in material occurring below the laterite zone, according to Dr. Jinks.

He said that reserves at Boddington are placed in two categories with the richest being 3,691,000 tonnes of ore in the supergene/basement deposits containing an average of 3.8 grams of gold per tonne. The laterite reserve is approximately 62 million tonnes at 1.31 grams per tonne.

The mine started operations with a design throughput of 3 million tonnes of ore per year and has been expanded twice to an annual capacity of 6 million tonnes. Boddington, which is now Australia's largest gold mine, produced 424,100 ounces of gold in 1989.

Dr. Jinks said that Reynolds is continuing to explore for gold and other precious metals at various sites in Australia and the United States.

#90114p6411 04/24/1990 ~PR Newswire

LAWRENCEVILLE, NJ (APRIL 24) PR NEWSWIRE - Imo Industries Inc. (NYSE: IMD) today reported net income of $8 million for the first quarter ended March 31, 1990, compared with $7.9 million reported for the same period a year ago.

Earnings per share were $.44 per share in the current quarter, compared with $.45 a year ago, on a higher number of average shares outstanding in the current period.

Sales for the first quarter of 1990 were $252.4 million, compared with $178.3 million for the first quarter of 1989.

Bookings in the first quarter, including $32.1 million for Generation II night vision equipment awarded in March under the Army's Omnibus II

program, increased 57 percent from bookings reported for the same period last year, and were up 31 percent on a pro forma basis. Excluding major defense contracts and turbomachinery unit orders, neither of which are evenly spread throughout any year, bookings were up 30 percent compared with last year and 8 percent on a pro forma basis.

Total segment operating income for the first quarter gained $5.4 million, or 24 percent over the prior year's first period, with an increase in all segments but the Instruments sector. This gain was partially offset by a $3.9 million increase in net interest expense. The company said it expects to reduce the impact of this increased interest expense.

Sales of the Instruments Group increased by 12 percent from a year ago, but operating profit margin declined on a generally less favorable product mix and start-up inefficiencies encountered on four new product lines. Most of these should be favorably resolved during the second half of this year.

The pleasure marine market served by the Mechanical Controls Group continued in a depressed condition, but the Group's sales more than doubled as the result of the inclusion of Roltra Morse, acquired last September. While Roltra's operating margin is below that of the Group's historic average, it was the prime contributor to the 82 percent increase in operating income compared with that reported a year ago.

Sales of the Power Transmission Group were 26 percent greater than in the same period last year, largely reflecting the inclusion of Warren Pumps, acquired in April of 1989. Operating income margin improved on a generally favorable product mix in the Group.

The Power Products and Services Group registered a very strong 56 percent increase in sales aided by substantial growth in shipments of new units compared with a year ago. Despite lower operating income margin associated with unit shipments, the Group's margin grew as the result of gains in service and aftermarket product sales.

IMO supplies analytical and optical instruments, electronic and mechanical controls, engineered power products and their support services to industrial and defense customers worldwide.

NEW YORK (APRIL 24) PR NEWSWIRE - Slattery Group, Inc. (NASDAQ: SGIB) announced today that 865,064 shares of common stock of the company, including shares guaranteed for delivery, had been tendered under the

offer by the company to purchase for cash all of its outstanding shares of common stock for $30 net per share.

The offer expired on April 23, 1990, at midnight, New York time.

In order to allow the other shareholders to fully divest their interest in the company, Getty Petroleum Corp. (NYSE: GTY), which owned prior to the acceptance of the shares approximately 40 percent of the common stock of the company, agreed not to tender any of its shares pursuant to the company's offer. The tendered shares represent approximately 99 percent of the outstanding shares of the company not presently held by Getty Petroleum. The company will pay for all properly tendered shares promptly.

DENVER (APRIL 24) PR NEWSWIRE - Presidio Oil Company (AMEX: PRS/A, PRS.pr) today announced that as of April 23, approximately 1,450,278 shares of its 9.5 percent cumulative convertible preferred stock have now been tendered pursuant to its offer to exchange shares of the preferred stock for shares of its Class A common stock at the rate of 1.35 shares of Class A common stock for each share of preferred stock tendered (exchange offer).

Sufficient shares of the preferred stock have been tendered to insure that all untendered shares of preferred stock will be called for mandatory redemption by Presidio if such tendered shares are not withdrawn prior to the expiration of the exchange offer. The exchange offer will expire at 5 p.m. New York City time on April 26, 1990, unless extended by the company. Tenders may be withdrawn at any time prior to April 26, 1990, and, if not yet accepted for exchange, at any time after May 24, 1990.

"Given the present status of the exchange offer, any preferred stock not tendered by April 26, 1990, will thereafter be redeemed as of June 1, 1990 under the existing mandatory redemption provisions of the preferred stock. Holders of the preferred stock not tendering in the exchange offer this week will thus only have the option to convert each share of their preferred stock into 1.25 shares of Class A common stock after April 26 and until May 24, 1990, or to receive $5 per share plus the accrued dividend on June 1, 1990. It is clearly more advantageous to the preferred stockholder to participate in our exchange offer, and we encourage everyone to do so," said George P. Giard Jr., chairman and chief executive officer.

Copies of the exchange offer materials may be obtained, at Presidio's

expense, by contacting the company at 5613 DTC Parkway, Suite 750, Englewood, Colo., 80111, attention: Carol Clark, 303-773-0100.

Presidio Oil Company is an independent oil and gas company engaged in onshore oil and gas exploration, development and production in the continental United States, primarily in Texas, Louisiana, Wyoming, North Dakota and West Virginia and in the transportation of gas through gas gathering systems in Wyoming and West Virginia. Presidio's securities are traded on the American Stock Exchange and on the London Exchange.

BIRMINGHAM, MI (APRIL 24) PR NEWSWIRE - Kuhlman Corporation (NYSE: KUH) announced today at its annual meeting of stockholders that it has entered into a letter of intent to sell its blow molded plastics operations to Solvay America, Inc., a Houston-based subsidiary of Solvay & Cie S.A. of Brussels, Belgium, for an aggregate consideration of approximately $45 million consisting of cash, certain deferred payments and assumption of related liabilities.

Kuhlman facilities which are part of the plastics operations include plants in Bronson, Mich., Bristol, Pa., Blenheim, Ontario, a technical development complex in Troy, Mich., and interest in a joint venture in Mexico. For the year ended Dec. 31, 1989, the plastics operations contributed approximately one-quarter of Kuhlman's consolidated net sales of $166 million.

In making the announcement, Donald O. Dulude, Kuhlman's chairman, president and chief executive officer, said, "This development will enable Kuhlman to focus its efforts on our profitable electrical transformer business which always has been our principal business segment over Kuhlman's entire 96-year history."

Dulude continued, "Solvay is a truly international chemical company with substantial resources at its command. Solvay has operated in the United States for many years, produces high density polyethylene and is also a supplier to the automotive industry.

The contemplated transaction is consistent with Kuhlman's long-term business strategy and in the opinion of Kuhlman's directors, the interests of our shareholders and customers as well as the employees of the plastics operations will be well served by this intended transaction. Specific plans as to how the proceeds from the sale will be utilized are currently under evaluation."

This transaction is subject to the negotiation and execution of a definitive agreement and various approvals.

BOHEMIA, NY (APRIL 24) PR NEWSWIRE - Symbol Technologies Inc. (NYSE: SBL) the world leader in barcode-based data capture systems, today announced that it has formed a strategic alliance with American Turnkey Corp. to market real-time material control software and total systems solutions for various aspects of warehousing, distribution and manufacturing.

Under the agreement, announced today in Los Angeles at Logistex 90 West, a show and conference focusing on material handling systems and equipment, Symbol will offer customized applications software for use with Symbol radio frequency (RF) data collection terminals. The systems enable users to control, monitor and optimize the flow of raw materials and finished goods throughout a facility in real-time; to update the information system instantly with inventory and location information; and to increase significantly the level of accuracy and productivity.

"Symbol, in alliance with American Turnkey, now can provide customers with the best products for manufacturing and distribution control. But, more importantly, they are provided with a complete, proven systems solution to meet their needs," Raymond R. Martino, president and chief operating officer of Symbol Technologies, said.

"As global markets continue to expand and competition intensifies, manufacturers and distributors are looking for the optimum solution, not just components," Dr. Boris Reznik, president of American Turnkey, said. "The Symbol-American Turnkey partnership provides a true systems approach that involves not only a complete understanding of a customer's individual needs, but also our combined expertise to meet those needs."

American Turnkey's Move(tm) software family has been adapted for use with Symbol's complete line of radio frequency terminals, utilizing both portable hand-held and forklift-mount models. The RFT units are coupled with Symbol's 8500 LR barcode scanners for non-contact warehouse data collection.

American Turnkey, based in Costa Mesa, Calif., is a leading provider of innovative real-time material control systems and software and has designed and implemented some of North America's most advanced warehouses and distribution centers.

Symbol Technologies, based in Bohemia, N.Y., is the only company to develop, manufacture and market hand-held laser scanners, portable data terminals and radio frequency (RF) devices.

#90114p6433 04/24/1990 ~PR Newswire

NEW YORK (APRIL 24) PR NEWSWIRE - Philip H. Geier, Jr. Chairman of the Board and Chief Executive Officer, reported that The Interpublic Group of Companies, Inc. (NYSE: IPG) had net income of $8,636,000 for the first quarter of 1990, an increase of almost 8 percent from $8,011,000 during the same period in 1989. Earnings per share increased over 8 percent to $.26 from $.24 in 1989. Gross income increased approximately 3 percent to $284,486,000 from $276,489,000 during the first quarter of 1989.

The per share results for 1989 have been restated to reflect the three-for-two split in June of 1989.

International gross income grew 12 percent in the first quarter of 1990. The decrease in domestic gross income results mainly from the exchange in July 1989 of Interpublic's interests in Lowe Marschalk for an increased ownership in The Lowe Group. This exchange also increased Interpublic's income attributable to unconsolidated affiliates. Continuing cost containment efforts kept costs at appropriate levels in light of the general economic conditions.

Mr. Geier noted that the Company's financial condition continues to be excellent, with a strong balance sheet and a solid cash position. He also noted that, as is customary, the results of the first quarter do not necessarily indicate the results for the full year.

Interpublic's agency systems have achieved net new business during the first quarter of 1990 of approximately $177 million which is an indication of solid growth.

The shares of The Interpublic Group of Companies, Inc. are listed on the New York Stock Exchange.

CONTACT: Eugene P. Beard, 212-399,8053, or William S. Keating, 212-399-8078, both of The Interpublic Group of Companies, Inc.

NEW YORK (APRIL 24) PR NEWSWIRE - Morgan Stanley Group Inc. (NYSE: MS) today announced net income of $82.1 million, or $2.07 per common share, for the quarter ended March 31, 1990, compared to $81.1 million, or $2.02 per common share, in the same period of 1989. Net revenues (gross revenues less interest expense) for the period were $578.3 million vs. $534.1 million in the first quarter of 1989.

The company also announced the declaration by its board of directors of a regular quarterly dividend of 37-1/2 cents per share. The dividend is payable May 22, 1990, to holders of record May 4, 1990.

S. Parker Gilbert, chairman; Richard B. Fisher, president and Robert F. Greenhill, vice chairman, said in a joint statement:

> "Morgan Stanley Group's performance in the first quarter benefited from results of improved sales and trading activities, particularly in fixed income and foreign exchange. Investment banking revenues declined as a result of significantly reduced merger and acquisition advice fees, reflecting a worldwide slowdown in mergers and acquisitions activity. Financing revenues were comparable to those of first quarter 1989."

Total capital (stockholders' equity and long-term debt) at March 31, 1990, was $2.65 billion, including $2.02 billion of common and preferred stockholders' equity. Book value per common share was $47.66, based on quarter-end shares and share equivalents of 37,191,430.

Morgan Stanley Group Inc. is a major international securities firm with offices in New York, London, Tokyo and other principal financial centers.

WAYNE, NJ (APRIL 24) PR NEWSWIRE - Toshiba America Consumer Products, Inc. announced today that it will establish the Advanced TV Technology Center on May 1, at its headquarters in Wayne.

The mission of the center is to develop new television technology, including high-definition television (HDTV), and provide technical support for subsequent research and development in the near future at the company's Lebanon, Tenn., television plant.

The initial goal of the new organization is the development of advanced receivers to meet the American broadcasting standards for HDTV systems,

which is expected to be decided by the Federal Communications Commission (FCC) in 1993. Soon after the standard is set, Toshiba America will manufacture these receivers at its Lebanon, Tenn., facility.

"We believe the center's research into HDTV development opens new frontiers to the consumer and promises many benefits to improve Americans' lifestyles," said Ken-ichiro Hiyama, president of Toshiba America Consumer Products, Inc., one of the nation's leading manufacturers of color televisions.

The Advanced TV Technology Center will be headed by Gregory DePriest. Before joining Toshiba America Consumer Products, DePriest was vice president of Maximum Service Telecasters, Inc. He is active in the field of advanced television systems and is a member in such organizations as the Advanced TV Systems Committee.

The center is Toshiba America's fourth research and development facility in the United States. Toshiba America Information Systems, Inc. has established a center in Irvine, Calif., that develops computers, telecommunications and information storage systems.

Toshiba America Consumer Products, Inc. (TACP) is a wholly owned subsidiary of Toshiba America, Inc., a diversified manufacturer of electronics products and systems. TACP manufactures more than one million color TV sets a year in its Lebanon, Tenn., plant. It has pioneered large screen television and highly popular large flat screen models for the American market and export overseas. TACP's large screen televisions feature 30- and 32-inch color picture tubes, the largest made in the United States, which are manufactured by Horseheads, N.Y.- based Toshiba Display Devices, Inc.

PHILADELPHIA (APRIL 24) PR NEWSWIRE - Comcast Corp. (NASDAQ-NMS: CMCSA CMCSK) announced today that it has entered into agreements with Birmingham Cable Co. Ltd. to participate in the construction and development of a cable television and telephone system in Birmingham, England.

In addition to Comcast, Birmingham Cable has entered into similar agreements with U.S. West Inc., an existing shareholder of Birmingham Cable.

Birmingham, England's second largest city, encompasses approximately 460,000 homes and 40,000 businesses in the franchise area.

In welcoming Comcast as a new shareholder in the company, Sir Reginald Eyre, chairman of Birmingham Cable, said, "We very much look forward to working with our new partner, Comcast, and expect to benefit from their operational expertise in cable television in much the same way as we are already benefitting from U.S. West's telecommunications know-how."

Brian L. Roberts, president of Comcast, said, "We are pleased to join forces with Birmingham Cable and U.S. West in developing this cable television and telephone market." As a result of the agreements, Comcast will be an equity investor in Birmingham Cable and will provide cable television management and consulting services to the venture.

Comcast Corp. is principally engaged in the development and operation of cable communications systems. The company's consolidated and affiliated operations served more than 2.3 million subscribers at Dec. 31, 1989. This included 767,000 subscribers associated with systems owned by Storer Communications Inc. for which Comcast provides consulting services. In addition, the company provides cellular telephone communications and sound communications services. The Class A and Class A Special common stock are traded in the over-the-counter market and are reported in the National Market List under the NASDAQ symbols CMCSA and CMCSK respectively.

CONTACT: John R. Alchin, 215-981-7503, or Marolyn L. Bailey, 215-981-7550 both of Comcast.

TEL-AVIV, ISRAEL (APRIL 24) PR NEWSWIRE - Israel Aircraft Industries (IAI) and Digital Equipment Corporation announced a strategic alliance agreement for IAI to participate in the development of an integrated enterprise environment. As part of the agreement, IAI has declared its intent to purchase hundreds of DECstation and VAXstation workstations and associated hardware, software and services from Digital over the next five years estimated to total $25 million. IAI will use the workstations as its standard platforms for mechanical CAD/CAM/CAE.

IAI's integrated enterprise environment will enable its mechanical CAD/CAM/CAE functions to be integrated throughout its establishment. The mechanical CAD/CAM/CAE systems will be based on Digital's workstations.

IAI will also participate in Digital's aerospace integrated management systems (IMS) program along with General Dynamics' Convair Division under which Digital will act as a systems integrator to network workstations and operating systems from several vendors. The network will use both Digital's ULTRIX software and other vendor's operating systems. General Dynamics' Convair Division will provide generic work process architecture

and information flow requirements to IAI through Digital Equipment Corporation. The IAI "TASHAN" Engineering Center will offer 20 years experience of CAD/CAM/CAE development and integration in the aerospace environment.

Dr. Meir Dvir, IAI's Executive Vice President, Planning and Business Development, said, "Engineering computing as well as general computing are essential ingredients in IAI's technical and commercial competitiveness and give us entry into the market of computer technology. Furthermore, this strategic alliance with Digital is essential to the process of merging industrial experience and computer methodologies into tools that will achieve the potential benefits of both.

"Dan Infante, Digital's vice president of Information and Technology and a senior sponsor of the program, said that economic and government requirements have created a complex and highly competitive global market for aerospace and defense manufacturers. "Product complexity, demanding manufacturing processes, and the government-sponsored CALS (Computer-Aided Acquisition and Logistics Support) initiative are driving the need for enterprise-wide integrated computing solutions."

IAI is the largest manufacturing company in Israel with world-wide relationships and a solid reputation for achievements in the aerospace and high-technology markets. IAI is an international company on the leading edge of CAD/CAM development and utilization.

Digital Equipment Corporation, headquartered in Maynard, Massachusetts, is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

#90114p6450 04/24/1990 ~PR Newswire

KANSAS CITY, MO (APRIL 24) PR NEWSWIRE - Marion Merrell Dow Inc. (NYSE: MKC) today announced net earnings of $111 million, or $.40 per share, on sales of $578 million for the first quarter ended March 31, 1990.

In making the announcement, the company said accounting standards require that Marion Merrell Dow's first-quarter performance be compared with results reported by Marion Laboratories, Inc. for the comparable period a year ago. On that basis, the company's 1990 first-quarter results compare

with sales of $243 million and net earnings of $55 million, or $.35 per share, for the same period a year earlier.

Although the combination of Marion Laboratories and Merrell Dow Pharmaceuticals Inc. that creased Marion Merrell Dow was not completed until December 1989, the company also provided a comparison of what its first-quarter results would have been had Marion Merrell Dow been operating as a single company for the same three-month period in 1989. From that perspective, Marion Merrell Dow would have reported an 11 percent gain in sales for the quarter ended March 31, 1990, and a 21 percent increase in earnings, with earnings per share growing to $.40. In the first quarter of 1989, Marion Merrell Dow would have reported earnings per share of $.33.

Strong performance by several major product lines keyed sales growth for the Kansas City-based pharmaceutical company during the first quarter. Sales of the Cardizem(R) family of leading cardiovascular products, which includes Cardizem tablets for angina (chest pain) and Cardizem SR sustained-release capsules for hypertension (high blood pressure), increased 16 percent over the same period in 1989. Sales of Cardizem SR alone in the quarter surged 111 percent over the prior-year period, when the product was introduced in the United States.

Seldane(R), the world's most widely prescribed non-sedating antihistamine, posted a 31 percent sales gain for the quarter. This increase is largely attributable to the strength of Seldane sales in Europe; a positive response by the U.S. market to the co-promotion of Seldane by both the Marion and the Merrell Dow sales divisions, which doubled -- to about 1,100 -- the number of sales representatives calling on physicians in support of the product; and shipments to Japan for the planned April launch of the product in that country.

Sales of Nicorette(R), a prescription nicotine gum that aids people who want to stop smoking, also were very strong in the first quarter, up 86 percent over last year. In the gastrointestinal area, first-quarter sales of Carafate(R), the company's anti-ulcer drug, were unchanged from a year ago, despite reduced promotional support for the product since the introduction of Cardizem SR.

ROCKY MOUNT, NC (APRIL 24) PR NEWSWIRE - Texfi Industries, Inc. (NYSE: TXF), announced today that it acquired the assets of privately held Bridge Street Apparel, a leading manufacturer and marketer of knit garments based

in Spartanburg, S.C. Bridge Street's manufacturing operations are located in Elkin, N.C., with 1989 sales of approximately $8 million. Terms were not disclosed.

Rob Leahy, founder and president of Bridge Street will be joining Texfi Industries as president of a newly formed Knit Apparel Group which will include Texfi's Kingstree Knits, Inc. and Vertex Industries.

L. Terrell Sovey, Jr., chairman and CEO of Texfi, commented, "We are delighted Rob Leahy will be joining us. The company he has built over the past six years, combined with Texfi's businesses, will provide the basis for considerable new growth in the knitted apparel area which we entered last year."

The Knit Apparel Group's products include heavyweight fleece garments, T-shirts, and with the addition of Bridge Street's operations, knit placket shirts. Customers of the Knit Apparel Group are private label companies, graphic screen printers, and now catalogue retailers such as Lands' End and L.L. Bean. Sales for this business are estimated to reach approximately $75 million in 1990. The company is now positioned to dramatically increase this figure with minor capital expenditures.

Texfi Industries, Inc. with headquarters in Rocky Mount, N.C., is in the business of manufacturing and marketing various textile products.

CONTACT: Michael A. Miller of Texfi Industries, 919-443-5001 or Pier Stiny of D.F. King & Co., 212-269-5550, for Texfi.

WOODCLIFF LAKE, NJ (APRIL 24) PR NEWSWIRE - Ingersoll-Rand (NYSE: IR) today reported a record first-quarter performance from operations. In addition, incoming orders for the quarter exceeded the billion-dollar level for the first time in the company's history.

Sales for the quarter were $902 million, 13 percent higher than the $802 million reported in the first quarter of 1989. Operating income totalled $90 million, or 18 percent above 1989's first quarter.

Net earnings from operations were $45.6 million, or 86 cents per share, as compared to net earnings of $40.7 million, or 76 cents per share, for the first quarter of 1989. During last year's first quarter, the company also reported an extraordinary tax benefit of approximately $8.5 million, or 17 cents per share, which resulted from a reduction of income taxes through the utilization of a capital loss carryforward associated with the sale of the company's finance subsidiary.

NEW YORK (APRIL 24) PR NEWSWIRE - Standard Motor Products, Inc. (NYSE: SMP) today reported that sales for the three months ended March 31, 1990, were $129,787,000. This compared with $95,598,000 in the first quarter last year.

Net income in the three months ended March 31, 1990, was $2,951,000, or 22 cents per share, vs. $3,562,000, or 27 cents per share, a year ago.

Commenting on the results for the first quarter, Lawrence Sills, president stated that approximately $11 million of the sales increase resulted from the late 1989 acquisition of Guaranteed Parts/Sorensen. In addition, the EIS Brake Division, and particularly the Four Seasons Air Conditioning and Heater Parts Division, had much higher-than-normal increases in sales.

However, Sills stated that the decrease in net income was attributable to several factors. Despite the increase in sales, lower production levels were maintained in certain key areas in order to reduce inventories. Also, substantial increases in interest expense and a higher estimated income tax rate contributed to the decrease in net income.

#90114p6474 04/24/1990 ~PR Newswire

CHICAGO (APRIL 24) PR NEWSWIRE - General Motors has retained U.S. Occupational Health, a Chicago company specializing in occupational medicine, to provide medical services for prevention of carpal tunnel syndrome (CTS). U.S. Occupational Health has installed their state of-the-art early detection system at General Motors/Danville, Ill. Substantial savings from medical and disability costs have already been

realized.

Carpal tunnel syndrome is a cumulative trauma disorder (CTD). CTDs are the second most common occupational illness (Bureau of Labor Statistics). They are soft-tissue injuries to the tendons, muscles and nerves of the upper body. When diagnosed early, carpal tunnel syndrome can be treated conservatively. If diagnosed late or if there is no improvement after six months of conservative treatment, surgery may be recommended.

U.S. Occupational Health's "CTS System" aids companies in the prevention of carpal tunnel syndrome. It provides several tests for early detection of nerve damage. Collected by U.S. Occupational Health's special software package and interpreted by their expert occupational physicians, the results allow conservative treatment to be instituted at the first sign of injury, when non-surgical treatment has the best chance for success.

For further information contact Debora L. Bee, marketing coordinator, U.S. Occupational Health Inc., 205 W. Randolph St., Suite 720, Chicago, Ill. 60606, Tel. 312-641-1449.

TROY, MI (APRIL 24) PR NEWSWIRE - K mart Corporation (NYSE: KM) today announced the promotion of Donald W. Keeble, 41, to senior vice president, special projects, effective May 14, 1990.

In this new position, Keeble will be responsible for directing and monitoring inventory investment for K mart's Hardlines Division. In addition, he will be involved with all aspects of the corporation's new Combo Store Program. Keeble will report directly to Joseph E. Antonini, K mart chairman of the board and chief executive officer.

Keeble, a graduate of Columbus College, Columbus, Ga., with a B.S. degree in business administration, joined K mart Corporation in 1971 as a management trainee. He has served as a store manager, district manager and regional director of personnel and training. Keeble has also held positions of regional manager in the Southern Region and director of store operations at K mart International Headquarters before being promoted to his most recent position of regional vice president of K mart's Midwestern Region.

K mart Corporation serves America with over 4,000 retail outlets in all 50 states in the United States and in Puerto Rico and Canada. K mart, currently operating 2,318 K mart stores, is also the parent company for

Pay Less Drug Stores, Builders Square, Waldenbooks, PACE Membership Clubs and The Sports Authority.

MEMPHIS, TN (APRIL 24) PR NEWSWIRE - Perkins Family Restaurants, L.P. (NYSE: PFR) today reported that net income for the first quarter ended March 31, 1990 increased 22 percent over last year. Net income for the quarter was $2,532,000, as compared with $2,075,000 in the prior year's first quarter.

Net income per unit for the first quarter of 1990 was $.25, as compared with $.20 per unit for the first quarter of 1989, a 25 percent increase.

Revenues for the quarter increased to $41,565,000 from $38,610,000 in the comparable period last year, a 7.7 percent increase. Same store sales for company-operated restaurants were up 5.8 percent for the first quarter.

"Perkins' dedication to growth through people, namely our employees, our franchisees and our customers, resulted in an excellent first quarter. We expect the success from that strategy to continue throughout 1990 and beyond," said Donald N. Smith, Chairman and Chief Executive Officer.

As of March 31, 1990, Perkins Family Restaurants, L.P., a Delaware limited partnership, owned and operated 114 Perkins Family Restaurants and franchised an additional 266 restaurants in 28 states and Canada.

LAKE SUCCESS, NY (APRIL 24) PR NEWSWIRE - Tambrands Inc. (NYSE: TMB) reported today that first-quarter sales and earnings reached record highs for any first quarter.

Net sales for the quarter ended March 31, 1990, were $159,256,000, an increase of 23 percent from first-quarter 1989 sales of $129,936,000. Net earnings were $22,065,000, an increase of 22 percent over earnings of $18,022,000 in the first quarter of 1989.

Earnings per share increased to $1.02 in the first quarter of 1990, up 26 percent from earnings per share of $.81 in the same period of 1989. The percentage increase in earnings per share exceeded the percentage increase

in net earnings because Tambrands has made repurchases of its own shares since the first quarter of 1989.

The increase in Tambrands' net sales resulted primarily from increased shipments of Tampax tampons in the United States, and from unusually strong results in Brazil, attributable to increased pricing and shipments. The improved results in Brazil occurred despite working capital foreign exchange losses of $7.9 million. Net earnings increased in line with sales.

Tambrands is a multinational manufacturer and marketer of personal care products, including Tampax(R) tampons, Maxithins(R) sanitary pads, and First Response(R) home diagnostics.

#90114p6490 04/24/1990 ~PR Newswire

PARIS (APRIL 24) PR NEWSWIRE - AT&T and France Telecom today announced that the first international ISDN (Integrated Services Digital Network) service between the United States and France will begin on May 15.

The service, known as switched digital international service, will be used to support new international communications applications such as high-speed facsimile, video conferencing, electronic data interchange and high-fidelity audio.

ISDN allows the simultaneous high-speed transmission of voice, data and video. The new service links AT&T's network to France Telecom's Numeris ISDN-based network.

AT&T and France Telecom demonstrated the capabilities of the new service by conducting a video conference between Jean-Jacques Damlamian at the SICOB trade show in Paris and John Berndt at AT&T's offices in New Jersey. Damlamian is France Telecom's director of industrial and international affairs. Berndt is president of AT&T's international communications services.

The service announced today provides callers with fully digital, dial-up connections that transmit at 64 kbits/s. AT&T and France Telecom have offered a switched 56 kbits/s service between the two countries, but will now support both transmission speeds. The 64 kbits/s rate is a standard for sending data outside the United States and is increasingly important within the U.S. because it is a building block of ISDN service.

AT&T's business is information movement and management; providing quality products, systems and services to diverse markets in the United States and

around the globe. The company offers long distance telecommunications services through the AT&T Worldwide Intelligent Network, as well as systems, products and services that combine communications and computers.

With annual revenues exceeding $16 billion, France Telecom is the official provider of all basic telecommunications services within France and from France to the rest of the world. The organization has 158,000 employees worldwide, with overseas offices in New York, San Francisco, Tokyo, Caracas, Djakarta, Singapore, Beijing, London, Brussels, Bonn, and soon in Moscow.

PARSIPPANY, NJ (APRIL 24) PR NEWSWIRE - At Warner-Lambert Company's (NYSE: WLA) annual meeting here today, company stockholders overwhelmingly approved an increase in the number of authorized shares of common stock from 150 million to 300 million shares.

This will enable the company to enact a two-for-one split of its outstanding common stock, as previously authorized by its board of directors.

The split will apply to all shares of record held at the close of business on May 2, 1990.

The board today also declared a regular quarterly dividend of 38 cents per share of common stock, payable on June 15, 1990, to stockholders of record on May 30, 1990. This dividend is based on the number of shares outstanding after the stock split, and is the equivalent of a quarterly dividend of 76 cents a share before adjusting for the split.

Speaking today at the company's annual meeting here, Chairman and Chief Executive Officer Joseph D. Williams reaffirmed his confidence in Warner-Lambert's future, both in the near term and beyond. "We continue to have great confidence in our ability to post another record year for both sales and earnings in 1990," said Williams. "We're definitely on target to meet our previously stated goal of increasing earnings per share at least 16 percent this year."

Last week, the Morris Plains, N.J.-based health care and consumer products company reported record sales and earnings for the first quarter. Earnings per share increased 20 percent to $1.79, and net income rose 19 percent to $120 million. Worldwide sales grew to $1.1 billion, an increase of 8 percent -- 9 percent at constant currency rates. In 1989, earnings per share rose 22 percent to $6.10 on sales of $4.2 billion.

Williams said research and development continue to be a priority at Warner-Lambert. Indicative of this commitment are the company's 1990 R&D budget of $350 million, up 30 percent since 1988, significant staffing increases and appropriations to construct new facilities in the U.S. and in Europe.

To build Warner-Lambert's business through unit growth, Williams said, the company will spend more than $1 billion on advertising and promotion in

1990.

During the meeting, shareholders also:

-- Elected 14 incumbents to the Warner-Lambert board of directors;
-- Approved the appointment of Price Waterhouse as independent accountants for 1990, and
-- Defeated two shareholder resolutions.

Warner-Lambert is a worldwide company devoted to developing, manufacturing and marketing quality health care and consumer products.

CINCINNATI (APRIL 24) PR NEWSWIRE - At the annual meeting of shareholders today, Cincinnati Milacron Inc. (NYSE: CMZ) reported a decline in earnings on slightly higher sales in the first quarter of 1990 compared to the first quarter a year ago. New orders were even with the year-ago quarter but at higher levels than in the three previous quarters.

Sales in the first quarter of 1990 were $191 million, compared to $188 million in the first quarter of 1989.

First quarter 1990 net earnings were $2.5 million, or 10 cents per share, compared to earnings from continuing operations before extraordinary items in the first quarter of 1989 of $6.2 million, or 26 cents per share. First quarter 1989 net earnings were $10.0 million, or 41 cents per share, and included an extraordinary tax benefit and a loss on discontinued operations, which added $3.8 million, or 15 cents per share.

"The decline in earnings resulted from reduced shipments of our higher-margin products, such as plastics injection molding machines, greater sales volume of certain lower-margin machine tools, and increased machine tool exports, which carry higher distribution costs," according to Daniel J. Meyer, who, separately, was named chief executive officer today.

New orders for the first 12 weeks of 1990 were $206 million, approximately even with the same period last year but an 18 percent improvement over $175 million in the fourth quarter of 1989. With new business exceeding shipments, the backlog of unfilled orders rose to $362 million from $347 million at the beginning of the quarter.

"We're encouraged by the order rate," Meyer said, "because it's higher than in the last three quarters."

"Even though earnings will be sluggish in the first half of the year, we're optimistic about significantly improved results in the second half," James A. D. Geier, chairman, said.

"Demand for machine tools on the part of commercial aircraft manufacturers remains at very high levels. And there are indications that automotive buying may firm up -- which would help all of our businesses, including industrial robots, coordinate measuring machines and plastics machinery," Geier said. "In addition, this year we're bringing several new world-class products to market that will ultimately increase our market share and boost our margins," he concluded.

At the annual meeting, three directors were re-elected: Neil A. Armstrong, Lyle J. Everingham and James A. D. Geier.

#90114p6516 04/24/1990 ~PR Newswire

ROMEO, MI (APRIL 24) PR NEWSWIRE - Ford Motor Company (NYSE: F) today unveiled its new Romeo Engine Plant, following a two- year, $780 million transformation from a former tractor assembly facility.

"Today is a very exciting and special day for all of the Ford Engine Division's 16,000 employees, especially the Romeo team," David Hagen, general manager of the Division, told the news media. "The $780 million investment in our new family of engines, in the training of the plant's employees, and in the plant itself represents a significant investment in our future.

"The Romeo Engine Plant is committed to producing engines that are of the highest quality, use the latest technology, offer the greatest fuel economy possible -- and are responsive to the needs and requirements of our society," Hagen said. "This investment is crucial to our ability to provide our customers with exciting powertrains that offer full satisfaction and good value."

At the core of the plant's efforts to build world-class engines is its training program. Before the first engine rolled off the line last week, the entire engine plant workforce -- UAW-represented employees and management employees -- will have gone through 750,000 hours of training.

In addition to training, the plant's operating philosophy encourages maximum levels of employee involvement. For example, the design and specifications of the plant's new equipment came not only from management, but also from the employees who are responsible for maintaining the equipment.

"Romeo's mission and slogan is to be the 'Best Engine Builders in the World,' and each employee is empowered with the responsibility to insure that Romeo does not ship an engine with a defect," Hagen said.

"We must support our people by giving them the tools to work with," he added. "This means designing exciting and innovative powertrains. The Ford Engine Division recognizes the need to remain competitive in today's crowded market, and enormous resources will continue to be devoted to building on Ford's proven capabilities."

The Romeo Engine Plant -- opened in 1973 as a tractor assembly plant -- will have an estimated annual capacity of 535,000 engines, or approximately 2,230 engines per day. The plant covers 1.4 million square feet. Flexible manufacturing will allow the plant to produce a new family of V-8 engines -- the first application being a 4.6-liter V-8.

The design flexibility of this family of engines provides for a common combustion chamber designed for maximum fuel economy and the sharing of a number of similar components. This allows for quick response to changing market conditions, reduced facility costs and minimizes manufacturing disruptions.

An advanced quality planning system has been deployed to help anticipate everything that could go wrong during the machining and assembly process. In the event of a problem, the computerized system helps prevent defects from occurring. This same advanced quality planning discipline is in effect among all of Romeo's suppliers to insure that incoming material is also defect free.

"Every aspect of the plant's operation has been carefully thought out," Hagen said, "down to the heating systems which are designed to make Romeo the most energy-efficient engine plant in Ford's operations....and contributing to our goal of becoming the lowest-cost producer of the highest-quality products in North America."

#90114p6519 04/24/1990 ~PR Newswire

CHICAGO (APRIL 24) PR NEWSWIRE - The Quaker Oats Company (NYSE: OAT) announced today that its board of directors has approved in principle the distribution of the company's Fisher-Price Division to Quaker's shareholders. Fisher-Price would operate as an independent, free-standing company that would be publicly traded. The distribution is subject to board approval of the final terms and conditions. The company expects that if a distribution is made, it will be completed by approximately the first quarter of calendar 1991 after receipt of an IRS ruling that the distribution is a tax-free transaction under Section 355 of the Internal Revenue Code. In such a distribution each holder of a share of Quaker common stock will receive a proportionate interest in the common stock of Fisher-Price.

William D. Smithburg, chairman and chief executive officer, said, "Quaker's management and the board of directors currently believe that the greatest value to shareholders -- both of Quaker and the new Fisher- Price -- is likely to result from Fisher-Price operating as a free- standing

company. An independent Fisher-Price would allow Quaker to concentrate its efforts and resources on our core grocery businesses and give our shareholders more choice as to the industry segments in which they invest.

"In the long term, a Fisher-Price which is not part of a larger company should be a more focused organization which should enhance its competitiveness and facilitate the attraction, retention and motivation of its management and employees."

An independent Fisher-Price would include all of the operations, both foreign and domestic, of the present Fisher-Price Division. It is expected that a new chief executive officer would be elected by the board of Fisher-Price. Paul E. Price, who serves as interim president and chief operating officer of Fisher-Price in addition to senior vice president-finance of Quaker, would return to his responsibilities as chief financial officer of Quaker. Following the spin-off Quaker expects that it would continue to provide some administrative and support services for an interim period with the related costs and expenses being paid by Fisher-Price.

The Fisher-Price Division, which has been a part of the company since 1969 is engaged in the toy and juvenile products businesses.

DALLAS (APRIL 24) PR NEWSWIRE - Enserch Exploration Partners, Ltd. (NYSE: EP) has announced that first-quarter 1990 net income was $11.9 million, compared with $14.2 million for the like period a year earlier. R.G. Fowler, president of Enserch Exploration, Inc., managing general partner of EP, attributed the comparative decrease to a 1989 windfall profit tax credit and higher interest expense in the first quarter of 1990. Net income per unit for the first quarter 1990 was 12 cents vs. 14 cents for the first quarter 1989. First-quarter weighted average units outstanding were 102.5 million, unchanged from a year ago. At March 31, 1990, ENSERCH Corporation owned 101.7 million units, or about 99 percent of the total partnership units outstanding.

Net cash flows from operating activities were $22.2 million, compared with $24.4 million a year earlier.

First-quarter 1990 operating income was $14.1 million, down from $15.1 million for the first quarter 1989. Revenues for the first quarter 1990 were $52.1 million, compared with $51.5 million for the year-ago period.

Natural-gas sales volumes (net) for the first quarter 1990 were 19.4

billion cubic feet (Bcf), down from 20.1 Bcf for the like period of 1989. The average sales price was $1.99 per thousand cubic feet (Mcf), slightly up from the $1.94 per Mcf in the first quarter of 1989.

Oil sales volumes (net) were 668 thousand barrels (MBbls) for the quarter, up from 637 MBbls for the like period a yea ago. The average sales price increased to $19.58 per barrel from $17.32 per barrel a year earlier.

Enserch Exploration Partners, Ltd., a Texas limited partnership, conducts substantially all the domestic oil and gas operations of ENSERCH Corporation, a diversified energy, engineering and construction company headquartered in Dallas.

WEST PALM BEACH, FL (APRIL 24) PR NEWSWIRE - Pratt & Whitney has delivered the first two prototypes of its newest and most powerful fighter engine, the F119-PW-100, to the U.S. Air Force. The F119 is P&W's candidate to power the new Air Force Advanced Tactical Fighter (ATF).

YF119 prototye engines will be test flown in both the Northrop-McDonnell

Douglas team's YF-23A aircraft and the Lockheed-Boeing-General Dynamics team's YF-22A aircraft. The YF119 will fly first in the YF-23A at Edwards AFB, Calif.

Walt Bylciw, Pratt & Whitney's vice president for F119 programs said, "More than three years ago, we laid out an aggressive schedule for development of the F119, and today's delivery is a major step toward reaching our goal of flying in the ATF. The YF 119 is a significant leap forward in technology, and we are looking forward to the flight demonstration program so we can show the exceptional performance of this engine."

Bylciw continued, "Our team of engineers, technicians, support people and suppliers have done a superb job. We are extremely pleased with the performance we are able to deliver with this engine."

Bylciw explained the importance of the F119 program by saying, "ATF is the Air Force's primary fighter program for the next decade, and it is very signficant to Pratt & Whitney. We are committed to providing the Air Froce, Navy and weapon system contractors an engine that fully meets their requirements. We are preparing to submit our full-scale development proposal at the end of this year."

The F119 is being developed by Pratt & Whitney under an Air Force demonstration/validation contract to meet both Air Force and Navy requirements. The program is managed by the Advanced Tactical Fighter Systems Program Office at Aeronautical Systems Division, Wright-Patterson Air Force Base, Ohio.

Pratt & Whitney's Government Engine Business, based in West Palm Beach, Fla., designs, develops and supports military jet engines. Pratt & Whitney is a unit of United Technologies Corporation (NYSE: UTX).

CLEVELAND (APRIL 24) PR NEWSWIRE - "The economic revitalization of Northern Ohio, our organizational streamlining, our cooperative relationships with regulators and customers, and our excellent nuclear operations are good reasons to be confident about the future of Centerior Energy," Richard A. Miller said today.

Addressing the annual meeting of share owners, the chairman of Centerior Energy Corporation (NYSE: CX) cited a January 1989 rate settlement as a key to the progress made by the company last year.

Centerior's cash flow has improved significantly as a result of the rate settlement, which enables the company to recover through a rate phase-in plan most of its large investment in two nuclear units that went into commercial service in late 1987.

For the 12 months ended March 31, 1990, Centerior's cash flow per share was $1.75, more than twice as much as the $.84 per share cash flow for the 12 months ended March 31, 1989.

Last year's progress included an increase in the company's stock price. "Stock market perceptions of Centerior should improve further as we implement the recommendations of a year-long cost-control study," Miller said.

Centerior and the management consulting firm of Cresap conducted the study. "We carefully evaluated Cresap's recommendations to ensure that our service to customers and the safety of our operations would not be impaired," Miller said. The results of the study will be announced this Thursday by the Audit Advisory Panel that has overseen the study.

"Where customers are concerned, we will work hard to keep our rate increases lower than the rate of inflation," Miller said.

"Over the next several years, we expect the iflation-adjusted cost of electricity in Northern Ohio to decline. This should be the case even with rate increases required to recover the cost of complying with new acid rain legislation. In other words, most customers will be paying a lower percentage of their household and business budgets for the electric energy service that is so vital to their comfort, convenience and economic growth.

"Where share owners are concerned, our short-term goal is to resume at the earliest feasible time annual dividend increases. We will do so as soon as we are confident we can sustain the increses. Longer term, we will strive to achieve dividend increases that are competitive within the industry."

"We are moving into the new decade as a leaner, more efficient and more competitive organization with improving growth prospects," he said.

Share owners also elected 13 directors and ratified the appointment of Arthur Anderson & Co. as independent accountants.

TULSA, OK (APRIL 24) PR NEWSWIRE - MAPCO Inc. (NYSE: MDA) today reported earnings of $1.10 per share for the three months ended March 31, 1990, compared to $.89 per share in the comparable quarter last year; net income for the first quarter was $36.7 million in 1990 and $35.4 million in 1989. Operating profit was $69.4 million in 1990, compared to $62.7 million in 1989. Operating profit figures reflect a change in the method of allocating corporate general and administrative expenses to segment operations, and operating profit for 1989 has been restated.

Results are based on 33.5 million average shares outstanding in the 1990 quarter, and 39.9 million average shares outstanding in the 1989 quarter.

TROY, MI (APRIL 24) PR NEWSWIRE - The board of directors of K mart Corporation (NYSE: KM) today approved a cash dividend to be paid on June 11, 1990, on the outstanding shares of the corporation's common stock to holders of record on May 17, 1990, in the amount of 43 cents per share. This represents an increase in the annual rate to $1.72 from $1.64.

In commenting on the dividend increase, Chairman of the Board and Chief Executive Officer Joseph E. Antonini said, "This is the 26th consecutive

year in which K mart dividends have been raised. The 4.9- percent increase reflects our confidence in the long-term future of the K mart Corporation."

K mart Corporation serves America with over 4,000 retail outlets in all 50 states in the United States and in Puerto Rico and Canada. K mart, currently operating 2,319 K mart stores, is also the parent company for Pay Less Drug Stores, Builders Square, Waldenbooks, PACE Membership Clubs and The Sports Authority.

K mart stock is traded on the New York, Pacific, Midwest and Tokyo stock exchanges. Its trading symbol is KM.

HARRISBURG, PA (APRIL 24) PR NEWSWIRE - Malcolm W. Gambill, president and chief executive officer of Harsco Corp. (NYSE: HSC), announced at the annual meeting of stockholders that the company has set a new sales record for any quarter.

First quarter sales reached $388.5 million, 5 percent ahead of the $370.0 million recorded in 1989. Net income of $13.0 million, which includes the profit from the sale of the Kinnear Division, was below 1989's first quarter net income of $15.5 million. Contributing to the decreased earnings were the higher effective income tax rate and increased expenditures by Tactical Truck Corp., Harsco's joint venture company developing and testing a new series of medium tactical trucks for the U.S. Armed Forces. Earnings per share were $.50 on 26,211,000 average shares outstanding versus the $.59 on 26,412,000 average shares outstanding earned in last year's first quarter.

The Industrial Services and Building Products Group recorded sales of $105.5 million, 2 percent below last year; revenues for Engineered Products were $134.8 million, 3 percent behind last year's first quarter. The revenues in the Defense Group were $148.2 million, a 19 percent increase over 1989's first quarter.

In summarizing Harsco's first quarter and the prospect for each of the company's three operating groups, Gambill observed: "First quarter operating profit of Industrial Services and Building Products was helped by sale of Kinnear, otherwise this group was off to a slow start in both sales and operating profit. We expect this condition to improve as the year progresses, depending upon the state of domestic steel production and stabilization of the price of resin. Engineered Products' sales and profit for the first quarter are ahead of first quarter 1989, considering

that Astro's (sold fourth quarter 1989) sales and profit are in 1989 figures. We expect this trend to continue for the balance of 1990. Sales and profit of Defense for the first quarter are ahead of last year. We expect this trend to continue, and if option 6 of the ACE contract is not exercised, we should show a profit for the year.

"In general backlogs are good. On balance, even if the sixth ACE option is exercised, we expect a considerably better year than last year."

Harsco Corp., a diversified industrial company, conducts its business through 12 divisions and has 20 varied classes of products and services, principally for defense, industrial, commercial, and construction applications.

#90114p6549 04/24/1990 ~PR Newswire

PITTSBURGH (APRIL 24) PR NEWSWIRE - Reporting a sharp upturn in business from the last half of 1989, Allegheny Ludlum (NYSE: ALS) today announced sales of $279,420,000 and earnings of $23,258,000, or $1.04 per share, for the 1990 first quarter ending April 1, 1990.

In the record first quarter of 1989, Allegheny Ludlum turned in an extraordinarily strong performance with sales of $363,923,000 and net income of $34,366,000, or $1.52 per share of common stock.

"Incoming orders continued to improve in the first quarter, exceeding our expectations by a substantial margin," Richard P. Simmons, chairman and chief executive officer of Allegheny Ludlum, said. "Our incoming order rate is now very brisk, reflecting widespread and greater stainless steel demand from service centers and the consumer goods industries. Business from the capital goods sector of the economy continues to be strong. Also, recent orders and indications point toward renewed automotive demand for the 1991 models.

"If this broad domestic market strength continues to develop, along with the anticipated resurgence in our exports, the outlook for the second and third quarters is quite promising," Simmons reported.

In a progress report to shareholders, Simmons said that the new Sendzimir cold rolling mill at the Vandergrift, Pa., plant will go "on stream" in late June, as planned. The $84 million capital investment program, which includes other advanced production equipment and automated handling systems, will improve productivity and quality while expanding finishing capacity by approximately 30 percent.

Allegheny Ludlum is a leading producer of a wide range of specialty materials, including stainless steels, electrical steels and high temperature alloys.

OAKBROOK TERRACE, IL (APRIL 24) PR NEWSWIRE - Telesphere Communications Inc. (AMEX: TSP), a full-service, interexchange carrier and provider of enhanced telecommunications services, today announced the re-introduction of public and private pay phone services as the latest addition to its portfolio of enhanced products and services.

Target customers for this specialized service are premise owners at hotels motels, hospitals, convention centers, universities and airports.

In a 1988 decision, Judge Harold Green enabled premise owners to pre-subscribe their pay phones to the operator service provider and carrier of their choice.

Telesphere chose not to agressively market pay-phone services during the pay phone equal access pre-subscription because of concerns regarding the operational issues related to interfacing with the BOCs and the potential fraud exposure inherent with public pay phones.

Many carriers and agents suffered major operational and economic problems. Over the past year, Telesphere has developed the systems to address these issues and now feels comfortable re- entering the pay phone business.

Nick Jent, senior vice president of communications services, pointed to Telesphere's opportunity. "As a long-time provider of operator services, we feel that pay phones are a natural fit. The market is looking for stability and confidence in the pay phone business, and we intend to lead the way as a full-service provider of quality products. We understand the needs in this business and are responding with service and rates which answer those needs."

Telesphere Communications Inc. operates a nationwide state-of-the- art digital fiber optic network and provides long distance, operator, interactive 900 and other enhanced communications services.

CONTACT: Paul E. Davies of Telesphere Communications, 708-954-7700.

#90114p6555 04/24/1990 ~PR Newswire

IRVINE, CA (APRIL 24) PR NEWSWIRE - Allergan Inc. (NYSE: AGN), one of the world's leading manufacturers of eye and skin care products, today announced operating results for the first quarter of 1990. Separately, Allergan's board of directors declared a cash dividend of $0.07 per share, payable June 15, 1990, to shareholders of record on May 25, 1990. This information was presented at Allergan's annual shareholder meeting held today.

For the three months ended March 31, 1990, Allergan worldwide net sales were $195.1 million, up 9.2 percent over the same period last year. Net earnings for the quarter decreased to $13.6 million, or 5.6 percent less than the pro forma net earnings of $14.4 million for the same period in 1989. Earnings per share on a pro forma basis for the first quarter of 1990 were $0.20. (Allergan Inc., formerly a division of SmithKline

Beckman Corp., became a stand alone public company on July 27, 1989, resulting in a new capital and administrative structure. For this reason, 1989 financial data should be adjusted from an "as reported" basis to a "pro forma" basis to compare meaningfully 1990 with 1989 results.

Commenting on the sales results, Gavin S. Herbert, chairman and chief executive officer, said: "Sales in the pharmaceutical, surgical and international businesses continue strong. Adverse market trends affecting our Optical business are continuing, with sales down slightly by 0.4 percent as compared to the first quarter 1989. These sales were negatively affected, in part, by competitive pricing and product pressures and the ongoing softness in the contact lens market. However, we are pleased with the early market acceptance of our recently introduced and easier to use Oxytab soft contact lens disinfection system."

Herbert concluded: "Allergan continues to maintain a strong balance sheet. Cash flow from operations was positive and we reduced debt by $6 million during the quarter."

To meet the competitive challenge caused by the market's shift to new chemical disinfection systems that are easier to use, Allergan has been developing cold chemical disinfection systems that will be simpler to use and will meet FDA guidelines for efficacy. Our research and development efforts remain focused on this area. Allergan's 1990 objective continues to be to file for U.S. marketing approval of a new disinfectant product and introduce it overseas. Recent results in the research program, however required some changes that now make it more likely that these activities will occur in 1991.

Allergan Inc., based in Irvine, employs more than 6,500 people. A worldwide health care company concentrated in eye and skin care, Allergan supplies prescription and over-the-counter pharmaceuticals, contact lenses and lens care products, intraocular lenses and ophthalmic diagnostic products.

CONTACT: Norris Battin, 714-752-4345 (media) or Jeff D'Eliscu, 714-752-4636 (investors), of Allergan

#90114p6556 04/24/1990 ~PR Newswire

FORT WASHINGTON, PA (APRIL 24) PR NEWSWIRE - Rorer Group Inc., (NYSE: ROR) a Fortune 500 worldwide pharmaceutical manufacturer, today reported that sales for the first three months of 1990 rose 15 percent to $277.7 million, from $241.2 million one year ago.

As a result of transaction-related charges, Rorer reported a net loss of $7.7 million for the quarter ended March 31, 1990, compared with net

income of $9.8 million for the same period in 1989. Earnings per share showed a loss of 23 cents per share, compared with a profit of 31 cents per share in the first quarter of 1989. Foreign currency exchange had a nominal effect on sales and earnings in the first quarter of 1990.

Results for the quarter reflect one-time transaction-related costs totalling $26.9 million; $11.9 million in connection with the pending combination of the worldwide human pharmaceutical business of Rhone-Poulenc S.A. with Rorer; and $15 million associated with Rorer's marketing alliance for consumer pharmaceuticals with The Procter & Gamble Co.

Were transaction-related expenses not recorded and assuming Rorer's currently projected full-year tax rate, net income would have been $11.1 million or 29 cents per share, and income before taxes would have been $15.8 million, or 7 percent higher than in the first quarter of 1989. Earnings per share results are being reduced in 1990 by a substantial increase in shares outstanding due to conversions of convertible debentures.

Rorer's chairman, president and chief executive officer, Robert E. Cawthorn, said, "We incurred one-time legal, consulting and other costs associated with our transaction with Rhone-Poulenc which we expect to complete by early summer. These costs were anticipated and are a portion of the previously disclosed one-time costs for this transaction which are expected to total $218 million in 1990.

"The benefits during the next 12 months of the Procter & Gamble alliance are expected to more than offset our consumer pharmaceutical restructuring costs. In the long term, this alliance guarantees us a better level of operating profit plus an opportunity to benefit from the upside.

"Finally, our strong sales increase in this quarter shows that our people around the world haven't let merger activity distract them from reaching our aggressive sales targets," Cawthorn said.

Rorer's first quarter sales increase was led by its international operations performance. In Italy, sales more than doubled due to excellent acceptance of an intranasal dosage form of calcitonin launched in mid 1989.

Rorer is a worldwide research-based pharmaceutical manufacturer based in Fort Washington, Pa. Its research and marketing activities are focused on five therapeutic areas: cardiovascular, gastroenterology, bone metabolism, hypersensitivity and plasma-related products. Rorer's 1989 worldwide sales were $1.2 billion.

DALLAS (APRIL 24) PR NEWSWIRE - With the launching of Pool Energy Services Co. (NASDAQ: PESC) as a publicly held entity, ENSERCH Corporation (NYSE: ENS) has concluded the sale of its previously discontinued oil field services segment. At the closing today, Pool Energy Services issued 11.5 million shares of common stock, including 1.0 million shares from the exercise by the underwriters of their overallotment option, in a public offering at $10.25 per share.

ENSERCH purchased an additional 2.0 million shares in a private sale at the same price. In connection with the transfer of ENSERCH's oil field services to Pool Energy Services, ENSERCH received proceeds fro the 10.5-million- share public sale and the 2.0-million-share private sale plus $4 million from the exercise of the 1.0-million-share underwriters' overallotment option.

ENSERCH will distribute the 2.0 million shares of Pool on a pro rata basis to its shareholders as a special dividend later in the year.

Net proceeds to ENSERCH are being used to reduce fixed-income obligations, primarily lease obligations and commercial paper. ENSERCH will record an after-tax gain on the transaction of some $9 million, or $.14 per share.

ENSERCH is a diversified energy, engineering and construction company.

#90114p6561 04/24/1990 ~PR Newswire
JEFFERSON CITY, MO (APRIL 24) PR NEWSWIRE - The Missouri Insurance Department yesterday granted Torchmark Corporation (NYSE: TMK) a limited exemption from filing a formal change of control application with regard to its proxy soliciting campaign for five seats on the American General board and for a non-binding resolution to sell American General.

An American General spokesman called the Missouri exemption "sharply limited -- an example of the kind of difficult decision presented to a regulator where a state's insurance law is either silent or ambiguous on the type of pressure campaign Torchmark is employing. Our legal counsel advises that the Missouri exemption is unlikely to be widely imitated."

In an April 23 letter to lawyers for both companies, Lewis E. Melahn, director of the state's Division of Insurance, noting that the Missouri

statute is somewhat more narrowly drafted than those in some other jurisdictions, said Torchmark's proxy materials filed earlier this month with the Securities and Exchange Commission would be exempt from the filing requirements regarding change of control in Missouri.

Furthermore, "any deviation by Torchmark from its stated intentions in the proxy statements of April 9, 1990, and April 13, 1990, is visualized by this division as being outside the boundaries of the (exemption) order," Melahn wrote in the letter.

The regulator noted several differences between Missouri's insurance law and those of other states that complicated his decision. He termed "perplexing" the twin issues of determining just how strong a presumption of control a proxy contest involves under Missouri's law and how that presumption can be dealt with.

Meanwhile, a hearing is set for Thursday morning in Tennessee with respect to Torchmark's attempting to effectuate an acquisition of control of American General without obtaining regulatory approval, and the state of Texas and New York have advised Torchmark that their acquisition of proxies in excess of 10 percent or more of the voting securities of American General will be in violation of state law.

American General is an insurance and financial services organization with assets of $32 billion and total equity of $4.4 billion. Headquartered in Houston, the company has subsidiaries that operate in 50 states and Canada. The company groups its operating subsidiaries into three business segments: Insurance-Home Service; Insurance-Special Markets; and Finance/Real Estate. American General common stock is listed on the New York, Pacific, London, and Swiss stock exchanges.

#90114p6574 04/24/1990 ~PR Newswire

CHICAGO (APRIL 24) PR NEWSWIRE - Centel Corp. (NYSE: CNT) announced today that it has entered into two revolving credit agreements totalling $385 million. Also entering into the agreement are Centel Capital Corp., a funding subsidiary for Centel's non-regulated businesses, and Central Telephone Co., Centel's local exchange telephone operation.

Centel entered into a three-year, $285 million agreement with nine U.S. banks. Harris Trust and Savings Bank of Chicago and Morgan Guaranty Trust Company of New York will serve as co-agents.

The other credit agreement is a four-year, $100 million arrangement with six international banks. Swiss Bank Corp. is the agent.

These new arrangements replace two existing credit agreements that totaled $190 million. Centel said the purpose of the new credit agreements is to back commercial paper and for general corporate purposes, which will provide financial flexibility for the future growth of the company's cellular communications and local telephone operations.

Chicago-based Centel Corp., which had 1989 revenues of $1.19 billion, provides local exchange telephone service through nearly 1.6 million access lines; operates cellular communications franchises in 44 markets, and supplies electric power to nearly 136,000 customers in Kansas and Colorado.

#90114p6575 04/24/1990 ~PR Newswire

BETHLEHEM, PA (APRIL 24) PR NEWSWIRE - Bethlehem had net income of $21 million for the first quarter of 1990 compared to net income of $65 million for the first quarter of 1989. This decline in net income was due to a continuation of the slowdown in steel markets which began in the second half of 1989 and to higher operating costs. 1989 results included a $55 million unusual charge principally for restructuring and downsizing the operations of the Baltimore Marine Division.

Basic Steel Operations: This segment had income from operations of $29 million for the first quarter of 1990 compared to $137 million for the first quarter of 1989. Steel shipments were approximately 19 percent lower in the first quarter of 1990 than in the year earlier period, and its raw steel production declined to 70 percent of capability from 82 percent in the same periods. Steel demand was particularly strong in early 1989, and the lower shipments in the first quarter of 1990 resulted from weaker demand, primarily from the construction and automotive markets reduced shipments of semifinished steel to other steel producers, and competitive pressures in the structural products market.

Results for the first quarter of 1990 were also adversely affected by a decline in realized steel prices in several product lines and by higher operating costs. The higher costs were attributable, in part, to planned outages of its large blast furnace for relining and of the hot strip mill as part of its modernization project at the Sparrows Point plant. The blast furnace reline began on March 16th and is expected to take about 100 days. Additional outages for the hot strip mill modernization are currently planned for the third quarter of 1990 and the first quarter of 1991.

NORTHBROOK, IL (APRIL 24) PR NEWSWIRE - IMCERA has been chosen as the new name for International Minerals & Chemical Corporation (NYSE: IGL) (IMC), Chairman and Chief Executive Officer George D. Kennedy announced here today.

"'International Minerals & Chemical Corporation' no longer describes what we do," Kennedy said. "We've changed from a commodity chemical producer to a builder of technology businesses in human and animal health care and specialty chemicals.

IMCERA is cast in a bold and modern typeface and is followed by a striking yellow logo which suggests growth.

The company's present name has been in effect since Dec. 1, 1941, and, prior to that, had been International Agricultural Corporation since its founding in 1909 as a New York corporation. IMC has been headquartered in the Chicago area since 1942.

IMC acquired Mallinckrodt, Inc., in 1986, and, later that year, sold its industrial products and gas and oil businesses. Two years later, the company sold a majority of its interest in the fertilizer business to the public as IMC Fertilizer Group, Inc., and currently retains only 38 percent of the latter's common stock.

More than $1.5 billion in cash was generated from these transactions which was used to invest in new product development, manufacturing expansion, strategic acquisitions, and the repurchase of IMC common stock.

IMC's three businesses -- Mallinckrodt Medical, Mallinckrodt Specialty Chemicals and Pitman-Moore -- are estimated to have combined net sales in fiscal 1990 ending June 30, of $1.4 billion.

Mallinckrodt Medical, with estimated 1990 net sales of $390 million, is a major supplier of products for radiology, cardiology anesthesiology, nuclear medicine and critical care. Its products are sold in over 100 countries and are used by more than 7,000 United States health care facilities.

Mallinckrodt Specialty Chemicals, with estimated 1990 net sales of $440 million, is an international manufacturer of drug and cosmetic chemicals, catalyst and performance chemicals, science products and flavors.

Pitman-Moore, with estimated 1990 net sales of $560 million, is one of the world's leading animal health and nutrition companies, manufacturing a broad line of products for livestock, poultry and companion animals.

#90114p6591 04/24/1990 ~PR Newswire

CHICAGO, (APRIL 24) PR NEWSWIRE - The Quaker Oats Company (NYSE: OAT) today reported earnings per share from continuing operations of 77 cents for the third quarter of fiscal 1990 ended March 31, 1990, compared to 69 cents a year ago. Fiscal 1989 results included a non-recurring pre- tax charge of $20.7 million, or 20 cents per share, relating to a planned consolidation of European pet food operations. Not included in these results from continuing operations is the Fisher-Price division, which has been classified as a discontinued operation, following the company's announcement today that Quaker's board has approved in principle the tax-free spinoff of Fisher-Price as a freestanding company.

Consolidated operating income from continuing operations in the quarter was $151.5 million compared to $114.1 million achieved last year. Net income including discontinued operations was $25.6 million compared to $64.1 million a year ago. Consolidated sales from continuing operations of $1.27 billion were 5 percent above the $1.21 billion last year.

For the first nine months of fiscal 1990, earnings per share from continuing operations were $1.62 compared to $1.36 last year. Nine- month operating income from continuing operations was $343.7 million versus $257.5 million a year ago. Nine-month sales from continuing operations of $3.62 billion were 3 percent above the $3.52 billion last year.

William D. Smithburg, chairman and chief executive officer, said, "The

decision announced today to move toward a spinoff of Fisher Price as a freestanding company clearly demonstrates Quaker's strategy of concentrating on our core grocery businesses. The financial results show that overall, our grocery products businesses are performing well, and we continue to expect fiscal 1990 operating income for worldwide grocery products to be up for the year."

MELVILLE, NY (APRIL 24) PR NEWSWIRE - For the quarter ending March 31, 1990, The Allen Group Inc. (NYSE: ALN) today reported earnings from continuing operations of $.28 per common share. This represents a 56 percent increase as compared to earnings from continuing operations of $.18 per common share for the same period last year. Revenues of $93,514,000 in the first quarter of 1990 increased 5 percent from the $88,880,000 recorded in the first quarter of 1989.

Commenting on the results of the first quarter, Philip Wm. Colburn, chairman and chief executive officer, stated: "The strength in earnings was largely attributable to incremental sales of emission test equipment in Texas and California as well as strong demand for cellular products from our Antenna Specialists division. These increased earnings were achieved despite a continuing weakness in those operating units that sell directly to the automotive and truck manufacturers.

"Earnings per common share from continuing operations for the year 1989 were the second best in our history. We believe that our results in 1990 will set new records."

The Allen Group Inc. is a manufacturer and marketer of automotive products including automotive test equipment, automated manufacturing equipment, truck components, and mobile communications antennas and accessories.

(A) -- On Feb. 16, 1989, the company sold its Specialty Rubber Products business resulting in this gain.

(B) -- The Federal District Court in San Francisco issued a final judgment on Jan. 19, 1990, that certain heavy duty truck radiators manufactured by the G&O Manufacturing Company division of the company willfully infringed a patent held by Modine Manufacturing Company and awarded Modine approximately $17.2 million in damages including prejudgment interest. The company is appealing this decision to the Federal Circuit Court in Washington. The company has determined that it is not possible, at this time, to estimate the amount of damages, if any, that may ultimately be incurred; accordingly, no provision has been made in its consolidated financial statements with respect to this contingent liability.

GLENWOOD, IL (APRIL 24) PR NEWSWIRE - Tech/Ops Landauer Inc. (AMEX: TO) today reported that, while revenues and operating income from the company's traditional radiation dosimetry business continued to increase in the quarter, there was a continuation of the year-to-date decline in radon gas testing services. As a result, net income of $1,742,000 or $.41 per share for the second quarter ended March 31, 1990, while an all-time record, was only 2 percent higher than the $1,708,000, or $.40, reported for the same quarter of the previous year.

The company, a recognized leader in radiation monitoring and radon detection services, had revenues for this year's second quarter of $6,290,000, compared to $6,329,000 recorded in last year's second quarter.

For the six months year-to-date, Tech/Ops Landauer reported net income of $3,180,000 or $.75 per share, compared to $3,339,000, or $.79 per share,

for the first half of the previous fiscal year. Revenues in 1990 were $12,021,000 compared to $14,429,000 in the year-earlier period.

KENILWORTH, NJ (APRIL 24) PR NEWSWIRE - The board of directors of Schering-Plough Corporation (NYSE: SGP) today declared a 2-for-1 stock split and increased the company's regular quarterly dividend by 24 percent from 45 to 56 cents, on the pre-split common shares.

Robert P. Luciano, chairman and chief executive officer, 1/2said the stock split and dividend increase reflect the company's financial strength following several consecutive years of outstanding earnings growth and good business performance.

Distribution of the additional shares will be made on May 30, 1990, to shareholders of record at the close of business on May 4, 1990. Payment of the increased dividend will be made on May 21, 1990, to shareholders of record at the close of business on May 4, 1990.

The last stock split was declared April 28, 1987, when the board approved a 2-for-1 stock split. The regular quarterly dividend was last increased April 25, 1989, when it went from 40 cents to 45 cents.

As of March 31, 1990, there were approximately 113,255,000 common shares outstanding.

#90114p6612 04/24/1990 ~PR Newswire

NEW YORK, NY (APRIL 24) PR NEWSWIRE - Equitable Resources president Donald I. Moritz told security analysts in New York today that 1990 earnings should exceed 1989's $2.24 per share.

He based his forecast on higher levels of natural gas, oil and liquids production; continued gains in sales of gas and services by the company's interstate pipeline subsidiary; and the strengthening economy of its retail distribution area.

Moritz said that first quarter earnings should be down only about 10 percent from the 1989 results even though weather in the company's service area was 24 percent warmer than normal, which he termed a once in 150-year occurrence. He noted that the effects of the weather on the company's natural gas heating sales were largely offset by the growth of its interstate natural gas sales and higher prices for increased gas and oil production.

Moritz predicted that the company's production revenues would rise from $120 million in 1989 to $144 million in 1990 and $159 in 1991 based on projected increases in wellhead sales and prices. Gas production is expected to rise by 2.8 and 2 billion cubic feet in 1990 and 1991 respectively; oil by 220,000 and 200,000 barrels; and natural gas liquids by 22 million and 2.3 million gallons over the two-year period.

Contributing to the higher production will be the company's largest ever drilling program of 260 net wells in 1990, principally in the Appalachian region. The program includes approximately 150 net wells in Kentucky, a level the company plans to sustain or even exceed into the foreseeable future.

Company officials said that initial flows from Equitable's new Gulf of Mexico offshore drilling venture would have their first impact in 1991. They announced that of the four wells drilled to date, the venture had made two discoveries -- at Galveston Block 313 and High Island, Block A-523. Equitable has a 12-1/2 percent interest in the two fields, which will require further evaluation to determine their reserve potential.

They also predicted that throughput on the company's pipeline and distribution system would be 7.2 billion cubic feet higher in 1991 than 1989, continuing the growth of recent years. Since 1987, throughput -- the combination of gas sales and transportation service -- has risen some 23 billion cubic feet, or 30 percent.

CLEVELAND, (APRIL 24) PR NEWSWIRE - NACCO Industries, Inc. (NYSE: NC) today announced net income for the first quarter of 1990 of $12.7 million, or $1.43 per share, compared with net income of $7.9 million or $0.89 per share, reported in the same period last year. Earnings in the first quarter of 1990 included a non-recurring charge to income of $0.11 per share due to a write-down of Hyster-Yale's Brazilian manufacturing operation. Revenues for the quarter were $328.2 million, which is significantly higher than the $150.8 million reported for the first quarter of 1989.

Ward Smith, chairman and chief executive officer, said, "The sharp increase in revenues and earnings was due to the inclusion of Hyster Company, which was acquired in May of last year." He further stated, "The earnings also reflect favorable business conditions at Hyster-Yale during the quarter."

NACCO Industries is a holding company that has three major operating subsidiaries. Hyster-Yale Materials Handling, Inc. designs, manufactures and markets forklift trucks and related service parts under the Hyster and Yale trade names. Proctor-Silex, Inc. is a leading manufacturer of toasters, irons, coffeemakers and other small electric appliances. The North American Coal Corporation mines and markets lignite coal for use primarily as fuel in power generation by electric utilities.

#90114p6636 04/24/1990 ~PR Newswire

HOUSTON (APRIL 24) PR NEWSWIRE - Battle Mountain Gold Co. (NYSE: BMG) today reported first quarter net income of $7 million, or 10 cents per share, down 35 percent from $10.8 million, or 16 cents per share in the first quarter of last year.

Net sales for the 1990 first period were $30.7 million, down 12 percent from $35 million in the first quarter of 1989.

The company's net profit margin for the 1990 first quarter was 23 percent.

BMG Chairman Douglas J. Bourne said earnings per share for the period declined primarily because of higher provisions for unproven lease abandonments; slightly higher G&A costs associated with increased corporate activity and acquisitions; a reduction in gold sales volumes; and the dilutive effect of the company's recent common stock and convertible debenture offerings (based on 65.6 million average shares in the first quarter of 1989 versus 72.3 million average shares in the first period of 1990).

Bourne also noted that the net sales figures reflect a decline of approximately 10,000 ounces in gold sales volumes resulting from timing differences in product shipments. Net sales for the 1990 first period do not reflect 3,000 ounces of gold sales representing the company's 33.33 percent share of sales by Inti Raymi, which has been accounted for as an equity investment.

As previously reported, the company's interest in Inti Raymi has been increased to 51 percent, and Inti Raymi's results of operations will be

reported on a consolidated basis in the future.

Net gold production volumes remained steady, compared with first quarter of 1989, and the company expects to sell 340,000 ounces of gold in 1990, as forecast, Bourne said. This compares with 331,000 ounces of gold sales in 1989.

Battle Mountain Gold common stock trades on the New York Exchange, the Australian Stock Exchange Limited, the Frankfurt Stock Exchange, the Swiss Stock Exchanges and the Toronto Stock Exchange, under the symbol BMG.

BENTON HARBOR, MI (APRIL 24) PR NEWSWIRE - At the Whirlpool Corporation (NYSE: WHR) annual meeting held today in Chicago, the stockholders elected four directors and failed to adopt a confidential voting proposal suggested by a shareholder.

Directors elected to the board for three-year terms to expire in 1993 were Douglas D. Danforth, retired chairman and chief executive officer of Westinghouse Electric Corporation; Miles L. Marsh, president and chief operating officer of Whitman Corporation; James R. Samartini, executive vice president and chief financial officer of Whirlpool Corporation; and Paul G. Stern, vice chairman, president and chief executive officer of Northern Telecom Limited. Danforth and Samartini had previously been elected to the board. Marsh and Stern are new board members. Charles D. Putnam, who has announced plans to retire from Whirlpool Corporation

effective May 1, 1990, and Bert E. Phillips and Jack B. St. Clair, who have reached the board's mandatory retirement age, did not stand for re-election.

Marsh, a native of South Africa, holds bachelor's and master's degrees from the University of Cape Town and a doctorate from Northwestern University. He was with McKinsey and Company for five years before becoming vice president and chief financial officer for the Consumer Products Group of Dart and Kraft in 1981. He was subsequently elected executive vice president and chief financial officer of Kraft, Inc. in 1984; president of Kraft International in 1985; president of the Operations and Technology Group in 1988 and president of General Foods USA in 1989. In late 1989, Marsh assumed his current position as president and chief operating officer of Whitman Corporation, a company involved in food and grocery products, soft drinks, automotive exhaust systems, suspension systems and brake services, and refrigeration and foodservice equipment.

The Whirlpool Corporation board of directors is presently composed of 12 directors, divided into three classes of four each. One class is elected each year for a three-year term.

Stockholders also failed to approve a proposal offered by several institutional investors to amend the company's by-laws to require confidentiality and independent third party tabulation in all stockholder votes.

Whirlpool Corporation is the world's leading manufacturer and marketer of major home appliances. Headquartered in Benton Harbor, Mich., the company manufactures in 10 countries and markets products under nine major brand names in more than 45 countries.

#90114p6652 04/24/1990 ~PR Newswire

SAN FRANCISCO (APRIL 24) PR NEWSWIRE - Chevron Corporation (NYSE: CHV) today reported first quarter earnings of $473 million, an increase of 51 percent from the $313 million earned in the first quarter of 1989.

Earnings per share increased 46 percent to $1.33 from $.91. Total revenues were $9.3 billion for the quarter, compared with $7.7 billion a year ago. The net effect of special items was not material to first quarter 1990 earnings. No special items were reported in the prior year's quarter.

''Our results for the quarter were enhanced by increased worldwide production of crude oil and natural gas. In addition, higher prices for these commodities contributed significantly to the earnings improvement,'' said Board Chairman and CEO Ken Derr. ''We were able to produce natural gas at record levels, reflecting in part the development of Gulf of Mexico properties purchased from Tenneco in 1988.

''Along with higher product prices, downstream earnings also benefited from increased refinery runs and higher sales volumes,'' Derr continued.

Crude oil and natural gas prices reached four-year highs in January before falling later in the quarter and into April. Chevron's posted price for West Texas Intermediate, an industry benchmark crude, peaked briefly in January at $22.50 per barrel but has retreated to a current level of $16.50. Gulf Coast natural gas spot prices peaked at about $2.35 per MCF but ended the quarter at about $1.40.

Derr noted that the operating outlook for the second quarter remains uncertain, as volatility in the price for crude oil continues. He also said that the company is in the process of finalizing several asset sales, which should result in the recognition of significant net gains over the balance of the year. These sales relate primarily to the company's continuing program to dispose of marginal producing properties and other underperforming assets.

U.S. exploration and production operations earned $155 million in the first quarter, compared with $70 million in the 1989 period. Average crude oil prices were up about $3.50 per barrel to over $18.50. Liquids production declined about 3 percent as a result of normal field declines. Average natural gas prices were up 15 percent to just over $1.90 per MCF.

Production improved 13 percent over the 1989 first quarter, reflecting increased demand resulting from the early winter cold spell in the eastern United States. Results for the 1990 quarter included charges for organizational restructuring and a prior year's tax adjustment. The restructuring, announced in February, is expected to result in the elimination of about 10 percent of employee positions in these operations by year-end. Over the next two years the company expects to sell $700 million worth of marginal producing properties, accounting for about 9 percent of domestic reserves.

U.S. refining and marketing operations earned $59 million, up from $7 million in the 1989 quarter. Most of the first quarter earnings were realized in January, when product prices, especially for jet and heating fuels, increased faster than crude oil acquisition costs. Average product sales prices advanced about 17 percent from the 1989 quarter, and sales volumes were up almost 6 percent. Both refinery input and capacity utilization improved over last year's first quarter.

Non-U.S. petroleum operations earned $200 million, compared with the prior period's $159 million. Exploration and production earnings improved on higher crude oil prices but were adversely affected by foreign exchange losses. Liquids production was up 3 percent, as increases in Indonesia and Australia more than offset declines in Canada and the U.K. The increase in Australia was from new production that began last November in the Saladin field. Natural gas production increased 33 percent, reflecting higher production in Canada and output that began in mid-1989 from Australia's North West Shelf project. Refining and marketing earnings benefited from higher sales margins and favorable foreign exchange effects.

Chemicals operations earned $123 million, compared with $131 million in last year's first quarter. Current results include some one-time benefits from product licensing agreements, which stem from the continuing program to restructure the company's agricultural chemicals operations. Earnings otherwise declined on sharply lower prices for aromatics and olefins commodity chemicals.

Foreign exchange losses were $15 million for the quarter, versus gains of $22 million for the 1989 period.

Worldwide capital and exploratory expenditures, including the company's share of affiliates' expenditures, were $807 million in the quarter, down

slightly from the $833 million in the first quarter of 1989.

LOS ANGELES (APRIL 24) PR NEWSWIRE - Bell Industries Inc. (NYSE: BI) today reported net earnings for the third fiscal quarter doubled over the year-earlier period on comparable sales. Improved profit margins reflect Bell's continuing economies and operating efficiences realized from a recently completed corporate restructuring.

Net income for the third quarter ended March 31, 1990, was $1,800,000, or 31 cents per share, compared with $897,000, or 15 cents per share, in the year-earlier period. Sales were $97,201,000 compared with $100,810,000 a year ago.

For the nine months ended March 31, 1990, net income rose 73 percent to $5,333,000, or 91 cents per share, from $3,089,000, or 50 cents per share, in the corresponding prior year period. Sales for the period were $292,907,000 vs. $312,527,000 in the same period last year.

President Theodore Williams noted that, in addition to doubling net income from the prior year period, current third quarter earnings advanced 31 percent over the preceding quarter on the slighty higher sales.

"We continue to see significant benefits from the restructuring, including increased pricing discipline, greater inventory control and lower overhead expenses due to our consolidation of facilities," Williams said.

He added that these benefits were being realized in Bell's largest business segments, the Electronics and Building Products Groups. The Electronics Group, the majority of which comprises electronics distribution activities, achieved a 40 percent improvement in operating earning compared with the fiscal 1989 third quarter and a 52 percent gain over the second quarter of fiscal 1990. The Building Products Group posted a significant improvement over the same period last year, more than tripling operating earnings on comparable sales. These gains more than offset quarterly declines reported by Bell's other smaller operations.

Bell's financial position remained strong. At March 31, 1990, working capital was $86.0 million; the current ratio was 2.6:1; and shareholders' equity was $92.5 million, equal to $15.96 per share. A special $2.00 per share cash dividend was paid March 30, 1990, representing the first of two annual special dividend payments. The second payment will be made in January 1991.

Bell Industries Inc. distributes and manufactures products for the electronics, computer, building and other markets.

DETROIT (APRIL 24) PR NEWSWIRE - Great Lakes Gas Transmission Company has successfully completed the private placement of $125 million of Senior Notes. The Notes, which carry a total coupon rate of 9.81 percent, are due April 15, 2005. They have an average life of 10.25 years and were placed at 125 basis points over 10-year Treasury Bills.

Great Lakes utilized Goldman, Sachs & Co.; Shea, Paschall & Powell, Inc.; and National Bank of Detroit as its agents in placing the notes.

John K. Archambault, president and chief executive officer of Great Lakes, said proceeds from the offering will be used to refinance existing short-term debt incurred in connection with pipeline expansion projects.

These projects will increase Great Lakes' firm capacity by 142.5 million cubic feet per day to provide additional transportation service to TransCanada PipeLines Limited, Midland Cogeneration Venture and POCO Petroleums Ltd.

The expansion projects involve installation of 177 miles of 36-inch-diameter pipe parallel to the existing pipeline. The projects are nearly complete, and Great Lakes anticipates that the facilities will be in service at the end of April 1990 at an estimated cost of $190 million.

Great Lakes Gas Transmission Company is a Detroit-based natural gas pipeline company that transports Canadian natural gas through a 1,300-mile pipeline for delivery to customers in the United States and eastern Canada. It is co-owned by The Coastal Corporation (NYSE: CGP), a Houston-based energy holding company, and TransCanada PipeLines Limited of Toronto, Canada.

PALO ALTO, CA. (APRIL 24) PR NEWSWIRE - The Board of Directors of Syntex Corp. (NYSE: SYN) today approved a 6.7 percent increase in the cash

dividend on the corporation's common stock.

The quarterly cash dividend will be increased to 40 cents per common share from 37-1/2 cents, payable June 11, 1990, to shareholders of record at the close of business May 18, 1990.

This is the 98th consecutive quarterly dividend Syntex has paid on its common stock and the 10th increase in the dividend amount in the past nine years.

"We are pleased to be able to share the rewards of our past performance with our shareholders by increasing the regular quarterly cash dividend," said Paul Freiman, president and chief executive officer. "We appreciate the support of our shareholders and we remain committed to sharing our profitable growth with them."

CLEVELAND, (APRIL 24) PR NEWSWIRE - Laidlaw Environmental Services, Inc., working with the Cleveland Public Schools, is in the process of removing chemicals at Margaret Spellacy Intermediate School, 655 East 162nd St.

Chemicals were inventoried on April 20 and are being packed up by the lab pack team from the Laurel, Maryland facility of Laidlaw Environmental Services, Inc. The team will consolidate the chemicals into lab pack containers for shipment to the final disposal sites.

Laidlaw Public Relations Director Tom Smith says, "The services extended by Laidlaw Environmental Services over the past several days were done to demonstrate our interest in solving the problems at Margaret Spellacy Intermediate School, and for the children, and the families of those children, who would like to return to complete their school year. We hope inpart our effort will help expedite their return."

Previously, Laidlaw Environmental Services, Inc. sponsored the Science Screen Report for the 1989-90 school year, a series of eight video programs focusing on the latest developments in science, technology, medicine, engineering, energy and the environment for Cleveland Public Schools students.

NEW YORK, (APRIL 24) PR NEWSWIRE - Mobil Corporation (NYSE: MOB) today reported estimated earnings for the first quarter of 1990 of $400 million. This was $29 million, or 7 percent, lower than the $429 million earned in the first quarter of 1989. Estimated earnings per common share were $.94, compared with the $1.04 earned in the first quarter of 1989.
First-quarter 1990 revenues were $14.9 billion, versus $14.0 billion for the same period last year.

In commenting on the first-quarter results, Chairman Allen E. Murray noted that petroleum operations results were 16 percent higher than the comparable year-earlier period primarily due to higher crude oil and gas prices in exploration and producing. As expected, chemical reported sharply lower earnings in the quarter, reflecting the worldwide fall-off in petrochemical prices from the record levels achieved in the first quarter of 1989. The quarter also benefited from lower financing costs mainly resulting from the redemption of the remaining Superior acquisition high-coupon debt in the second half of 1989.

-- COMPARISON OF FIRST-QUARTER EARNINGS WITH 1989 Addressing the performance of each of the major business segments during the first quarter, Murray made the following points:

-- Exploration and producing earnings of $369 million were $81 million higher than in the first quarter of 1989.

In the United States, income was $97 million, compared with $54 million in the year-earlier quarter. The improvement mainly reflected higher crude oil and natural gas prices, up 25 percent and 8 percent, respectively, from those that prevailed last year. Lower production reflected the ongoing sale of less attractive properties and reduced gas demand due to unseasonably warm weather.

International income of $272 million was $38 million higher than in the comparable 1989 period. Improved prices for crude oil (up 20 percent) and gas (up 16 percent) accounted for the higher earnings. Production volumes were essentially the same as the prior year quarter, on a barrel of oil equivalent basis.

-- Marketing and refining earnings of $92 million were $17 million lower than in the first quarter of 1989.

In the United States, income of $39 million was down $30 million from the $69 million earned in the first quarter of 1989. Product prices have not reached levels sufficient to recover the increase from first-quarter 1989 levels in crude and other hydrocarbon acquisition prices, the impact of inflation on expenses, and higher environmental costs. Autogasoline sales

to trade volumes were down 4 percent, reflecting the company's strategic restructuring involving the BP exchange of marketing assets last year.

International earnings of $53 million were up $13 million from the $40 million reported in the comparable period last year. Earnings were higher in Europe and the Pacific Rim countries (except Japan), reflecting higher gross margins and improved refining operations. Results in Japan continue to be disappointing because of intense competition following gasoline production decontrol in April 1989. International's first quarter of 1990 was negatively affected by a prior-period tax charge of $28 million.

-- Chemical earnings were $83 million in the first quarter versus the record $180 million in the comparable period last year. Worldwide petrochemical prices generally peaked in the first quarter of 1989. The downward trend continued into the first quarter of 1990, although prices for some products have recently firmed. In the other segments of Mobil's chemical business, improved earnings were achieved through higher volumes and stable margins.

-- Corporate and other reported net expense of $28 million, versus $21 million in the first quarter of 1989. Effective with first-quarter 1990 reporting, Mobil's operating divisions now include certain expenses formerly in the corporate departments. For comparative purposes, prior year data have been restated.

-- Net financing expense was $116 million, an improvement of $11 million from the $127 million reported in the prior-year period. Lower net borrowing balances and the redemption of the remaining Superior acquisition high-coupon debt in the second half of 1989 accounted for the improvement.

Mobil's estimated return on average shareholders' equity for the 12 months ended March 31, 1990, was 11.2 percent, compared with 11.3 percent for the calendar year 1989. Return on average capital employed was 10.0 percent during the 12 months ended March 31, 1990, the same as calendar year 1989.

Worldwide capital and exploration expenditures were estimated at $737 million, an increase of $60 million from the first quarter of 1989.
